5. LENGTH OF OBSERVATION	11. BRIEF SUMMARY AND ANALYSIS		
1 to 3 hours	Various observers watched a round shaped object in different parts of the sky. One observer noticed a red glow, green around the edges, colored object travel from the east to the west. The object in this case was in sight for over one hour. The object did not disappear but was seen by another observer in the western sky. One observer followed the object for nearly 17 miles but could not catch the object. A truck driver watched a star like object in the NE part of the sky. It definitely appears that two different objects were responsible for the sightings; one traveled across the sky in three hours while the other was seen only in the northeastern sky. The first object is believed to have been Venus while the latter Arcturus.

k. Mr. [REDACTED], Bottineau, NDak, Sheriff, was contacted and his narrative description of events was as follows:

While at home listening to his radio, he heard policeman Allen Gustafson, Velva, NDak, talking over Police Radio Net about a UFO. He became interested, went outside, and saw the object. He then followed the object for one (1) hour in his car for about seventeen (17) miles. He then heard [REDACTED] policeman, Mohall, NDak, say he had picked up the object at Mohall. [REDACTED] then returned to Bottineau.

Mr. [REDACTED] truck driver and part-time policeman at Mohall, NDak, was contacted by telephone. He saw the object over Mohall, NDak after being alerted to watch for it over Police Radio Net. He watched the object for 3½ hours. His observation is attached to this report. He did not see the object disappear; it was lost in the stars. Several other people reported to [REDACTED] as having seen this object and are listed on this report. An attempt was made to contact Mr. Allen Gustafson of Velva, NDak who first reported the object. He could not be contacted by telephone. I have no reason to doubt the integrity of these men in submitting these reports. Chester A. Shaw Jr., Major, USAF, Base Operations Officer. 2213
