PAGE 2 OF 4 PAGES

1. On 27 January 1951 the 20th Air Force, Okinawa, reported an F-4C flight sighted a vapor trail on 26 February 1951 at an altitude of 30,000 feet; heading: 240 degrees; time: 1625/I. The point of sighting was 25 degrees 10 minutes North - 127 degrees 15 minutes East. The friendly aircraft was at an altitude of 16,000 feet; heading: 110 degrees at an indicated air speed of 400. The vapor trail was sighted for two (2) minutes. A second F-4C flight scrambled and observed one (1) vapor trail at 24 degrees 10 minutes North - 125 degrees 21 minutes East at 1635/I; altitude: 30,000 feet; heading: 230 degrees; speed: unknown. Altitude of the second flight was 30,000 feet; heading: 270 degrees; indicated air speed 470. Duration of sighting was 25 minutes. The flights were unable to intercept because of the distance from the target and fuel exhaustion. No friendly aircraft were known to be in the vicinity. The unidentified object was not picked up on any radar.

2. Inquiries directed to the Thirteenth Air Force and Commander, Seventh Fleet established that no aircraft from those organizations were in the vicinity at the time of the sighting.

3. A query was dispatched to USARMC Taipei, Taiwan, to check the possibility of Chinese Nationalist or other activity in area of the sighting. Taipei replied on 14 February 1951, stating there had been no Chinese Nationalist or other activity in the area.

4. Weather data for the area of sighting during the period 1500 hours to 1800 hours, 26 January 1951, follows: low overcast, bases 3,500 feet - 4,500 feet; 10/10 alto stratus layer, bases 8,000, tops 15,000; no precipitation for the past three hours; winds from the west at 30,000 at 70 knots, surface winds from 020 degrees at 16 knots. Cloud 32.1 degrees centigrade temperature at 30,000. Weather personnel at 20th Air Force Headquarters believe conditions stated above were favorable for formation of contrails by any aircraft at 30,000 feet.

5. Pilots of the two F-4Cs were interrogated and made the following statements:

26TH FIGHTER INTERCEPT TOW SQUADRON

30,000 turned to a heading of 270 degrees and sighted a vapor trail at 11 O'clock level. At the distance we were from the vapor trail it was impossible to determine the number of vapor trails. It is my belief that there was only one vapor trail which could be seen from that distance. We turned to 235 degrees and flew that heading for 23 minutes at 99%. At this point our rate of closure on the vapor was not apparant, there fore due to lack of fuel we returned to base and landed.

25TH FIGHTER INTERCEPTOR SQUADRON
AFC 235 29 January 1951

7626

SUBJECT: Interrogation Report

TO: Intelligence Officer
6302nd Air Base Group
AFC 235

Penetrate "D" Flight Leader was scrambled at 15:10 and completed 8 intercepts on B-29 type aircraft given by wonderlust and was returning to base low on fuel. At 15:25 while crusing at 15,000 feet we sighted one vapor trail at approximately 190 degrees and 74 miles from our position.

The heading of the vapor trail was 045 degrees and altitude 30,000 feet. The distance we were from the vapor trail it was impossible to determine the number of vapor trails. It is my opinion that there was only one vapor trail from what could be seen from that distance. Its location was 127 degrees 15 minutes East 25 degrees North, as near as I can estimate. At no time did I see any flying object, aircraft or otherwise, and the source of the vapor trail is unknown to me.
