Weather and research agencies will be contacted and witnesses interviewed relative to the sighting of aerial phenomena at Des Moines, Iowa on 7 April 1949. Inclosed guide will be used for reference.

UNCLASSIFIED

CONFIDENTIAL

has left a lasting impression on him but that he had not thought about it until this happened the other night. [redacted] called the local paper and told them about it and that he didn't mind a little publicity if they would report the truth as he saw it and not make it appear that he ([redacted]) had seen a "flying saucer." [redacted] stated that he has read articles about aerial phenomena and that the last article he read had given the address to which correspondence concerning unusual activity should be sent. [redacted] reported the incident to the newspaper before he communicated with Wright Field. [redacted] stated that no one from the newspaper had come to see him. The object was moving north and [redacted] stated he had to get on his knees to see out his window and over the roof of the house next door on the west. [redacted] stated that the shadow on his bedroom floor was moving south and that the light was so intense that it shown through his blinds which are heavy, green, non-transparent blinds.

AGENT's NOTE: [redacted] appeared to be making statements which he was not sure were correct. When the writer remarked about them, [redacted] would counter by asking if his statements were not correct. [redacted]'s grandchild was present and this appeared to make the interview very uncomfortable for [redacted]. The grandchild was asking questions and [redacted] appeared desirous of having the child out of the room.

5. The name files of the Police Department, Des Moines, Iowa, and the Sheriff's Office, Polk County, Des Moines, Iowa, were examined and revealed no derogatory information concerning [redacted].

Inclosures:

DETAILS:

UNCLASSIFIED

AT DES MOINES, IOWA

1. Mrs. LOIS M. WALTON, 2910 Rutland, Des Moines, Iowa, housewife and private nurse, was interviewed on 20 June 1949. Mrs. WALTON stated that she has known Mr. M. L. AHERN for three years as a neighbor, and that from her observation of him, he (AHERN) appears and acts odd. Mrs. WALTON also stated that Mr. AHERN has caused trouble in the neighborhood and that she would not put it past AHERN to think up something unusual for a bit of publicity.

2. Miss OSIE TAYLOR, 2906 Rutland, Des Moines, Iowa, saleslady, was interviewed on 20 June 1949. Miss TAYLOR stated that she has known Mr. AHERN for nine years as a neighbor and has found him to be odd and eccentric. Informant also stated that she stays away from AHERN because he has caused trouble in the neighborhood. Informant stated that AHERN has a feeling that some of his property may be taken away from him, as some of the neighbors had their lots surveyed and in the surveying it was determined that the lot stakes were not exactly right. The neighbors were entitled to a few more feet of land. This caused AHERN a great deal of concern as he felt that this would revert down the line until he would be the last and that some of his land would be taken away from him. AHERN is hot headed and is capable of giving information that does not exist.

3. Miss MELISSA TAYLOR, 2906 Rutland, Des Moines, Iowa, accountant, was interviewed on 20 June 1949. Miss TAYLOR stated that she has known Mr. AHERN for eight years as a member of the community, and believes that he is capable of giving information which is not substantiated by facts. AHERN has written letters to the local newspaper which has caused his family great concern because it jeopardized his son's position. AHERN is eccentric and informant stated that she and her sister have stopped having anything to do with him.

4. Mr. [redacted], Des Moines, Iowa, retired, was interviewed on 20 June 1949. Mr. [redacted] stated that he was awakened from a sound sleep by a terrifying light shining through his blinds on 7 April 1949 at 0415 hours. [redacted] stated that he watched the light from his bed and that it gave off a light brighter than day. [redacted] stated that he could see shadows in his back yard, especially the eave from the garage next door, but that it gave or cast no shadow from the telephone pole to the rear of his house. He ([redacted]) then got up and went to the window on the west and watched the light until it disappeared behind the neighbor's house and chimney. [redacted] stated that he awakened no one in the house because they have two roomers who have to go to work early, and also a young grandchild who, if awakened, will not go to sleep again. [redacted] stated that when he was a young boy fourteen years old he looked directly into a sun spot, and that this phenomena in the sky is the closest thing he has seen to the sun spot. [redacted] stated that looking into that sun spot

UNIDENTIFIED AERIAL OBJECTS

Incident No._____

1. Date of Observation 7 April 1949 Date of Interview 20 June 1949

2. Exact time of observation (local) 0415 CST

3. Place of Observation: Des Moines, Iowa
(Map Coordinates)

4. Position of observer (air, car, bldg, location of - give details:
Observer was in 2d floor, south-west bedroom, frame house. Object was west south west of him and he observed it from the east.

5. What attracted attention to object: I was awakened by a piercing light shining through non-transparent blinds(green). It was lighter than day.

6. Number of objects and sketch of formation or grouping:
One object(see sketch attached)

7. Apparent size (compare to known object, i.e., sun, moon, thumb or fist at arms length): It was twice the size of a full moon.

8. Color of object: Reddish, yellow and purple, that is, the upper 4/5's.

9. Shape (give graphic description - compare with known object):
It resembled the scoop that is used by grocery men in scooping sugar.

10. Altitude (Angle of elevation above horizon - 0° at horizon, 90° overhead): Angle approximately 30 degrees and 350 feet.

11. Direction from observer (Angle clockwise from North):
When first seen? West south west When last seen? North north west

12. Distance from observer (Distance to town, bldg, etc., over which object appeared to be): Approximately 200 feet from observer

13. Direction of flight of object (s): North

14. Time in sight: 12 Minutes; went behind chimmney of neighbor's house. I did not go down stairs to follow it.

15. Velocity (time to cover given angular distance):
35 degree angle and took 12 minutes.

16. Sound and odor:
There was no sound or oder

UNCLASSIFIED

Incl 1

17. Trail (color, length, width, persistance, etc.): No trail, no color, length about 4" over 2 feet, width, less than 2 feet.

18. Luminosity (visible by reflection, incandescence, other - degree of brilliance): Brightest thing I have ever seen..incandescence.

19. Projections (fins, wings, rods, antennae, canopies, etc.):

No projections--steady flight, perfect control.

20. Maneuvers (turns, climbs, dives, etc. - sketch of flight path):

No maneuvers of any kind--straight flight and disappeared behind neighbor's chimmney.

21. Manner of disappearance:
Around roof on neighbors house and behind the chimmney.

22. Effect on clouds: None--not determinable.

23. Additional information concerning object:

24. Weather conditions and light at time of sighting:
No adverse weather conditions and no light at time of sighting.

Name and address of observer:
Mr. [redacted], Des Moines, Iowa

Occupation and hobbies:
Retired, former, Farmer, Insuranceman Hobbies: Politics
Teacher, RR Mail Service

Comments of Interrogator relative to intelligence and character of observer (Check neighbors, police dept., FBI records, employer,etc):
This writer believes this to be publicity stunk which didn't materialize. Subject is fairly intelligent but lacks ambition for doing anything constructive. He is approximately 65 years of age and has no outside interests or within the home. He has read numerous articles on arial phenomena and is more or less intrigued by them. He has much time to do about nothing. He is shabbely dressed and generally unkept. His reasoning has been easily changed to conform to this writers opinion, and would readily change his to conform to what was correct.

Did observer wear glasses, especially polaroid glasses at time of sighting, or was object viewed through canopy, window, or other transparent material? No glasses were used and object was observed through window pane

Gentlemen:

About 4:15 a. m. Thursday, April 7th, I was awakened by the brightest light I have ever seen.

It was not a ball of fire racing through the sky. It was moving so slow it appeared to be standing still. The only way that I could tell it was moving was to note the space between it and the roof of my neighbor's house, 25' west of me. It passed west of that roof, going north.

There was a straight line on the back of the thing. It was divided into two apartments. The upper apartment was three times as large as the lower apartment. They were separated by a straight line. The lower apartment was divided into several different apartments, all the same size, all a different color, and all had straight sides. The whole thing was inclosed in something like glass. I did not see any opening nor did I hear any noise.

The upper apartment was a raging fire. The fire seemed to start at the point where I started the arrow, race up to the ceiling, then turn around and around. When the fire hit the celing it always turned toward the back and then down.

The moment I saw it I was satesfied it was man made. It was the most heinous looking thing I have ever seen. I don't think it was more than 200 feet from me. Please find enclosed a rough sketch of the thing. This thing did not resemble the "saucers".(I saw three saucers last October about 2:30 P.M. The day was perfect. They were north east, a little east of overhead, the sun was south west. The sun was shining on them. They were going north, not very fast.

At first glance they seemed to be bobing along, but I noticed they seemed to have rhythm. Then I could see that they were fastened together,by a stout crooked axis, about two feet apart. The axis was traveling end ways. They seemed to be rotateing, with th e axis, at a terrific speed. This speed, plus the position of the saucers on the axis, seemed to hold it up and move it forward. It seemed to bore through space just like an auger. I saw no tail, no wings no light.)

This thing that I saw, April 7, moved straight, steady and very slow. It had a very thick back made of something like iron. Yours very Truly,

M. L. Ahern 2900 Rutland Ave

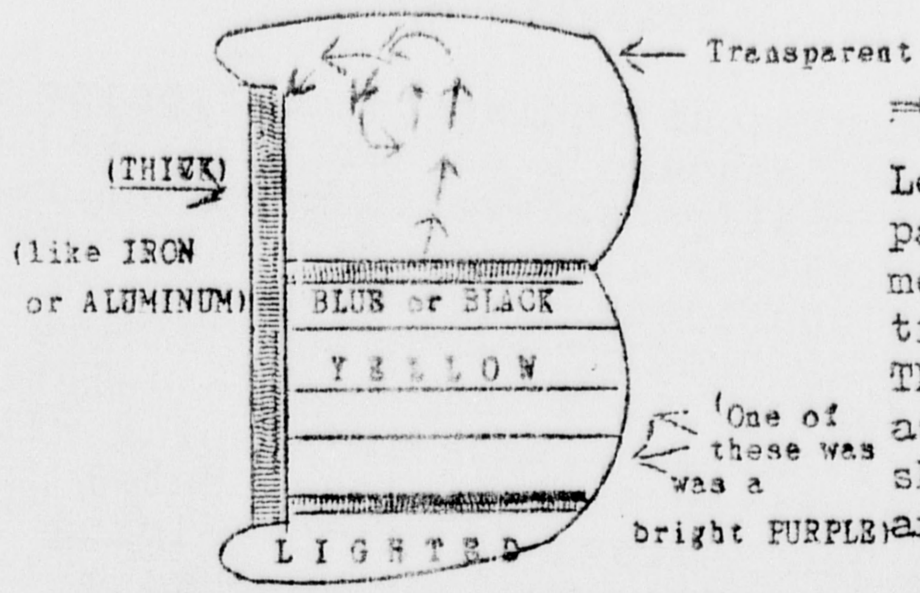
lower two, one of those was a bright purple, but I don't know which one.

DESCRIPTION OF A "FIREBALL"

by Dr. William Nothdurft.

In the early morning of April 7, 1949, at about 4:15 - 4:30 a.m., there appeared over Des Moines, Iowa, a strange object. This was two days after the various appearances over Salt Lake City and northward.

The object was evidently first seen by a Mr. [redacted] One of the shades in his room (toward the west) was up about four inches; the light that came through this small opening was so bright that it awakened him, and he went to the window, spent several moments examining the object, then lay down on his bed again to determine by its shadow whether it was moving*. The shadow (or, the light on the floor) was moving southward. Then he went to the window again and watched it as it slowly disappeared behind the house next door. The object was thus travelling north and was west of the observer. "It was the most heinous thing I have ever seen in my life" says Mr. Ahern; and he drew a sketch of the way it looked:



Mr. [redacted] diagram

Left vertical line represents a part that looked "thick, like metal. The upper part seemed transparent and full of fire. The lower part was also lighted as if in compartments, and these showed blue (or black), yellow, and purple respectively.

At about the same time, a Mrs [redacted]ay, [redacted]t., some 40 blocks west of Mr. [redacted] was startled by a brilliant light high in the sky toward the S.SW. Fire "trailed from it like a Roman candle" but the illumination was very brief. Both Mrs. [redacted] and Mr. [redacted] seemed to me to be perfectly normal people and not unduly excited by their experiences.

From my interviews with people in Waterloo last fall regarding the discs that were seen here in July 1947, and from newspaper clippings, especially from Iowa, I have learned that similar phenomena are usually seen over a certain kind of terrain, either around a hilly section, or river bottoms where great sink holes are, and always with thick vegetation and undergrowth. In Waterloo, this section of Des Moines, and in Exline, Iowa (where a disc was seen May 5th last), there are rivers. In the light of this, I am wondering if this object seen over DesMoines was not going slowly over this hilly section looking for something, and whether the flash noted by Mrs Bubany might not have been a flare; tho' the Utah stories reported not only explosions that were seen but that were also felt. Always travelling north? Over DesMoines and Exline, Ia. over Utah, and over Oakland, Calif.-all were travelling northward.

Project Saucer,
Wright-Patterson Air Force Base,
Dayton,
Ohio

Gentlemen:-

I hope, sincerely, you do not think I am boring you with my occasional and small contributions.

I felt very badly about Shalett's mentioning my little theory regarding the "saucers". He certainly had not asked my permission, and I really believe it gave the reader the impression that one takes his life and reputation in his hands to dare write you in confidence, lest he be held up in absolute public ridicule. My "reply" to Shalett in the Saturday Evening Post's "Letter" section was, due to deletion and butchering, made quite impotent,--perhaps in keeping with the joking attitude the Post's writer Shalett inaugurated in his fiasco entitled "What You Can Believe About the Flying Saucers". Paxton made my "dovetail" into "dovetailing" and made it appear that I had forgotten to begin one sentence with "Then--". Actually, a sticker for accuracy, I had checked and rechecked my letter before I submitted it to the Post.

As things now stand, I am a martyr to my convictions, and only time may vindicate me. Believe you me, I as firmly hold today, as I did when I first wrote you in July 11, 1947, that the "saucers" are extra-terrestrial "ghost-objects" propelled by telekinetic energy and caused to remain stationary in mid-air by levitation. Excuse the title of the magazine (I hate the esoteric) but FATE, 139 N. Clark Street, Chicago 2, Illinois, will print my article "The Mystery of Borley Rectory" tentatively scheduled to appear in the November 1949 issue. I have, in that article, summarized Harry Price's findings relating to the paranormal influence manifested in the Borley Rectory hauntings, and you will see WHY I believe absolutely in the etheric.

You may keep the enclosed material.

Sincerely,

[redacted]
