14. Did the object disappear while you were watching it? If so, how? *Yes, it slowly faded. It looked as though it sped up while gaining altitude.*

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes ☒ No ☐ Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes ☒ No ☐ Don't Know. IF you answered YES, then tell what in front of: *We could see it in front of the stars and the moon.*

17. Tell in a few words the following things about the object:

- a. Sound *Did not hear any sound*
 b. Color *It was redish-orange.*

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

About 3/4's of the object would be covered.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

A redish-orange ball of yarn.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? (Circle One) Yes No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes No

Dear [REDACTED]

This replies to your recent correspondence concerning your unidentified observation.

Although a positive identification has not been made, investigation revealed that you probably observed a hot air balloon. The description you submitted is consistent with such an evaluation. Since the first of the year, hot air balloons have accounted for twenty-seven sightings reported to the Air Force.

At the time of your sighting, the wind was from approximately 220 degrees, which would have caused the object to drift toward the northeast. Hot air balloons have been constructed from plastic dry cleaning bags with a platform of straws or such to support the heat source. Quite often, candles have been used as the heat source. This would account for the dim fiery look.

We wish to thank you for reporting your interesting observation to the Air Force.

Sincerely,

BARNETT B. YOUNG
