8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight—pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

It was bigger and brighter

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

1 1 1
Day Month Year

2. Time of day:

9:30 3
Hours Minutes

(Circle One):

A.M.

or

P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

my home West New York New Jersey
Nearest Postal Address City or Town State or County

5. How long was object in sight? (Total Duration)

3
Hours Minutes Seconds

a. Certain
b. Fairly certain

c. Not very sure
d. Just a guess

5.1 How was time in sight determined?

about 3 minutes

5.2 Was object in sight continuously?

Yes ✓ No _____

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
a. Bright
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object:

8.1 STARS (Circle One):

a. None
b. A few
c. Many
d. Don't know

9. What were the clouds like?

CLOUDS (Circle One):

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy

10. The object appeared to be:

a. Solid
b. Transparent
c. Vapor

11. If it appeared as:

a. Bright
b. Dim

11.1 Compared to:

light

12. The edges of the object were:

(Circle One):

13. Did the object:

a. Appear to stop
b. Suddenly disappear
c. Break up into pieces
d. Give off smoke
e. Change brightness
f. Change shape
g. Flash or flicker
h. Disappear and reappear

Official U.S. Air Force UFO form

Page 3

14. Did the object disappear while you were watching it? If so, how?

It moved down slowly and then to the right.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't know.

If you answered YES, then tell what

it moved behind:

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't know.

If you answered YES, then tell what

in front of:

17. Tell in a few words the following things about the object:

a. Sound

b. Color

kind of white or black

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

moved slowly

20. Do you think you can estimate

20. Do you think you can estimate the speed of the object?

(Circle One)

☒ Yes

☐ No

IF you answered YES, then what speed would you estimate? 25 miles an hour

21. Do you think you can estimate how far away from you the object was?

(Circle One)

☒ Yes

☐ No

IF you answered YES, then how far away would you say it was? 100 or 150 miles

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building

b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other in a building by a window

23. Were you (Circle One)

a. In the business section of a city?

b. In the residential section of a city?

c. In open countryside?

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

☐ Yes

☐ No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

No

e. Binoculars

Yes

No

b. Sun glasses

Yes

No

f. Telescope

☒ Yes

No

c. Windshield

MEMO FOR THE RECORD

3 April 1968

Subj: Balloon Launch (Accidental), 2 Apr 68

At 1530 hours, Lt Col Hippler, AFRSTA, called regarding a balloon that got away at the Holloman AFB. It was a big "V" Shaped balloon and may have appeared to be two sausage shaped objects connected at the balloon. He thought that we might receive reports on it since there were planes going around it and following it. The FAA had been notified that it was loose and was in air routes. It got away at approximately 8 am local, MST, and was expected to impact around 1430 hours, local. It had gone up to altitudes of 30,000 and at 1330 hours, local was at approximately 15,000 ft alt. If we needed further information we could get it from the balloon launch facilities at Holloman.

Second visit report
(may have been let

4 April 68
April 5, 1968

~~_____~~
Thunderbolt, Ga. 31404

Major Hector Quintinilla, USAF
UFO Project
Wright-Patterson AFB, Ohio

Dear Sir:

This is to report the sighting of an unusual aerial object on April 4, 1968, over Thunderbolt, Ga. At 7:40 p.m. two boys were using a small telescope on the lawn of a residence at ~~_____~~ Road. The boy not observing through the telescope suddenly exclaimed to the other to the effect that something unusual was moving in the sky. Both boys then observed the object until it disappeared from view behind trees to the north.

When the boys related this to me I separated them and asked each one to draw the object he had seen. While they were making the drawings I called Hunter Army Air Field and reported the sighting to the officer with whom I was connected when I asked for the UFO officer. The boys finished the drawings within ten minutes after seeing the object.

According to the boys' accounts, the object was moving almost due north along a south-north line about 80 degrees above the western horizon. It was moving "much faster" than a jet aircraft that had passed overhead shortly before. It left no trail and no sound was heard.

According to both boys, the object presented a clearly visible disc and had extensions from both sides that carried small lights at their ends. The attitude of the object was constant and the motion was at a constant rate. It was enveloped in a bright orange glow, described by one boy as a mist.

On the evening of the sighting there was intermittent broken cloud cover over the Savannah area but at the time of the sighting the sky was clear. Sighting was by visual observation only because the movement was too fast to permit aiming the telescope. Several helicopters from the training base at Hunter were aloft in the vicinity, but both boys maintain that the object could not have been a helicopter.

Enclosed herewith are the drawings made by the boys. That labeled "A" was made by a 15-year-old. The other boy is an unusually bright 10-year-old.

The older boy, incidentally, has a story that might be worth investigation. About three years ago, he was one of a group of about ten Boy Scouts camping on Big Wylie Island near Savannah who were badly frightened by a huge, orange-glowing object that apparently rose from the island near their camp.

Sincerely yours,
~~_____~~

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

29 4 68
Day Month Year

2. Time of day:

11 31
Hours Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Nearest Postal Address _____

City or Town NEAR IDYLLWILD JUNCTION

State or County RIVERSIDE, CALIF.

5. How long was object in sight? (Total Duration)

0 4 0
Hours Minutes Seconds

a. Certain
b. Fairly certain

c. Not very sure
d. Just a guess

5.1 How was time in sight determined?

WRIST WATCH

5.2 Was object in sight continuously?

Yes _____ No X

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
a. Bright
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left slightly
e. Overhead
f. Don't remember

8. IF you saw the object at NIGHT

8.1 STARS (Circle One):

a. None
b. A few
c. Many
d. Don't remember

9. What were the weather conditions?

CLOUDS (Circle One):

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

10. The object appeared: (Circle One)

a. Solid
b. Transparent
c. Vapor

11. If it appeared as a light, was it:

a. Brighter
b. Dimmer

11.1 Compare brightness to _____

12. The edges of the object were:

(Circle One): a. Fuzzy or
b. Like a bright
c. Sharply
d. Don't remember

13. Did the object:

a. Appear to stand still at or
b. Suddenly speed up and
c. Break up into parts or
d. Give off smoke?
e. Change brightness?
f. Change shape?
g. Flash or flicker?
h. Disappear and reappear?

14. Did the object disappear while you were watching it? If so, how? ~~THE OBJECTS~~ **THE OBJECTS APPEARED IN A CLUSTER OF ABOUT 100 (APPROX. ESTIMATION) OBJECTS APPEARED TO BE REFLECTING SUNLIGHT. THEY WOULD BE SEEN REFLECTING LIGHT THEN THEY WOULD SLOWLY FADE AWAY AND THEN APPEAR AGAIN**

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't know.

If you answered YES, then tell what

it moved behind:

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't know.

If you answered YES, then tell what

in front of:

17. Tell in a few words the following things about the object:

a. Sound **NONE**b. Color **A SILVERY WHITE**

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

ONE OF THE OBJECTS COULD HAVE BEEN COVERED VERY WELL BY THE MATCH HEAD

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

THERE WAS NO DEFINITE SHAPE OF THE CLUSTER BUT A SINGLE OBJECT APPEARED TO BE ROUND

20. Do you think you can estimate

(Circle One)

If you answered YES, then tell what

21. Do you think you can estimate

(Circle One)

If you answered YES, then tell what

22. Where were you located when

(Circle One):

a. Inside a building

b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other

24. IF you were MOVING IN A

24.1 What direction were you

a. North

b. Northeast

24.2 How fast were you moving

24.3 Did you stop at any time

(Circle One)

25. Did you observe the object through

a. Eyeglasses

b. Sun glasses

c. Windshield

d. Window glass

26. In order that you can give as accurate an estimate as possible of the objects which, when placed up

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

At about 9:00 o'clock I stepped out doors to call for my boys they come home from boy scouts. I saw a big light very bright and so big that I was waiting for a plane to come down. no matter no noise at all, and the light went back and forth and the light was strong only a plane could make a big funnel of light like that down ward to light the trees and houses.

14. Did the object disappear while you were watching it? If so, how?

Just disappeared

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound No

b. Color None just bright

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

Appeared to be like a satellite or star

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

14. Did the object disappear while you were watching it? If so, how?

no

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

If you answered YES, then tell what

it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

If you answered YES, then tell what

in front of: _____

17. Tell in a few words the following things about the object:

a. Sound

no sound

b. Color

no color other than light in front & green light at rear

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

3 objects would be larger than Grapefruit held at arms length

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One)

☒ Yes

No

IF you answered YES, then what speed would you estimate? 50 M.P.H.

*until lead object
broke formation
then lead at high E.*

21. Do you think you can estimate how far away from you the object was?

(Circle One)

☒ Yes

No

IF you answered YES, then how far away would you say it was? 500 ft

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building

☒ b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other _____

23. Were you (Circle One)

a. In the business section of a city?

b. In the residential section of a city?

☒ c. In open countryside?

d. Near an airfield?

e. Flying over a city?

☒ f. Flying over open country?

g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? 25 miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

☒ Yes

No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

No

e. Binoculars

Yes

No

b. Sun glasses

Yes

No

f. Telescope

Yes

No

c. Windshield

☒ Yes

No

g. Theodolite

Yes

No

d. Window glass

Yes

No

h. Other

Got out to look

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw

3 head lights in V formation in SKY
but head lights without a projected beam

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? 3
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

no

31. Was anyone else with you at the time you saw the object? (Circle One) ☒ Yes ☐ No

31.1 IF you answered YES, did they see the object too? (Circle One) ☒ Yes ☐ No

31.2 Please list their names and addresses: Wife Same Address

32. Please give the following information about yourself:

NAME W. Brown William Brown
Last Name First Name Middle Name

ADDRESS 2 Chattanooga Spawick 01935
Street City Zone

TELEPHONE NUMBER 356 3192 AGE 55 SEX Male

Indicate any additional information about yourself, including any special experience, etc.

Have some knowledge of
took flying lessons as young man
1932

33. When and to whom did you report that you had seen the object?

April 11 1968 Daughter
Day Month Year Spawick

34. Date you completed this questionnaire:

<u>19</u>	<u>April</u>	<u>1968</u>
Day	Month	Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

While driving from Ipanema Center to home at Great Neck in easterly direction toward ocean I observed 3 very bright lights in sky. First thought them to be stars but were too bright and not of any eastern star formation. Stopped to observe lights and at this time, leading object's light broke away from formation & at greater speed went to S.E. on a tangent. Got back in car & did not observe the course the objects took. Was not disturbed but considered the sight unusual.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

We were leaving the town to come home, at about 9:00, and as we drove along the lower end of Jeffreys Neck road we saw what we thought were three very bright stars.

We soon realized they were too bright and large to be stars and they were in a V formation.

We stopped the car and got out to look as they passed over us. I saw many green and red lights on the under sides of these objects as well as the white light. I could not make out the forms. As we watched one of the objects veered off ahead of the others and went off in a different direction and we got in the car and came home.

Paul M. Grover.

This light broke formation
and sped off to
90° E.

UFO passed in front of NA at ft/mi - passed behind NA at ft/mi

SIGHTING ACCOUNT

The witness was on top of Sagamore Hill where two Radio Telescopes are located to watch the Eclipse of the moon. He noticed a brightly-lit object in the West which was hovering at an elevation of 10°. No shape was seen behind the colored lights which were blinking very rapidly and were packed closely together and appeared to overlap. Their order was RED-ORANGE-BRIGHT BLUE. Distance was estimated at 6 miles. Suddenly, after watching the object in a hovering mode for about a minute, it shot away upwards at a 35° angle until reaching an elevation estimated at 45° and just blinked out or disappeared. Its speed seemed much faster than a conventional aircraft's speed. (Not Sirius this time!)

(Unconventional Lights)

SKETCH OF UFO(s)

RED ----- ORANGE ----- BRIGHT BLUE

REMARKS

The witness is working landscaping until he joins the military this summer. He is a student pilot, knows aircraft and their identification lights. He said he never would have reported it if he had thought it were an aircraft. This report is one of many received between April 10-20th. It is evaluated as a low-weight "unknown".

CIRC. 28,550

APR 17 1968 New
England
Newsclip

~~~~~  
**Viewers Mum  
About Identity  
Of Sky Object**

BEVERLY — What has flashing lights, flies low and goes "whish"?

A UFO, that's what.

Some of Beverly's finest aren't talking about their chases Sunday night. As a matter of fact the official police blotter is devoid of any mention of the incident.

But the strange looking thing in the sky had some patrolmen baffled. It was seen, at one time, off Her-rick Street during the early evening hours. One cruiser patrolman said he thought it might have been a plane, but when it flew low, it didn't make any noise.

"I don't know what the answer is," he commented to one confidant. "But until somebody explains it I'm not saying anything!"  
~~~~~

NICAP MASS REPORT # 68-21 - 14 April 1968, 9:00 PM EST, Beverly, Mass.

INVESTIGATORS REPORT

- By Robert Jackson

Approximately 9:00 PM, the Beverly Police Department received 2 phone calls (no names given) from residents of Beverly concerning a string of white lights out near the New England Electrical Power Plant on Salem Harbor. Officers Harold Coffey and Victor Emeny responded to the calls by driving to Quincy Park off River Street on the shoreline overlooking the harbor. When they arrived they found several parked cars and witnesses standing on the sidewalk of River Street looking out over the water. Officer Emeny stated that he first saw a string of steady bright white lights due South moving toward and to the right of him over the water on their side of the power plant. There was no sound at all coming from the object. He said there were at least 5 lights but maybe more. The string of lights continued NNW to their right (see detailed sketch) and finally a little behind them. The lights then stopped right over some house and trees where a rapid sequence of flashing began from left-right as it hovered. It then began moving slowly (lights still flashing in left-to-right sequence) westward where it disappeared for only a few seconds behind some trees and then reappeared again moving southward out over the water where it first appeared. It moved to a position due South where it stopped again and THEN A SPOTLIGHT OF SOME SORT TURNED ON AND PROJECTED STRAIGHT DOWN ON THE WATER, illuminating much of the harbor. Then, suddenly it streaked off on a northward course. Emeny stated that at the last part of the sighting, he was in radio contact with Officer Carpenito who was located in another cruiser in another part of town who was also watching. Carpenito exclaimed over the radio, just as the object streaked away - "Did you see that!?" (Later, Carpenito said that the object looked red to him when it streaked away. This was not noticed by the other officers). Emeny stated that there were numerous planes out over the water and that he could hear the jet engines on many of them as they circled in their landing pattern to Logan Airport, Boston, Mass. But, he could not hear anything coming from the string of lights that appeared as close as 2 city blocks at one point and at a seemingly low altitude. This is what amazed the officers - no sound. Officer Coffey did not seem to remember as many details of the sighting unless Emeny was exaggerating but both seemed sincere and had no apparent motive to exaggerate. Both feared ridicule so much that nothing was reported to NICAP MASS. We found out through the grapevine and a brief newsclip which is enclosed as part of this report.

CHAIRMAN'S COMMENTS/EVALUATION

- By Raymond E. Fowler

I find this sighting hard to evaluate. It has all the characteristics of a B-52 Flare Drop except for the fact that 1) At one time the lights were steady; 2) The hovering mode and searchlight emanating from the light-string; 3) The streaking off into the North.

I tried to obtain Flare Drop data for this date from 8th AF at Westover AFB but was told it involved too much research. Hanscom AFB stated they had received no reports this date. I also talked to the UFO officer at Otis AFB who usually does receive B-52 flare drop-type UFO reports from witnesses on Cape Cod who have an excellent vantage point but he had no reports of this nature. The officers could have imagined these variants but this seems unlikely. My evaluation is "Unknown", possibly flares. FTD will receive this report and be able to check the flares possibility. If it were flares, the report is valuable for "witness impressions of flares".

Respectfully submitted, R.E. Fowler

DATA SHEET - UNIDENTIFIED FLYING OBJECT(s)

Please answer the following questions concerning the Aerial Phenomena you observed. The data will be used for research purposes. Thank you for your cooperation in this matter.

Return to: Raymond E. Fowler, CHAIRMAN Tel. 468-4815
NICAP MASSACHUSETTS SUBCOM.
13 Friend Court, Wenham, Mass.

UFO SIGHTING REPORT

I. PERSONAL ACCOUNT

In your own words, Please describe the incident as it happened. (If additional pages are needed, be sure they are numbered.)

NICAP

Note to observer: In filling out this form, please be as complete and accurate as possible. Some of the information asked for may not apply to your sighting or may be unavailable to you. In such cases, please indicate.

II. ENVIRONMENTAL SITUATION

1. What was your exact location when you observed the UFO(s)? (Include the name of the city or town you were in, or the distance to the nearest city or town.)

2. What was the date? Apr 14, 1968

3. How long did you observe the object(s)? Hours: Approx 15 min - 1/2 hr. Minutes: _____ Seconds: _____

From Approx A.M. 9 P.M. _____ ZONE (When FIRST seen)

To _____ A.M. _____ P.M. _____ ZONE (When LAST seen)

4. Assuming you had stayed in one place, what is the longest time you COULD HAVE OBSERVED the UFO(s)?

Hours: _____ Minutes _____ Seconds: _____

5. How did you first happen to notice the object(s)?

noticed series of bright white lights - flashing in sequence

6. What had you just been doing?

on routine police patrol that evening - in station when received call from woman about lights over harbor

7. A. In what direction did you FIRST see the Object(s)? (Indicate this in the diagram by drawing an arrow from the center of the circle (observer's position) to the point on edge representing the object's position. Label this point No. 1.

B. In what direction did you LAST see the object(s)? (Indicate by drawing a second arrow labeled No. 2.)

(Pos. 1.) first seen moving in downward arc then upward again to fixed position

(Pos. 2.) last seen with lights in 100% horizontal position and stationary

8. Estimate the MINIMUM distance and altitude of the object(s) from you and how you determined this measurement.

a. distance:

b. altitude:

9. Estimate the elevation (in degrees) of the object(s) in the sky. Mark position on the dotted line in the diagram. If elevation of object changed, please mark BOTH highest position and lowest position.

(point directly overhead)

90°

45°

HC

10. Did you observe the object(s) through any of the following? (Circle) Include information on type of equipment: model, type of film, filters, etc. (See question number 45.)

- | | |
|--|-----------------|
| a. eyeglasses | f. binoculars |
| b. sunglasses | g. telescope |
| c. windshield <i>not first - then left car</i> | h. theodolite |
| d. windowpane | i. still camera |
| e. movie camera | j. other |

11. Was object(s) observed by radar? _____ If so, where was the radar located? (Give name(s) of radar operator(s) and information on speed and flight path(s), if available.)

12. Please describe weather conditions and type of sky; i.e., bright daylight, nighttime, dusk, etc. Were stars or moon visible? *moon & stars visible - only few clouds in eastern sky*

13. Was there any wind? *not noticed* If so, please give direction and speed as accurately as you can.

14. What was the position of the sun and/or the moon in relation to object(s) and to you? (Please explain.)
moon was to the left in eastern sky

15. Briefly describe the type of terrain in the area.
harbor & shoreline

16. Did you see any conventional aircraft in the area immediately before, during, or after the incident? *before - 2 after heading North*

17. Please list any airport, military, governmental, or research installation(s) in the area. Are there any other unique features or landmarks (either natural or manmade) in the vicinity? *yes* If so, please describe.
Salem Harbor Power plant

18. Sketch or include a map of the area, labeling north, your position, the apparent course or position(s) of object(s) and any other important landmarks. (Please use separate piece of paper for sketch and attach to this report.)

DESCRIPTION OF OBJECT(S)

19. Were you able to see the object(s) clearly? Please describe any limiting factors.
only lights were seen - lights moved as if attached to some structure

20. Did you see more than one object? _____ If so, how many? _____ Make a sketch showing formation and position changes
only a great many lights

21. Did the objects all appear to be similar to one another? *yes* If not, describe the differences in question #22.

22. Please give a detailed description of the object(s), including shape, color, lights, surface features (if any), etc. Sketch the object(s) in detail according to your description.

A series of intensely bright white lights flashing on in very rapid sequence from left to right. All lights moved in unison as if joined together and the flashing sequence was similar to the tail directional lights of a new Mercury where the flashing sequence runs from one end of the horizontal red reflector to the other end and then starts again at the opposite end.

23. If only lights were seen, did they seem to maintain fixed positions relative to one another? In other words, could they have been attached to a solid object? Please explain. yes

24. Did object(s) leave any physical evidence of its presence (i.e. burns, radioactivity, disturbed ground, wreckage, other)? Please describe. no

Were any samples taken?

☐ Yes

☒ No

By Whom? _____

Where to? _____

Was any analysis done?

☐ Yes

☐ No

By Whom? _____

Please summarize results if known. If report is available, please attach copy.

25. Did object(s) make any sound? no If so, what kind?

26. Did object(s) produce heat? no If so, please explain.

27. Did object(s) produce an odor? no If so, please describe it.

28. Did object(s) appear to be solid or gaseous? solid lights - very intense similar to strong photo flash or elect arc welding

29. Was object(s): (circle one) a. fuzzy or blurred? b. like a bright star? c. sharply outlined

30. How would you describe the brightness of the object(s)? (Circle one)

a. brighter than the sun?

b. brighter than the moon?

c. brighter than any star (or planet)?

d. brighter than the background?

e. same brightness as the background?

f. darker than the background?

g. other (explain)?

31. Was the object(s): (circle one)

a. self-luminous?

b. dull finish?

c. reflecting?

d. transparent?

32. (Circle the items which apply and DESCRIBE as clearly as you can.)

Did the object(s):

a. appear to rotate (as a whole or in part)?

f. leave any visible trail?

b. change shape?

g. drop anything?

c. change color?

h. separate into parts or explode?

d. change brightness?

i. disappear and reappear?

e. give off smoke or vapor?

j. appear to affect any animals?

33. Did the object(s) appear to affect any mechanical or electrical devices (i.e. automobile engine, headlights, radio, T.V., appliances, clocks, watches, etc.)? no If so, please explain in detail. (include make, model, transmission type if automobile, etc.)

- ~~THE~~ ~~SO~~ WAS EACH LIGHT WAS THAN

37. What would you estimate the ACTUAL size of the object(s) to be (measured in feet along its greatest dimension)?

III. MOVEMENT OF OBJECT(S)

- steady Motion

- slow apparent motion — but 3 times as fast as aircraft in area

41. Can you estimate the speed of the object(s) _____ How was this determined? _____
object seemed much farther away than aircraft in area
42. Did the object(s) disappear while you were watching? yes If so, how? instantly vanished

43. Please give names and addresses of other witnesses, if any. Indicate relationship of witnesses to you, if it exists, and whether their sightings occurred before, during or after yours.
44. Have you seen other objects of an unidentified nature? NO If so, use separate forms or attached pages to describe these sightings.
45. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations or any other background material. IF PHOTOGRAPHS OR MOTION PICTURES ARE ENCLOSED, BE SURE TO INCLUDE ALL INFORMATION ON CAMERA TYPE, FILM TYPE, FILTERS, CAMERA SETTINGS, WHERE DEVELOPED, ETC. ORIGINAL NEGATIVES ARE NECESSARY FOR PHOTOGRAPHIC ANALYSIS. If you wish to have items returned to you, please indicate.
46. Have any other groups or individuals interviewed you? Salem News Apr 16 If so, please give names and date of interview.

Please give the following information about yourself:

FULL NAME: Harry R. Coffey AGE: 41 SEX M.
ADDRESSES 15 KITTREDGE STREET TELEPHONE - HOME 922-4207
BUSINESS: POLICE OFFICER

UFO SIGHTING REPORT

I. PERSONAL ACCOUNT

In your own words, Please describe the incident as it happened. (If additional pages are needed, be sure they are numbered.)

2 - 074 5 ac 75

lower over bay

Note to observer: In filling out this form, please be as complete and accurate as possible. Some of the information asked for may not apply to your sighting or may be unavailable to you. In such cases, please indicate.

II. ENVIRONMENTAL SITUATION

1. What was your exact location when you observed the UFO(s)? (Include the name of the city or town you were in, or the distance to the nearest city or town.)
2. What was the date? April 14, 1968
3. How long did you observe the object(s)? Hours: _____ Minutes: _____ Seconds: _____
From approx 9 PM A.M. _____ P.M. _____ ZONE (When FIRST seen)
To _____ A.M. _____ P.M. _____ ZONE (When LAST seen)
4. Assuming you had stayed in one place, what is the longest time you COULD HAVE OBSERVED the UFO(s)?
Hours: _____ Minutes _____ Seconds: Object in view for at least 5 min.
5. How did you first happen to notice the object(s)?
received calls at Beverly station
6. What had you just been doing?
on Duty at Police Station
7. A. In what direction did you FIRST see the Object(s)? (Indicate this in the diagram by drawing an arrow from the center of the circle (observer's position) to the point on edge representing the object's position. Label this point No. 1.
B. In what direction did you LAST see the object(s)? (Indicate by drawing a second arrow labeled No. 2.)

- 1.) object seen in South 20° etc moved NNW to ^{Right} of Police officers over water.
- 2.) object stopped at NNW and hovered over houses.
- 3.) At this point Rapid sequence of flashing lights began.
- 4.) Object began moving slightly west and disappeared briefly behind trees and houses.

- 5.) object reappeared and heading S. out over water again.
- 6.) Object stopped over water and shown bright spotlight on water.
- 7.) object suddenly vanished by taking off like a streak of lightning to North.
(see aerial sketch)

8. Estimate the MINIMUM distance and altitude of the object(s) from you and how you determined this measurement.

a. distance:

b. altitude:

9. Estimate the elevation (in degrees) of the object(s) in the sky. Mark position on the dotted line in the diagram. If elevation of object changed, please mark BOTH highest position and lowest position.

object at all times appeared quite low.
Emmery estimates 2 city blocks away from h

10. Did you observe the object(s) through any of the following? (Circle) Include information on type of equipment: model, type of film, filters, etc. (See question number 45.)

- a. eyeglasses
- b. sunglasses
- c. windshield
- d. windowpane
- e. movie camera

- f. binoculars
- g. telescope
- h. theodolite
- i. still camera
- j. other

at first then got out of car

11. Was object(s) observed by radar? 9 If so, where was the radar located? (Give name(s) of radar operator(s) and information on speed and flight path(s), if available.)

12. Please describe weather conditions and type of sky; i.e. bright daylight, nighttime, dusk, etc. Were stars or moon visible?

clear, Bright

13. Was there any wind? not noticed If so, please give direction and speed as accurately as you can.

14. What was the position of the sun and/or the moon in relation to object(s) and to you? (Please explain.)

to the left (Eastern sky)

15. Briefly describe the type of terrain in the area.

Ocean Bay

16. Did you see any conventional aircraft in the area immediately before, during, or after the incident? yes

Before, during, and after

17. Please list any airport, military, governmental, or research installation(s) in the area. Are there any other unique features or landmarks (either natural or manmade) in the vicinity? yes If so, please describe.

Salem C.G. station

18. Sketch or include a map of the area, labeling north, your position, the apparent course or position(s) of object(s) and any other important landmarks. (Please use separate piece of paper for sketch and attach to this report.)

DESCRIPTION OF OBJECT(S)

19. Were you able to see the object(s) clearly? Please describe any limiting factors.

Saw lights very clearly - but no connecting structure between lights were seen

20. Did you see more than one object? only 5 or more lights If so, how many? 5 or more lights Make a sketch showing formation and position changes

all lights were exactly the same

21. Did the objects all appear to be similar to one another? yes If not, describe the differences in question #22.

22. Please give a detailed description of the object(s), including shape, color, lights, surface features (if any), etc. Sketch the object(s) in detail according to your description.

*1 2 3 4 5 6
0 0 0 0 0 0
1 1 1 1 1 1*

5 or more flashing lights in this sequence - (rapid)

All lights were bright white.

30. Have you ever seen this, or a similar, object before. If so give date or dates and location.

Have seen satellites before

31. Was anyone else with you at the time you saw the object? (Circle One) Yes No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes No

31.2 Please list their names and addresses:

[REDACTED]

32. Please give the following information about yourself:

NAME _____

Last Name

First Name

Middle Name

ADDRESS

Street

City

Zone

State

TELEPHONE NUMBER

AGE

SEX

Indicate any additional information about yourself, including any special experience, which might be pertinent.

Arctium astragalus

33. When and to whom did you report that you had seen the object?

15

Day

APRIL

Month

1918

Year

SDO FTD (MAJ. RINEARSON)

23. If only lights were seen, did they seem to maintain fixed positions relative to one another? In other words, could they have been attached to a solid object? Please explain. *lights*
yes - moved in various

24. Did object(s) leave any physical evidence of its presence (i.e. burns, radioactivity, disturbed ground, wreckage, other)? Please describe.
✓

Were any samples taken?

☐ Yes

☒ No

By Whom? _____

Where to? _____

Was any analysis done?

☐ Yes

☐ No

By Whom? _____

Please summarize results if known. If report is available, please attach copy.

25. Did object(s) make any sound? *NO* If so, what kind? *no sound whatsoever*

26. Did object(s) produce heat? *NO* If so, please explain.

27. Did object(s) produce an odor? *NO* If so, please describe it.

28. Did object(s) appear to be solid or gaseous? *solid light sources*

29. Was object(s): (circle one) a. fuzzy or blurred? b. like a bright star? c. sharply outlined

30. How would you describe the brightness of the object(s)? (Circle one)

a. brighter than the sun?

e. same brightness as the background?

b. brighter than the moon? *yes*

f. darker than the background?

c. brighter than any star (or planet)?

g. other (explain)?

d. brighter than the background?

31. Was the object(s): (circle one)

a. self-luminous?

b. dull finish?

c. reflecting?

d. transparent?

32. (Circle the items which apply and DESCRIBE as clearly as you can.)

Did the object(s):

a. appear to rotate (as a whole or in part)?

f. leave any visible trail? *no*

b. change shape? *possibly - due to flashing sequence of lights*

g. drop anything? *no*

c. change color? *no*

h. separate into parts or explode? *no*

d. change brightness? *no*

i. disappear and reappear? *no*

e. give off smoke or vapor? *no*

j. appear to affect any animals? *no*

33. Did the object(s) appear to affect any mechanical or electrical devices (i.e. automobile engine, headlights, radio, T.V., appliances, clocks, watches, etc.)? *no* If so, please explain in detail. (include make, model, transmission type if automobile, etc.)

34. Can you describe the interior of the object(s) in any way? NO

35. Do you have any reason to believe the object(s) was occupied? If so, please explain.

36. What was the APPARENT size of the object(s) compared with the following familiar objects?
(Note: The moon is the same size as a pencil eraser (1/4") held at arms length) Please check the appropriate boxes.

THE OBJECT WAS each Light WAS THAN

smaller	same size	larger	familiar objects
			than a. faint star
			than b. bright star
			than c. object half as large as the moon
	☒		than d. the moon
			than e. dime at arm's length
			than f. nickel at arm's length
			than g. quarter at arm's length
			than h. half-dollar at arm's length
			than i. an orange at arm's length
			than j. other object at arm's length: PLEASE SPECIFY ()

37. What would you estimate the ACTUAL size of the object(s) to be (measured in feet along its greatest dimension)?

Longer than a car

III. MOVEMENT OF OBJECT(S)

38. In what direction was the object(s) traveling? S. to N. to W. to S then sped away N.

39. Describe the movement of the object(s), including the path(s) and nature of motion (i.e. steady, wobbling, waving, jerky, etc.). Did it (they) move significantly with respect to background of stars or landscape? Sketch path(s) showing orientation of object (s) in sky.

40. Did object pass in front of or behind any fixed physical objects such as trees, clouds, mountains, buildings, etc. Describe any notable relationships to such objects if observed.

Yes. Object for a period of a few seconds disappeared behind trees & houses then returned over the water.

41. Can you estimate the speed of the object(s) 40 mph How was this determined? by the apparent closeness of lights

42. Did the object(s) disappear while you were watching? yes If so, how? suddenly accelerated to the North in an instant.

43. Please give names and addresses of other witnesses, if any. Indicate relationship of witnesses to you, if it exists, and whether their sightings occurred before, during or after yours.
44. Have you seen other objects of an unidentified nature? NO If so, use separate forms or attached pages to describe these sightings.
45. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations or any other background material. IF PHOTOGRAPHS OR MOTION PICTURES ARE ENCLOSED, BE SURE TO INCLUDE ALL INFORMATION ON CAMERA TYPE, FILM TYPE, FILTERS, CAMERA SETTINGS, WHEN DEVELOPED, ETC. ORIGINAL NEGATIVES ARE NECESSARY FOR PHOTOGRAPHIC ANALYSIS. If you wish to have items returned to you, please indicate.
46. Have any other groups or individuals interviewed you? Salmon News Apr 16 If so, please give names and date of interview.

NO

RE: UFO's

Dear Dr. Hynek:

Saturday evening, April 13, 1968, eight of us had a rather unusual experience that I feel should be registered with your reports of UFO's.

This letter is not a hoax, as the men that witnessed this phenomenon are business executives of good reputation in the San Francisco Bay Area. If you need a list of names I shall be happy to supply you with them.

We were just departing from a friend's home high on a dark hill in Albany, California (about 12:30 a.m.). We had not been drinking as we had been playing bridge. While standing in the street saying goodnight, one of the men noticed something in the sky headed directly towards us. It was a bright, bright ball of light. As it drew closer we could see that it was very shiny (sort of like a highly polished piece of aluminum), with exhaust, similar to our rockets, coming from underneath. The metal body was so shiny that we could not determine the size or shape - except that the exhaust came from underneath. It was very quiet. There wasn't one bit of noise as it passed directly over our heads. It came from out of the west (from the ocean), circled along the eastshore of the Bay, then disappeared, headed northwest. Enclosed is a map of the route.

My husband said it could have been anywhere from 1,000 feet to 5,000 feet high as there was no way to judge the elevation.

Our first thought was that it must be a weather balloon, but there wasn't a breeze blowing that evening. If there had been, in order to move a balloon at that rate of speed, we would have soon had a cyclone. Besides that, it stayed at about the same elevation until it disappeared.

I work for the University of California Press/Production Department. Our Space Sciences Laboratory referred you to me.

DAILY WEATHER MAPS

WEEKLY SERIES APRIL 15-21, 1968

The charts in this publication are a continuation of the principal charts of the Weather Bureau publication, Daily Weather Map. They include the Surface Weather Map, the 500-Millibar Chart, the Highest and Lowest Temperatures Chart, and the Daily Precipitation Chart. All of the charts for one day are arranged on a single page of this publication. They are copied from operational weather maps prepared by the National Meteorological Center, Weather Bureau. The symbols used on the Surface Weather Map and the 500-Millibar Chart are the same as those used previously in Daily Weather Map. An explanatory sheet is available, and may be obtained by writing to: Environmental Science Services Administration, Publications Section, AD 143, Rockville, Maryland 20852.

The Surface Weather Map presents station data and the analysis for 7:00

a.m./e.s.t. Areas of precipitation are indicated by shading. The weather reports that are printed here are only a fraction of those that are included in the operational weather maps, and on which the analyses are based. Occasional apparent discrepancies between the printed station data and the analyses result from those station reports that cannot be included in the published maps because of lack of space.

The 500-Millibar Chart presents the height contours and temperature isotherms of the 500-millibar surface at 7:00 a.m./e.s.t. The height contours are shown as continuous lines, and are labeled in feet above sea level. The temperature isotherms are shown as dashed lines, and are labeled in degrees Celsius. The arrows show the wind direction and speed at the 500-millibar level.

The Highest and Lowest Temperatures Chart presents the maximum and minimum values for the 24-hour period ending at 1:00 a.m./e.s.t. The names of the reporting points can be obtained from the Surface Weather Map. The maximum temperature is plotted above the station location, and the minimum temperature is plotted below this point.

The Precipitation Areas and Amounts Chart indicates by means of shading the areas that had precipitation during the 24 hours ending at 1:00 a.m. Amounts in inches to the nearest hundredth of an inch are for the same period. Incomplete totals are underlined. "T" indicates a trace of precipitation. Dashed lines show the depth of snow on the ground in inches as of 7:00 a.m. of the previous day.

The Surface Weather Map presents station data and the analysis for 7:00

The 500-Millibar Chart presents the height contours and temperature isotherms of the 500-millibar surface at 7:00 a.m./e.s.t. The height contours are shown as continuous lines, and are labeled in feet above sea level. The temperature isotherms are shown as dashed lines, and are labeled in degrees Celsius. The arrows show the wind direction and speed at the 500-millibar level.

The Precipitation Areas and Amounts Chart indicates by means of shading the areas that had precipitation during the 24 hours ending at 1:00 a.m. Amounts in inches to the nearest hundredth of an inch are for the same period. Incomplete totals are underlined. "T" indicates a trace of precipitation. Dashed lines show the depth of snow on the ground in inches as of 7:00 a.m. of the previous day.
