Dear Major Quintanilla,
I am writing to you concerning two U.F.O.s which I witnessed on the night of September 21, 1967. The objects were of orange color and glowed. They were about as large as a medium sized star. And were sighted in the southern sky just after dawn approximately 7:19 P.M. One seemed to gain altitude and travel westerly. The other object seemed to lose altitude and it traveled easterly. The objects traveled at a very fast speed. The strange thing was they seemed to travel in a series of dips. But I guess the atmosphere made them do this for I have seen artificial satellites do almost the same. But I do know they weren't meteors, aircraft, or swamp gas!

Sincerely,

P.S. There were 5 other witnesses of these objects.

I wish to know but do not know what the objects were. They seemed to travel like artificial satellites which I have observed before but the objects were like nothing I have seen before.

Some of the other observers say they saw ~~it~~ ^{the objects} travel a little differently but I must assure you the observation was very strange.
