Dear 

This replies to your letter of December 20, 1967. Yes, it is possible to fake a picture of a flying saucer as you suggested.

The photo which you submitted is an excellent example of a fake flying saucer. Thank you for your letter and good luck.

Sincerely,

HECTOR QUINTANILLA, Jr, Major, USAF

Dear Sirs:

Thank you very much for your kind reply about the chart
I sent you. I agree that it is probably not any alien chart.
I enjoyed reading Project Blue Book very much.

I hope I am not wasting your time with this letter, because
I realize you are very busy.

I wondered if it would be possible to fake a picture of an
U.F.O., that would look as good as some pictures I have seen.
I made a model out of black paper and used thread to hang it from
a tree branch. The idea worked. The photo enclosed is, in my
opinion, very good and could pass for any saucer.

I thank you again for sending Project Blue Book.

Sincerely,

★ Observers' Notebook ★

Unusual observation. On December 28, 1967, about 3:00 a.m. Pacific standard time, Richard A. Steeg of Oakland, California, was preparing to photograph Canis Major when a brilliant orange sunlike object appeared above his southern horizon. At first it had constant brightness, slow speed, and left a conspicuous trail.

Mr. Steeg reports: "While I was adjusting my Honeywell Pentax camera, the object entered the field, and was well into it when the 30-second exposure began. Near the end of it, the object suddenly disappeared. The train quickly brightened and then began to fade. Changing from my 50-mm. lens to one of 105-mm. focus, I recorded its swiftly contorting shape. It seemed to show no drift for about 15 minutes, but an hour later it had shifted 25° eastward and was greatly diffused.

"The object first appeared near right ascension 10h, declination -40°. Traveling north, it passed about 3° east of Gamma Velorum, and it disappeared just west of Canis Major. In all, it covered about 45°, and was visible one minute and 45 seconds."
