

PROJECT 10073 RECORD

1. DATE - TIME GROUP 8 Mar 67 9/0205Z	2. LOCATION Holland, Missouri one
3. SOURCE Civilian	10. CONCLUSION Aircraft(possible) ✓ <i>gld</i>
4. NUMBER OF OBJECTS three lights	
5. LENGTH OF OBSERVATION 20 minutes	11. BRIEF SUMMARY AND ANALYSIS
6. TYPE OF OBSERVATION Ground Visual (Auto)	Observer watched a triangle shaped object larger than an airplane at $\frac{1}{2}$ miles, travel and appear to land in the south. Three object were seen according to the observer, two with a blinking red light and three or four white lights. The object appeared to land south of the observers position. Object observed again after initial report to the local air base.
7. COURSE south	
8. PHOTOS ☐ Yes XX No	The most probable cause of the sighting is a KC-135 aircraft which was in the area making simulated instrument approach landings. Observations of both B-52 and KC-135 aircraft during approach and landing have caused many UFO sightings around the Blytheville AFB area.
9. PHYSICAL EVIDENCE ☐ Yes XX No

PHOTO ANALYSIS REPORT

NR 67-26

PAGE 1 OF 1 PAGES

DATE OF REPORT 20 April 1967

SUBJECT UNIDENTIFIED FLYING OBJECT

LOCATION HOLLAND, MISSOURI

DATE 10 March 1967

PHOTOGRAPHY

AF _____ IR _____ QUALITY Poor

P NRS One roll 8 mm motion picture film (color)

1. PURPOSE: This report is in response to Work Order Number 67-41, submitted by Major H. Quintanilla, requesting an analysis of a roll of 8 mm motion picture film which allegedly contains photography of an unidentified flying object.
2. ANALYSIS: The entire roll of film was scanned and was found to be blank with the exception of approximately 11 feet. Within this footage are two small, roughly circular bright spot images. A detailed photographic analysis of these images is not possible due to the lack of camera data, specifically focal length and range to the subject.
3. An examination of the film by a photo processing specialist reveals several similar circular bright spot images occurring outside of the normal frame area. On the entire roll of film there is no evidence of the frame lines which would be expected on a normally exposed 8 mm motion picture film. This raises the possibility that the film was not exposed or was run through a camera where the light path from the lens to the film was obstructed.
4. Further analysis could possibly be accomplished if more data was furnished in regard to the comments in Paragraphs 2 and 3.

REPLY TO
ATTN OF:

DCOI

27 Mar 67

SUBJECT:

UFO Report

TO: TDETR, Wright-Patterson AFB, Ohio 45433

1. Reference our message DCOI 04018 Mar 67, subject same as above.
2. Forwarded for your information and exploitation is a roll of 8mm movie film which is alleged to contain photography of the same or a similar UFO as that reported in the referenced message. The film was exposed on 10 March 1967 by Mr. [REDACTED] who provided the information in the original report. At the time of the original report, Mr. [REDACTED] advised that he would attempt to photograph the object and, if successful; would release the film to this organization. The inclosed film was obtained from Mr. [REDACTED] on 23 March 1967.
3. Mr. [REDACTED] was unable to describe the camera or to provide any information as to the type of camera or lenses, the lense opening or shutter speeds or processing method, except to say that the camera was "borrowed" and "wide open."
4. The inclosed film was reviewed on 23 March 1967 but availabel technical equipment does not permit further exploitation or a logical conclusion as to the cause of this sighting.
5. A brief evaluation of this film would be appreciated. Further, Mr. [REDACTED] requests the return of the original film when exploitation has been completed.

Peace is our Profession

10 March 67

SAF-OICC/Mrs Cassel/bp/79079/18 May 67

MAY 18 1967

Dear Mr. [REDACTED]

Thank you for submitting your roll of 8 mm movie film for evaluation.

The entire roll of film was found to be blank with the exception of approximately 11 feet. Within this footage are two images. A detailed photographic analysis of these images is not possible due to the lack of camera data.

On the entire roll of film there is no evidence of the frame lines which would be expected on a normally exposed 8 mm motion picture film. This raises the possibility that the film was not exposed or was run through a camera where the light path from the lens to the film was obstructed.

Photographic analysis reached the conclusion the film does not contain photography of the same or similar unidentified flying object (UFO) as first believed.

Your interest in our program is appreciated. Your film is inclosed.

Sincerely,
