Dear Sirs,

Last week April 17th
my wife saw a falling
object out of the sky about
11:45 P.M. It glowed all
the way to the ground.

The next morning I walked
across the road to hunt
gophers and I spotted this
piece of melted metal on
the ground. I've been hunting
gophers in this area for the
past few days and never
saw it before.

The area was burned
off last fall. Under the matted
the green grass was burned
" "

on the ends that stuck
out of the ground.

The air force base at
Colorado Springs, Col.
contacted me. They would
like a piece of it for show.
I would like to get it
tested before I start cutting
it up. Do you do this kind
of work at this base and
how big of piece would a
person have to send or should
I send the whole piece? It
weighs about 2 pounds it's 11
inches long $4\frac{3}{4}$ inches wide and
about 1 in thick at thickest part.

If I could get some information
on this I would appreciate it very
much.

Write up from

From Satellite or Flying Saucer?

Metal Falls on Area Farm

Harlow Haverkamp, Center Route, Mandan, has a curious piece of flat, aluminum-like metal that he believes fell out of the sky Wednesday night like a falling star.

Meteorologists at the U.S. Weather Bureau in Bismarck who looked at the fragment suggest it may have fallen off

a satellite and melted during its dizzy plunge through space.

But they aren't sure. And Haverkamp can't be sure the object he found was the same glowing streak his wife saw fall out of the sky.

HAVERKAMP, a fireman at

Montana-Dakota Utilities Co., R. M. Heskett plant north of Mandan, lives three miles north of Mandan.

"My wife says this particle fell out of the sky when she was backing out of the yard to go to get me at work," Haverkamp said.

That would be about 11:45 p.m., Wednesday.

"It was glowing just like a falling star," he said.

The next morning, Haverkamp said, he was hunting striped gophers in the area when he spotted the object lying on the ground about 300 feet from the house and in the same direction that his wife had spotted the glowing fragment fall.

Haverkamp said there was an imprint on the ground where the piece fell.

He said he had been over the area a few days before and he would have spotted the fragment if it had been there then.

THE FLAT PIECE is about 11 inches long, 4 $\frac{3}{4}$ inches at its widest point and about an inch at the thickest part.

Haverkamp has scratched and sawed into the metal and it has a silver shine under its scorched exterior.

What the object is Haverkamp doesn't know. But he said he plans to find out.

He said he might take it to Bismarck Junior College for examination or send it somewhere else where proper tests can be made.

At this point, he's not speculating whether he's found a piece of a flying saucer.

Handan, North Dakota

1. On behalf of Aerial Phenomenon Office and Hq Air Force Systems Command, may I express my appreciation to you and your wife for releasing the metallic specimen found in the vicinity of your home to our office for examination.
2. After a close examination of the item by USAF analysts, we are unable to determine the exact identity of the debris. The composition of the unit contains elements which are common, especially aluminum and iron. The physical condition of the item precludes any substantive identification. In view of this, and per your agreement with 1/Lt E. F. Matthews of this office, the item is returned for your retention.

Sincerely,
