SIGHTING OF UNIDENTIFIED PHENOMENA QUESTIONNAIRE

BUDGET BUREAU APPROVAL NUMBER 21-R258

THIS QUESTIONNAIRE HAS BEEN PREPARED SO THAT YOU CAN GIVE THE U.S AIR FORCE AS MUCH INFORMATION AS POSSIBLE CONCERNING THE UNIDENTIFIED PHENOMENON THAT YOU HAVE OBSERVED. PLEASE TRY TO ANSWER ALL OF THE QUESTIONS. THE INFORMATION YOU GIVE WILL BE USED FOR RESEARCH PURPOSES YOUR NAME WILL NOT BE USED IN CONNECTION WITH ANY OF YOUR STATEMENTS OR CONCLUSIONS WITHOUT YOUR PERMISSION. RETURN TO AIR FORCE BASE INVESTIGATOR FOR FORWARDING TO FTD (TDETR), WRIGHT-PATTERSON AFB, OHIO 45433, IAW AFR 80-17. *(IF ADDITIONAL SHEETS ARE NEEDED FOR NARRATIVE OR SKETCHES ATTACH SECURELY TO THIS FORM OR ANNOTATE WITH YOUR NAME FOR IDENTIFICATION.)*

1. WHEN DID YOU SEE THE PHENOMENON? DAY 31 MONTH Dec. YEAR 1968

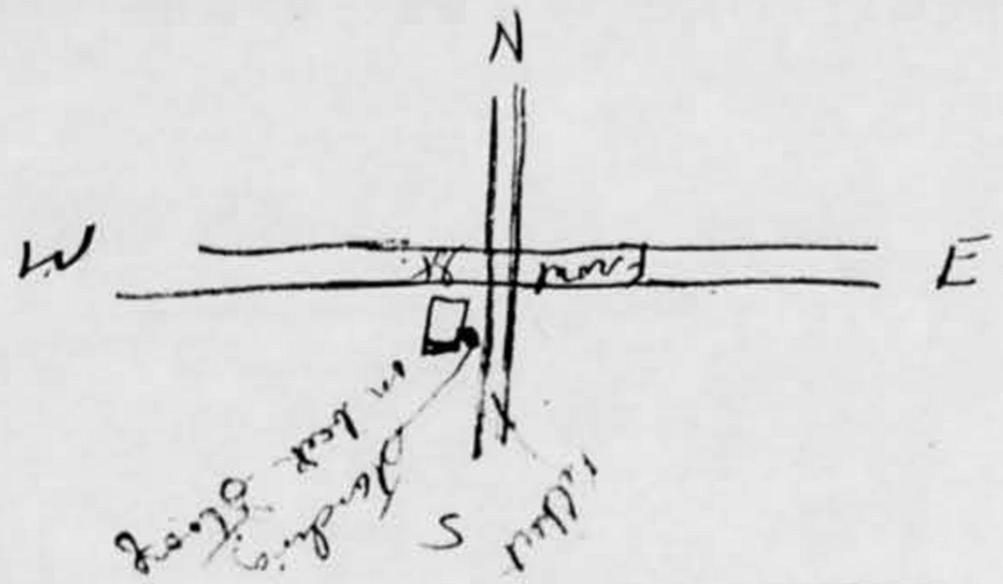
2. WHAT TIME DID YOU FIRST SIGHT THE PHENOMENON? HOUR 12:00 MINUTES 25 [X] A.M. [ ] P.M.

3. WHAT TIME DID YOU LAST SIGHT THE PHENOMENON? HOUR 4:00 MINUTES 47 [X] A.M. [ ] P.M.

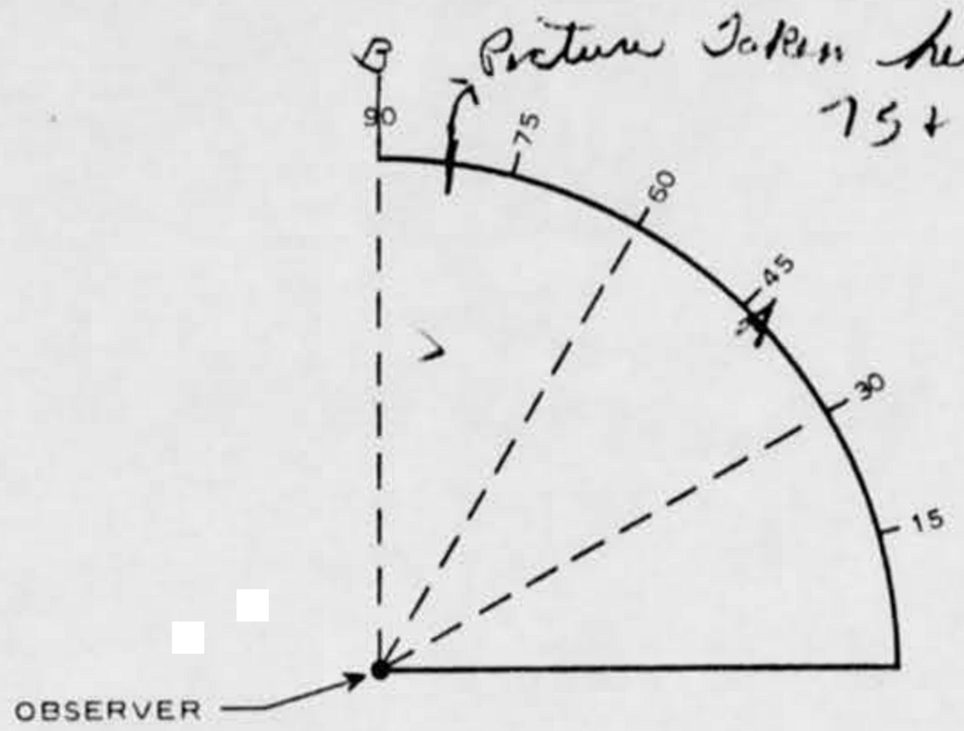
4. TIME ZONE [ ] DAYLIGHT SAVINGS [ ] STANDARD
[ ] EASTERN [X] CENTRAL [ ] MOUNTAIN [ ] PACIFIC [ ] OTHER

5. WHERE WERE YOU WHEN YOU SAW THE PHENOMENON? IF IN CITY, GIVE THE NEAREST STREET ADDRESS AND INDICATE ON A HAND DRAWN MAP WHERE YOU WERE STANDING WITH REFERENCE TO THE ADDRESS. IF IN THE COUNTRY, IDENTIFY THE HIGHWAY YOU WERE ON OR NEAR AND TRY TO FIX A DISTANCE AND DIRECTION FROM SOME RECOGNIZABLE LANDMARK.

[redacted] St
New Carlisle, Ind



6. IMAGINE YOU ARE AT THE POINT SHOWN IN THE SKETCH, PLACE AN "A" ON THE CURVED LINE TO SHOW HOW HIGH THE PHENOMENON WAS ABOVE THE HORIZON, OR SKYLINE, WHEN FIRST SEEN. PLACE A "B" ON THE SAME CURVED LINE TO SHOW HOW HIGH ABOVE THE HORIZON THE PHENOMENON WAS WHEN LAST SEEN.



AF FORM AUG 67 117

)AILY WEATHER MAPS

/EEKLY SERIES DEC. 23-29, 1968

The charts in this publication are a continuation of the principal charts of the Weather Bureau publication, Daily Weather Map. They include the Surface Weather Map, the 500-Millibar Chart, the Highest and Lowest Temperatures Chart, and the Daily Precipitation Chart. All of the charts for one day are arranged on a single page of this publication. They are copied from operational weather maps prepared by the National Meteorological Center, Weather Bureau. The symbols used on the Surface Weather Map and the 500-Millibar Chart are the same as those used previously in Daily Weather Map. An explanatory sheet is available, and single copies may be obtained without charge by writing to: Environmental Science Services Administration, Publications Section, AD 143, Rockville, Maryland 20852. Bulk copies may also be ordered, at a cost of $2.30 per 50 copies. Checks should be made payable to the Superintendent of Documents.

The Surface Weather Map presents station data and the analysis for 7:00 a.m./e.s.t. The tracks of well-defined low pressure areas are indicated by chains of arrows; the locations of these centers at times 6, 12, and 18 hours preceding map time are indicated by small black squares enclosing white crosses. Areas of precipitation are indicated by shading. The weather reports that are printed here are only a fraction of those that are included in the operational weather maps, and on which the analyses are based. Occational apparent discrepancies between the printed station data and the analyses result from those station reports that cannot be included in the published maps because of lack of space.

The 500-Millibar Chart presents the height contours and isotherms of the 500-millibar surface at 7:00 a.m./e.s.t. The height contours are shown as continuous lines, and are labeled in feet above sea level. The isotherms are shown as dashed lines, and are labeled in degrees Celsius. The arrows show the wind direction and speed at the 500-millibar level.

TheHighest and Lowest Temperatures Chart presents the maximum and minimum values for the 24-hour period ending at 1:00 a.m./e.s.t. The names of the reporting points can be obtained from the Surface Weather Map. The maximum temperature is plotted above the station location, and the minimum temperature is plotted below this point.

The Precipitation Areas and Amounts Chart indicates by means of shading the areas that had precipitation during the 24 hours ending at 1:00 a.m. Amounts in inches to the nearest hundredth of an inch are for the same period. Incomplete totals are underlined. "T" indicates a trace of precipitation. Dashed lines show the depth of snow on the ground in inches as of 7:00 a.m. of the previous day.

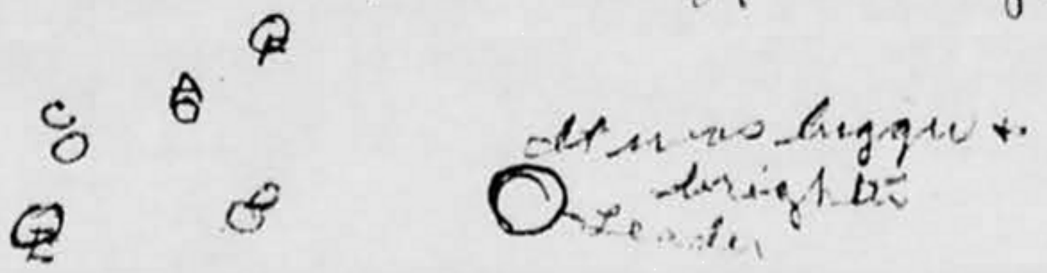
10. IF THERE WERE MORE THAN ONE PHENOMENON, HOW MANY WERE THERE? DRAW A PICTURE TO SHOW HOW THEY WERE ARRANGED. DID THIS ARRANGEMENT CHANGE DURING THE SIGHTING? We counted 7 just before it disappeared, The are staged all the time but one by one the others appeared and all of them disappeared together



11. CONDITIONS *(Check appropriate blocks.)*

A. SKY		B. WEATHER			
	DAY		CUMULUS CLOUDS *(Low fluffy)*		FOG OR MIST
	TWILIGHT		CIRRUS CLOUDS *(High fleecy or Herring-bone)*		HEAVY RAIN
✓	NIGHT				LIGHT RAIN OR DRIZZLE
✓	CLEAR		NIMBUS CLOUDS *(Rain)*		HAIL
	PARTLY CLOUDY		CUMULONIMBUS CLOUDS *(Thunderstorms)*		SNOW OR SLEET
	COMPLETELY OVERCAST				UNKNOWN
			HAZE OR SMOG	✓	NONE OF THE ABOVE

C. IF THE SIGHTING WAS AT TWILIGHT OR NIGHT, WHAT DID YOU NOTICE ABOUT THE STARS AND MOON?

(1) STARS		(2) MOON			
X	NONE		BRIGHT MOONLIGHT	X	NO MOONLIGHT
	A FEW		MOON WITH HALO		UNKNOWN
	MANY		MOON HIDDEN BY CLOUDS		
	UNKNOWN		PARTIAL *(New or quarter)*		

D. IF SIGHTING WAS IN DAYLIGHT, WAS THE SUN VISIBLE? ☐ YES ☒ NO. IF "YES," WHERE WAS THE SUN AS YOU FACED THE PHENOMENON?

	IN FRONT OF YOU		TO YOUR RIGHT		OVERHEAD *(Near noon)*
	IN BACK OF YOU		TO YOUR LEFT		UNKNOWN

E. SPECIFY THE MAJOR SOURCE OF ILLUMINATION PRESENT DURING THE SIGHTING, SUCH AS THE SUN, HEADLIGHTS OR STREET LAMP, ETC. FOR TERRESTRIAL ILLUMINATION, SPECIFY DISTANCE TO LIGHT SOURCE.

one street light 75' north
one street light 75' [illegible] - not working

12. GIVE A BRIEF DESCRIPTION OF THE PHENOMENON, INDICATING WHETHER IT APPEARED DARK OR LIGHT, WHETHER IT REFLECTED LIGHT OR WAS SELF-LUMINOUS AND WHAT COLORS YOU NOTICED. DESCRIBE YOUR IMPRESSION OF WHETHER IT WAS SOLID OR TRANSPARENT, WHETHER EDGES WERE SHARP OR FUZZY. DESCRIBE THE SHAPE OR INDICATE IF IT APPEARED AS A POINT OF LIGHT. INDICATE COMPARISONS WITH OTHER OBSERVED OBJECTS, LIKE STARS, A LIGHT OR OTHER OBJECT IN YOUR FIELD OF VIEW.

It was light, It had lights on sides and Up and the entire bottom was one big light. it was solid material the whole object was easy to see the edges were rounded like the top of a cup. When it was down low the lights were bright blue, as it went upward it turned orange and when it got higher it was a bright yellow beleive me. This was not a part of light or any thing I ever saw before or ever want to see again, I never believed in such things but I sure do now. It reminded me of a Chinese soup Bowl Turned upside down or a flying Saucer. This was something that you are afraid of at first sight.

DAILY WEATHER MAPS

SEND TO UFO!

WEEKLY SERIES NOV. 25-DEC. 1, 1968

The charts in this publication are a continuation of the principal charts of the Weather Bureau publication, **Daily Weather Map. They include the Surface Weather Map, the 500-Millibar Chart, the Highest and Lowest Temperatures Chart, and the Daily Precipitation Chart. All of the charts for one day are arranged on a single page of this publication. They are copied from operational weather maps prepared by the National Meteorological Center, Weather Bureau. The symbols used on the Surface Weather Map and the 500-Millibar Chart are the same as those used previously in Daily Weather Map.** An explanatory sheet is available, and single copies may be obtained without charge by writing to: Environmental Science Services Administration, Publications Section, AD 143, Rockville, Maryland 20852. Bulk copies may also be ordered, at a cost of $2.30 per 50 copies. Checks should be made payable to the Superintendent of Documents.

The Surface Weather Map presents station data and the analysis for 7:00 a.m./e.s.t. The tracks of well-defined low pressure areas are indicated by chains of arrows; the locations of these centers at times 6, 12, and 18 hours preceding map time are indicated by small black squares enclosing white crosses. Areas of precipitation are indicated by shading. The weather reports that are printed here are only a fraction of those that are included in the operational weather maps, and on which the analyses are based. Occational apparent discrepancies between the printed station data and the analyses result from those station reports that cannot be included in the published maps because of lack of space.

The 500-Millibar Chart presents the height contours and isotherms of the 500-millibar surface at 7:00 a.m./e.s.t. The height contours are shown as continuous lines, and are labeled in feet above sea level. The isotherms are shown as dashed lines, and are labeled in degrees Celsius. The arrows show the wind direction and speed at the 500-millibar level.

The Highest and Lowest Temperatures Chart presents the maximum and minimum values for the 24-hour period ending at 1:00 a.m./e.s.t. The names of the reporting points can be obtained from the Surface Weather Map. The maximum temperature is plotted above the station location, and the minimum temperature is plotted below this point.

The Precipitation Areas and Amounts Chart indicates by means of shading the areas that had precipitation during the 24 hours ending at 1:00 a.m. Amounts in inches to the nearest hundredth of an inch are for the same period. Incomplete totals are underlined. "T" indicates a trace of precipitation. Dashed lines show the depth of snow on the ground in inches as of 7:00 a.m. of the previous day.

8. WHERE WERE YOU WHEN YOU SAW THE PHENOMENON? *(Check appropriate blocks.)*

✓	OUTDOORS		IN BUSINESS SECTION OF CITY
	IN BUILDING	✓	IN RESIDENTIAL SECTION OF CITY
	IN CAR ☐ AS DRIVER ☐ AS PASSENGER		IN OPEN COUNTRYSIDE
	IN BOAT		NEAR AIRFIELD
	IN AIRPLANE ☐ AS PILOT ☐ AS PASSENGER		FLYING OVER CITY
✓	OTHER Picture was Taken outdoors		FLYING OVER OPEN COUNTRY
			OTHER

A. IF YOU WERE IN A VEHICLE, COMPLETE THE FOLLOWING:

WHAT DIRECTION WERE YOU MOVING?

	NORTH		EAST
	SOUTH		WEST
	NORTHEAST		SOUTHEAST
	NORTHWEST		SOUTHWEST

HOW FAST WERE YOU MOVING?

DID YOU STOP ANYTIME WHILE OBSERVING THE PHENOMENON? ☐ YES ☐ NO

EXPLAIN WHETHER SUCH MOVEMENT AFFECTS YOUR SKETCHES IN ITEMS 5 AND 6.

DESCRIBE TYPE OF VEHICLE YOU WERE IN AND TYPE OF ROAD, TERRAIN OR BODY OF WATER YOU TRAVERSED DURING THE SIGHTING. STATE WHETHER WINDOWS OR CONVERTIBLE TOP WERE UP OR DOWN.

HOW MUCH OTHER TRAFFIC WAS THERE?

DID YOU NOTICE ANY AIRPLANES? ☐ YES ☒ NO. IF "YES," DESCRIBE WHEN THEY WERE IN SIGHT RELATIVE TO THE TIME OF SIGHTING THE PHENOMENON AND WHERE THEY WERE IN THE SKY RELATIVE TO THE POSITION OF THE PHENOMENON.

9. HOW LONG WAS THE PHENOMENON IN SIGHT?

LENGTH OF TIME about First time 20 min - 2nd 3½ hrs.

✓	CERTAIN OF TIME		NOT VERY SURE
	FAIRLY CERTAIN		JUST A GUESS

HOW WAS TIME DETERMINED?

I noticed the time & I was excited

WAS THE PHENOMENON IN SIGHT CONTINUOUSLY? ☐ YES ☒ NO. IF "NO," INDICATE WHETHER THIS IS DUE TO YOUR MOVEMENT OR THE BEHAVIOR OF THE PHENOMENON, AND DESCRIBE SUCH MOVEMENT OR BEHAVIOR. INDICATE DISAPPEARANCES ON PREVIOUS SKETCHES.

I was outside I ran into house & shut the door & went into the next room & look out the window when it was low it went straight up as a yo yo on a string It just drifted up higher

DAILY WEATHER MAPS

WEEKLY SERIES DEC. 2-8, 1968

The charts in this publication are a continuation of the principal charts of the Weather Bureau publication, Daily Weather Map. They include the Surface Weather Map, the 500-Millibar Chart, the Highest and Lowest Temperatures Chart, and the Daily Precipitation Chart. All of the charts for one day are arranged on a single page of this publication. They are copied from operational weather maps prepared by the National Meteorological Center, Weather Bureau. The symbols used on the Surface Weather Map and the 500-Millibar Chart are the same as those used previously in Daily Weather Map. An explanatory sheet is available, and single copies may be obtained without charge by writing to: Environmental Science Services Administration, Publications Section, AD 143, Rockville, Maryland 20852. Bulk copies may also be ordered, at a cost of $2.30 per 50 copies. Checks should be made payable to the Superintendent of Documents.

The Surface Weather Map presents station data and the analysis for 7:00 a.m./e.s.t. The tracks of well-defined low pressure areas are indicated by chains of arrows; the locations of these centers at times 6, 12, and 18 hours preceding map time are indicated by small black squares enclosing white crosses. Areas of precipitation are indicated by shading. The weather reports that are printed here are only a fraction of those that are included in the operational weather maps, and on which the analyses are based. Occational apparent discrepancies between the printed station data and the analyses result from those station reports that cannot be included in the published maps because of lack of space.

The 500-Millibar Chart presents the height contours and isotherms of the 500-millibar surface at 7:00 a.m./e.s.t. The height contours are shown as continuous lines, and are labeled in feet above sea level. The isotherms are shown as dashed lines, and are labeled in degrees Celsius. The arrows show the wind direction and speed at the 500-millibar level.

TheHighest and Lowest Temperatures Chart presents the maximum and minimum values for the 24-hour period ending at 1:00 a.m./e.s.t. The names of the reporting points can be obtained from the Surface Weather Map. The maximum temperature is plotted above the station location, and the minimum temperature is plotted below this point.

The Precipitation Areas and Amounts Chart indicates by means of shading the areas that had precipitation during the 24 hours ending at 1:00 a.m. Amounts in inches to the nearest hundredth of an inch are for the same period. Incomplete totals are underlined. "T" indicates a trace of precipitation. Dashed lines show the depth of snow on the ground in inches as of 7:00 a.m. of the previous day.

22. HAVE YOU EVER SEEN THIS OR A SIMILAR PHENOMENON BEFORE? ☐ YES ☒ NO. IF "YES," GIVE DATE AND LOCATION.

And I don't ever want to again

23. WAS ANYONE WITH YOU AT THE TIME YOU SAW THE PHENOMENON? ☒ YES ☐ NO. IF "YES," DID THEY SEE IT TOO? ☒ YES ☐ NO. my 3 children ages 14, 13, 11. + neighbors

A. LIST THEIR NAMES AND ADDRESSES

[redacted] New Carlisle

[redacted] St New Carlisle

24. GIVE THE FOLLOWING INFORMATION ABOUT YOURSELF

LAST NAME, FIRST NAME, MIDDLE NAME [redacted]

ADDRESS (Street, City, State and Zip Code) [redacted] St New Carlisle Ind 46552

TELEPHONE (Area code, number) [redacted]

AGE		MALE		FEMALE
37			X	

INDICATE ADDITIONAL INFORMATION INCLUDING OCCUPATION AND ANY EXPERIENCE WHICH MAY BE PERTINENT.

I am not employed at the present but I am a machine operator, my last job was a computer operator at a factory and in my entire life I have never experienced anything unusual or strange, I am not making believe or am I crazy as this question seems to indicate. A lady across town was awaken by the humming sound & saw the flashing lights although she did not investigate I reported this to the Police Dept and he made a wise crack & didn't bother to look & see.

I do not drink any thing stronger than coffee but seeing something like this it could drive you to drink

25. WHEN AND TO WHOM DID YOU REPORT THAT YOU HAD SIGHTED THIS PHENOMENON?

NAME [redacted] DAY 30 MONTH Dec. YEAR 1968

26. DATE YOU COMPLETED THIS QUESTIONNAIRE.

DAY Jan MONTH 29 YEAR 1969

17. DID YOU OBSERVE THE PHENOMENON THROUGH ANY OF THE FOLLOWING? INCLUDE INFORMATION ON MODEL, TYPE, FILTER, LENS PRESCRIPTION OR OTHER APPLICABLE DATA. Picture Taken outside

	EYEGLASSES	X	CAMERA VIEWER
	SUNGLASSES		BINOCULARS
	WINDSHIELD		TELESCOPE
	SIDE WINDOW OF VEHICLE		THEODOLITE
X	WINDOWPANE	X	OTHER Naked Eye

A. DO YOU ORDINARILY WEAR GLASSES? ☐ YES ☒ NO

B. DO YOU USE READING GLASSES? ☐ YES ☒ NO

18. WHAT WAS YOUR IMPRESSION OF THE SPEED OF THE PHENOMENON? GIVE ESTIMATE OF SPEED fast

19. WHAT WAS YOUR IMPRESSION OF THE DISTANCE OF THE PHENOMENON? GIVE ESTIMATE OF DISTANCE Low Low.

20. IN ORDER THAT WE MAY OBTAIN AS CLEAR A PICTURE AS POSSIBLE OF WHAT YOU SAW, DESCRIBE IN YOUR OWN WORDS A COMMON OBJECT OR OBJECTS WHICH, WHEN PLACED IN THE SKY, SIMILAR TO WHERE YOU NOTED THE PHENOMENON, WOULD BEAR SOME RESEMBLANCE TO WHAT YOU SAW. DESCRIBE SIMILARITIES AND DIFFERENCES BETWEEN THE COMMON OBJECT AND WHAT YOU SAW.

It reminded me of a soup bowl turned upside down on a dinner plate. Only it had a thing on top like light on a Police car that was a light and it had lights on front + Back in the bottom at the back it had two holes that the vapor came out when it moved forward when it was high it gave off vapor when it was back it look like a big tail. The entire bottom was as if it was one big light. a bright blue it hurt your eyes to look

21. DID YOU NOTICE ANY ODOR, NOISE, OR HEAT EMANATING FROM THE PHENOMENON OR ANY EFFECT ON YOURSELF, ANIMALS OR MACHINERY IN THE VICINITY? ☒ YES ☐ NO. IF "YES," DESCRIBE.

It made a humming sound like a sworm of bees. I dont know if the object in the camera but I got a headache in the back of my head + cant get rid of it and my hands were like they had been burned + had blisters like things on my hands + face Will explain more on Stmt of Proceedings

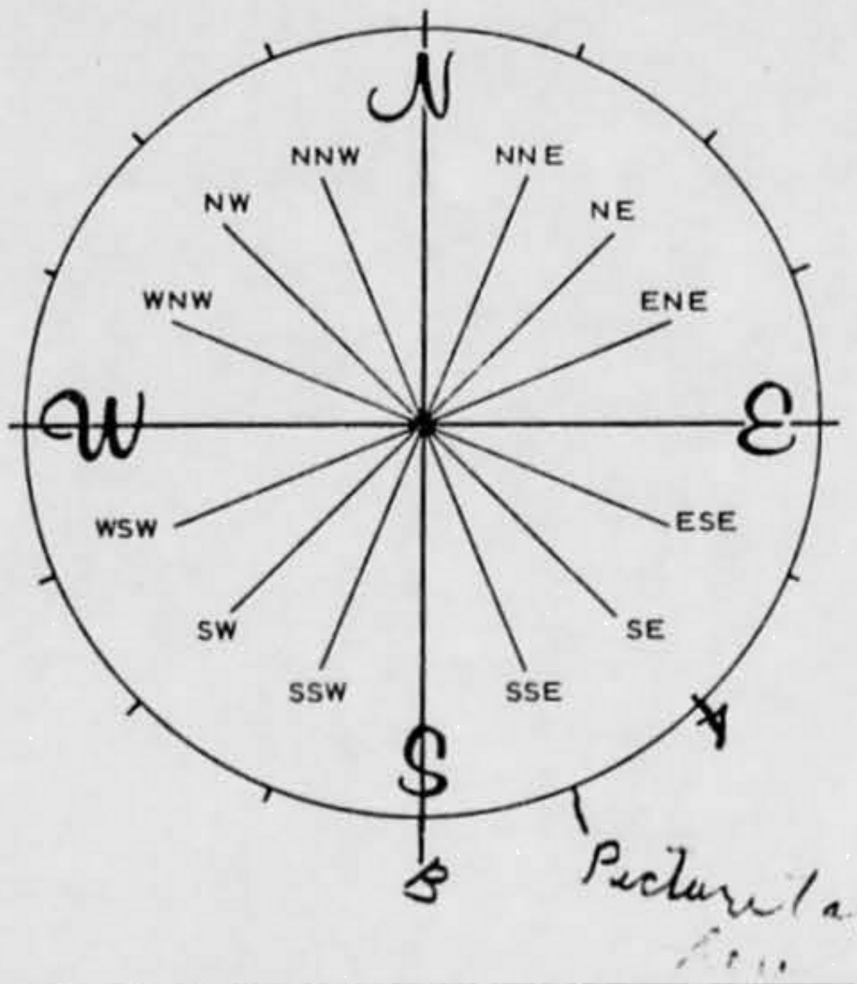
A. DID THE PHENOMENON DISTURB THE GROUND OR LEAVE ANY PHYSICAL EVIDENCE. ☐ YES ☒ NO. IF "YES," DESCRIBE.

I didnt check to see. + you would not either had you been here

27. INFORMATION WHICH YOU FEEL IS PERTINENT BUT WHICH IS NOT ADEQUATELY COVERED IN THIS QUESTIONNAIRE, ALTERNATIVELY PROVIDE A NARRATIVE EXPLANATION OF THE SIGHTING.

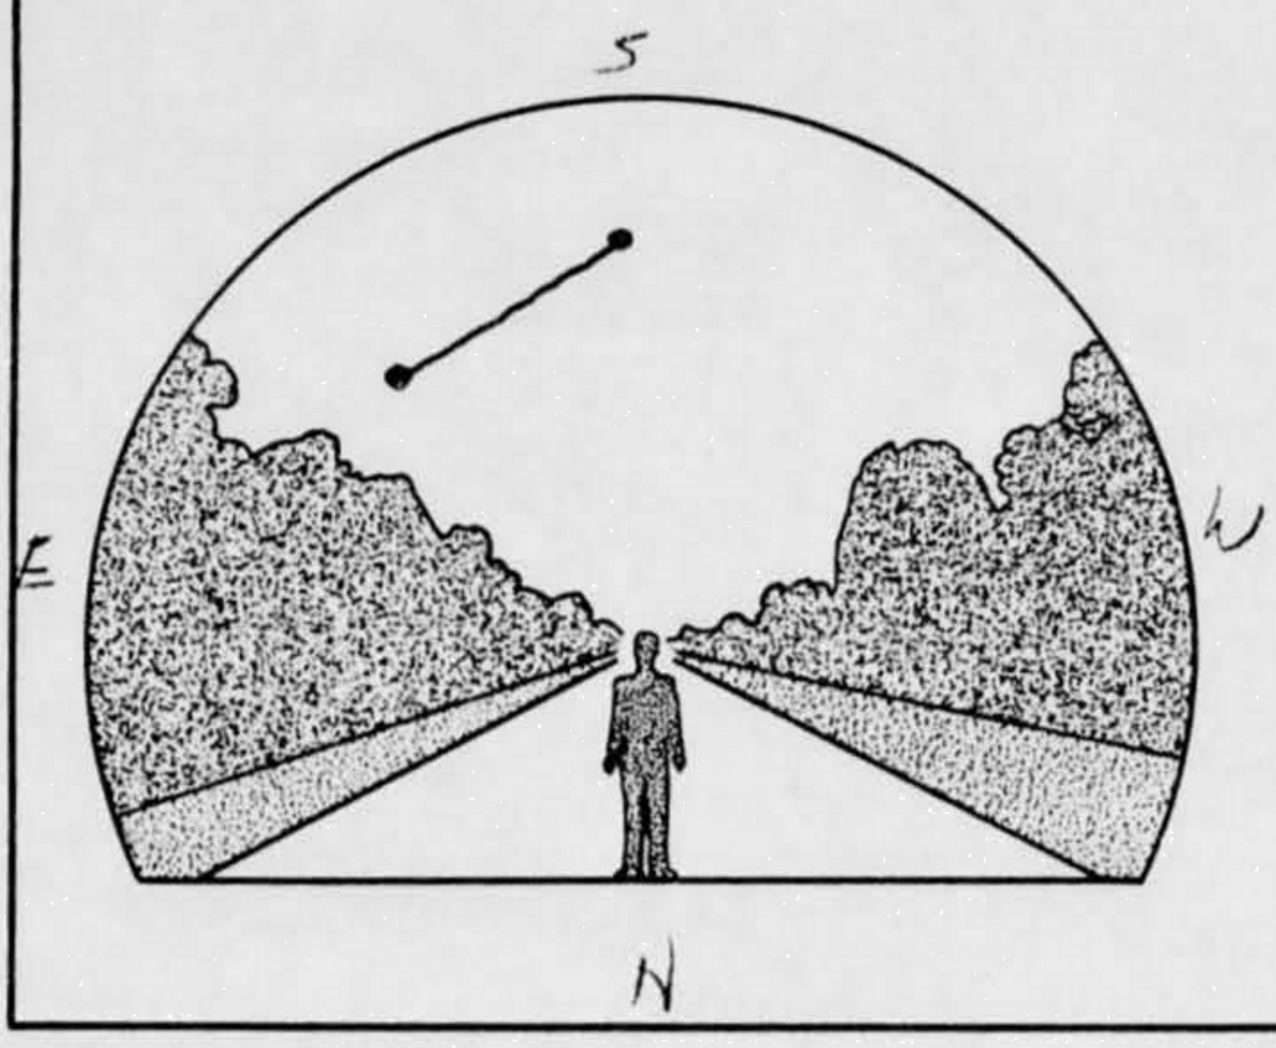
The first picture I took when it was real low came out all white, + was taken through a window- the second one I took as a good one it was taken outside, with out a flash bulb, that was the last picture my camera has taken, I used 3 rolls of film since and they all come out black and the neg. are brown when they should be black. It ruined my camera + it was a new one which I had used to take 5 or 6 rolls of film with. So tell me why the camera has all of a sudden broke. After the first night the next night it appeard again but higher then on Thursday night it appeared also, six more met it + all disappeard but I could get no picture as I had no camera. You people dont believe it with Pictures - so you would not even listen with out Pictures. If Possible I'd like the picture back and just maybe there some body somewhere that will believe, I know in my heart this was real, I'd stake all I own on it. You can say what you like but I saw it, I know it was real, a just because you People havent seen one is no proof that they dont exist. The last page will explain more and its all true so help me God I swear it on the Bible

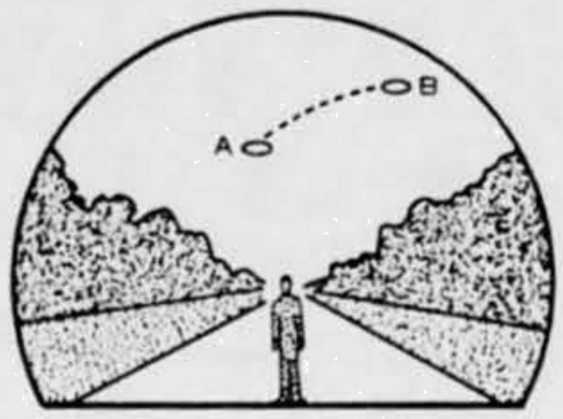
6A. NOW IMAGINE YOU ARE AT THE CENTER OF THE COMPASS ROSE. PLACE AN "A" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN FIRST SEEN. PLACE A "B" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN LAST SEEN.



Picture taken about

7. IN THE SKETCH BELOW, PLACE AN "A" AT THE POSITION OF THE PHENOMENON WHEN FIRST SEEN, AND A "B" AT THE POSITION OF THE PHENOMENON WHEN LAST SEEN. CONNECT THE "A" AND "B" WITH A LINE TO APPROXIMATE THE MOVEMENT OF THE PHENOMENON BETWEEN "A" AND "B". THAT IS, SCHEMATICALLY SHOW WHETHER THE MOVEMENT APPEARED TO BE STRAIGHT, CURVED OR ZIG-ZAG. REFER TO SMALLER SKETCH AS AN EXAMPLE OF HOW TO COMPLETE THE LARGER SKETCH.





AFR 80-17(C1)

SIGHTING OF UNIDENTIFIED PHENOMENA QUESTIONNAIRE

BUDGET BUREAU APPROVAL NUMBER 21-R258

THIS QUESTIONNAIRE HAS BEEN PREPARED SO THAT YOU CAN GIVE THE U.S. AIR FORCE AS MUCH INFORMATION AS POSSIBLE CONCERNING THE UNIDENTIFIED PHENOMENON THAT YOU HAVE OBSERVED. PLEASE TRY TO ANSWER ALL OF THE QUESTIONS. THE INFORMATION YOU GIVE WILL BE USED FOR RESEARCH PURPOSES YOUR NAME WILL NOT BE USED IN CONNECTION WITH ANY OF YOUR STATEMENTS OR CONCLUSIONS WITHOUT YOUR PERMISSION. RETURN TO AIR FORCE BASE INVESTIGATOR FOR FORWARDING TO FTD (TDETR), WRIGHT-PATTERSON AFB, OHIO 45433, IAW AFR 80-17. *(IF ADDITIONAL SHEETS ARE NEEDED FOR NARRATIVE OR SKETCHES ATTACH SECURELY TO THIS FORM OR ANNOTATE WITH YOUR NAME FOR IDENTIFICATION.)*

1. WHEN DID YOU SEE THE PHENOMENON? DAY 31 MONTH Dec YEAR 1968

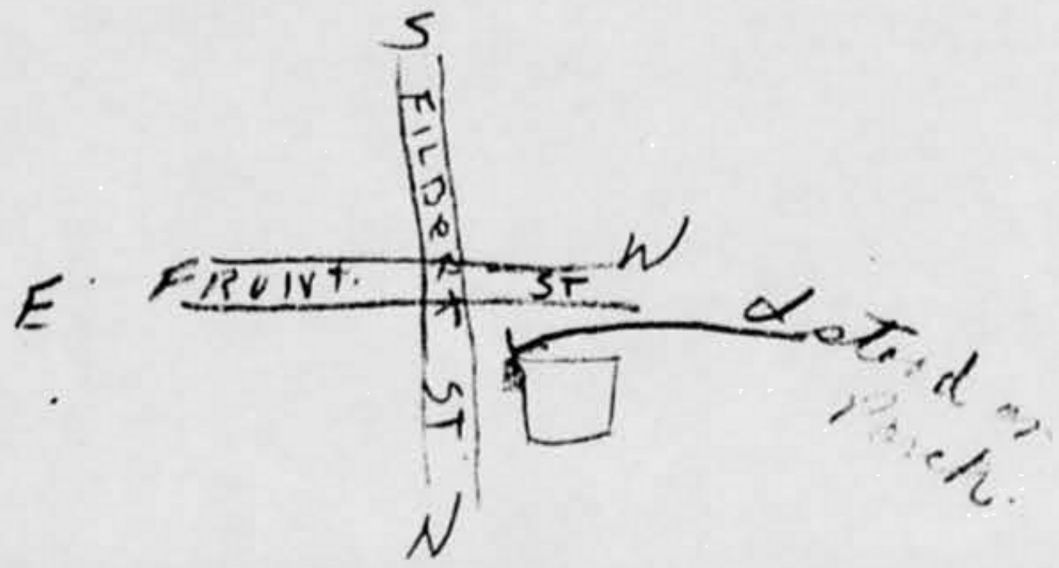
2. WHAT TIME DID YOU FIRST SIGHT THE PHENOMENON? HOUR 12:00 MINUTES 25 [X] A.M. [ ] P.M.

3. WHAT TIME DID YOU LAST SIGHT THE PHENOMENON? HOUR 4:00 MINUTES 17 [X] A.M. [ ] P.M.

4. TIME ZONE [ ] DAYLIGHT SAVINGS [ ] STANDARD
[ ] EASTERN [X] CENTRAL [ ] MOUNTAIN [ ] PACIFIC [ ] OTHER

5. WHERE WERE YOU WHEN YOU SAW THE PHENOMENON? IF IN CITY, GIVE THE NEAREST STREET ADDRESS AND INDICATE ON A HAND DRAWN MAP WHERE YOU WERE STANDING WITH REFERENCE TO THE ADDRESS. IF IN THE COUNTRY, IDENTIFY THE HIGHWAY YOU WERE ON OR NEAR AND TRY TO FIX A DISTANCE AND DIRECTION FROM SOME RECOGNIZABLE LANDMARK.

[redacted] St
New Carlisle Ohio



6. IMAGINE YOU ARE AT THE POINT SHOWN IN THE SKETCH, PLACE AN "A" ON THE CURVED LINE TO SHOW HOW HIGH THE PHENOMENON WAS ABOVE THE HORIZON, OR SKYLINE, WHEN FIRST SEEN. PLACE A "B" ON THE SAME CURVED LINE TO SHOW HOW HIGH ABOVE THE HORIZON THE PHENOMENON WAS WHEN LAST SEEN.

2 Jan 1969

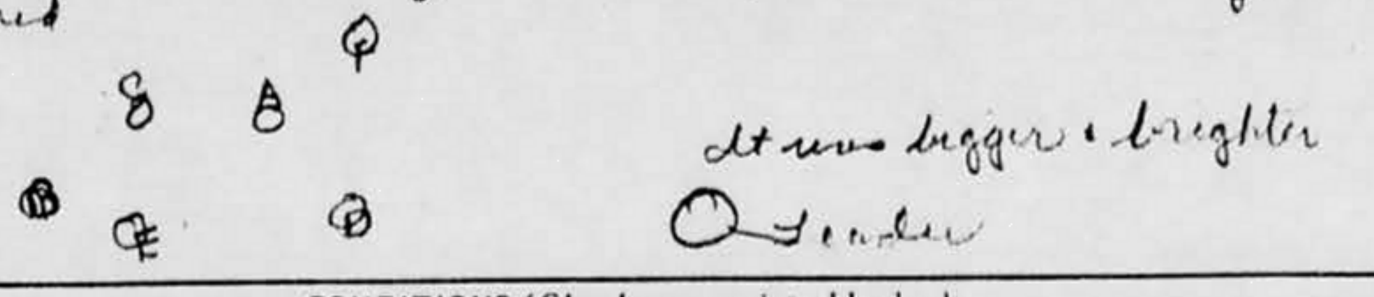
SUBJECT: UFO Sighting

TO: Project Bluebook
Wright-Patterson AFB, Ohio 45433

1. I was contacted about an UFO sighting in my office by a [redacted] on 2 January 1969. She made the sighting on the nights of 30 December 1968 and 1 January 1969 near her apartment in New Carlisle, Indiana. The following is a synopsis of what she told me:

"On Monday and Wednesday nights [redacted] saw the flying objects. They were very bright and she could hardly look at them. On Monday night she took two pictures of one of them with her Polaroid Swinger camera. The first picture did not turn out; however, the second shows a bright object roughly shaped like an inverted saucer. She reports that she has been unable to get any kind of a picture with the camera since then, despite using two rolls of film and trying to photograph such things as her children. The film shows blackness and the side of the film with the developing material is orange; that part of the film is black when a normal picture is taken. There is a small area in the light meter of the camera that looks like it may have been burned. A man that lives in her apartment also took some pictures, but his have not been developed as yet. She reports that a large object came in first and then several smaller objects converged on the area. They were bright and some had an orange color. When they were motionless the glowing was dim and when they started to move they grew brighter and a tail stretched out behind them. She also noticed two holes near the tail end of the object. About six people saw them on Monday night. One person reported being awakened by a loud buzzing sound. On Wednesday, some members of the New Carlisle Police Department also observed them. When an airplane was approaching the area, the large object moved straight up until it was almost out of sight. After the plane passed, it returned. When one of the objects flew over a service station the lights, which had been off, came on and grew very bright and then went off when the object moved away. The same thing happened to a street light near the service station."

10. IF THERE WERE MORE THAN ONE PHENOMENON, HOW MANY WERE THERE? DRAW A PICTURE TO SHOW HOW THEY WERE ARRANGED. DID THIS ARRANGEMENT CHANGE DURING THE SIGHTING? At 21:30 we saw more we counted + all together there were 7 when they seem to assemble in formation, all went straight up + disappeard



11. CONDITIONS *(Check appropriate blocks.)*

A. SKY		B. WEATHER			
	DAY		CUMULUS CLOUDS *(Low fluffy)*		FOG OR MIST
	TWILIGHT		CIRRUS CLOUDS *(High fleecy or Herring-bone)*		HEAVY RAIN
✓	NIGHT				LIGHT RAIN OR DRIZZLE
✓	CLEAR		NIMBUS CLOUDS *(Rain)*		HAIL
	PARTLY CLOUDY		CUMULONIMBUS CLOUDS *(Thunderstorms)*		SNOW OR SLEET
	COMPLETELY OVERCAST				UNKNOWN
			HAZE OR SMOG	✓	NONE OF THE ABOVE

C. IF THE SIGHTING WAS AT TWILIGHT OR NIGHT, WHAT DID YOU NOTICE ABOUT THE STARS AND MOON?

(1) STARS		(2) MOON		
✓	NONE		BRIGHT MOONLIGHT	✓ NO MOONLIGHT
	A FEW		MOON WITH HALO	UNKNOWN
	MANY		MOON HIDDEN BY CLOUDS	
	UNKNOWN		PARTIAL *(New or quarter)*	

D. IF SIGHTING WAS IN DAYLIGHT, WAS THE SUN VISIBLE? ☐ YES ☒ NO. IF "YES," WHERE WAS THE SUN AS YOU FACED THE PHENOMENON?

	IN FRONT OF YOU		TO YOUR RIGHT		OVERHEAD *(Near noon)*
	IN BACK OF YOU		TO YOUR LEFT		UNKNOWN

E. SPECIFY THE MAJOR SOURCE OF ILLUMINATION PRESENT DURING THE SIGHTING, SUCH AS THE SUN, HEADLIGHTS OR STREET LAMP, ETC. FOR TERRESTRIAL ILLUMINATION, SPECIFY DISTANCE TO LIGHT SOURCE.
one street light about 75' north
one street light about 75' south but this one not lit

12. GIVE A BRIEF DESCRIPTION OF THE PHENOMENON, INDICATING WHETHER IT APPEARED DARK OR LIGHT, WHETHER IT REFLECTED LIGHT OR WAS SELF-LUMINOUS AND WHAT COLORS YOU NOTICED. DESCRIBE YOUR IMPRESSION OF WHETHER IT WAS SOLID OR TRANSPARENT, WHETHER EDGES WERE SHARP OR FUZZY. DESCRIBE THE SHAPE OR INDICATE IF IT APPEARED AS A POINT OF LIGHT. INDICATE COMPARISONS WITH OTHER OBSERVED OBJECTS, LIKE STARS, A LIGHT OR OTHER OBJECT IN YOUR FIELD OF VIEW. When I first saw it; it was low very low and a very very bright blue, It was of solid material the edges look rounded as if rolled. It was no point of light as it went up it became orange and as it went higher it turned bright yellow. I have never believed in things like that but it made a believer out of me I never want to see it again or any thing like it

8. WHERE WERE YOU WHEN YOU SAW THE PHENOMENON? *(Check appropriate blocks.)*

✓	OUTDOORS		IN BUSINESS SECTION OF CITY
	IN BUILDING	✓	IN RESIDENTIAL SECTION OF CITY
	IN CAR ☐ AS DRIVER ☐ AS PASSENGER		IN OPEN COUNTRYSIDE
	IN BOAT		NEAR AIRFIELD
	IN AIRPLANE ☐ AS PILOT ☐ AS PASSENGER		FLYING OVER CITY
	OTHER Picture Taken Outside		FLYING OVER OPEN COUNTRY
			OTHER also standing still

A. IF YOU WERE IN A VEHICLE, COMPLETE THE FOLLOWING:

WHAT DIRECTION WERE YOU MOVING?				HOW FAST WERE YOU MOVING?
	NORTH		EAST	
	SOUTH		WEST	DID YOU STOP ANYTIME WHILE OBSERVING THE PHENOMENON?
	NORTHEAST		SOUTHEAST	
	NORTHWEST		SOUTHWEST	☐ YES ☐ NO

EXPLAIN WHETHER SUCH MOVEMENT AFFECTS YOUR SKETCHES IN ITEMS 5 AND 6.

DESCRIBE TYPE OF VEHICLE YOU WERE IN AND TYPE OF ROAD, TERRAIN OR BODY OF WATER YOU TRAVERSED DURING THE SIGHTING. STATE WHETHER WINDOWS OR CONVERTIBLE TOP WERE UP OR DOWN.

HOW MUCH OTHER TRAFFIC WAS THERE?

DID YOU NOTICE ANY AIRPLANES? ☐ YES ☒ NO. IF "YES," DESCRIBE WHEN THEY WERE IN SIGHT RELATIVE TO THE TIME OF SIGHTING THE PHENOMENON AND WHERE THEY WERE IN THE SKY RELATIVE TO THE POSITION OF THE PHENOMENON.

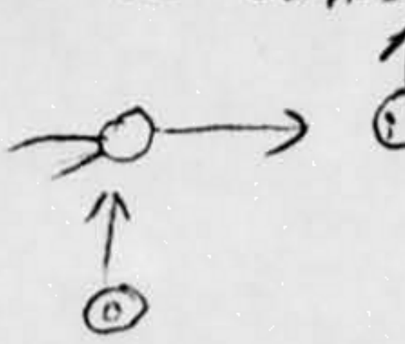
9. HOW LONG WAS THE PHENOMENON IN SIGHT?

LENGTH OF TIME				
20 min First time 3½ hrs	✓	CERTAIN OF TIME		NOT VERY SURE
		FAIRLY CERTAIN		JUST A GUESS

HOW WAS TIME DETERMINED?
I checked the time on my watch

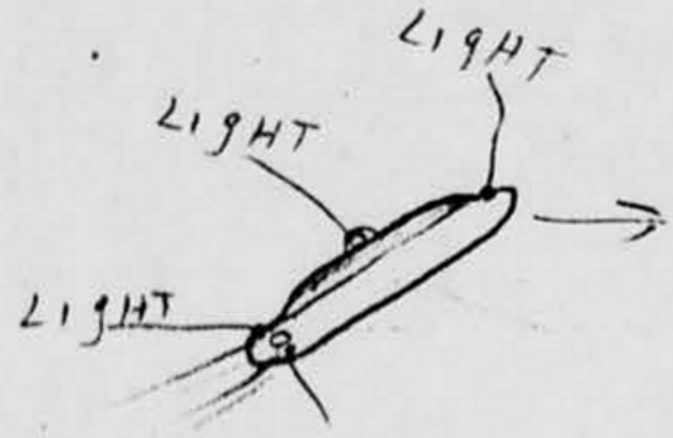
WAS THE PHENOMENON IN SIGHT CONTINUOUSLY? ☐ YES ☐ NO. IF "NO," INDICATE WHETHER THIS IS DUE TO YOUR MOVEMENT OR THE BEHAVIOR OF THE PHENOMENON, AND DESCRIBE SUCH MOVEMENT OR BEHAVIOR. INDICATE DISAPPEARANCES ON PREVIOUS SKETCHES.

It went straight up & disappeared then then reappeared & stayed continuously for 3½ hrs. It would sit still for a while then vapor streams came from it & it would move farther to the South



I was outside when I saw it and only time it was out of sight was when I ran in & shut the door & look out the window

15. DRAW A PICTURE THAT WILL SHOW THE SHAPE OF THE PHENOMENON. INCLUDE AND LABEL ANY DETAILS THAT MIGHT HAVE APPEARED AS WINGS OR PROTRUSIONS, AND INDICATE EXHAUST OR VAPOR TRAILS. INDICATE BY AN ARROW THE DIRECTION THE PHENOMENON WAS MOVING.



16. WHAT WAS THE ANGULAR SIZE? HOLD A MATCH AT ARM'S LENGTH IN FRONT OF A KNOWN OBJECT, SUCH AS A STREET LAMP OR THE MOON. NOTE HOW MUCH OF THE OBJECT IS COVERED BY THE HEAD OF THE MATCH. NOW IF YOU HAD BEEN ABLE TO PERFORM THIS EXPERIMENT AT THE TIME OF THE SIGHTING, ESTIMATE WHAT FRACTION OF THE PHENOMENON WOULD HAVE BEEN COVERED BY THE MATCH HEAD. When I first saw it it was about the size of 1½ station wagons + when I get the picture a match head would cover about 1/3 of it

13. DID THE PHENOMENON	YES	NO	UNKNOWN
MOVE IN A STRAIGHT LINE?	✓		
STAND STILL AT ANYTIME?	✓		
SUDDENLY SPEED UP AND RUN AWAY? Direct straight up	✓		
BREAK UP IN PARTS AND EXPLODE?		✓	
CHANGE COLOR? when moving upward	✓		
GIVE OFF SMOKE? vapor stream	✓		
CHANGE BRIGHTNESS?	✓		
CHANGE SHAPE?		✓	
FLASH OR FLICKER? only when spotted		✓	
DISAPPEAR AND REAPPEAR? only once for 20 min	✓		
SPIN LIKE A TOP?		✓	
MAKE A NOISE? Humming	✓		
FLUTTER OR WOBBLE?		✓	

14. WHAT DREW YOUR ATTENTION TO THE PHENOMENON?

I saw bright flashing lights + went outside to investigate

A. HOW DID IT FINALLY DISAPPEAR?

Went straight up until disappeared

B. DID THE PHENOMENON MOVE BEHIND OR IN FRONT OF SOMETHING, LIKE A CLOUD, TREE, OR BUILDING AT ANY TIME?
☐ YES ☒ NO. IF "YES," DESCRIBE.

22. HAVE YOU EVER SEEN THIS OR A SIMILAR PHENOMENON BEFORE? ☐ YES ☒ NO. IF "YES," GIVE DATE AND LOCATION.

Ya'd sure want to again.

23. WAS ANYONE WITH YOU AT THE TIME YOU SAW THE PHENOMENON? ☒ YES ☐ NO. IF "YES," DID THEY SEE IT TOO? ☒ YES ☐ NO.

A. LIST THEIR NAMES AND ADDRESSES

Mr + Mrs [redacted] St New Carlisle, Ind

[redacted] S. New Carlisle Ind

24. GIVE THE FOLLOWING INFORMATION ABOUT YOURSELF

LAST NAME, FIRST NAME, MIDDLE NAME: [redacted]

ADDRESS (Number, Street, City, State and Zip Code): [redacted] St New Carlisle Ind 46552

TELEPHONE (Area code and number): [redacted]

AGE: 37 | MALE: | FEMALE: ✓

INDICATE ADDITIONAL INFORMATION INCLUDING OCCUPATION AND ANY EXPERIENCE WHICH MAY BE PERTINENT.

I am a house wife and I have seen in my entire life expained any thing to compare with it before & never want to again. I get the impression that with this question I might be a nut, will let me assure you I'm not. I dont go around seeing things as you People seem to imply. Why did you bother sending this form, if you just throw it away & ignore it. I know what I saw I got a good future and now I dont have a camera because that is the last picture it will take. + I still got a headache that wont go away. I guess if you saw it or any other you might believe People once in a while because every one is not liars just because of a few

25. WHEN AND TO WHOM DID YOU REPORT THAT YOU HAD SIGHTED THIS PHENOMENON?

NAME New Carlisle Police Dept DAY 31 MONTH Dec YEAR 1968

26. DATE YOU COMPLETED THIS QUESTIONNAIRE.

DAY Jan MONTH 29 YEAR 1969

The officer made a wise crack + didnt bother to look

I dont drink anything stronger than coffee but seeing something like that could drive you to drink

17. DID YOU OBSERVE THE PHENOMENON THROUGH ANY OF THE FOLLOWING? INCLUDE INFORMATION ON MODEL, TYPE, FILTER, LENS PRESCRIPTION OR OTHER APPLICABLE DATA.

	EYEGLASSES	X	CAMERA VIEWER
	SUNGLASSES		BINOCULARS
	WINDSHIELD		TELESCOPE
	SIDE WINDOW OF VEHICLE		THEODOLITE
X	WINDOWPANE		OTHER Outside

A. DO YOU ORDINARILY WEAR GLASSES? ☐ YES ☒ NO

B. DO YOU USE READING GLASSES? ☐ YES ☒ NO

18. WHAT WAS YOUR IMPRESSION OF THE SPEED OF THE PHENOMENON? GIVE ESTIMATE OF SPEED Very fast

19. WHAT WAS YOUR IMPRESSION OF THE DISTANCE OF THE PHENOMENON? GIVE ESTIMATE OF DISTANCE at first it was [illegible]

20. IN ORDER THAT WE MAY OBTAIN AS CLEAR A PICTURE AS POSSIBLE OF WHAT YOU SAW, DESCRIBE IN YOUR OWN WORDS A COMMON OBJECT OR OBJECTS WHICH, WHEN PLACED IN THE SKY, SIMILAR TO WHERE YOU NOTED THE PHENOMENON, WOULD BEAR SOME RESEMBLANCE TO WHAT YOU SAW. DESCRIBE SIMILARITIES AND DIFFERENCES BETWEEN THE COMMON OBJECT AND WHAT YOU SAW.

It reminded me of a dinner Plate with a soup Bowl turned upside down only it had 2 lights in the Bottom, on top looks like a light on top of Police car only a blue one one on each end were also blue and the entire bottom was a bright blue as if it was one big light as it went up it turned orange and then lighter it turned yellow. Terribly bright and it went straight up.

21. DID YOU NOTICE ANY ODOR, NOISE, OR HEAT EMANATING FROM THE PHENOMENON OR ANY EFFECT ON YOURSELF, ANIMALS OR MACHINERY IN THE VICINITY? ☒ YES ☐ NO. IF "YES," DESCRIBE.

It sounded like a large swarm of bees, I have had a headache in the back of my head that I now have the back of my neck, my hands had little blisters later on them as well as my face the rest of my body was covered.

A. DID THE PHENOMENON DISTURB THE GROUND OR LEAVE ANY PHYSICAL EVIDENCE. ☐ YES ☒ NO. IF "YES," DESCRIBE.

I didn't check to see and you would not have either had you been here.

27. INFORMATION WHICH YOU FEEL IS PERTINENT BUT WHICH IS NOT ADEQUATELY COVERED IN THIS QUESTIONNAIRE, ALTERNATIVELY PROVIDE A NARRATIVE EXPLANATION OF THE SIGHTING.

The first Picture I took was all white it was taken through the window which the object was low. The second + last one was taken outside, My camera will not take any more Pictures, I used 3 rolls of film the pictures is Plain black + White neg. are light brown matted; black.

It reappeared on Tuesday night I was asleep it woke me up it was like a magnet pulling me + I could stop it, it pulled me toward the door + out on the Porch, Then it seemed like all the life was being pulled from me. I got back into the house after what seemed an eternity + my head ached + not nearly killed me; Then on Thursday night same thing happened It woke me up + pulled me outside again. And it felt the same as before, I got back in the house after a while it seem faint + my head hurt worse again. I shut the door + watch through the door glass + it stayed there, both on Tuesday + Thursday night. As it stayed in one Place I opened the door + stepped onto the porch several times to see what it would do, + when I stepped out it would come closer + I could feel the Pull. I got back in the house + it would stand still until I went back out. If I could talk to you I could explain all this better

A Lady friend of Mine was awaken by the humming sound + flashing lights but didn't get up to investigate

TDPT (UFO) 1st Ind Kelly

MEMO FOR RECORD 12 February 1969

SUBJECT: Call fro[redacted] - UFO Sightings of 30 Dec 68 and 1 Jan 69

1. On 10 February 1969, Lt. Marano received a telephone call from [redacted] in relation to her sightings of 30 Dec 68 and 1 Jan 69. She stated that she had received the letter and the photos and negatives we returned to her. She stated she had a picture of the object which she took on 30 Dec 68 that she hadn't submitted to TDPT (UFO). She said she would send us the picture if she was sure she would get back. She has been offered money for this picture and a story. She stated that she was divorced with three children and she could use the money.

2. Mrs. [redacted] stated that there were six witnesses to the first sighting - her three children, the people who live upstairs in her home, and herself. The object was shiny, and when it took off there was a vapor like a jet taking off. Mrs. [redacted] stated there was a knob on top of the object like that of a light on top of a police car. She also stated that there was a bright light which travelled cross ways across the sky lasting about 2 or 3 seconds.

3. The second night the object was sighted by the same people plus a policeman. Mrs. [redacted] stated that the policeman and another man went to look for the object. She said she wanted to take pictures of the object the second night, but her camera couldn't take pictures after she used it during the 30 Dec sighting. The object seemed to turn on a street light by Mrs. [redacted]s home and the lights in a service station. The humming from the object awoke Mrs. [redacted] She said it was like a magnet drawing her to the window. A 77-year old woman who lives across town was also awakened by the humming, but she didn't realize what it was and didn't investigate. Mrs. [redacted] said the object gave off a light so bright it seemed like it was daylight. The object lifted up and idsappeared at dawn. When asked to describe the object, Mrs. [redacted] stated that the bottom was flourescent. She said it was a very bright blue which hurt her eyes when she looked at it. There were two holes in the bottom where a vapor came out. The object looked like it had windows but they weren't glass. Mrs. [redacted] also stated that since the sighting her vision gets blurred at times and she gets pains down the back of her neck.

REPLY TO ATTN OF: TDPT (UFO)

11 FEB 1969

SUBJECT: UFO Observation, 31 December 1968

TO: [redacted]treet
New Carlisle, Indiana 46552

Your name has been given to the Aerial Phenomena Office (Project Blue Book) as being a witness to an unidentified flying object. If you were a witness to an UFO sighting on **31 December 1968**, would you please complete the attached AF Form 117 and return it in the envelope provided. If you were not a witness to this sighting, would you please make a statement to this effect on the attached form. The information which you provide will be used in evaluating this observation. Thank you for your assistance in this matter.

NICAP MASSACHUSETTS INVESTIGATING COMMITTEE

BOX 19 WENHAM MASS 01984
AC 617/468 4815

SUBJECT: UFO Witness Profile Reports for September - December 1968

DATE: 8 January 1969

FROM: Raymond E. Fowler, Chairman

TO: NICAP, Washington, D.C. 20036

cc: J. Allen Hynek
J. E. McDonald
USAF FTD (TDETR) WPAFB

Enclosed are UFO Witness Profile Reports for the months September 1968 through December 1968 inclusive. An Annual Witness Profile report comprising of an overview of the 12 monthly reports has been included in your copy of the NICAP MASS SUBCOM ANNUAL REPORT for 1968.

The UFO Witness Profile Reports are not intended to be exhaustive surveys but rather are a means by which one can quickly obtain a summary of the type of witnesses who are submitting UFO Reports to the NICAP MASS SUBCOM. The witnesses are referenced to their respective UFO Reports by a "filing number" in order that further information might be obtained as required.

Present Education means a distinct educational unit presently held by the witness. A unit must be fully completed before one is given credit. For example, one might be a Senior in College but would still be listed as a High School Graduate until a degree had been awarded. Due to space limitations there is no distinction between the sexes. The Occupation Other covers a variety of "other-than-listed" occupations such as None, Housewife, Minister, Artist, etc. Encircled items connected by lines indicate occupation/experience plurality, i.e., one might be an Engineer but hold a private pilots license.

Respectfully submitted,

Raymond E. Fowler

[redacted]

Dear Sir

Enclosed is the information you ask for except for the picture and since I heard the report you people made, you dont believe it anyway, youll just throw it all away + forget it, So if you want the picture youll have to come + get it, I have been offered good money for it so why should I send it to you to destroy. I will send you the neg. + film I took that were black because its no good to me anyway. I also know there are a lot of brilliant people in the world that believe me + some have seen them + wouldnt come forward because you people say wire nuts. As God is my judge and I swear on the Bible I saw the thing what ever it was + I got a picture of it. Some day I am going to write a story about it as I have already been contacted to do an article so you see every one is not crazy. This is one time you cant order a person around, so if you want it youll have to come + get it also that way ill know you are interested in all this otherwise it will prove my point. and I know better than to

NCIO

10 Dec 68
Fort Recovery
Ohio

MEMO FOR THE RECORD: 1235PM, 10 December 1968

SUBJECT: UFO Report

Nancy Guntle
RR 3
Fort Recovery, Ohio 45846
Phone (317) 337-2747
Salamonia, Indiana

At 1235, 10 December 68, Sgt Jones received a collect call from a Nancy Guntle of Fort Recovery, Ohio. She stated ever since last Thursday night, she and her husband has been followed by this UFO (Thing she called it later). She said where-ever they go, it followes them after dark. She said last night her husband chased it and couldn't catch it. She stated he turned his lights out for awhile to try and catch it and then lost it, but he had to turn his lights on because of a turn in the road and then it came down on him. She stated when there is more than her and her husband with them, they can see it but it won't come down on them as when they are alone. She said it is real bright, has a red blinking light. She said she knows its not any type of aircraft because it goes to fast.
[redacted]

[redacted]

She said the phone was listed under Dan Guntle. She said she could be reached at this number from after 7 PM until 0800 in the mornings. She stated if we had to get in touch with her after that we could reach her where she works, (Flavor Best Processing Ind.), Fort Recovery, Ohio

(Fort Recovery is on the western border of Ohio)

SUBJ: U. F. O.; Sighting of

1. On the evening of December 11, 1968, at approximately 1800Z the local citizens of Thorshofn, Iceland reported seeing an Unidentified Flying Object. Thorshofn is a small fishing village located in north eastern Iceland, approximately 250 miles northeast of Keflavik, Iceland and 15 miles west of Site H-2. The object was generally seen in Thorshofn but was not observed from Site H-2.

2. What was generally seen was an oblong object that seemed to be equal in size in relation to the moon. It was white in color with a reddish tint. It seemed to be traveling in a westerly direction. Its estimated speed was 100 Kilometers. No noise was heard. The object remained in the area for approximately 30 minutes, from 1700 to 1730. The object disappeared behind Heljaidalsfjall Mountain.

3. The local Icelandic Police was able to take a picture of the object. Due to the fact it was completely dark out at the time and a Kodak Instamatic camera was the only one available, the quality of the picture is very poor (see picture one and two). The next day I obtained a picture of the terrian for reference, (see picture Three). Enclosure 4 is a rough sketch of the places of sightings and the proposed track of the object. Enclosure 5 is a list of 14 people who saw the object. As said before, the object was generally seen in Thorshofn.

4. While in the town of Thorshofn, I interviewed three people who said they had seen the object. I had a picture of the object with me. The following is a summary of those interviews.

A. Thorsteinn Hikonasson the local Icelandic Policeman. He was notified about the object by [redacted] He saw it at 50 kilometers at the closest point. The object seemed to be oblong in shape. It was about 40 meters in diameter. It was white with a reddish tint. It traveled about 50 kilometers in 30 minutes or 100 kilometers in an hour. There was no noise. There was no sunshine or moon light at the time. The skies were cloudy. He said many people had seen it. He furnished the list of names. He took the picture.

B. [redacted], the local Icelandic [redacted] Contractor. The object was much bigger at first. It was about the size of a full moon. It was oblong in shape and reddish in color. It was brighter at first. At first there seemed to be light coming from two sources which looked like windows. From one of the sources was a rotating blue light. He saw it for 30 minutes and identified it as the object in the picture. The object traveled in a straight line at approximately 100 kilometers. The object did not change altitude or course. It disappeared behind Heljaidalsfjall Mountain. There was no moon, or sunshine and the sky was cloudy.

C. Oil Truck Driver. He saw it from 1700 to 1730. It was oblong in shape. It seemed to get closer to the earth. It seemed to be at least 1/3 the size of a full moon. He identified the object in the picture. It was white with a reddish tint. It seemed like a star at first that grew bigger.

5. Here are some scattered details and rumors, according to my interpreter [redacted]. There was a report of an U.F.O. on Akureyri radio. This was heard on Monday or Tuesday. The object was traveling Northeast. This has not been confirmed. A man named [redacted] (not to be confused with [redacted]) reported that on the evening of December 11, (the day of the sighting) he saw 3 highly focused beams of lights projected on him. These came from the sky. He thought he was going mad. He is the only witness to this.

6. Evaluation. My evaluation of the sighting is that the people of Thorshofn actually saw an Unidentified Object in the sky. This object does not fit the description of any known aircraft.

Very respectfully

Leroy C. Jones

Leroy C. Jones, LTJG, USNR
Officer in Charge, Site H-2

TOP

I also have the Camera if you get it
you want it, its just junk now. I
intend on Keeping it unless you want
it to throw away with everything else.
enjoined in this. I love my Country
and I worry about it now, it seems
you people don't because of that was
from some place else for all the concern
you've shown we could all disappear &
you people would sit back & say that
your All nuts; but believe me you all
some day are going to have a very rude
awakening when something does happen
to all of us. So Wake up now before it
does really happen. I'm not a Crackpot
I'm not drunk as I don't drink but to
Hear of some of the people they have to
protect us that don't give a hoot is
enough to drive a person to drink &
that is the truth. Had I been the only
one to see it I probably would've thought
I was cracking up but since quite a few
others saw it also then I know I'm not
how about you?

Remember if you want that picture
come & get it.

Subj: UFO; Sightings #2, #3, #4
Encl: Enclosure I, Witnesses

1. U.F.O. number 2 appeared about 1705 and lasted to 1720 on 13 December 1968. It appeared to be reddish in color. It wasn't quite as large as the previous sighting. It traveled in a Southwest direction at about 50 KM per 1 hour. It changed directions both vertically and horizonally. It moved against the direction of the wind. It was not sighted at site H-2 or by any military personnel. It was cloudy that night. The description is based on observation by the local I.P. Enclosure one lists other people who witnessed it.

2. U.F.O number 3 appeared about 1715 on 14 December 1968. We received a report from [redacted] and were able to get an observer into the area. UTC [redacted] R.C., and SN [redacted] W.L., saw it. UTC [redacted] was not impressed. He said it looked like a star to him. The I.P. said it did not look like the other UFO's.

3. U.F.O. number 3 appeared about 1730 on 28 December 1968. The local I.P. came to Site H-2 quite excited about it. He said it could be observed from the Site. RMC [redacted] P.C., ETC [redacted] and I went out to observe it. It was a little hazy out but what we saw was definitely a star or planet. Furthermore we feel it was Venus, the evening star. Because of my certainty in evaluation I did not call main base. The I.P. said it did not look like the object in UFO sightings number 1 or number 2.

NO EXPLANATION ON THE STRANGE LIGHTS SIGHTED FROM THORSHOFN.

No acceptable explanations have been given of the lights seen by Thorshofn residents in the southern sky, seen from Thorshofn, day before yesterday. Thorstoinn Hakonarson policeman took pictures of this phenomena and the film was developed by the Defense Force at Lonnanos. In one of the photographs it was possible to see a lighted sphere at a great distance, but it is impossible to see what kind of phenomena this is and if it is of this world. It is likely a weather observation balloon. This is not certain however, because there are quite some remarkable descriptions of this phenomena. At least 30 persons watched this in the sky and, according to those who watched it through binoculars, this thing emitted lights of blue and red color.

We talked with Thorstoinn Hakonarson policeman yesterday and inquired about an investigat upon this matter. He said that he had compiled a report on the testimony given by a number of people, all who clearly saw this lighted sphere. He said, that all these people give exactly the same description of what they saw. Thorstoinn said, that he had taken photographs yesterday, in full daylight, in the area the sphere was seen in and these will be compared with the photographs he took of the sphere in an attempt to determine the size of this sphere in comparision with known landmarks and mountains. Thorstoinn said, that Jon Johannsson at Thorshofn had watched this phenomena through binoculars from his home and that as far as he could see the bottom half of this object had strange lights, primarily flashing red and blue lights quite regularly. Jon saw that one half of this thing was a source of light, to be exact the upper half but on the bottom of the lower half these lights were seen. The light on the upper half looked like a half moon, but when the light drew farther away, Jon called Thorstoinn on the phone and Thorstoinn went out to take the photographs.

Thorstoinn also told us, that one Thorshofn resident, Johann Fr annsson, had been walking outside the village when he noticed this phenomena in t sky at the same time as other people noticed it, or in the time between five ar five thirty day before yesterday. Johann said, that three rays of light had p ted down to the ground where he was walking, that these rays had followed one another, where they were quite sharply defined on the ground and the light was quite intense.

We talked with Grimur, farmer at Aland in Thistilfjordur, who said that he saw these strange lights just before six in the evening, that it had been unclear but appeared to travel very slowly over the southern sky.

As this paper reported yesterday, men who were in Vesturoraefi saw strange lights night before last in the period between four thirty and eight in the evening. The men were at Kofaalda and the light they saw was visible to them every ten minutes and was very strong and lit up the area where they were. The light appeared to move slowly to the west. When the light shone, it was intense enough to light up the area where they were but was not as intense when clouds were between them and the light.

STRANGE LIGHTS SEEN IN THE SKY IN THINGEYJAR COUNTY.

Suspicious lights were seen in the sky to the south of Thorshofn yesterday around six. These lights - some kind of round lights - were seen by scores of people. Thorsteinn Hakonarson policeman, took photographs of this phenomena and the films were being developed last night by the Defense Force at Langenes, as far as Morgunbladid was able to learn. Jon Johannsson, driver was first to see the lights around 17.15 hours. He immediately called Adalbjorn Arngrimsson, airport manager at Thorshofn, informing him about this strange object. He was told, that there were no aircraft in the area. Thorsteinn Hakonarson policeman, described this phenomena as follows:

I was with Adalbjorn, both of us ran outside and watched this object for about 15 minutes through binoculars. I borrowed a phot graph and tried to take pictures of this thing, but I don't know about the results yet, the camera was not a good one. I shot about six pictures of this thing. This looked like a round thing, a sphere or a disc in the southern sky and appeared to be about midwa, up the slope of the Hlidardals mountain. This thing moved to south west and the size, from where we were standing, appeared about one tenth of the size of the moon.

Jon Jonsson said that he saw this thing first at quarter after five and observed it until around six in the evening. It was difficult to see what this was but most people believe that this was something very unusual. Most people in the village saw this light and people in the nearby countryside saw it. I believe that a few scores of people saw this thing. I called Adalbjorn on the phone and he told me that there were no aircraft in the area. I watched this thing through binoculars and I can't describe the shape of this thing, but boys around here believed they saw skis on this thing, which may be an imagination. The light varied in intensity and I believe this was some kind of a sphere and it seemed that something was revolving inside the sphere because the lights changed regularly, revolved like a radar scanner and I believe I saw the light ray from this thing. Like I said, the light varied in intensity, sometimes it was weak and then again quite bright, but this fluctuation in intensity was regular. I don't dare to assert anything about the distance, but if this thing was sighted from the Holsfjoll mountain area, the distance could be figured out. When this object disappeared over the mountains, it seemed just barely clear the mountains, so it must have been a little over 2500 feet up in the air. This strange object then disappeared over the Arnarfjoll mountains.

Late last night, Morgunbladid heard about other strange lights seen by two men day before yesterday in the Vesturoraefi in the interior, when they were at a location called Saudakofi in darkness. They saw lights between Eyjabakka glacier and Brior glacier and they believed it came down a pass or a depression in the glacier. They said that these lights were nothing like brightness from a volcanic eruption, they appeared to be like spotlights. The brightness was enough to light up the area around them, although they were quite far away from where the lights appeared to be.

* * *

ENCLOSURE (3)

MORGUNBLADID, 15 December 1968.
Page 32, Col. 2-3.

THE RESIDENTS OF THORSHOFN STILL SEE STRANGE LIGHTS.

Strange lights were again seen to the south of Thorshofn at six in the evening of day before yesterday. Among those who saw these lights was Thorsteinn Hakonarson, policeman, who took photographs of it, but Thorsteinn informed us yesterday that he knowsabout eight other persons who saw these lights. In the evening of Wednesday a great number of people saw some kind of an illuminated disc in the sky to the south of Thorshofn and Thorsteinn took photographs of this, which were developed by the Defense Force at Langanes. Thorsteinn told us yesterday, that according to computations made by the Defense Force members, that light appeared to be at a distance of some 50 kilometres from Thorshofn and the disc must be about 400 metres in diameter. The latest photographs, of the lights seen day before yesterday, had not been developed yesterday.

Thorsteinn informed us, that he had first seen the light at about 17.15 hours night before last. At first it appeared, that the light was stationary in the southern sky but then it descended rapidly and moved to the west at the same time. When Thorsteinn had watched the light for a while, it disappeared but then appeared again and by then considerably farther to the west and lower in the sky. It then appeared to be stationary for a few minutes. Again the light disappeared or was turned off, then appeared again farther to the west and lower in the sky than before only to be seen very briefly and then to disappear.

Thorsteinn said, that the movements of this light had been independent of the wind. Thorsteinn also said, that the red had been more prominent in the light than the one seen last Wednesday, but visibility was worse day before yesterday than it was last Wednesday.

STRANGE LIGHTS SEEN IN THE WESTFJORDS AREA.

Of late there have been seen, three times, strange lights in the sky over the southern part of the Westfjords area. Morgunbladid had an interview with Thordur Jonsson at Latrar, where this light phenomena was seen in the sky for one and a half hour in the evening of Monday.

Thordur Jonsson said, that the light had also been seen from the village of Bildudalur one day after Christmas, that the light had been seen passing over the mountain called Otrafjall. Later, the light was seen from the farm at Kollsvik for some fifteen minutes and finally it was seen from Latrar night before last. The description of this phenomena is identical from these three locations.

Thordur Jonsson gave the following description: The light is light yellow, but variable in color and changes to bright red, also to green. If the light is watched through binoculars, the light and the colors appear sharper still. The light is quite large in dimension larger than those earth satellites which have been seen in the sky, the size appears to be between that of a large star and that of the moon. The light moves, in the evening of Monday it moved from east to west, as the wind was blowing at that time.

When the light was seen from Kollsvik, it could be seen for about fifteen minutes. It was a moonless night and to people who saw the light, it appeared to illuminate the sea in an area about 20 to 30 metres across. In the evening of Monday, this light was seen for one and a half hour from Latrar. At that time, the sky was clear, and the moon shone brightly. Thordur Jonsson at Latrar believes, that had it been darker, this phenomena would have illuminated its surroundings quite well. He claims it quite impossible that this can be explained away as a distress flare of any kind, but it was somewhat similar to a distress signal rocket. The light moves too slowly to be such a distress signal and it sails across the sky. Thordur Jonsson said, that he had called the headquarters of the Icelandic Life Saving Association, since it would be very interesting to get some explanation to this phenomena.

Last night, Thordur Jonsson at Latrar called us again, since this light phenomena was in the sky and this time, he said it appeared like a rod of some kind extended from the top of it and the light appeared to rock back and forth. Before the moon rose, this light was strong enough to be reflected across the sea. At times it shone with a yellow color, at other times it appeared like a star, very beautiful but variable in shape.

Morgunbladid discussed this with meteorologist Jonas Jakobsson who said, that it is quite difficult to say what this might be, but there is a great number of all kinds of research equipment carrying balloons in the sky and in the fringes of outer space by now. This appears, from the descriptions given, to be some kind of a balloon, which is descending very slowly into the athmosphere, having completed its mission and gradually leaking out the gas, which inflated it. At times, such balloons are covered with a light reflecting material, a metallic coating and reflect light quite well. These balloons can reflect moonlight although the moon is not visible from the ground.

It was recently found out in Denmark, that strange lights seen in a similar manner there, turned out to be reflections from one of the inflated balloons used for television signal deflection, so called ECHO balloons. When these begin to descend into the athmosphere they slow down and they are deflected to an oblong shape. In this connection it might be pointed out, that French research scientists released a great number of large research balloons here in Iceland last summer. Jonas Jakobsson stated at the end, that he could not make any definite statements on what this phenomena might be, but he just happened to think of these balloons as an explanation.

PHOTOGRAPHIC DATA

1. Type and make of camera: Polaroid Swinger Model 20

2. Type, focal length, and make of lens:

3. Brand and type of film: Polaroid Swinger Film Made for Camera

4. Shutter speed used:

5. Lens opening used; that is, "f" stop:

6. Filters used:

7. Was tripod or solid stand used: NO

8. Was "panning" used:

9. Exact direction camera was pointing with relation to true North, and its angle with respect to the ground:
South South East

10. If supplemental information is unobtainable, the minimum camera data required are the type of camera, and the smallest and largest "f" stop and shutter speed readings of the camera:

If Camera range was set on 20 which is as far as it will go but the distance setter is for flash only. This was taken with out the flash. The object was so bright against the night sky it didnt need a flash bulb

Also [redacted] took some pictures get it and enclosed youll find the rug as the pictures did not take

T

MORGUNBLADID, 23 January 1969.
Page 24, Col. 5.

6.

STRANGE LIGHTS OVER HUSAVIK LAST NIGHT.

Unidentified and unusual light was seen by residents at Husavik last night. The light was seen in the sky to the south east from the town. The light did not appear to move much, but appeared to draw farther away rather slowly. The light appeared much brighter than a star, had a strange colour shading to it. On its edges, the light appeard to be a mixture of red and green, like navigation lights, yet the red light was dominant. Many residents at Husavik saw this strange light after eight last night. No explanations are available on the reasons for this strange light.

UNCLAS OTN-B SUBJ: UFO

1. FOR FTD WPAFB (TDPT-UFO), CASF(AFRDC), OSAF (SAF-OI). IAW AFR 80-17 THE FOLLOWING INFORMATION IS SUBMITTED REGARDING UFO SIGHTINGS AT 0330Z, 0730Z AND 0900Z 30 DEC 1968.

2. DESCRIPTIONS OF OBJECTS:

A. OBJECT SIGHTED AT 0330Z APPEARED AS A LARGE BRIGHT LIGHT RESEMBLING A STAR. THERE WAS A PROJECTION FROM THE REAR OF THE LIGHT WITH NUMEROUS SMALL PINK AND GREEN CIRCULAR LIGHTS. NO MOVEMENT WAS APPARENT.

B. OBJECT SIGHTED AT 0730Z 30 DEC 68 WAS WHITE WITH THE SHAPE

OF A CIGAR AND HAAD WING-LIKE PROTRUSIONS ON EITHER SIDE WHICH HAD A BLUISH GLOW. THE OBJECT MOVED WITHOUT ANY APPARENT NOISE OR EXHAUST TRAIL THEN BECAME STATIONARY.

C. THE OBJECT SEEN AT 0900Z RESEMBLED A GLIDER OF KITE. MOVEMENT APPERARED TO BE A SAILING OR GLIDING MOTION. THE OBJECT SEEMED TO BE MADE OF A PLASTIC MATERIAL WHICH GLOWED AND HAD SEVERAL REDDISH CIRCLES ON THE SURFACE. WHRN THE OBJECT MOVED IT HAD A SOUND THAT RESEMBLED THAT OF A HELICOPTER.

3. DESCRIPTION OF COURSE OF OBJECTS:

A. THE FIRST OBJET WAS CALLED TO THE ATTENTION OF THE OBSERVER DUE TO ITS BRIGHTNESS. THE OBJECT WAS AT AN UNESTIMATED HEIGHT BUT WAS AT AN ELEVATION THAT PLACED IT ABOVE THE HORIZON AND ON A PLANE WITH THE STARS.

B. THE SECOND OBJECT'S MOVEMENT AND UNUSUAL SHAPE BAUGHT THE OBSERVERS ATTENTION. THE OBJECT WAS VISIBLW FOR APPROXIMATELY 15 MINUTES. THE FLIGHT PATH WAS FROM EAST TO WEST. SPEED AND ELEVATION IMPOSSIBLE TO ESTIMATE.

C. THE THIRD OBJECT WAS CALLED TO THE ATTENTION OF THE OBSERVER BY ITS MOVEMENT. OBJECT WAS FIRST SEEN NORTH OF THE OBSERVER'S LOCATION MOVING EAST. THE OBJECT'S MVEMENT WAS SLIGHTLY IRREGULAR

AS THOUGH SAILING OR GLIING, BUT OBJECT MOVED STEADILY UNTIL IT DISAPPERARED TO THE SOUTH. OBJECT WAS VISIBLE ABOUT TWO MINUTES.

4. MANNER IF OBSERVATION: ALL OBJECTS WERE GROUND-VISUALLY SIGHTED. NO OPTICAL AIDS WERE EMPLOYED. A CHECK WITH FAA AND ADDC RADAR OPERATORS PRODUCED NEGATIVE CONFIRMATION OF SIGHTINGS VIA ELECTRONIC MEANS:

5. TIME AND ATE OF SIGHTINGS:

A. FIRST OBJECT: 0330Z, 30 DECEMBER 1968.

B. SECOND OBJECT: 0730Z, 30 DECEMBER 1968.

C. THIRD OBJECT: 0900Z, 30 DECEMBER 1968.

D. ALL OBJECTS WERE SEEN AT NIGHT

6. LOCATION OF OBSERVERS:

A. FIRST OBJECT: 0858N 9730W, SAN FRANCISCO SECTION OF PANAMA CITYN R. P. (1/2 MILE NE OF MARCOS A GELBERT AIRPORT, R. PM

B. SECOND AND THIRD OBJECTS: 0859N 7931W, PASAENA SECTION OF PANAA CITY, R. P. (ADJACENT TO THE UNIVERSITY OF PANAMA.)

7. IDENTIFYING INFORMATION ON OBSERVERS:

A. FIRST OBJECT: [redacted] AGE APROXIMAELY 25 C[redacted] -, !4-,:8:9, REPUBLIC OF PANAMA.

[redacted] AGE APPROXIMATELY 60, [redacted]

NEITHER WITNESS EXPERIENCED WITH CELESTAL OR AERONAUTIAL SIGHINGS.

B SECON OBECT: [redacted], AGE 40, AVENUE [redacted] [redacted] PASADENA, PANAMA REPUBLIC OF PANAMA. TEL [redacted] EMPLOYED AS A DRAFTSMAN WITH [redacted] COMPANY, PANMA CITYM MR. [redacted] IS WELL EDUCATED AND INFORMED, HOWEVER HE IS NOT EXPERIENCED WITH AERONAUTICAL SIGHTINGS AS HE COULD NOT ESTIMATE HEIGHTM, DISTANCES OR SPEED. DAILY WEATHER MAPS

WEEKLY SERIES DEC. 30, 1968-JAN. 5, 1969

Send to TDPT/UPO

The charts in this publication are a continuation of the principal charts of the Weather Bureau publication, Daily Weather Map. They include the Surface Weather Map, the 500-Millibar Chart, the Highest and Lowest Temperatures Chart, and the Daily Precipitation Chart. All of the charts for one day are arranged on a single page of this publication. They are copied from operational weather maps prepared by the National Meteorological Center, Weather Bureau. The symbols used on the Surface Weather Map and the 500-Millibar Chart are the same as those used previously in Daily Weather Map. An explanatory sheet is available, and single copies may be obtained without charge by writing to: Environmental Science Services Administration, Publications Section, AD 143, Rockville, Maryland 20852. Bulk copies may also be ordered, at a cost of $2.30 per 50 copies. Checks should be made payable to the Superintendent of Documents.

The Surface Weather Map presents station data and the analysis for 7:00 a.m./e.s.t. The tracks of well-defined low pressure areas are indicated by chains of arrows; the locations of these centers at times 6, 12, and 18 hours preceding map time are indicated by small black squares enclosing white crosses. Areas of precipitation are indicated by shading. The weather reports that are printed here are only a fraction of those that are included in the operational weather maps, and on which the analyses are based. Occational apparent discrepancies between the printed station data and the analyses result from those station reports that cannot be included in the published maps because of lack of space.

The 500-Millibar Chart presents the height contours and isotherms of the 500-millibar surface at 7:00 a.m./e.s.t. The height contours are shown as continuous lines, and are labeled in feet above sea level. The isotherms are shown as dashed lines, and are labeled in degrees Celsius. The arrows show the wind direction and speed at the 500-millibar level.

TheHighest and Lowest Temperatures Chart presents the maximum and minimum values for the 24-hour period ending at 1:00 a.m./e.s.t. The names of the reporting points can be obtained from the Surface Weather Map. The maximum temperature is plotted above the station location, and the minimum temperature is plotted below this point.

The Precipitation Areas and Amounts Chart indicates by means of shading the areas that had precipitation during the 24 hours ending at 1:00 a.m. Amounts in inches to the nearest hundredth of an inch are for the same period. Incompiete totals are underlined. "T" indicates a trace of precipitation. Dashed lines show the depth of snow on the ground in inches as of 7:00 a.m. of the previous day.
