and yet, as in my case,
to not have been very
eager to gain any publicity

It finally dawned upon me

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No ☒ Don't know. IF you answered YES, then tell what

in front of: _____

17. Tell in a few words the following things about the object:

a. Sound *None - it was at least (estimated) 5-8 miles distant.*

b. Color *a silvery-white (similar to the full moon glow, when the moon is high)*

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

all flat (due to the distance of the object) (objects)

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

Direction of Flight *on first sighting, it appeared as a singular [March] object; this sketch [March] enlarged! I did look at this object very carefully, replacing my glasses on to get a better view.*

after the object passed further to my left - or, to the south, I noticed that there was another identical one on the opposite side - thusly: 

the actual size, from where I was observing it, would be about a third of the size of the sketch marked with an X. Thus, the reason why I could not see any distinct features

20. Do you think you can estimate the speed of the object?
(Circle One) Yes ☒ No ☐ (approx. only)
IF you answered YES, then what speed would you estimate? 200-300 miles per hr. - until the time it accelerated; when it must have increased speed to 4 or 5 times as great.

21. Do you think you can estimate how far away from you the object was?
(Circle One) Yes ☒ No ☐
IF you answered YES, then how far away would you say it was? 6-8 mi. (approx)

22. Where were you located when you saw the object?

f. Flying over open country?
g. Other standing on the sand a few yards from the edge of the lake.

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:
24.1 What direction were you moving? (Circle One)
a. North b. Northeast c. East d. Southeast e. South f. Southwest g. West h. Northwest
24.2 How fast were you moving? _____ miles per hour.
24.3 Did you stop at any time while you were looking at the object?

a. Eyeglasses Yes ☒ No ☐ e. Binoculars Yes ☐ No ☐
b. Sun glasses Yes ☐ No ☐ f. Telescope Yes ☐ No ☐
c. Windshield Yes ☐ No ☐ g. Theodolite Yes ☐ No ☐
d. Window glass Yes ☐ No ☐ h. Other however I first saw the object (objects) without my glasses on.

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.
a white foot ball, or egg, with somewhat of a glowing effect - but at such a distance that no distinct lines could be made out.

I had the "notion" at the time that it was the size of a large airplane and for a few seconds thought it might be a sea gull - then a reg. plane, until I noticed it was not actually long like our planes.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass when you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? Two.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I had been very skeptical about all the "fuss" I had heard about "flying saucers" — until this incident here-in related. In fact, I had no idea at all as to whom I should report ^{to} about this more or less peculiar observation — because as the facts are given here, there was nothing particularly distinct to present — no details could be given — nothing definite. I only then realized that what was seen did corres-pond in "behavior" to ~~with~~ some of the comments I had read about relating to others seeing this phenomenon themselves. Thus I suddenly became vividly aware of the fact that there really were such objects — that really moved with a fantastic velocity, and so quietly. So I then checked out a library book on the subject ~~of~~ and became concerned with what others had experienced in this regard.

In fact, the whole feeling that others would mostly consider me as another "crack pot", kept me from doing any thing further about the incident.

So all these years I've just more or less "put it out of my mind"; though a

few times I've mentioned to certain friends that I myself have seen these "things" which people refer to as "flying saucers" (at least on that one occasion)

In fact too I had no notion as to whom to report such an incident, until

I just recently came across this old issue of Look Magazine; and thought

I would go ahead — better late than never — and sketch in what I

do actually remember of that

incident. Nothing, (on my word of honor), has been added or changed as

to the exact sighting which I observed. I am sorry that I

cannot recall the exact dates or

were with me. I had made several

trips to the Lake there on outings &

as to who was with me that particular time, I cannot remember
