UFO Observation, July 12, 1967

Mr. [REDACTED]
[REDACTED] Street
Vancouver 5, B.C., Canada

Reference your recent correspondence regarding your unidentified observation over Buffalo, New York on July 12, 1967. Air Force photo interpreters would appreciate the opportunity to review your slide. Request you complete the attached photographic data sheet and FTD Form 164 and return them with your original slide. We will then be able to perform a scientific investigation. Upon complete of analysis we will return your slide along with our findings.

14. Did the object disappear while you were watching it? If so, how?

Just disappeared.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't know.

If you answered YES, then tell what

it moved behind:

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't know.

If you answered YES, then tell what

in front of:

17. Tell in a few words the following things about the object:

a. Sound

None.

b. Color

Similar in color and brightness to planet Venus.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

Three times the width of the matchhead.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

h. Other Camera

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

I can't compare it with a common object but I happened to have my camera in my hand so I snapped a picture. The slide shows an object of saucer shape with a distinct dome and a tail behind it. The slide is still in my possession and upon my promise it is your choice.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

*I am a research assistant in the field of micro-
fractology and am interested in relaying this
information to you for your research and not
sensationalism. Also, we did not report this
earlier because we had just arrived back
home in Vancouver, B.C. and discovered
we had this picture amongst our slides and
we remembered the incident.*
