35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

When I first sighted the object I was in bed and looking through window glass. I glanced at clock with luminous dial noting time to be 10:30 P.M. To make sure that it was a reflection off the glass I ~~went~~ ^{went} outside and observed object. There was an absence of sound from object. There were red and green lights flashing on object, and they were constantly shifting positions. There was a halo about the object that flashed on and off irregularly. Upon flashing on the halo stayed on for about 2 to 3 seconds outlining and showing metal skin of object distinctly.

Being an amateur astronomer I have observed air craft, planetary movements, satellites, and meteors ~~and~~ under all conditions and none have borne any resemblance to this object.
