I am interested in the stars and watch the sky at night frequently. I feel I can distinguish between an airplane, a star, and an object such as this. I have observed objects similar to this one before but did not report them as I was alone and did not wish to be told I was hallucinating. I am positive of what I saw on these occasions.

Day	Month	Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The light followed the same flight path the entire time it was observed. After it disappeared from my line of vision, it would reappear in 3 to 10 minutes and follow the same course. At one point, it appeared as two white lights which fused into one large ball of light that stood still. After a few seconds, it rose straight in the air and resumed its south-westerly course.
