Re: TDPT (UFO)
UFO Obser. 7 Aug. 67

My dear Colonel:

Pursuant to your letter dated 29 April 1968 an inquiry into subject information was instituted and the results proved NEGATIVE as far as the reliability of your information.

Upon interviewing Mrs. [REDACTED], West New York, N. J. this woman recalled that in the summer of 1967 her 13 year old son hung an object on a piece of string in the rear of their home and took a picture of same. The youth then submitted this picture to a science fiction magazine "to see how far they would go" in investigating same.

Mrs. [REDACTED] expressed her regret that the incident went as far as it did and assured the investigator that it would not happen again. You may be assured that this subject matter may be called a HOAX as far as your records and files are concerned.

It is a pleasure to cooperate with you on matters of mutual concern and interest.

Very truly yours,

Richard T. Warnock

Gentlemen:

In answer to your correspondence to us about sighting a UFO, we wish to give you the true explanation.

My son had made a miniature flying saucer, suspended it by a thread attached to a tree in our backyard and took several Polaroid shots at different angles.

We had the pictures developed and we showed them around the neighborhood to see if anyone would think it was authentic.

Apparently someone did and sent it to you as a true sighting of a UFO. (My son had given some pictures to several people)

We are truly sorry for any
inconvenience this has caused
you and hope this explains
satisfactorily the report you
are investigating.

Sincerely

Mr + Mrs

| h. Disappear and reappear? | Yes | ☒ No | Don't know |

14. Did the object disappear while you were watching it? If so, how?

Yes. At first left at a 45° angle, then went 90° straight up and left with great speed.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't Know.

IF you answered YES, then tell what

it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't Know.

IF you answered YES, then tell what

in front of: _____

17. Tell in a few words the following things about the object:

a. Sound *none*

b. Color *GREEN*

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

1/10 of object

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.
