27. INFORMATION WHICH YOU FEEL IS PERTINENT BUT WHICH IS NOT ADEQUATELY COVERED IN THIS QUESTIONNAIRE, ALTERNATIVELY PROVIDE A NARRATIVE EXPLANATION OF THE SIGHTING.

I realize the information on attached form is sparse, but I wrote down all the information I could remember while it was fresh on my mind and mailed same to Wright-Patterson on 22 April, 68. It should be in your office by this time. In addition to the sighting on the night of the 16th, a similar sighting was made on the night of the 17th. This is also covered in the letter, or "diary" already mailed to you.

AF Form 117 w/envelope

April 17, 1968

8:30 - 11:00 P.M.

Objects a, b & c were first seen shortly after 8:30 P.M. on the night of 4/17/68. Object "a" appeared to be about 30° above the horizon; "b" about 35° above; "c" was about 20° above.

The night was very clear and all the stars were clearly visible. The nearest identifying star was the Evening Star, which was about 5° SW to the largest and brightest object, "a".

About 9:40 object "c" began to slowly sink toward the horizon, in a swaying or rocking motion. (During the entire time, objects were visible, with the exception of object "d"; all were blinking red, white & bluish-green intermittently. Objects "b" & "c"

maintained a glowing, reddish appearance, while object "a" was ~~an~~ extremely bright, glowing, & metallic in appearance. Within approximately ten minutes, object "c" had completely disappeared below the horizon. As object "c" began to descend, objects "a" & "b" began to rock with a pendulum motion, all the time blinking their lights. Within 30 minutes of object "c's" disappearance, object "b" had descended to about 5' above the horizon. It was about this time that I noticed object "d" moving rapidly from the Southeast toward object "a", which had begun to glow even more brightly. Within a few seconds object "d" had reached object "a" and either passed beyond my vision, went out or merged with object "a". It seemed to me that they merged together. Then I noticed that object "b" had gone below the horizon. I had a flashlight with me and decided to see if object "a" would respond to signals. I flashed the light toward it several times, three blinks in succession. After about the third or fourth time, the object "a" turned its lights all off. This time in

succession, in apparent acknowledgement.
This was repeated again, with me
flashing the flashlight at it three times.
Again it would fade completely out of
sight three times in acknowledgement.

This sighting was reported to Wright-
Patterson AFB in Dayton, Ohio the same
night.

When I went back outside after reporting
to Wright-Patterson, object "a" was
gone and did not reappear.

One thing I failed to mention was that
while objects b, c & d were disc shaped,
object "a" would appear at times to
be oblong rather than the usual disc
shape it usually assumed.

Also FFA in Greenwood, which is 23 miles
West of Winona reported one plane leaving Greenwood
at 8:50 arriving in Columbus, about 80 miles East
of Winona, ^{8:20} and one plane leaving Greenwood at
9:10 going Southwest of Greenwood. No other
aircraft were reported, so that the planes could
not account for the phenomena witnessed.

The night was partly cloudy, but stars were visible, appearing slightly hazy. About 9:00 P.M. I went outside to watch the skies. Objects "a" & "b" were sharply defined in contrast to the hazy stars. Object "b" was swaying slightly, much in the same way as the previous night. Both objects were blinking different colored lights, red, bright white, bluish-green. The light rotation reminded me of the reflectors used with Christmas trees.

About 9:30 I noticed another object, "c", either come in view slightly to the Northwest of object "b", or it emerged from object "b", I do not know which. Object "c" moved Northwest of object "b". One thing about this

particular object was rather unusual. It was bright metallic looking, disc shaped, blinked no lights. It too was sharply defined in contrast to the hazy stars. It moved in short, staccato, or jerky motion. Then it would stop for a second, back up, and move ahead in the same jerky motion; repeating its stopping & back ups several times before going out of sight behind a group of trees to the Northeast.

Within a few minutes, object 'b' was gone & did not reappear.

Object 'a', however, began to disappear, then reappear in sequences of three at a time. After it repeated this several times I decided to get my flashlight and signal it again as I had done the night before. When I returned with the flashlight, object 'a' was in the process of going "on & off", three times in succession. I blinked the flashlight directly at it three times. This time the object blinked its lights only once. Then it began to glow much more in intensity and disappeared all together.

It did not happen.

I stayed outside for about ten minutes to see if it would happen. Then I had the oddest feeling as if someone were looking over my shoulder. I looked quickly and there was no one there; at least not visibly. My dogs then began barking excitedly and ran to the side of the house as if looking for someone, but there was no one there. Then the neighborhood dogs began barking the same as mine. I became nervous and had the strangest feeling of fear, so I went inside and locked all my doors. Immediately the dogs stopped barking.

4/19/68. About 6:30 P.M.

We were eating supper and my three year old daughter began crying and clawing at her flesh, particularly particularly around the vulva area. I checked her and she had broken out in a rash completely around her waistline, on her lower body and the upper part

of the right thigh on the inside. This appeared to be more of a sunburn than a rash as it was in large wheals, some being the size of my hand span. As I watched, before my own eyes, she began to produce more wheals, spreading over both breasts, shoulders, arms, face and hands. Then her ears became red and inflamed, beginning to swell. The wheals began to spread over her entire body, even to her feet which began to swell, the same as her face and hands. She was in extreme agony. She almost went into hysterics. I bathed her in a soda-water solution and then rubbed baking soda over her much the way I would powder. This seemed to give her some relief, and she slept fitfully most of the night.

4/20/68

This morning my daughter seemed a little better, but by mid-morning she was covered in red wheals again. Her eyes became dilated and she was

itching and burning almost to the point of being unbearable.

Shortly after 11:00 A.M. she was in such agony that my mother took her to her physician, Dr. [REDACTED]. He became visibly alarmed and according to my mother, he took her on in as an emergency patient. He took her on in and gave her a shot, I don't know what kind, and had my mother sit in his office with her while he sat and watched the results of the shot. As the whelps began to fade, he checked her chest and heart often. He could not tell my mother what was wrong with her, but he prescribed medication of two types to be taken three times daily. In spite of the medication, she still breaks out in whelps and small red spots, although not as severe as at first. Today is 4/21/68, the second day of medication. Only a few small spots remain.

I have not mentioned my experience of the night of 4/18, but I cannot escape the feeling that it has something

to do with this particular experience. She was sleeping at the time in the bedroom at the side of the house which attracted the dogs' attention. However, I do not understand why I was unaffected, nor my son and parents who were in bedrooms on the other side of the house.

As I have stated, I have not mentioned my feelings as most people do not take things like this seriously, and I don't think I would like the inside of a nut house. My concern over U.F.O.'s is, however, apparent to most people who know me. These are not the first objects I have ever seen. Many of the sightings I have had were seen by my son, some neighbors, and former Chief of Police.

If you need any further information, please do not hesitate to contact me as I am very much interested in U.F.O.'s. Some of my experiences would take too long to relate by letter. No - I haven't

been visited by little men, taken
space rides, etc., but I have witnessed
some unusual sightings:

I sincerely hope the enclosed
information will be of some value
to you.
