UFO Observation, December 10, 1967

Valley Station, Kentucky, 40272

1. Reference your unidentified flying object (UFO) observation of December 10, 1967. The object that you sighted at 0026 hours was probably a weather balloon that was released at 0018 hours. Although the surface wind was toward the southwest at four knots, at 6,000 ft altitude it was toward the north-northeast at seventeen knots and at 10,000 ft it was toward the east-northeast at twenty-one knots. These balloons usually ascend at approximately 1000 ft/minute and can be observed until an altitude of about 10,000 ft.

2. Radar usually does not paint these balloons unless they have a metal reflector attached.

3. Thank you for reporting your observation to the Air Force.
