U. S. Air Force

United States of America

One night about 11:00 P.M. I went out with my telescope to study the moon. It was a cloudless sky. I was standing right by our Garage looking at the moon, which was in the south-western part of the sky.

Out of the corner of my eye an object appeared in the south, out of nowhere. I looked to it. Then I nearly dropped.

We have this relay tower about a quarter of a mile from our home. It had been built the summer of 67. About 50 to 100 feet above and to the right of it and a quarter from me was a space ship.

The thing was around the length of a large size jet. Its shape was that of a flat-topped triangle, it was a solid silver. Nothing hazy or fuzzy. It had no glow what so ever. It had four blinking yellow lights on the bottom, I looked at it through my telescope and I saw it had two view slits near the top. I watched

it for at least a half an hour, making the time near 11:30 P.M.

Since I draw, I made a sketch of it, in location in proportion to the tower and to me. I am pretty sure that I am the only one to see it, as the people who live near, are either old or farmers and go to bed early.

It made no sound and I saw no vapor come from it, it was motionless so it seemed to me.

I looked down for a moment and when I looked up again, it was gone.

I have the drawing home with me. It is too large to send through in the mail. If you would care to see it, you may. Thank you.

Sincerely yours,

Dear Miss [REDACTED]

This replies to your recent letter in which you reported that you had seen an unidentified aerial object.

Without additional information, we cannot offer an explanation of what you saw. However, if you will complete the inclosed questionnaire and mail it in the attached envelope, our technical people at Wright-Patterson Air Force Base, Ohio, will be able to investigate further and make an evaluation.

Should you ever sight another such object, please report it as soon as possible to the nearest Air Force base. Each base in the United States has an investigator of unidentified flying objects (UFO's). He is in a better position to make an on-the-spot investigation, which usually results in a more accurate analysis.

In the meantime, you might be able to identify your sighting by looking at the categories of objects often reported as UFO's in the material we are sending.

Sincerely,

JAMES H. AIKMAN
