UFO Observation, 23 - 30 June 1967

Base Operations (Control Tower)
Olmsted AFB, Pennsylvania 17057

1. The Aerial Phenomena Branch is currently investigating an unidentified flying object (UFO) report from Manchester, Pa. The witness described the objects as bright lights that crossed the sky in approximately thirty minutes. These objects, sometimes two at a time, crossed the sky with different headings, the most common was east. The observations occurred between 11 pm and 4 am, 23 - 30 June 1967.

2. Any information you can provide on air activity that may have been responsible for these sightings will be helpful in making our evaluation.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

some went different ways.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

34. Date you completed this questionnaire:

24th August 1967
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I made a few diagrams please note the same two stars. They passed, went around or ^{between} ~~through~~ them. The square is where we observe them. The one marked June 23rd. One made that trip every night. But June 27th, it met another one and it made a perfect half circle around it also June 29, it met one coming from the north and went beside it both were seen constantly until about 15° above the horizon traveling what seemed to $\frac{1}{2}$ " apart with the naked eye, never any further apart or any closer together.

In this questionair you have circle one. I had to circle more, because we see so many. All look alike and the same size.

One night in June, on the 11:00 P.M. news broadcast, W.B.B.A. York Radio Station announced observed and investigating U.F.O.'s (I do not remember how many)

14. Did the object disappear while you were watching it? If so, how?

one went out then relight
one also was over a cloud when cloud passed
it was still there

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

IF you answered YES, then tell what

it moved behind:

if it was a cloudy night it would go
behind a cloud then reappear or an airplane would
fly beneath it.)?

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

IF you answered YES, then tell what

in front of:

it passed right beneath a star and the
star could not be seen.

17. Tell in a few words the following things about the object:

a. Sound no sound

b. Color bright

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

As large as our largest stars

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

they were round
