AIR INTELLIGENCE INFORMATION REPORT

10

SUBJECT: Report of Unknown Aircraft

AREA REPORTED ON	FROM (Agency)
Northeast Illinois	Radar Mal. 755th AC&W Squadron, Williams, Bay, Wis.

DATE OF REPORT	DATE OF INFORMATION	EVALUATION
7 June 52	3 June 52	A-3

PREPARED BY (Officer): Capt. Douglas A. Neilson

SOURCE: [redacted]

REFERENCES (Control number, directive, previous report, etc., as applicable): EADF Letter 200-1, 18 June 51

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 113—Part II.)

Time: 1527Z

On 3 Jun. 52, an estimated six (6) to ten (10) aircraft were detected by our radar set (AN/CPS 6B) at a GEO. REF. position of DM 3012, on a heading of 310°, altitude of 25,000 feet, and an estimated air speed of 450 M.P.H. [redacted] controller on duty, checked C.A.A. and M.F.S. for flight plan, but they had no flight plan; so he consequently declared an unknown classification on the track, and scrambled Shantung Red, F-86 type aircraft, from O'Hare Field, in Chicago. During the time the track was inbound, the Shantung Aircraft, flying at 29,000 feet, were merged twich with the unknown track, by radar control; however, the fighter aircraft were unable to sight any aircraft, at the position occupied by the unknown track. At 1546Z, position CM 2553, the unknown aircraft turned to heading 140° and followed the lake shore to position CM 5542; the aircraft then turned to heading 090°, maintaing this heading until they reached position DM 3545. At whixh time, they turned to a heading of 120° and maintained this heading until faded at 1616Z, in position GL 1035.

The weather, at the time the fighters attempted intercept, was 30,000 scattered clouds and better than 15 miles visibility. The target indication was very strong on the PPI scope; HRI scope carried indication of from six (6) to ten (10) aircraft.

DOWNGRADED AT 3 YEAR INTERVALS;
DECLASSIFIED AFTER 12 YEARS.
DOD DIR 5200.10

APPROVED:

S/ DOUGLAS A. NEILSON
T/ DOUGLAS A. NEILSON
Captain, USAF
Intelligence Officer

COMMENTS
H4 30TH ADIV (DEF), Director of Intelligence:
A total of eight (8) aircraft were scrambled from three (3) different bases but no interception was accomplished due to contact loss without reappearance. Two (2) from Lockbourne AFB, two (2) from O'Hare AFB, and four (4) from Selfridge AFB. No identification was made although all sources were checked.

Study of this incident by representatives at this headquarters concluded that very probably the accurance resulted from arching in the Equipmeat.

had witnessed this, no followup whatever was made. It is [illegible] sort of thing in this case, and in a great many others, that led to the facetious, but somewhat deadly remark by someone that Project Blue Book might be called, not the "Society for the Investigation of Unexplained", (Ivan Sanerson's organization) but rather, "Society for the Explanation of the Uninvestigated". Since 1947, because of lack of funds and adequate personnel, a formidable number of cases were not adequately followed up. I had often pointed out, both to officials in Dayton and in Washington, that a day of reckoning might some day come when the Air Force might be asked to show cause why proper investigations were not made. In this case, for instance, no attempt apparently was made even to find out who "the others" were who had made this sighting. How many? Were they passengers? Were they members of the crew? No attempt even was made to find out the duration of the sighting. In view of all this, it is patently impossible to form any sort of a valid judgment as to what the stimulus that gave rise to this report might have been. To list it as "insufficient information" is incorrect, but it should really be listed as "insufficient information because of lack of followup". A store of information may have been available, but this store was never tapped. Incidentally, how is the case presently carried, unidentified, or insufficient information? The latter would certainly be more appropriate.

3. 4 June 1952, Stuttgart, Germany.

I have rated this a Σ3 C6 meaning puzzling but possibly explanable case of credibility 6, since there were two witnesses technically trained. One witness was a Lieutenant Colonel who was shortly thereafter assigned to the Directorate of Intelligence, Headquarters, United States Air Force. It seems unlikely that they would have been mislead into a misidentification of an F84, and reported instead a very bright light that crossed in front of their aircraft, made fairly tight turns, and then have turned their own aircraft to follow it. Of course, it is entirely possible that it was a gross misidentification on the part of these two experienced pilots and therefore the evaluation of possible aircraft is justified. It is unjustified, however, in the statistics for the year to call it an unquestioned aircraft. To be fair, one might also have designated it "possibly unidentified" and at the end of the year have listed it as "unidentified". I have long inveighed against the unacceptable (and this is to any good statistician) statistics employed by Blue Book over the years in transforming"possibles" and "probables into firm actualities.

Should the files of Blue Book ever be thoroughly examined by competent scientists, this incorrect statistical procedure will surely be pointed out as being most unscientific. Though more cumbersome, the proper thing to do is, of course, to carry in the statistical records the number of, let us say, aircraft, probable aircraft, and possible aircraft cases as separate entries.

4. 5 June 1952, Lubbock, Texas.

Properly classed as unknown. It would be straining things to call these possible aircraft in view of the experience and reliability of both observers. I feel, however, much more information could have been extracted from the original observers. For instance, what did they mean by "lights appeared to be spherical and six inches in diameter?" They estimated the objects to be 40,000 feet high. Did they mean six inches at arm's length, etc? Very obvious information bits have been repeatedly overlooked in these cases. It is obviously too late to go back for this information in 1952 cases, etc., but in view of the continued interest in the UFO phenomenon in this and other countries, it behooves us to correct the mistakes of the past in the investigation of the truly puzzling cases of the present. The great handicap that Project Blue Book works under arises not only from lack of staff in Dayton, but far more importantly, in the gross lack of support at the originating airbases. Also, what is meant by "two objects were approximately 100 yards apart?" At 40,000 feet, this would mean a subtended angle of approximately one-half degree. Things like this could have been checked out by an intelligent interrogation officer.

5. 12 June 1952, Wichita, Kansas.

Ex C6. The past evaluation, "probably balloon" has a low probability, even though a piball was reportedly launched 10 minutes earlier in that general area. There were two witnesses and with the wind 25 miles per hour from the southwest it is unlikely that a balloon could perform the maneuvers as reported. It was stated that the object remained almost motionless for 10 to 15 seconds then moved southwest at a fast rate (against the wind) whereupon it stopped, made several maneuvers, reversed its field until it reached its original position, stopped and took off directly east at an estimated speed of 400 miles per hour, at which time the object changed from globular to saucer-shaped. Observers stated that the object was moving faster than

SUMMARY (Brief concise summary of report. Give significance in final one sentence paragraph. List enclosures at lower left. See text of report on AF Form 112—Part II.)

1. Part II of this report is the account of the sighting on 4 June 1952 by [redacted], USAF, of an unidentified flying object in the vicinity of Stuttgart while on routine C-47 training flight.

2. A check with Neubiberg Air Base revealed the information that eight (8) F-84 aircraft departed from Neubiberg during the period 1900Z-1930Z on round robin flights, Neubiberg-Nurnberg-Frankfurt-Stuttgart-Neubiberg. The estimated times en route were from 2 + 00 to 2 + 30 hours. This would put one or more of the aircraft near Stuttgart at the time of the sighting and offer a possible explanation for the reported sighting.

3. This information will be of interest to the Air Technical Intelligence Center, Wright-Patterson Air Force Base, Ohio, Attention: ATIAA-2C.

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE 2 OF 2 PAGES
HQ, USAFE, ATI BRANCH	ATI-1094-52	

1. I was flying the left seat of a Wiesbaden Air Base C-47 on a round-robin flight Wiesbaden-Munich. On return leg from Munich to Wiesbaden, I had just crossed over Stuttgart range station and had completed a turn to heading of 345°. At this time I noticed at 90° to the right of the line of flight what appeared to be a very bright white star. At first I attached no great importance to it but began to wonder which star it could be. It was so bright that I searched the sky for other stars of comparable brilliance. However, because of a moon, nearly full, the stars were fairly dull. Approximately ten seconds later I looked at this same light again and received the impression that it was moving. Looking away and then back again, I discovered that it was moving and on a heading of approximately 270. The light crossed in front of our aircraft at about 7000 feet (2000 feet higher than our altitude at the time) and at a speed as great as or greater than a jet fighter at cruise. The light was white with no beams emanating therefrom, and no sparks, etc., trailing behind it. I was too astonished to do anything but watch it for approximately three seconds. After it had crossed in front of the aircraft and was approximately one mile or two miles west, I drew the attention of the copilot to the object and turned to follow it. At that time the object made a fairly tight turn of approximately 145 degrees and I turned the aircraft to intercept it. The object approached rapidly and the brilliant white light disappeared to be replaced by a bright (much brighter than normal running lights of aircraft) blinking red light, then a blinking green light, followed by the white light again. At this point the object was directly over the city of Stuttgart and I attempted to determine its silhouette outlined against the lights of the city.

2. At this point it is very possible that hallucination enters the situation, for only a fraction of a second was I able to observe its silhouette. It was my impression that the object was circular in shape with white lights on the leading edge. Around the trailing edge was what appeared to be a slight haze similar to that caused by waves of intense heat emanating from jet aircraft, which fogged the lights of the city seen through this haze. The object made a sharp turn to the left on a heading of approximately 270 and disappeared under the nose of the aircraft. At this point I observed the time to be 2107 zebra. I estimate the total time of observation to be not more than three minutes. (ATI COMMENT: [redacted] was the Air Attache in Prague, Czechoslovakia, and has recently been assigned to the Directorate of Intelligence, Headquarters, United States Air Force.)

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE 2 OF 3 PAGES
Det 1, 6004th AISS, APO 970	52-125	

I. SOURCE AND UNIT IDENTIFICATION:

a. Name: [redacted]; Nationality: North Korean; PW #: 130; Rank: Pvt; Duty: Rifleman; Age: 18; Address: [redacted]

b. Unit: II NK Corps, 13th Div, 21st Regt, 1st Bn, 1st Co, 1st Plat, 3rd Sqd

c. Date, Place and Circumstances of Capture or Surrender: While on guard duty between 112300 and 112400 June 52 Source deserted his unit surrendering on 120530 June 52 to elements of the 6th Co, 2nd Bn, TAFC, 25th Inf Div at DT176381.

2. RELIABILITY OF SOURCE:

Source was rather nervous during the interrogation furnishing frequently contradictory or evasive statements. Later on he regained his composure and tried in earnest to cooperate with the interrogating personnel. His conception of distance, memory of dates and places appears to be rather vague and due to this fact truth of the information submitted by Source cannot be judged. His reliability cannot be judged.

3. OBSERVATION OF SOURCE:

On 5 June 1952 at approximately 2200 hours while Source was on the way from his bunker (vicinity of DT 176402) to the Co latrine he noted a strange luminous stationary object appeared to be suspended approximately five hundred (500) meters above the top of the hill # 1290 (DT1844) which is located in a distance of approximately one (1) km NE from Source's position. Source observed the object for approximately five (5) minutes. He stated that the object was of light-brownish color, luminous, oval shaped, approximately fifteen (15) cm long and five (5) cm wide. The object, when observed by Source, was in a vertical position in relation to the hill. Source attracted the attention of other soldiers present in the area and discussed with them the incident but nobody was able to give any reasonable explanation as to the origin of the object and it's purpose. Approximately three (3) minutes after Source sighted the object it faded gradually in place within 40 seconds it's original color loosing gradually the intensity. Source stated that he had no previous knowledge or did not make previous observation of this object. No further information.

4. HEARSAY INFORMATION REPORTED BY SOURCE:

On 7 June 52 Source and other members of his squad were informed by their squad leader that a light-type NK A/C will be employed every night in the vicinity of DT 176402. Squad leader did not discuss the mission of this A/C nor did he give any description of it with the exception that "the engine noise of this A/C is similar to the noise produced by the engine of a motorcycle and differs substantically from the noise produced by UN A/C". The same leader informed his squad that NK A/C will initiate bombing of UN front lines in the immediate future, but so far no evidence of this promise was observed either by Source or his fellow soldiers in the area. No further information.

INTERROGATOR: A/1C W.C. Redfield

5. COMMENTS OF REPORTING OFFICER:

Information contained in par 3 of this report represents first instance of reporting unknown luminous object by captured enemy personnel interrogated by this detachment.

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE 2 OF 3 PAGES
Wing Intelligence Office Reese AFB, Texas	IR-3-52 [redacted]	

SUBJECT: FLYOBRPT

SOURCE: Information contained in this report was obtained from Mr [redacted], [redacted] Lubbock, Texas and Mr [redacted] Lubbock, Texas. Interview was conducted by Captain [redacted], Wing Intelligence Officer.

1. On 5 June 1952 from 2300 hours to 2345 hours CST, eight (8) unidentified flying objects were sighted. The objects sighted were spherical in shape with no apparent tail surfaces or exhaust. Source estimated the size of each object to be approximately six inches in diameter. He compared them to a very bright star, such as Jupiter, and said that they were a little bit larger. Objects were all uniform in size and color. They gave a constant yellow glow that was quite bright in color.

There were eight (8) objects sighted, all of which were sighted singularly, except for two which appeared together in a trail formation. The two in formation were approximately 100 yards apart. The second object followed the first at a uniform distance until they disappeared over the horizon.

Seven (7) of the objects appeared in the north at approximately 3 o'clock high and disappeared in the south in 1 1/2 to 3 minutes. All objects sighted were flying north to south except for one which flew exactly opposite, south to north. All of the objects pursued a straight and level flight with the last two veering sharply into the southeast. There was no sound connected with any of the objects.

2. Objects were sighted at 3 o'clock due north of observer's home and were seen over a period of 45 minutes. One object was held under observation for two minutes.

3. Objects were viewed with the naked eye and with a pair of 7 X 35 Bausch and Lomb binoculars. Objects viewed through the binoculars appeared the same as when viewed with the naked eye.

4. Observation took place at 3334N and 10248W in the city of Lubbock, Texas. Objects appeared due north of point of observation at approximately 40,000 feet. Estimated altitude was based on a comparison of the objects with the approximate altitude of the B-36 type aircraft that frequently flies over Lubbock, Texas. Source said the objects appeared to be at a higher altitude than the B-36 normally flies.

5. Information concerning the reliability and experience of the observers is rather limited. Mr. [redacted] seemed to be quite familiar with various types of conventional aircraft and both witnesses were very sincere in their efforts to be of service. Prior to sighting the unidentified objects, source had clearly identified two B-25's and one DC-3 type aircraft flying at high altitudes. A check with Reese AFB Operations revealed that there were B-25 type aircraft in the general area at 2001, 2231, 2223, and 1926 hours CST. One C-47 type aircraft departed from Reese AFB at 2037 hours which could have been mistaken for a DC-3.

6. The weather conditions at 2330 hours on 5 June 1952 were: temperature 69 degrees, no ceiling, visibility 15 miles plus with scattered clouds at 12,000 and 25,000 feet, and calm winds (no direction and no velocity).

7. There was no known meteorological activity or condition to which this sighting could be attributed.

8. Physical evidence such as fragments, photographs, etc. were nonexistent.

9. There was no interception or identification action taken.

10. Two B-25 type aircraft were known to be in the general vicinity at the time of the sighting. One B-25 type aircraft landed at Reese AFB at 2329 hours and another landed at Reese AFB at 2341 hours.

COMMENTS of Preparing and Approving Officer:

Mr. [redacted] and Mr. [redacted] are well educated and highly intelligent individuals. They were very sincere in their efforts to cooperate and assist this organization.

Should the files of Blue Book ever be thoroughly examined by competent scientists, this incorrect statistical procedure will surely be pointed out as being most unscientific. Though more cumbersome, the proper thing to do is, of course, to carry in the statistical records the number of, let us say, aircraft, probable aircraft, and possible aircraft cases as separate entries.

4. 5 June 1952, Lubbock, Texas.

Properly classed as unknown. It would be straining things to call these possible aircraft in view of the experience and reliability of both observers. I feel, however, much more information could have been extracted from the original observers. For instance, what did they mean by "lights appeared to be spherical and six inches in diameter?" They estimated the objects to be 40,000 feet high. Did they mean six inches at arm's length, etc? Very obvious information bits have been repeatedly overlooked in these cases. It is obviously too late to go back for this information in 1952 cases, etc., but in view of the continued interest in the UFO phenomenon in this and other countries, it behooves us to correct the mistakes of the past in the investigation of the truly puzzling cases of the present. The great handicap that Project Blue Book works under arises not only from lack of staff in Washington, but far more importantly, in the gross lack of support at the originating airbases. Also, what is meant by "two objects were approximately 100 yards apart?" At 40,000 feet, this would mean a subtended angle of approximately one-half degree. Things like this could have been checked out by an intelligent interrogation officer.

5. June 1952, Wichita, Kansas.

23 C6. The past evaluation, "probably balloon" has a low probability, even though a piball was reportedly launched 10 minutes earlier in that general area. There were two witnesses and with the wind 25 miles per hour from the southwest it is unlikely that a balloon could perform the maneuvers as reported. It was stated that the object remained almost motionless for 10 to 15 seconds then moved southwest at a fast rate (against the wind) whereupon it stopped, made several maneuvers, reversed its field until it reached its original position, stopped and took off directly east at an estimated speed of 400 miles per hour, at which time the object changed from globular to saucer-shaped. Observers stated that the object was moving faster than

AIR INTELLIGENCE INFORMATION REPORT

SUBJECT: Unidentified Flying Objects (FLYOBRPT)

AREA REPORTED ON	FROM (Agency)
Albuquerque, New Mexico	~~Hq 4901st Support Wing (Atomic)~~ Kirtland Air Force Base, New Mexico

DATE OF REPORT	DATE OF INFORMATION	EVALUATION
9 June 1952	6 June 1952	C-3

PREPARED BY (Officer)	SOURCE
Major Roy L. Huddleston, USAF	S/Sgt T.H. Shorey, USAF

REFERENCES (Control number, directive, previous report, etc., as applicable)
AFL #200-5 and TWX AQQ-WCKD 6-1

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

One object was observed from the ground at 1845 on 5 June 1952 by S/Sgt T.H. Shorey of 4925th Test Group (Atomic), Kirtland Air Force Base, New Mexico at his home at 521 South Cedar Street, Albuquerque, New Mexico. This address is approximately in the center of the city. The object was round in shape, but of indeterminable size. It had a very shiny luster but neither made noise nor left a trail. Its speed was described by the observer as approximately five or six times that of the F-86. It was first sighted at an angle of 80° to the observer on its north course which involved no apparent maneuvers or change of altitude. The object was observed for approximately six seconds in which time it covered the remaining distance across the horizon. The object crossed above a B-29 or B-50 which was flying on an easterly course at approximately 10,000 feet. It was believed by the observer that the object was at a much greater altitude than the bomber. There were no clouds with 60-mile visibility and easterly winds aloft of 20 MPH. S/Sgt Shorey's duty in the 4925th Test Group (Atomic) is in the engineering field. His observations from the mechanical viewpoint should be credited as fairly reliable. He has had experience in judging altidudes and speeds by observing F-86's in flight with knowledge of their speed and altitude.

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE 2 OF 2 PAGES
Air Estimates Division, D/I Strategic Air Command	IR-34-52	

1. A bright red light, appearing round, approximately the size of a 12-quart pail and approximately the density of one landing light on a plane (except that it was red instead of clear) stayed in one place for approximately 4-1/2 minutes, at which time it disappeared at a very high rate of speed, leaving a very short tail. No other objects were visible.

2. Time of sighting: approximately 2300 hours 5 June 1952. Observed for 4-1/2 minutes.

3. Sighting was visual—through open window of automobile not in motion.

4. While observing the object, source was 1-1/4 miles north of the Twin Cables on Highway 75. The object appeared to be at approximately 1,000 feet and 1/4 mile south southwest of the Twin Cables. Object appeared approximately 1 to 1-1/2 miles from source.

5. The other two occupants of the automobile were questioned but did not add to nor deviate from the report by Lt. Soper.

6. Weather was not observed, but it seems there were a few light scattered clouds and almost no wind. Stars were out, shining clear and brightly.

7. No meteorological or other condition was noted to account for sighting.

8. No photographs or physical evidence were obtained of the sighting.

9. No interception action was taken.

10. During the sighting of the object, source saw a plane, type unknown, located due west.

11. CREDIT LINE: This interview conducted by M/Sgt E. J. Driskill, USAF.

COMMENTS OF PREPARING OFFICER:

1. Weather for 2300 5 June 1952: clear, 10-mile visibility, temperature 74, dew point 66, wind calm. Offutt AFB Weather Station recorded an inversion at 500 to 700 feet at 2100 hours.

2. A check with flight service indicated that at 2322 a T-6 arrived from and landed from the southeast; at 2344 a T-11 took off heading into the northwest; and at 2357 a C-47 arrived and landed from the southeast.

3. Source and his wife both stated that the object disappeared after they turned onto the highway and began driving south.

4. 2d Lt. William R. Soper is the Top Secret Control Officer for SAC and has been in this position for approximately 5 weeks. Prior to this, Lt. Soper was a member of the OSI and also worked in the SAC IG office. Lt. Soper has been assigned to Offutt AFB since June 1950. Lt. Soper has 9-1/2 years service, of which 8-1/2 years was as an airman. He was also a test engineer as an airman. He has no flying experiance as an officer. Lt. Soper gave his experience in a straight-forward way and seemed quite convinced that the light he saw was not an aircraft or any object he had seen before.

APPROVED:

ALBERT E. STOLL, JR.
Lt. Colonel, USAF

PREPARING OFFICER:
JAMES C. EGAN, Capt, USAF

STATEMENT OF SOURCE

At 2300 hours on 5 June 1952, the undersigned, his wife Nadenne V. Soper and Valeria Wenninghoff, 1615 Pinkney Street, Omaha, Nebraska, approached highway #75 from Airview, Fort Crook, Nebraska in the undersigned's automobile.

The undersigned looked South to check for approaching cars before pulling onto the highway at which time he noticed a bright red light hovering at approximately 1,000 feet, 1/4 mile South, Southwest of Twin Gables.

This light was very bright and hovered in one spot not varying right or left, nor up or down for approximately 4 to 4½ minutes at which time the light started moving South at a very high rate of speed and disappeared in approximately 2 to 3 seconds.

The undersigned then drove to the SAC Main Gate and informed Lt. Colonel Arthur K. Soball, Staff Duty Officer and T/Sgt L. G. Simmons, Sgt of the Guard, of the incident by telephone.

IN REPLY REFER TO:
AFOIN-ATIAA-5

SUBJECT: (Uncl) Sighting of Unidentified Objects

TO: Commanding Officer
31st Air Division
Director of Intelligence
Fort Snelling
St. Paul, Minnesota

1. We have received your report of the sighting of unidentified objects by Capt [redacted] and would like some additional information:

a. Exact location the observer sighted the objects. If possible, designate the area on a map.

b. What time were they firing tracers at Twin City Arsenal? The location of the Arsenal on the same map as requested in a and the direction of fire for the firing of 6 June 1952.

2. Your promptness in reporting this incident is greatly appreciated. The fact that you initiated an investigation by contacting the Arsenal is highly commendable and extremely helpful.

FOR THE COMMANDING OFFICER:

DONALD L. BOWER
Colonel, USAF
Chief, Technical Analysis Division

AIR INTELLIGENCE INFORMATION REPORT

Subject: **Unidentified Aerial Object**

Area Reported On: Five (5) miles NNE of Minneapolis		From (Agency): 31ST AIR DIV
Date of Report: 7 June 52	Date of Information: 6 June 52	Evaluation: B-6
Prepared by (Officer): J W Hubbard Capt USAF		Source: observer-Richand Capt USAF

References (Control number, directive, previous report, etc., as applicable): Exempt of ECS

Summary: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112---Part II.)

CONFIRMATION REPORT

A. Shape, indefinite and fuzzy. Size, approximately that of a 40 MM projectile color undulating red to white-each object changed color approximately three times while in view of observer. There were approx. twenty (20) objects sighted within the three minute period of observation. The objects were following in a trail formation, on the same trajectory. They ascended to 5,000 ft and descended to about 500 ft., were they faded from view. No aerodynamic features, exhaust or propulsion system observed. Objects traveling at extremely high velocity, no sound nor apparent maneuvers evidenced. Objects traveling from South to North on the West side of New Brighton Arsnel. Radar Station contact but no objects picked up. Objects were traveling in groups of four or five, with inconsistent spacing (3-5 secs.) between objects and groups. The red and white light noted seemed to be in the tail of object.

B. Objects observed at 0245Z on 6 June 52 within a three minute period of observation.

C. Visual observation from airborne plane (T-6) traveling on a 80° heading at 150 mph at 5,000 ft. a/c turned to heading 360° which parelled track of objects.

D. Location Lat. 45° 10'N; Long 93° 10'West near New Brighton Arsenel. Objects were approx 5,000 ft closing to 1,000 ft from observer traveling South to North at 5,000 ft Altitude.

E. Observer, [redacted] is a rated pilot and has had combat experience on night bombing missions encountering Anti Aircraft heavy projectiles.

F. Weather clear, no clouds nor haze; wind SE at 10 mph.
