Dear Sir:

I am very much interested in U. F. O. I just was a article in the Cleveland Press, saying there isn't much sighting in U. F. O. - There are many who see them but they do not make the report: I belong to a U. F. O Group & do Sky Watched. - At home from my window it was March 3 or 4 when I saw a bright light stop, lights went ~~home~~ out & then on again to go to the East - It came south It was bright as a starlite - At arms length it would cover a nickel:

The strangest I have seen was in March, date I have forgotten but it must be around 7 or 11 it traveled from east to west not very high in the sky from the upstairs window

2.

It was below eyes level, so on the ground it could have a 35 degree angle - This is the shape of it to me it is a saucer

Blue White streak

This is what I couldn't make out

It went so fast I couldn't make out what was in front of it before I had a chance it went behind a cloud - The blue streak lasted 5 sec. It was the most beautiful thing I have ever seen - It was big. At arms length - from my elbow to the tips of my fingers. (Beautiful)

June 24th at ~~21~~ Twenty to one in the morn. going west to east at below eyes level at the window. A orange yellow light travelling rather odd - its cause looked like this

3
Arm Length About a quarter
The only trouble was I got to the
window a little late, had
I been a sec sooner I could
have made it out better - It
was on Metrolite - - Also many
times at 7:30 P.M. I have seen
stars more around - I alone don't
see this. I have a girl friend
who see these stars travel -
We are also watching for them!

There is another exciting thing
that happened while I got
a big kick from

A black Cadillac came
down the street about 3:30 A.M.
Stop in front of my house.
They looked at my house then
went down the street &
came back slowly looked again
& then took off - I no harm
done. I couldn't get the license
because I was alone & didn't
want to go out -

Please give me information
on D. G. O. and Sighting
dates etc - Thank You
