FORM

FTD SEP 63 0-329 (TDE) Previous editions of this form may be used.

13. DRAW A PICTURE THAT WILL SHOW THE SHAPE OF THE PHENOMENON. INCLUDE AND LABEL ANY DETAILS THAT MIGHT HAVE APPEARED AS WINGS OR PROTRUSIONS, AND INDICATE EXHAUST OR VAPOR TRAILS. INDICATE BY AN ARROW THE DIRECTION THE PHENOMENON WAS MOVING.

It appeared as sphere but we were directly under it and had to look almost straight up. It could have been a flat round object. appeared to have a

moving antenna arm and a ring around it also a vapor trail emitted at one time in the course of visibility

15. WHAT WAS THE ANGULAR SIZE? HOLD A MATCH AT ARM'S LENGTH IN FRONT OF A KNOWN OBJECT, SUCH AS A STREET LAMP OR THE MOON. NOTE HOW MUCH OF THE OBJECT IS COVERED BY THE HEAD OF THE MATCH. NOW IF YOU HAD BEEN ABLE TO PERFORM THIS EXPERIMENT AT THE TIME OF THE SIGHTING, ESTIMATE WHAT FRACTION OF THE PHENOMENON WOULD HAVE BEEN COVERED BY THE MATCH HEAD.

17. DID YOU OBSERVE THE PHENOMENON THROUGH ANY OF THE FOLLOWING? INCLUDE INFORMATION ON MODEL, TYPE, FILTER, LENS PRESCRIPTION OR OTHER APPLICABLE DATA.

☒ EYEGLASSES	☐ CAMERA VIEWER
☒ SUNGLASSES	☐ BINOCULARS
☐ WINDSHIELD	☐ TELESCOPE
☐ SIDE WINDOW OF VEHICLE	☐ THEODOLITE
☐ WINDOWPANE	☒ OTHER <i>Regular Eyes -</i>

A. DO YOU ORDINARILY WEAR GLASSES? ☐ YES ☒ NO

B. DO YOU USE READING GLASSES? ☐ YES ☐ NO

18. WHAT WAS YOUR IMPRESSION OF THE SPEED OF THE PHENOMENON? GIVE ESTIMATE OF SPEED *2000 mi P.H.R.*

19. WHAT WAS YOUR IMPRESSION OF THE DISTANCE OF THE PHENOMENON? GIVE ESTIMATE OF DISTANCE *10,000 FT.*

20. IN ORDER THAT WE MAY OBTAIN AS CLEAR A PICTURE AS POSSIBLE OF WHAT YOU SAW, DESCRIBE IN YOUR OWN WORDS A COMMON OBJECT OR OBJECTS WHICH, WHEN PLACED IN THE SKY, SIMILAR TO WHERE YOU NOTED THE PHENOMENON, WOULD BEAR SOME RESEMBLANCE TO WHAT YOU SAW. DESCRIBE SIMILARITIES AND DIFFERENCES BETWEEN THE COMMON OBJECT AND WHAT YOU SAW.

*a 17 year old girl - Difference in sight
a 15 year old Boy - would be - antenna and
myself - 54 retro emission.*

my wife 43 - all seen the same thing.

I & I threw a silver agate in the air and the sun reflected on it while it was in the air and I was directly under it I would have seen the same thing - it was quite large considering the distance and height.

21. DID YOU NOTICE ANY ODOR, NOISE, OR HEAT EMANATING FROM THE PHENOMENON OR ANY EFFECT ON YOURSELF, ANIMALS OR MACHINERY IN THE VICINITY? ☐ YES ☒ NO. IF "YES," DESCRIBE.

A. DID THE PHENOMENON DISTURB THE GROUND OR LEAVE ANY PHYSICAL EVIDENCE. ☐ YES ☒ NO. IF "YES," DESCRIBE.

DAILY WEATHER MAPS

WEEKLY SERIES JUNE 3-9, 1968

The charts in this publication are a continuation of the principal charts of the Weather Bureau publication, Daily Weather Map. They include the Surface Weather Map, the 500-Millibar Chart, the Highest and Lowest Temperatures Chart, and the Daily Precipitation Chart. All of the charts for one day are arranged on a single page of this publication. They are copied from operational weather maps prepared by the National Meteorological Center, Weather Bureau. The symbols used on the Surface Weather Map and the 500-Millibar Chart are the same as those used previously in Daily Weather Map. An explanatory sheet is available, and may be obtained by writing to: Environmental Science Services Administration, Publications Section, AD 143, Rockville, Maryland 20852.

The Surface Weather Map presents station data and the analysis for 7:00

a.m./e.s.t. Areas of precipitation are indicated by shading. The weather reports that are printed here are only a fraction of those that are included in the operational weather maps, and on which the analyses are based. Occasional apparent discrepancies between the printed station data and the analyses result from those station reports that cannot be included in the published maps because of lack of space.

The 500-Millibar Chart presents the height contours and temperature isotherms of the 500-millibar surface at 7:00 a.m./e.s.t. The height contours are shown as continuous lines, and are labeled in feet above sea level. The temperature isotherms are shown as dashed lines, and are labeled in degrees Celsius. The arrows show the wind direction and speed at the 500-millibar level.

The Highest and Lowest Temperatures Chart presents the maximum and minimum values for the 24-hour period ending at 1:00 a.m./e.s.t. The names of the reporting points can be obtained from the Surface Weather Map. The maximum temperature is plotted above the station location, and the minimum temperature is plotted below this point.

The Precipitation Areas and Amounts Chart indicates by means of shading the areas that had precipitation during the 24 hours ending at 1:00 a.m. Amounts in inches to the nearest hundredth of an inch are for the same period. Incomplete totals are underlined. "T" indicates a trace of precipitation. Dashed lines show the depth of snow on the ground in inches as of 7:00 a.m. of the previous day.

The Surface Weather Map presents station data and the analysis for 7:00

27. INFORMATION WHICH YOU FEEL IS PERTINENT BUT WHICH IS NOT ADEQUATELY COVERED IN THIS QUESTIONNAIRE, ALTERNATIVELY PROVIDE A NARRATIVE EXPLANATION OF THE SIGHTING.

When I called the base I tried to get someone at base to go out and look up. I told them plane had taken off and to notify all personnel. But I was informed at the time the gentleman was by himself and could contact no one. I have a camera capable of a picture of this type but had no film in it. Sorry.

In April 7 1967 I and [REDACTED] an Executive at the McCall Corporation here in Dayton at Dark did see a light object Dart around and back and forth above the Goodview Hospital here in Dayton - we did not report it because we felt it could be some light reflection. This was visible for 35 minutes.

Thank you

SIGHTING OF UNIDENTIFIED PHENOMENA QUESTIONNAIRE

BUDGET BUREAU APPROVAL
NUMBER 21-2233

THIS QUESTIONNAIRE HAS BEEN PREPARED SO THAT YOU CAN GIVE THE U.S. AIR FORCE AS MUCH INFORMATION AS POSSIBLE CONCERNING THE UNIDENTIFIED PHENOMENON THAT YOU HAVE OBSERVED. PLEASE TRY TO ANSWER ALL OF THE QUESTIONS. THE INFORMATION YOU GIVE WILL BE USED FOR RESEARCH PURPOSES. YOUR NAME WILL NOT BE USED IN CONNECTION WITH ANY OF YOUR STATEMENTS OR CONCLUSIONS WITHOUT YOUR PERMISSION. RETURN TO AIR FORCE BASE INVESTIGATOR FOR FORWARDING TO FTD (TDETR), WRIGHT-PATTERSON AFB, OHIO 45433, 1AW AFR 80-17. (IF ADDITIONAL SHEETS ARE NEEDED FOR NARRATIVE OR SKETCHES ATTACH SECURELY TO THIS FORM OR ANNOTATE WITH YOUR NAME FOR IDENTIFICATION.)

1. WHEN DID YOU SEE THE PHENOMENON?

DAY 16 MONTH Jun YEAR 68

2. WHAT TIME DID YOU FIRST SIGHT THE PHENOMENON?

HOUR 19 MINUTES 00 ☐ A.M. ☒ P.M.

3. WHAT TIME DID YOU LAST SIGHT THE PHENOMENON?

HOUR 19 MINUTES 20 ☐ A.M. ☒ P.M.

4. TIME/ZONE

☒ DAYLIGHT SAVINGS☐ STANDARD☒ EASTERN☐ CENTRAL☐ MOUNTAIN☐ PACIFIC☐ OTHER

5. WHERE WERE YOU WHEN YOU SAW THE PHENOMENON? IF IN CITY, GIVE THE NEAREST STREET ADDRESS AND INDICATE ON A HAND DRAWN MAP WHERE YOU WERE STANDING WITH REFERENCE TO THE ADDRESS. IF IN THE COUNTRY, IDENTIFY THE HIGHWAY YOU WERE ON OR NEAR AND TRY TO FIX A DISTANCE AND DIRECTION FROM SOME RECOGNIZABLE LANDMARK.

~~XXXXXXXXXXXXXXXXXXXX~~ DR. Huber HTS

6. IMAGINE YOU ARE AT THE POINT SHOWN IN THE SKETCH, PLACE AN "A" ON THE CURVED LINE TO SHOW HOW HIGH THE PHENOMENON WAS ABOVE THE HORIZON, OR SKYLINE, WHEN FIRST SEEN. PLACE A "B" ON THE SAME CURVED LINE TO SHOW HOW HIGH ABOVE THE HORIZON THE PHENOMENON WAS WHEN LAST SEEN.

Rec'd in TDPT (4/0) on 17 June 68

9A. NOW IMAGINE YOU ARE AT THE CENTER OF THE COMPASS ROSE. PLACE AN "A" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN FIRST SEEN. PLACE A "B" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN LAST SEEN.

7. IN THE SKETCH BELOW, PLACE AN "A" AT THE POSITION OF THE PHENOMENON WHEN FIRST SEEN, AND A "B" AT THE POSITION OF THE PHENOMENON WHEN LAST SEEN. CONNECT THE "A" AND "B" WITH A LINE TO APPROXIMATE THE MOVEMENT OF THE PHENOMENON BETWEEN "A" AND "B". THAT IS, SCHEMATICALLY SHOW WHETHER THE MOVEMENT APPEARED TO BE STRAIGHT, CURVED OR ZIG-ZAG. REFER TO SMALLER SKETCH AS AN EXAMPLE OF HOW TO COMPLETE THE LARGER SKETCH.

8. WHERE WERE YOU WHEN YOU SAW THE PHENOMENON? (Check appropriate blocks.)			
☒ OUTDOORS		☐ IN BUSINESS SECTION OF CITY	
☐ IN BUILDING		☒ IN RESIDENTIAL SECTION OF CITY	
☐ IN CAR ☐ AS DRIVER ☐ AS PASSENGER		☐ IN OPEN COUNTRYSIDE	
☐ IN BOAT		☐ NEAR AIRFIELD	
☐ IN AIRPLANE ☐ AS PILOT ☐ AS PASSENGER		☐ FLYING OVER CITY	
☐ OTHER		☐ FLYING OVER OPEN COUNTRY	
		☐ OTHER	
A. IF YOU WERE IN A VEHICLE, COMPLETE THE FOLLOWING:			
WHAT DIRECTION WERE YOU MOVING?		HOW FAST WERE YOU MOVING?	
☐ NORTH	☐ EAST	DID YOU STOP ANYTIME WHILE OBSERVING THE PHENOMENON? ☐ YES ☐ NO	
☐ SOUTH	☐ WEST		
☐ NORTHEAST	☐ SOUTHEAST		
☐ NORTHWEST	☐ SOUTHWEST		
EXPLAIN WHETHER SUCH MOVEMENT AFFECTS YOUR SKETCHES IN ITEMS 5 AND 6.			
DESCRIBE TYPE OF VEHICLE YOU WERE IN AND TYPE OF ROAD, TERRAIN OR BODY OF WATER YOU TRAVERSED DURING THE SIGHTING. STATE WHETHER WINDOWS OR CONVERTIBLE TOP WERE UP OR DOWN.			
HOW MUCH OTHER TRAFFIC WAS THERE?			
DID YOU NOTICE ANY AIRPLANES? ☒ YES ☐ NO. IF "YES," DESCRIBE WHEN THEY WERE IN SIGHT RELATIVE TO THE TIME OF SIGHTING THE PHENOMENON AND WHERE THEY WERE IN THE SKY RELATIVE TO THE POSITION OF THE PHENOMENON. ONE TAKING OFF FROM WP. WHEN ACFT APPROACHED UFO WAS OVER WP.			
9. HOW LONG WAS THE PHENOMENON IN SIGHT?			
LENGTH OF TIME		☒ CERTAIN OF TIME	☐ NOT VERY SURE
20 min		☐ FAIRLY CERTAIN	☐ JUST A GUESS
HOW WAS TIME DETERMINED? Clock			
WAS THE PHENOMENON IN SIGHT CONTINUOUSLY? ☐ YES ☒ NO. IF "NO," INDICATE WHETHER THIS IS DUE TO YOUR MOVEMENT OR THE BEHAVIOR OF THE PHENOMENON, AND DESCRIBE SUCH MOVEMENT OR BEHAVIOR. INDICATE DISAPPEARANCES ON PREVIOUS SKETCHES. IN & OUT of clouds			

10. IF THERE WERE MORE THAN ONE PHENOMENON, HOW MANY WERE THERE? DRAW A PICTURE TO SHOW HOW THEY WERE ARRANGED. DID THIS ARRANGEMENT CHANGE DURING THE SIGHTING?

11. CONDITIONS (Check appropriate blocks.)

A. SKY		B. WEATHER	
☒ DAY		CUMULUS CLOUDS (Low fluffy)	FOG OR MIST
☐ TWILIGHT		CIRRUS CLOUDS (High fleecy or Herring-bone)	HEAVY RAIN
☐ NIGHT			LIGHT RAIN OR DRIZZLE
☐ CLEAR		NIMBUS CLOUDS (Rain)	HAIL
☐ PARTLY CLOUDY		CUMULONIMBUS CLOUDS (Thunderstorms)	SNOW OR SLEET
☐ COMPLETELY OVERCAST			UNKNOWN
		HAZE OR SMOG	NONE OF THE ABOVE

C. IF THE SIGHTING WAS AT TWILIGHT OR NIGHT, WHAT DID YOU NOTICE ABOUT THE STARS AND MOON?

(1) STARS	(2) MOON
☐ NONE	☐ BRIGHT MOONLIGHT
☐ A FEW	☐ MOON WITH HALO
☐ MANY	☐ MOON HIDDEN BY CLOUDS
☐ UNKNOWN	☐ PARTIAL (New or quarter)

D. IF SIGHTING WAS IN DAYLIGHT, WAS THE SUN VISIBLE? ☒ YES ☐ NO. IF "YES," WHERE WAS THE SUN AS YOU FACED THE PHENOMENON?

☐ IN FRONT OF YOU	☐ TO YOUR RIGHT	☐ OVERHEAD (Near noon)
☒ IN BACK OF YOU	☐ TO YOUR LEFT	☐ UNKNOWN

E. SPECIFY THE MAJOR SOURCE OF ILLUMINATION PRESENT DURING THE SIGHTING, SUCH AS THE SUN, HEADLIGHTS OR STREET LAMP, ETC. FOR TERRESTRIAL ILLUMINATION, SPECIFY DISTANCE TO LIGHT SOURCE.

SUN

12. GIVE A BRIEF DESCRIPTION OF THE PHENOMENON, INDICATING WHETHER IT APPEARED DARK OR LIGHT, WHETHER IT REFLECTED LIGHT OR WAS SELF-LUMINOUS AND WHAT COLORS YOU NOTICED. DESCRIBE YOUR IMPRESSION OF WHETHER IT WAS SOLID OR TRANSPARENT, WHETHER EDGES WERE SHARP OR FUZZY. DESCRIBE THE SHAPE OR INDICATE IF IT APPEARED AS A POINT OF LIGHT. INDICATE COMPARISONS WITH OTHER OBSERVED OBJECTS, LIKE STARS, A LIGHT OR OTHER OBJECT IN YOUR FIELD OF VIEW.

Round, silver with white Ring (similar to SATURN)

13.	DID THE PHENOMENON	YES	NO	UNKNOWN
	MOVE IN A STRAIGHT LINE?	☒		
	STAND STILL AT ANYTIME?			
	SUDDENLY SPEED UP AND RUN AWAY?			
	BREAK UP IN PARTS AND EXPLODE?			
	CHANGE COLOR?			
	GIVE OFF SMOKE?			
	CHANGE BRIGHTNESS?			
	CHANGE SHAPE?			
	FLASH OR FLICKER?			
	DISAPPEAR AND REAPPEAR?			
	SPIN LIKE A TOP?			
	MAKE A NOISE?			
	FLUTTER OR WOBBLE?			

14. WHAT DREW YOUR ATTENTION TO THE PHENOMENON?

SON SAW IT & CALLED EVERYONE ELSE

A. HOW DID IT FINALLY DISAPPEAR?

CLOUDS & DISTANCE

B. DID THE PHENOMENON MOVE BEHIND OR IN FRONT OF SOMETHING, LIKE A CLOUD, TREE, OR BUILDING AT ANY TIME?

☒ YES ☐ NO. IF "YES," DESCRIBE.

Our investigations indicate that you probably saw a weather balloon that was launched from Sulfur Grove Weather Station. Ordinarily, they launch the balloons at 6:00 pm plus or minus $\frac{1}{2}$ hr. These balloons can be seen for as long as $1\frac{1}{2}$ hours on a clear day. The actual balloon is on top under which is attached a hoop to stabilize the parachute which returns the payload to the ground. A cable hangs down from the balloon and at the end the small payload is attached.

Thank you for reporting your observation to the Air Force.

Dear Sirs,

I am writing to you on account of the book on, letters to you, printed in 1967 which I have come across.

My family and I spotted a UFO one Saturday night while watching tv. It was during the summer (1968) and our front door was open, suddenly my brother called our attention to a small hovering light a few miles away. It was a white light. It started to move up and to the north, as it moved it began to pick up speed. In about 1/2 min. it was over our house and changing color from white to light green to pink and then to white again. I had grabbed my telescope to look at it.

Description: It was a light orange color. It was made up of a half circle with what looked like a huge, huge, retractable antenna on the back.

Dear Sir,

In June of '68 I saw two flying saucers hovering in the air. It was calm at first. Then a ring of light went from one to the other. One started shaking then it flew up. A fragment came down to me. It did not glow at all though. I enclosed the fragment.

Sincerely
Arthur Lundquist

P.S. Tell me what the fragment was and give me some more information about flying saucers.

Because of the conversation between Lt Col Quintanilla and Dr. Craig, of the Univ of Colorado, Col Quintanilla does not feel that a wet analysis of the sample, to determine carbon content would be justified. Because the sample is not from the continental U.S. we aren't sure if we could justify getting the work done anyhow. I'm sorry to have been of so little help on this sample. The sample is inclosed and is undamaged in any way.

Reference conversation between Dr. Craig, University of Colorado and Lt Colonel Quintanilla, Aerial Phenomena Office on 17 June 1968. Dr. Craig personally investigated the matter and stated that the object could not have come from the sky since there was no evidence of any impact and that it (the object) was definitely terrestrial in nature.

Common:

First of all I question the ~~conclusions~~ conclusions reached by Mr. Rowland. He identified the metallic material as an austenitic high-manganese steel. Commercial austenitic manganese steels usually contain 1-1.4% C and 10-14% Mn in addition to other alloying additions in small amounts. The primary factor is the apparent total lack of any carbon, a element found in basically all steels. Some of the austenitic stainless steel contain about a 0.08 maximum carbon content, but these steels contain 11-18% Chromium and usually some nickel.

Accepting a large percentage error in their analysis I could agree that the material is nothing more than a common steel. This is of course as if some carbon was present. Since a semi-quantitative spectrographic analysis was made there is room for error -

Dear Dr. Hynek:

Thank you for your letter of inquiry concerning the 1000 lb. piece of metal being held by the Canadian Government which is believed by some people to be a crashed UFO. Unfortunately, I had assumed that you had personal access to this metal through the U.S. Air Force Project Blue Book and Air Technical Intelligence. The piece of metal which I am submitting was cut from a larger piece in my possession. The original 1000 lb. piece measuring about 6 x 7 feet and 1-1/2 feet thick is in the custody of Bill Riddell, who was Wilbert Smith's assistant and now directs the UFO study in Canada. I also have photographs of the original piece. There is considerable romance behind the conditions under which the metal was found during the latter part of June 1960, 20 miles north of Quebec City on the edge of the St. Lawrence River. This information is also available upon your request.

I am enclosing a copy of the complete analysis made by John F. Rowland, Senior Scientific Officer, Physical Chemistry Section, Mineral Sciences Division, Mine's Branch, Department of Mines and Technical Surveys, Ottawa, Canada using X-ray diffraction and spectographic techniques. In his summary you will note, that it is identified as austenitic high-manganese steel. He concluded that it is almost certain to have been of terrestrial rather than of meteoric origin.

The article by John Fuller in the May 14 issue of Look Magazine was very revealing concerning the attitude of Dr. Edward Condon and Robert J. Low to this scientific research project. It will be a serious setback to the study of the UFO phenomena if their report is negative in nature as implied by the tone of the article. The word "trick" in Low's letter of August 6, 1966 to University officials prior to signing the contract is the key to the lack of good faith under which the project was undertaken and apparently conducted. To the scientist and the student of the UFO phenomena, the University of Colorado Project could be the blunder of the century.

I will be very interested in obtaining your analysis of this metal for comparative purposes. Robert Q. Achzehner of Villa Park, Illinois advised me that he has given a piece of this same metal to your colleague, Fred Beckman at the University of Chicago for study. Bob Achzehner and I are co-chairmen of the Illinois Section of Aerial Phenomena Research Organization with headquarters in Tucson, Arizona. I am very proud to have organized the first such statewide section, which has since spread from Connecticut to Hawaii.

If I can be of further assistance, please call upon me, because I do appreciate the interest you have shown to date.

EXAMINATION OF AN UNIDENTIFIED AERIAL OBJECT RECEIVED
FROM A REPRESENTATIVE OF THE DEPARTMENT OF TRANSPORT,
OTTAWA, IN DECEMBER, 1960.

by

John F. Rowland*

SUMMARY OF RESULTS

An unidentified aerial object,
which was received from a representative
of the Department of Transport, Ottawa,
has been examined by X-ray diffraction and
spectrographic techniques. The irregularly-
shaped, metallic object was identified as
martensitic high-manganese steel. It is almost
certain to have been of terrestrial rather than
of meteoric origin.

*Senior Scientific Officer, Physical Chemistry Section, Mineral
Sciences Division, Mines Branch, Department of Mines and
Technical Surveys, Ottawa, Canada.

On December 30, 1960, an irregularly-shaped mass of a silvery metal was submitted to the Mineral Sciences Division by Mr. E.K. Swinnings of the Technical Services Division of the Mines Branch. The material had been received from a representative of the Department of Transport, Ottawa, and was described as an unidentified aerial object. The requested identification was done by X-ray diffraction and spectrographic analyses in the Physical Chemistry and Analytical Chemistry Sections, respectively.

The surface condition indicated that the object had been subjected to high temperatures. Preliminary tests showed that the material was very weakly ferromagnetic.

EXPERIMENTAL TECHNIQUES

X-ray powder diffraction patterns were obtained of material taken from a freshly-exposed metallic surface of the sample, and of the soft, brown deposit present on portions of the surface as received. The patterns were obtained using 57.3 mm diameter Debye-Scherrer powder cameras and Fe K α radiation. The films were interpreted by comparison with data published in the X-Ray Powder Data File issued by the American Society for Testing Materials, and by direct comparison with available standard films. The value of the unit-cell dimension of the cubic compound, which was the predominant constituent of the metallic object, was

calculated from the measurement of the spacing of the diffraction lines. Since the lines were broad, accurate measurements could not be made, and the calculated unit-cell dimension can be considered only as an approximation.

The unidentified aerial object was submitted to the Analytical Chemistry Section, where a portion was filed off and, from this, a semi-quantitative spectrographic analysis was obtained. The results of this analysis were provided to the Physical Chemistry Section, and were correlated with the X-ray diffraction interpretations.

EXPERIMENTAL RESULTS

The X-ray diffraction pattern obtained from the metallic portion of the sample was interpreted as representing diffractions from the following compounds:-

- 1) predominant constituent: face-centred cubic compound with unit-cell dimension, $a \approx 3.62\text{\AA}$ approximately; corresponds to a gamma-iron solid solution as found in austenitic steel (austenite), e.g., nickel-bearing and manganese-bearing types, and to meteoric iron (taenite).

- 2) trace constituents: quartz and calcite.

The X-ray diffraction pattern obtained from the small amounts of soft brown material on the surface of the aerial object was interpreted as follows:-

- 1) major constituent: quartz,
- 2) large minor constituent: spinel-type compound, close to magnetite, Fe_3O_4 ,
- 3) small minor constituent: goethite, $\alpha\text{-Fe}_2\text{O}_3 \cdot \text{H}_2\text{O}$,
- 4) trace constituent: lepidocrocite, $\gamma\text{-Fe}_2\text{O}_3 \cdot \text{H}_2\text{O}$.

Neither X-ray diffraction pattern showed any indication of any other crystalline constituents, or of any amorphous material.

The results of the semi-quantitative spectrographic analysis are as follows:-

Fe = PC,

Mn = 6, Si = 2, Ni = 0.6,

Cr = 0.3, Cu = 0.2, W = 0.2, Sn = 0.1, Al = 0.1,

Co = 0.04, Mg = 0.03, Ba = 0.02, V = 0.008,

Mo = tr, Ti = tr.

The abbreviations PC and tr indicate principal constituent and trace, respectively. The figures given are percentages by weight.

CONCLUSIONS

The X-ray diffraction analysis indicated that the unidentified serial object consisted of a metallic face-centred cubic compound, with a unit-cell dimension agreeing with those of 1) austenitic steel, and 2) meteoric iron. The semi-quantitative spectrographic analysis showed, however, that there was insufficient nickel present for the material to be of meteoric origin. The amount of

manganese detected in the spectrographic analysis suggests that the metallic material is best described as high-manganese austenitic steel. This is consistent with the very weak ferromagnetic nature of the metal.

The iron oxide and the hydrated iron oxides on the surface are normal results of the exposure of steel to the atmosphere. The amounts of quartz and calcite detected by X-ray diffraction are very small, and are common extraneous materials.

The low nickel and high manganese content are not consistent with a meteoric origin, whereas they are consistent with common high-tensile steels. The object is therefore considered to be of terrestrial origin.

Subj: UFO Sighting of 16 June 1968

Called Sulfur Grove and asked if they had launched a balloon on 16 June 1968 that would have been able to be seen from 6:45 pm to 7:20 pm. The weather officer said although the records had been destroyed it certainly could have been one of their balloons. Ordinarily they launch the balloons at 6:00 pm plus or minus $\frac{1}{2}$ hr and that the balloon can sometimes be seen for as long as $1\frac{1}{2}$ hrs. The balloon is on top under which is attached a hoop to stabilize the parachute. A cable hangs down from the balloon and at the end a small payload is attached.

Dear Sir -

Many years ago when in the air
force I was aboard a C-47
flying to Washington state (Paine Field)
to rejoin my group which was
assigned there for Operation
Whisper-sock. It was an F-86
out fit and the only officer I
recall at the present was a
Capt. Scott - who I told my story
to -

to -

I had seen four UFO's in formation,
over the state of Oregon or northern
California can't say for sure which
but surely one of the two - when
I first spotted them I thought
they were F-86's but soon realized

they were not A/c of a kind known
to me - We were flying north
and the U.F.O's were flying south.
altitude of C-47 approx 9000 to 10,000
ft, U.F.O's approx 200 ft. below us +
300 ft to our right - sky overcast
& visibility, clear, it was daylight.
time of day was 1300 hrs, or there
about -

The following is path of flight of U.F.O's
I had seen -

No 3 reflected light from sun
when it rejoined No 4

all four C.P.O.'s ~~went~~ went

into a 45° climb up & out of sight.

Dear Col. Quintanilla;

A matter of a week or so ago, I recall reading in our news paper and hearing on the television news, that the UFO is something out of a sick mind, that the UFO can not come from outer-space. Sir, this is insufficient and I can not buy it.

There are space-ships and very real, as to where they come from, like the Air Force and Project Blue Book, I like-wise don't know, but I can tell you, they are real!

Believe me, I am not a nut or am I looking for fame, I'm only trying to make you people realize that UFO's are flying around!

As to what kind of beings they may be or as to what kind of power they use of cause is unknowing to me, I can only say, I have my own ideas on that matter.

It is, in my mind, that is very possible for them to come from outer-space and time is of no matter. However, if this is not true, then they come from the USSR or the USA and I doubt this very much.

I would appreciate it very much that we get the truth once and for all on this matter.

5. WHERE WERE YOU WHEN YOU SAW THE PHENOMENON? IF IN CITY, GIVE THE NEAREST STREET ADDRESS AND INDICATE ON A HAND DRAWN MAP WHERE YOU WERE STANDING WITH REFERENCE TO THE ADDRESS. IF IN THE COUNTRY, IDENTIFY THE HIGHWAY YOU WERE ON OR NEAR AND TRY TO FIX A DISTANCE AND DIRECTION FROM SOME RECOGNIZABLE LANDMARK.

~~████████████████████~~ OAKLAND, CALIF.

In front of house

I was looking out the living room window in front of house.

6. IMAGINE YOU ARE AT THE POINT SHOWN IN THE SKETCH, PLACE AN "A" ON THE CURVED LINE TO SHOW HOW HIGH THE PHENOMENON WAS ABOVE THE HORIZON, OR SKYLINE. WHEN FIRST SEEN. PLACE A "B" ON THE SAME CURVED LINE TO SHOW HOW HIGH ABOVE THE HORIZON THE PHENOMENON WAS WHEN LAST SEEN.

6A. NOW IMAGINE YOU ARE AT THE CENTER OF THE COMPASS ROSE. PLACE AN "A" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN FIRST SEEN. PLACE A "B" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN LAST SEEN.

7. IN THE SKETCH BELOW, PLACE AN "A" AT THE POSITION OF THE PHENOMENON WHEN FIRST SEEN, AND A "B" AT THE POSITION OF THE PHENOMENON WHEN LAST SEEN. CONNECT THE "A" AND "B" WITH A LINE TO APPROXIMATE THE MOVEMENT OF THE PHENOMENON BETWEEN "A" AND "B". THAT IS, SCHEMATICALLY SHOW WHETHER THE MOVEMENT APPEARED TO BE STRAIGHT, CURVED OR ZIG-ZAG. REFER TO SMALLER SKETCH AS AN EXAMPLE OF HOW TO COMPLETE THE LARGER SKETCH.

I placed a C because it moved in a straight line to the right then shot straight out to sea (not C but sea) over San Francisco on San Mateo in that direction.

I looked out the living room window to see if the truck was ready to go. It was so close and right then. You couldn't help but notice it. I watched it until it finally disappeared.

A. HOW DID IT FINALLY DISAPPEAR?

It moved slowly off to my right then picked up tremendous speed and took off heading out to sea.

B. DID THE PHENOMENON MOVE BEHIND OR IN FRONT OF SOMETHING, LIKE A CLOUD, TREE, OR BUILDING AT ANY TIME?
☐ YES ☒ NO. IF "YES," DESCRIBE.

15. DRAW A PICTURE THAT WILL SHOW THE SHAPE OF THE PHENOMENON. INCLUDE AND LABEL ANY DETAILS THAT HAVE APPEARED AS WINGS OR PROTRUSIONS, AND INDICATE EXHAUST OR VAPOR TRAILS. INDICATE BY AN ARROW HOW THE DIRECTION THE PHENOMENON WAS MOVING.

16. WHAT WAS THE ANGULAR SIZE? HOLD A MATCH AT ARM'S LENGTH IN FRONT OF A KNOWN OBJECT, SUCH AS A STREET LAMP OR THE MOON. NOTE HOW MUCH OF THE OBJECT IS COVERED BY THE HEAD OF THE MATCH. NOW IF YOU HAD BEEN ABLE TO PERFORM THIS EXPERIMENT AT THE TIME OF THE SIGHTING, ESTIMATE WHAT FRACTION OF THE PHENOMENON WOULD HAVE BEEN COVERED BY THE MATCH HEAD.

I would say less than $\frac{1}{4}$ of the object would have been covered. It was just too close to cover anymore than that.

6A. NOW IMAGINE YOU ARE AT THE CENTER OF THE COMPASS ROSE. PLACE AN "A" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN FIRST SEEN. PLACE A "B" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN LAST SEEN.

B. DO YOU USE READING GLASSES? ☐ YES ☒ NO

18. WHAT WAS YOUR IMPRESSION OF THE SPEED OF THE PHENOMENON? GIVE ESTIMATE OF SPEED fast
I couldn't give a good estimate

19. WHAT WAS YOUR IMPRESSION OF THE DISTANCE OF THE PHENOMENON? GIVE ESTIMATE OF DISTANCE 10 miles

20. IN ORDER THAT WE MAY OBTAIN AS CLEAR A PICTURE AS POSSIBLE OF WHAT YOU SAW, DESCRIBE IN YOUR OWN WORDS A COMMON OBJECT OR OBJECTS WHICH, WHEN PLACED IN THE SKY, SIMILAR TO WHERE YOU NOTED THE PHENOMENON, WOULD BEAR SOME RESEMBLANCE TO WHAT YOU SAW. DESCRIBE SIMILARITIES AND DIFFERENCES BETWEEN THE COMMON OBJECT AND WHAT YOU SAW.

I can't because I have never seen anything like that before.

21. DID YOU NOTICE ANY ODOR, NOISE, OR HEAT EMANATING FROM THE PHENOMENON OR ANY EFFECT ON YOURSELF, ANIMALS OR MACHINERY IN THE VICINITY? ☐ YES ☒ NO. IF "YES," DESCRIBE.

A. DID THE PHENOMENON DISTURB THE GROUND OR LEAVE ANY PHYSICAL EVIDENCE. ☐ YES ☐ NO. IF "YES," DESCRIBE.

I don't know.

22. HAVE YOU EVER SEEN THIS OR A SIMILAR PHENOMENON BEFORE? ☐ YES ☒ NO. IF "YES," GIVE DATE AND LOCATION.

I'm an executive secretary at Kaiser Center in Oakland.
I do not have much experience in the technical sense.
I'm an average secretary who saw a UFO. But I do
know this object was some type of ship which we
just do not have. I swear it was a flying saucer.

25. WHEN AND TO WHOM DID YOU REPORT THAT YOU HAD SIGHTED THIS PHENOMENON?

NAME U.S. Air Force - Alameda DAY 3 MONTH June YEAR 68

26. DATE YOU COMPLETED THIS QUESTIONNAIRE.

DAY 20 MONTH JUNE YEAR 68

My boyfriend and I were leaving Sat. 5:00 AM June 1, 1961 to his ranch in the Valley. He went outside to warm up his truck & came running inside and told me to look at this. So I went over to the living room window which faces west too towards San Mateo, So. San Francisco area and then it was. It was too close to be mistaken for an airplane or whatever.

It had a beam of light shining down at an angle. It also had a ring of haze around it sorta like a light fog. But the object itself & the sky & stars were very clear around it. A very small circle started to form in the center and it kept getting bigger & bigger and as it became as big as the ring of haze the beam of light and the haze disappeared. Then the object moved slowly to the right in a straight line then shot backwards which would be straight out to sea from where I was standing. Now I watched this for a good twenty minutes. I don't know how long it was there before I saw it. But my boyfriend watched it for about ten minutes before he came and got me. I hope this is helpful and I would appreciate your letting me know the results of this sighting if you can.

Object was self-luminous (as the moon), with a trailing of mist at sides and behind; there were rays of light shining from object through mist (as the sun shines through clouds). After perhaps 2 minutes the object dimmed and what seemed to be a circle of black moved out from the object, completely encircling it -- I believe this was an illusion as the mist was clearing from nearest the object out.

Object did not appear to change shape or size, merely dimmed in brightness.

26. DATE YOU COMPLETED THIS QUESTIONNAIRE.

DAY 7 MONTH June YEAR 1968

In question #13 I marked yes to "Haze off smoke"
"change brightness" & "flash or flicker"

The smoke was the vapor/mist shown in #15,
as to the changing of brightness, flash or flicker, it
seemed to dim for an instant like a light bulb,
during a storm, when this happened the vapor began
to disappear from around object, it appeared as a
large black ring going from object outward until
only the bright Phenomena remained. Just before
I lost sight of it, it appeared to be getting
brighter again, and looked as though the vapor
was starting to re-appear slowly.

SIGHTING OF UNIDENTIFIED PHENOMENA QUESTIONNAIRE

REPORT NUMBER 16

THIS QUESTIONNAIRE HAS BEEN PREPARED SO THAT YOU CAN GIVE THE U.S. AIR FORCE AS MUCH INFORMATION AS POSSIBLE CONCERNING THE UNIDENTIFIED PHENOMENON THAT YOU HAVE OBSERVED. PLEASE TRY TO ANSWER ALL OF THE QUESTIONS. THE INFORMATION YOU GIVE WILL BE USED FOR RESEARCH PURPOSES. YOUR NAME WILL NOT BE USED IN CONNECTION WITH ANY OF YOUR STATEMENTS OR CONCLUSIONS WITHOUT YOUR PERMISSION. RETURN TO AIR FORCE BASE INVESTIGATOR FOR FORWARDING TO FTD (TDETR, WRIGHT-PATTERSON AFB, OHIO 45433, IAW AFR 80-17. (IF ADDITIONAL SHEETS ARE NEEDED FOR NARRATIVE OR SKETCHES ATTACH SECURELY TO THIS FORM OR ANNOTATE WITH YOUR NAME FOR IDENTIFICATION.)

1. WHEN DID YOU SEE THE PHENOMENON?

5. WHERE WERE YOU WHEN YOU SAW THE PHENOMENON? IF IN CITY, GIVE THE NEAREST STREET ADDRESS AND INDICATE ON A HAND DRAWN MAP WHERE YOU WERE STANDING WITH REFERENCE TO THE ADDRESS. IF IN THE COUNTRY, IDENTIFY THE HIGHWAY YOU WERE ON OR NEAR AND TRY TO FIX A DISTANCE AND DIRECTION FROM SOME RECOGNIZABLE LANDMARK.

*San Francisco on West Highway approximately
3 miles south of Cliff House Restaurant.*

6. IMAGINE YOU ARE AT THE POINT SHOWN IN THE SKETCH. PLACE AN "A" ON THE CURVED LINE TO SHOW HOW HIGH THE PHENOMENON WAS ABOVE THE HORIZON, OR SKYLINE, WHEN FIRST SEEN. PLACE A "B" ON THE SAME CURVED LINE TO SHOW HOW HIGH ABOVE THE HORIZON THE PHENOMENON WAS WHEN LAST SEEN.

6A. NOW IMAGINE YOU ARE AT THE CENTER OF THE COMPASS ROSE. PLACE AN "A" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN FIRST SEEN. PLACE A "B" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN LAST SEEN.

7. IN THE SKETCH BELOW, PLACE AN "A" AT THE POSITION OF THE PHENOMENON WHEN FIRST SEEN, AND A "B" AT THE POSITION OF THE PHENOMENON WHEN LAST SEEN. CONNECT THE "A" AND "B" WITH A LINE TO APPROXIMATE THE MOVEMENT OF THE PHENOMENON BETWEEN "A" AND "B". THAT IS, SCHEMATICALLY SHOW WHETHER THE MOVEMENT APPEARED TO BE STRAIGHT, CURVED OR ZIG-ZAG. Living near 5 F airport, I think about the sun, way bright on approaching aircraft. Having seen this bright sun distances of several miles, I believe the UFO's I saw ^{were} considerably larger & much brighter. I think that maybe it could have been just planes in a formation at about 20 miles & with the sun. Having just got possibly 10-20 mins before, the separation of the planes of the sun could maybe be so; however, I have often on this & yet I haven't seen anything this bright.

Complains About ^A UFO Procedure

To the Editor:

I would like to tell you about an incident that happened last Sunday evening at approximately 7 p.m. We were sitting on the front porch when we noticed what appeared to be an U.F.O. After observing that it did not seem to move my husband got the binoculars to see what it was. It was a flat object with three cables straight out behind it and one short one on the front that hung down. I called the city desk at The Dispatch and they gave me a number at L.A.F.B. where I should report it.

After talking with a young man for almost a half-hour I got disgusted and put my husband on the phone. He, too, got disgusted at the stupid questions that were asked of him, told the young man at L.A.F.B. he was getting the third degree, that he was only trying to report something to him, and hung up.

It is pretty sad to think that our Air Force is in the hands of individuals who can't even ask a sensible question. If this is what everyone goes through that wants to report an U.F.O., then I can understand why people don't wish to get involved. That is the last time we will do it.

Mrs. Harry L. Dunn.
Columbus.

Dear Dr. Hynek,

I called Ridge Ave. Monday night (June 10) to ask your permission to go out after the object described in the enclosed clipping "A". Joel said you were out of town so I did just what you'd expect me to -- I went after it anyway.

After I talked to Joel, I called this [redacted]. She seemed intelligent and willing to discuss the sighting. Before long, she was giving me a description of an object which certainly did smack of "jellyfish" and "falling leaf." There were eight observers with two pairs of binoculars. I made an appointment to see her the next day.

Meanwhile, another person had called [redacted] re: her letter. This caller, a [redacted], had observed an identical object in the same location the week before. He was driving at the time and decided to track it down. He soon arrived at Bishop Reedy High School (1½ miles from [redacted]) and found an extraordinary kite and an extraordinary kite-flyer. Seems there was an eccentric little fellow, about 30, who lives in a rented room near High & Mound (pretty crummy). He built the kite and transports it to the school grounds via City bus (!). The kite body is 30 inches high, several feet long, and has wide plastic streamers for tails -- the longest tail is 249 feet long. The enclosed drawing was made by [redacted]. She added the dimensions as given by Mr. [redacted]. In their phone conversation they agreed they had undoubtedly seen the same object. Only thing left is to verify with the kite flyer that he was actually flying it On June 2 at 1900, but [redacted] doesn't know how to reach him. As far as I'm concerned, I consider the case closed.

Glad I solved this one so easily, but sorry it wasn't a good juicy Type I which I personally observed from a distance of 10 feet. Better luck(?) next time.

Dr. Ayvek

I observed these balloons at 2210 hrs Monday June 10 — (My G-D, I hope they were the balloons). In case you have any cases come up for comparison, my sighting follows:

I was standing in the yard at [REDACTED], looking directly south. The temperature was 73 - 75, humidity very high, very smoggy, with a high misty overcast. Only objects visible were Jupiter, very hazy, and the full moon, rising very hazy and red.

I noticed a star-like object rising slowly out of the South, heading straight North. It was about -1 in apparent magnitude, and a steady white light. It's motion was slow and continuous, about comparable to "Echo." Through 7 X 50 glasses this object remained a white point source: no other lights, no shape, and no sound. When this object was within a few degrees of the zenith, it began a course change, orbiting over to the east, preserving the same smooth flight. Then it slowed, finally remaining stationary high in the E. Then it blinked several times, with no apparent frequency or pattern, and slowly drifted back toward the S, getting fainter, as if it were climbing.

At intervals of about 5 minutes, three other objects followed, covering the same path across the sky; the only difference being the last three objects did not blink. All objects eventually drifted back toward the South and faded.

These objects definitely could have given the impression that they were under positive control.

"B" Balloons with Lights To Aid Pollution Study

A battery of lights and spheres will float across Columbus next week, but they won't be flying saucers or any other sort of UFO.

Lights will appear from nowhere, probably hesitate and possibly even blink, then move quickly off in some direction, thus fitting the oft repeated descriptions given of UFOs.

THE LIGHTS will be attached to a series of gas filled balloons that U.S. air pollution scientists will set free in Columbus Monday through Friday to see how the weather affects air pollution.

A chief reason for the tests is to find out how winds and other weather conditions spread odors and bothersome gases around a city.

"This kind of information is useful in planning air pollution control programs," the department said.

THE SCHEDULE for releasing the balloons calls for freeing five of them at 8-minute intervals every two hours during three time periods.

The time periods will be from 2 p.m. Monday to 9 a.m. Tuesday; 2 p.m. Wednesday to 9 a.m. Thursday and from 2 a.m. to 9 a.m. Friday.

At night, the balloons will carry tiny lights. The federal scientists will observe the balloons and will not need assistance from the public.

THE FOUR locations for releasing the balloons will be in the Downtown, in the suburbs, downwind and upwind of the city.

Ft. Hayes will be the Downtown location. Three other sites will be selected on the basis of weather conditions, federal officials said.

The government has obtained assistance from scientists of the U.S. Weather Bureau offices in Columbus for the tests. Ohio State University students will release and watch the balloons.

DAILY WEATHER MAPS

WEEKLY SERIES JUNE 10-16, 1968

The charts in this publication are a continuation of the principal charts of the Weather Bureau publication, Daily Weather Map. They include the Surface Weather Map, the 500-Millibar Chart, the Highest and Lowest Temperatures Chart, and the Daily Precipitation Chart. All of the charts for one day are arranged on a single page of this publication. They are copied from operational weather maps prepared by the National Meteorological Center, Weather Bureau. The symbols used on the Surface Weather Map and the 500-Millibar Chart are the same as those used previously in Daily Weather Map. An explanatory sheet is available, and may be obtained by writing to: Environmental Science Services Administration, Publications Section, AD 143, Rockville, Maryland 20852.

The Surface Weather Map presents station data and the analysis for 7:00

a.m./e.s.t. Areas of precipitation are indicated by shading. The weather reports that are printed here are only a fraction of those that are included in the operational weather maps, and on which the analyses are based. Occasional apparent discrepancies between the printed station data and the analyses result from those station reports that cannot be included in the published maps because of lack of space.

The 500-Millibar Chart presents the height contours and temperature isotherms of the 500-millibar surface at 7:00 a.m./e.s.t. The height contours are shown as continuous lines, and are labeled in feet above sea level. The temperature isotherms are shown as dashed lines, and are labeled in degrees Celsius. The arrows show the wind direction and speed at the 500-millibar level.

The Highest and Lowest Temperatures Chart presents the maximum and minimum values for the 24-hour period ending at 1:00 a.m./e.s.t. The names of the reporting points can be obtained from the Surface Weather Map. The maximum temperature is plotted above the station location, and the minimum temperature is plotted below this point.

The Precipitation Areas and Amounts Chart indicates by means of shading the areas that had precipitation during the 24 hours ending at 1:00 a.m. Amounts in inches to the nearest hundredth of an inch are for the same period. Incomplete totals are underlined. "T" indicates a trace of precipitation. Dashed lines show the depth of snow on the ground in inches as of 7:00 a.m. of the previous day.

Maryland 20852.

The Surface Weather Map presents station data and the analysis for 7:00

Celsius. The arrows show the wind direction and speed at the 500-millibar level.

7:00 a.m. of the previous day.
