6. TYPE OF OBSERVATION Ground Visual	Observer sighted an object that he first thought was a star but then he noticed that it had two beams at angles from its bottom, and was moving toward the clouds. At this time the object was under the clouds. About 20 minutes later he sighted another similar object from near the same place. No noise was heard. COMMENTS: Observer stated that a helicopter would look similar to the object. Wright-Patterson AFB is located near Dayton and usually has numerous aircraft departing and on approach. The witness was sent a 117 but failed to return it. There is nothing to indicate that the object could-not have been an aircraft. There is not real data on second sighting however, since it is similar to first it too may have been an aircraft.

May 26.

I do not know how long the object was in the sky when I first noticed it. I thought it was the moon, but then realized the sky was cloudy and light rain was falling. The object was very dim at first, then rapidly grew as bright as a ball of fire. I went downstairs to close windows, went back upstairs to look at the object, and it had disappeared. I looked all over the sky and saw it nowhere. It had disappeared in a matter of 3 to 5 minutes.

1966. In the mid-summer of 1966 my husband and I saw a very fast moving object high in the SW skies. Approx. 80° up. This object looked like a star. Suddenly it stopped, started up, very fast, then disappeared; reappeared some distance away. An airplane flew by (the plane was also up very high); then the object reappeared and, moving very slow, it began to trail the airplane. My husband saw a similar incident around the month of October of the same year.
