35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

First On question #5.2 The object was in sight by me for one and a half minutes, and in that time it was a continuous sighting in view all the time, no change in its make up whatsoever.

I went outside to feed the birds, had a pan of food for them in my hand. It was very close and the stars looked like someone shined each one. I ~~immediately~~ immediately caught sight of this object and put the pan down in my driveway after watching for a minute or a half, ran back into the house which was on the double, got my Binoculars and on the double was outside. But it was no longer in sight. That is all the information I can give you on this object.

I told the Officer also that I had another sighting of an object that was very unusual. ~~Not~~ Not getting two forms, I can't report the second one. If you send me another form I will be only too happy to report on my second sighting at about eleven minutes after the first one.

In closing I must say you people are on your toes. It's nice to know we have people who give so much to our Country.

We have a son in Vietnam in the Air Force, loading Bombers. 30 years old three children. God be with all of you.

Sincerely
