Dear Sirs,

On Monday, February 27 at 7:55 AM. Eastern Standard time, I was on the way to school and noticed something outside the window to the right of the bus. It was brightly illuminated and the size of a quarter at arm's length on a 45 degree tilt facing me. It appeared to be hovering just above a group of trees. I constantly tried moving my head in all directions as to eliminate this reflection if the window was either scratched or cracked. This thing was still there after my continuous efforts had failed. The total amount of time this sighting took was approximately 45 seconds. This object's color was a polished aluminum color. I have deduced that it was not a reflection for the sun was on the left and to the rear.

I have grown accustomed to looking out the window because I have read 3 U.F.O. books.

I would very thoroughly appreciate an immediate reply.

Sincerely,

Send 164
