was going North on Bogues Basin Rd. approx
1 mi. from the Highlands Sub-Division.

Suddenly to my left I noticed this red
light. It was approx the size of a grape-
fruit. Red in color & was slowly descending
at approx 3-5 degrees from the horizontal.
travelling about 1-5 MPH.

I stopped my car & turned the
spot-light toward it, but could not reach
it with the beam.

It made approx a 90° turn left
& headed West & began to ascend at
about a 3-5 degree angle.

I called another patrol car on the
radio to meet me. This car came on
the scene & arrived in about 2 min.
We both watched it until it
disappeared from sight. This took
about 2-3 minutes from the time
the other patrol car arrived.

The spot-light on the patrol
car is an airplane landing light & much
brighter than an ordinary spot-light.

Also the other Officer & myself
got out of our cars to watch this
light!
