1. Reference your recent correspondence of September 29 in which you reported your unidentified observation of September 15, 1967 and subsequent photographs. Additional information on your sighting and your original negatives are needed to perform a scientific investigation. Request you complete the attached photographic data sheet and FTD Form 164 and return them with your original negatives. Upon completion of analysis we will return your negatives along with our findings.

2. We are returning your letter of September 29 as you requested.

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

I am afraid I can not do so, because it looked too much like a flying saucer.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? (none)
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

no, I haven't.

The object seemed to hover over radio station wires and antennae. Traveled at a great rate of speed. The three lights would always blink left to right. The object would stop to a complete standstill, then take off to the other side of the sky in the same second. In conclusion, I give you my permission to use any statements or conclusions that I have stated.

I am sorry, but at the time of the sighting, I did not think of getting a camera. And the most important thing about this is that the object was moving entirely too fast for any kind of camera. I will try my very best to supply you with as much information as possible. If you think more information is needed, feel free to tell me about it. I will be more than happy to give it. When and if you come to a conclusion, please inform me.

Thank you very much.

Information

The object was viewed by the naked eye and the aid of a pair of binoculars. Moving in an east to west pattern, it traveled at a great rate of speed. Blinked lights off and on, always from left to right. Sometimes the object would seem to disappear then reappear a little bit farther away. It was hovering over large radio station towers. Then it would go from horizon to horizon in a split second. It would always stop then take off like a jet, or maybe even faster. Some people on the block said it was an airplane, but I asked them to point it out to me and it turned out to be a completely different object in a different part of the sky. I have seen things in the sky before, but this must be something. It was too fast for an airplane, but not so fast as a jet, excluding

ing. An illusion, that lasted for
at least a half hour? It made
no sound. I shall try and find
an answer. And, if possible, send

Dear sir:

An incident has happened to me which I will never forget, the sighting of an unidentified flying object, or an U. F. O. I tried to be as precise as possible, but if I am not, please excuse me. If at all possible, I would gratefully appreciate it if you could analyze the picture, the information, and also the situation. When and "if" you come to a good explanation,
please send it to me so
I may get into the light
about this. My name and address is enclosed.

Thank You very
much,
