Dear Sirs:

On the evening of 14 FEB '68
I was walking home from a store when I happened
to glance up at the sky. I saw a strange white object
moving slowly through the sky. I watched it for
about a minute then went to the city Police Station
which was about 100 feet away. I told the lieutenant
[REDACTED] & [REDACTED] about it we
then went outside and watched the object with
binoculars. After this we called Kalamazoo Air Force
Base who told us to call Metro Airport which
we did when we again went outside the object was
gone. Thank you for willingness to read our report.

Sincerely

Object was very high in the sky and seemed to follow the same height coming from the north and going due south.

[REDACTED] and I (along with 3 friend) went back to the same location the next night. [REDACTED] went along to help look for any object. If we had seen it again, we would think that it was a satellite. We reached the spot at 8:00 and stayed until 9:40. This allowed plenty of time (before and after our sighting) for it to appear. We had a telescope and a pair of binoculars along in case of another sighting. We were in the same spot exactly and were outside the car. It was another moonless night but the stars were not as bright. The sky was clear. We did not see the object again. We decided that it was not a satellite.

18 and 19. THE Object Looked to have speed and altitude of a satellite. I know that speed and altitude vary with different type orbits so I cannot give a true estimate of its speed and altitude.

6A. NOW IMAGINE YOU ARE AT THE CENTER OF THE COMPASS ROSE. PLACE AN "A" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN FIRST SEEN. PLACE A "B" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN LAST SEEN.

7. IN THE SKETCH BELOW, PLACE AN "A" AT THE POSITION OF THE PHENOMENON WHEN FIRST SEEN, AND A "B" AT THE POSITION OF THE PHENOMENON WHEN LAST SEEN. CONNECT THE "A" AND "B" WITH A LINE TO APPROXIMATE THE MOVEMENT OF THE PHENOMENON BETWEEN "A" AND "B". THAT IS, SCHEMATICALLY SHOW WHETHER THE MOVEMENT APPEARED TO BE STRAIGHT, CURVED OR ZIG-ZAG. REFER TO SMALLER SKETCH AS AN EXAMPLE OF HOW TO COMPLETE THE LARGER SKETCH.
