Col. Hector Quintanilla, Jr.
FTD(TDET/UFO) Reasearch and
Aerial Phenomenon Division
Wright Patterson AF Base, Ohio 45433

Dear Col. Quintanilla:

Inclosed are photos and a letter that I received when I sent a UFO report to Colorado University. They failed to return my report and I fail to see why, if it were not to be considered the whole thing wasn't returned. Fortunately I retained a copy and it is notorized and signed by a witness. The witness also wrote a report.

I have the negatives to these photos plus the original report but unless I can be assured of these being examined and studied, I prefer to keep them. I would be glad to supply original negatives, reports and other itaas if they will be examined seriously. My personal feeling is that even if the commission at CU was writing a report they could have at least examined my report and given me some expolla nation. I think it said well that "A thing worth doing is worth doing well."

I and another person observed three UFO's in a space of one hour in June. I photographed the first one which was close enough to give an image that could be printed. The photos are on Kodacolor X film (negative color film) so the spectrum of the light could be studied by use of filters, I believe. I have two witnesses actually to the sighting but only onew wrote up a report. These two people are also able to verify my photogprahy as legitimate (they saw me take the pictures as they watched). I think this meets a legal test set forth by Hyneck in his Popular Photography article of about a year past.

I teach engineering and physics at Western College and I have not had any previous belief in "flying saucers". I am only able to say they object looked like nothing I've seen before in the sky at night. I am willing to admit it

Case includes three (3) 8" x 10"
photographs.

Mr. [REDACTED]
Physics and Engineering
Western Wyoming College
Reliance, Wyo. 82901

Dear Mr. [REDACTED]:

Because the project is now engaged in writing a final report of the study it is not possible to add any new sighting materials. If you wish you might send the photographs, which I am returning herewith, and a copy of your report to Project Blue Book for consideration there. The address is: Col. Hector Quintanilla, Jr. FTD(TDET/UFO) Research and Aerial Phenomenon Div., Wright Patterson AF Base, Ohio, 45433.

We appreciate your interest.

Sincerely,

E. U. Condon

EUC:s

may be a identifiable object of somekind but there have been sightings in this area before and since. I think it a favorable observational area for UFO's.

I would like to retain my rights to the photographs as to ownership. If they are to be published for profit I would expect to retain rights to the photos and the subsequent profits. I am however willing to submit them as a scientific endeavor in hopes it will show that UFO's can be photographed and witnesses to the sightings are available. One of the students here saw a similar object in the sky the same night as well as we three who saw it. It was there--whatever it was and it was photographed.

Please know that I am interested in reaching the truth whither it turns out to be "flying saucers" or just a planes light. I do believe all reports should be considered seriously and especially those with tangible evidence of a sighting.

By the way you may know that we have a radar station south of Rocksprings, Wyo. and they may have had an observation on the same date(June 13)I think).

Thank you for your help.

Yours truly,

 Instructor
Engineering and Physics
Head, Division of Science

UFO Observation and Photographs of June 1968

Mr. [REDACTED]
Physics and Engineering
Western Wyoming College
Reliance, Wyoming 82901

Reference your UFO observation and photographs of June 1968. Usually the Air Force doesn't accept UFO sightings over 30 days old because pertinent data, such as aircraft flight records and balloon-launch records, may already have been destroyed. We have also found that an observer usually forgets many details of the sighting after 30 days. However, if you would complete the inclosed AF Form 117 and Photo-Data Sheet and return them to this office along with the original negatives and any other information or narrations that you feel are pertinent, we will do our best to identify the stimulus of your sighting. Thank you for your cooperation and concern in this matter.
