AIR INTELLIGENCE INFORMATION REPORT

UNCLASSIFIED

FROM (Agency)	REPORT NO.	PAGE 1 OF 1 PAGES
Dir/Int, NEAC	IR-26-52	

1. At 260343Z ([redacted]) an unidentified aerial object was observed through a Theodolite by one (1) maintenance man and two (2) weather observers while following an ipibal balloon.

Verbatum statements are as follows:

Weather man one:

"At 26/0343Z I sighted an unidentified object in the theodolite field of visw while following ipibal balloon. The object was very bright silver color and appeared elliptical shaped. It seemed at a great distance from the station. I called the other weather observer to confirm the sighting and together we followed it for five (5) minutes during which time it moved at the same altitude in a south southwest direction at the same speed until the last minute (near end of sighting) when it picked up speed and faded from sight. The sky condition was scattered and the visibility unlimited. There were no stars visible at the time".

Weather man two:

"An unidentified object was encountered (observed) at approximately 26/0345Z. Description as seen: Object was silver blue in color and shape was similiar to a pear. Direction to which object was moving was 162 degrees according to the theodolite".

Maintenance man:

"On 260344Z this airman observed an unidentified object by way of theodolite. (Airman saw object three (3) times and convinced that it was not hysteria). To the best of my descriptive abilities I shall attempt to describe what I saw. It was a very small but very prominent object in the viewing instrument. It was silver in color and twinkled like a star only at a greater frequency (brilliance). It was also definitely moving. The shape was noted to be oblong and flat. I definitely and beyond a shadow of a doubt do not believe it was an aircraft such as I know".

2. "The detachment commander was unable to verify the sightings as the object was lost in the view of the theodolite in a matter of a few minutes".

27 June 1952 26 June 1952 F-3

Frank M. Allen, Lt Colonel, USAF

Mr. [redacted]
Pottstown, Pennsylvania

FLYOBRPT, Olmsted Flight Service Center, 270702Z June, submitted via electrical means.

1. Lights of five unidentified flying objects were sighted 2200 to 2230EST 26 June 1952, by the Assistant Manager of the airport at Pottstown, Pennsylvania.

2. Objects reported flying on course of 120°, approximately downwind. One pair flying tandem 2 miles apart, followed by a second pair in tandem flight 1 mile apart 15 minutes later, then a single object 15 minutes after the second pair, were reported. Leading objects of pairs displayed steady lights, while trailing objects of pairs, and single object, displayed irregular flashing lights. Altitude estimated 2,000 above surface, speed estimated 150 to 250 miles per hour.

3. Weather at time was excellent for visual observation.

1. Five unidentified flying objects were sighted within a period of 30 minutes, 17 nautical miles Southeast of Reading, Pennsylvania (40° 16'N - 75° 30' W), in the vicinity of the airport at Pottstown, Pennsylvania, at 2200EST 26 June 1952.

2. Objects were moving on a course of approximately 120°. First two objects were flying tandem, approximately two miles apart. The first had steady glowing lights, while the second had an irregular flashing light. Approximately 15 minutes later there were two objects flying tandem, approximately one mile apart, with the same light characteristics. Approximately 15 minutes later a single object with irregular flashing lights. The lights on all objects were of a non-directional type. The lights were the only portion of the objects visible. No sound at all was heard, and no trail or exhaust was reported. Altitude was estimated to be 2,000 feet above the ground, speed estimated 150 to 250 miles per hour, with a steady line of flight.

3. Weather in the vicinity reported as CAVU by observer. U.S. Weather Bureau observations reported as follows:

a. Allentown, Pennsylvania, 1930EST, scattered clouds at 18,000 feet, visibility 15 miles.

b. Philadelphia, Pennsylvania, 1930EST, clear sky, visibility 8 miles.

c. Winds aloft in the general area: 2,000 feet, from 270° at 25 knots. 4,000 feet, from 320° at 22 knots.

4. Reporting observer was Mr. [redacted]r, Pottstown Airport, Pennsylvania. Mr. [redacted] advised that approximately 50 persons observed the five objects, but the names of all observers were not available. Mr. [redacted] reported the sighting to the CAA Airport Traffic Control Tower, Harrisburg State Airport, New Cumberland, Pennsylvania at 2340EST. This agency transmitted the information to Olmsted Flight Service Center at 2350EST. Olmsted Flight Service Center submitted FLYOBRPT by electrical means at 0202EST 26 June.

5. No reported: (1) meteorological activity which might account for sighting, (2) physical evidence of objects sighted, (3) interception or identification action, or (4) air traffic in the vicinity at the time of the sighting.

Comments of the Preparing Officer:

1. Course flown by the objects is not defined. If it is a magnetic course, the True course would be 112° (Variation 8° West). This course is approximately equivalent to the winds aloft direction, as reported.

2. Configuration of lights not given, but reports seem to indicate that there were more than one light on at least part of the objects.

3. Observer is personally unknown, but his position would indicate familiarity with night flight of aircraft. Weather was excellent for observation.

4. Witness was not contacted or interrogated by this organization.

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE 2 OF 2 PAGES
3540th Flying Training Wing, Pinecastle Air Force Base, Orlando, Florida	IR-28-52	

At 0815 hours, 26 June 1952, an unidentified object was observed at an undetermined distance west of Kissimmee, Florida. Observation was made by Mr. [redacted], Kissimmee, Florida, who, at the time of sighting, was in his front room looking through a large picture window.

The object was in sight approximately ten seconds, during which time it flew straight and level, at a high rate of speed. Due to the short time object was in sight, it was impossible to determine the altitude, speed, size or distance of object from observer.

Object appeared to be a flat, circular disk, the thickness being approximately 1/8 of the diameter. Upper surface of object was a golden color, and lower surface was silver. Object appeared to be perfectly smooth, with no protuberances or exhaust visible. There was no audible sound.

Observer served three years in the Navy as a Gunnery Officer, and has 175 hours flying time as pilot of light aircraft. Observer states he does not believe it was a jet type aircraft.

Weather at time of sighting was CAVU, with no clouds in the sky.

No interceptions were made, and no photographs were taken.

T-33 type aircraft from this base were flying in the vicinity of Kissimmee between 0700 and 1000, at altitudes from 1500 to 30000 feet.

Dear Sir:

It has been reported to the Air Technical Intelligence Center that you observed an unidentified aerial object on the night of 27 June 1952. To obtain more information on this observation, it is requested that the inclosed questionnaire be completed and returned in the inclosed envelope.

Your action in making this report to the Air Force is greatly appreciated.

Yours very truly,

AIR INTELLIGENCE INFORMATION REPORT

SUBJECT

Report of Unidentified Celestial Object

AREA REPORTED ON	FROM (Agency)
Near Mitchel Air Force Base, New York	Headquarters, Mitchel Air Force Base, N. Y.

DATE OF REPORT	DATE OF INFORMATION	EVALUATION
30 June 1952	26 June 1952	

PREPARED BY (Officer)	SOURCE
Captain Kenneth F. Gallagher, USAF	

REFERENCES (Control number, directive, previous report, etc., as applicable)

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

At approximately 2330 hours, 26 June 1952, Mr W[redacted]r [redacted] East Meadow, New York, was visiting at the home of Mr [redacted], East Meadow, New York. This location is approximately three (3) miles east northeast of Mitchel Air Force Base, New York. While in the yard of the [redacted] home and in the company of Mr and Mrs [redacted], Mr [redacted] observed a strange object in the sky at approximately eighty-five (85) degrees from the horizontal and above his position of observation. This object appeared to be at a great distance with a southeasterly path of travel. There was no associated sound. The brilliance of the object exceeded that of the brightest star SIRIUS. The object was observed for a twenty minute period and the total arc of travel did not exceed forty (40) degrees.

The object was in a limited measure comparable to a star; however it appears SIGNIFICANCE: that it was slightly larger and seemingly brighter than the average star visible to the naked eye. The sky condition at the time was clear ruling out the possibility of a searchlight being played on the bottom of a cloud coverage. Locally, no explanation can be offered for the presence of the unidentified object in the sky.

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE 1 OF 2 PAGES
HEADQUARTERS Mitchel Air Force Base, N. Y.		

1. Descriptions:

a. Shape: Circular shape but could have been the shape of a star as one appears as viewed from the earth's surface.

b. Size: Slightly larger than the star SIRIUS.

c. Color: Amber cast of brilliant intensity fading as it moved across the sky to no color.

d. Number: One - no formation.

e. No apparent aerodynamic features such as wings, tail or any means of control.

f. Trail or exhaust: None apparent.

g. Propulsion system: None apparent.

h. Exhaust: None apparent.

i. Speed: Unknown. Object traveled approximately forty (40) degrees in twenty (20) minutes.

j. Sound: None.

k. Maneuvers: The movement was erratic, at times rapid; at other times it was observed to move rather slowly, and from right to left.

l. Manner of disappearance: Object became completely invisible after twenty (20) minutes of observation.

m. Other pertinent features: None.

2. a. Time sighted: Approximately 2330 hours

b. Length of time observed: Twenty (20) minutes (Approx)

3. Manner of observation: Visual from the surface. No optical equipment used.

4. Location of the observer during sighting: About three miles east northeast of Mitchel Air Force Base, N. Y. Location of the observer and the relative path of the object shown on map - Exhibit A.

5. Information on observers: MR [redacted]. Pilot with Pan American Airways, Inc. Thirteen years of experience flying both military and civilian aircraft. Most intelligent, very rational and seemingly entirely reliable. Excellant knowledge of the celestial sphere. MR [redacted] A high school mathematics instructor teaching in the Public School System of New York City. Concise and direct in his presentation of his observation. He seemed to be more interested in an explanation of the phenomenon rather than being excited by it. Apparently reliable.

SECURITY INFORMATION

[redacted]

STATEMENT UNCLASSIFIED

30 June 1952

The following is a statement made by Mr [redacted] Civilian, [redacted], East Meadow, New York, a pilot with Pan American Airways, Inc. This statement is made in connection with an unidentified celestial object:

" At about 2330, EDT, 26 June, 1952, I and two neighbors observed a brilliant object in the sky ten degrees northwest of the star VEGA; the brilliance of the object exceeded that of our brightest star SIRIUS but was of an amber cast. This object appeared to move in a southeasterly direction and with an apparent velocity that carried it past VEGA in about thirty seconds. Its motion was erratic, at times moving quite rapidly, then stopping or moving sideways. It was observed reversing its path for a short space. There was no associated sound. After passing VEGA its velocity appeared to diminish and the object declined in brilliance until as it approached the star ALTAIR it had become quite faint. Its apparent motion was still southeasterly but halting and erratic as before. At this time it had been under observation for about five or six minutes. For the next fifteen minutes it appeared to hover in the vicinity of ALTAIR growing fainter and moving very slowly in many directions and then became invisible within a few degrees of ALTAIR at about 2350, EDT. The total arc of observation did not exceed forty degrees and the elapsed time was about twenty minutes. The impression was that the object was receding at a very rapid rate. The sky condition at this time was clear.

After thirteen years of aviation experience in both civilian and military capacity, I am convinced that the foregoing phenomenon could not have been caused by any craft or weapon with which I am familiar."

[redacted] UNCLASSIFIED

STATEMENT

30 June 1952

The following is a statement made by Mr [redacted], Civilian, [redacted] East Meadow, New York. Mr [redacted] is a teacher of mathematics in the New York City Public School System. This statement is made in connection with an unidentified celestial object:

"On the evening of 26 June 1952, at about 2330 EDT, I, in the company of my wife and Mr [redacted] a pilot with Pan American Airways, Inc., were sitting on the lawn of my home at [redacted] East Meadow, New York. At this time, Mr [redacted] called my attention to a bright object in the sky approximately eighty-five (85) degrees from the horizontal. The object was moving in a southeasterly direction, in an erratic way. The rapidity of its motion changed from time to time. There was no associated sound with the object or its movement and because of its distance from me, I cannot approximate its height. While the object could have been a heavenly body, its color or cast was different from any other heavenly body that I have seen. This object had a very definite amber cast to it. The object became invisible at about 2350 hours, EDT. I would judge we watched this object for about twenty (20) minutes."

Dear Sir:

It has been reported to the Air Technical Intelligence Center that you observed an unidentified aerial object on the night of 27 June 1952. To obtain more information on this observation, it is requested that the inclosed questionnaire be completed and returned in the inclosed envelope.

Your action in making this report to the Air Force is greatly appreciated.

Yours very truly,

2 Incls

TENTATIVE
OBSERVERS DATA SHEET

Where Choice is Given, Circle Proper Answers, or Insert Answer

1. Date of your observation: 26 (Day) JUNE (Month) 1952 (Year)

2. Date you reported the observation: 27 (Day) JUNE (Month) 1952 (Year)

3. What time was it when you sighted the object: 1130 (Hours) _____ (Minutes)

A.M. (P.M.) (Daylight) Standard

Zone: (Eastern) Central, Mountain, Pacific, _____ (Other)

4. Length of time object was observed. Estimate: _____ (Hours) 20 (Minutes) _____ (Seconds).

5. Where observed:

[redacted] (Postal Address) EAST MEADOW, (City or Town) N.Y. (State) USA (Country).

6. Where were you at time of observation:

Inside building, In Car, (Outdoors), _____ (Other).

7. Were you moving at any time during this sighting: No (Yes or No).

8. Did you stop at any time during this sighting: _____ (Yes or No).

9. If you were moving - give _____ (Direction) and _____ (Speed) miles per hour.

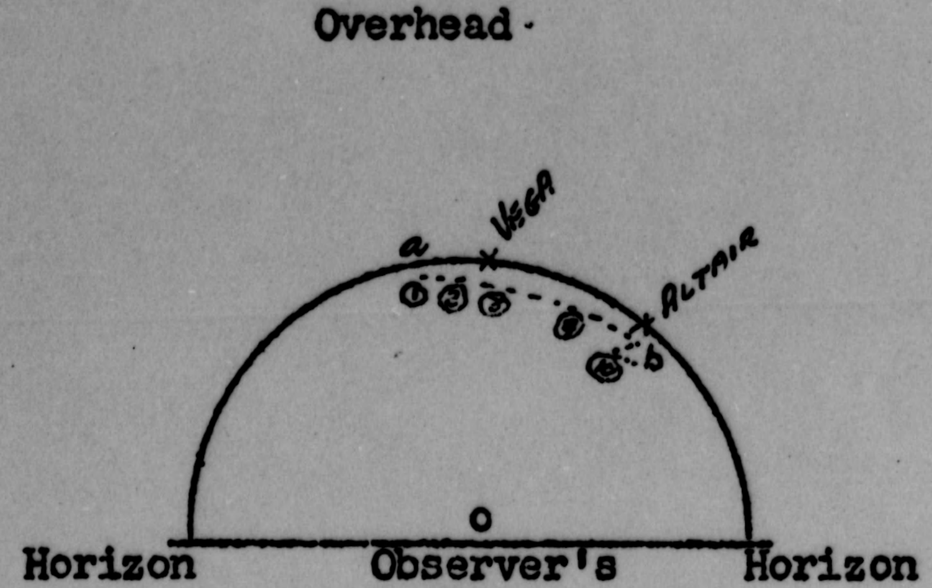
10. How was object observed: (Naked eye)
Eye glasses
Other glass (Window or Windshield)
Binoculars, Telescope, Theodolite
Other _____

11. How did you happen to notice the object: HAPPENED TO GLANCE UP AND NOTICED A BRILLIANT STAR OF SOMEWHAT AMBER COLOR ALMOST QUERNERD. IT OCCURRED TO ME THIS COULD NOT BE AND I LOOKED UP

AGAIN AND (-ICED ITS POSITION HAD (HANGED AND THEN I OBSERVED ITS ERRATIC MOTION AND CALLED THE ATTENTION OF MY NEIGHBOR, MR. [redacted], WHO WAS WITH ME.

18. On the following Sketch B, label a at the apparent position of the object when first seen and b at point last seen. Trace the apparent path of the object between points a and b.

If possible label 1, 2, 3, etc., along the traced path to show the successive positions of the object after equal intervals of time during the sighting.



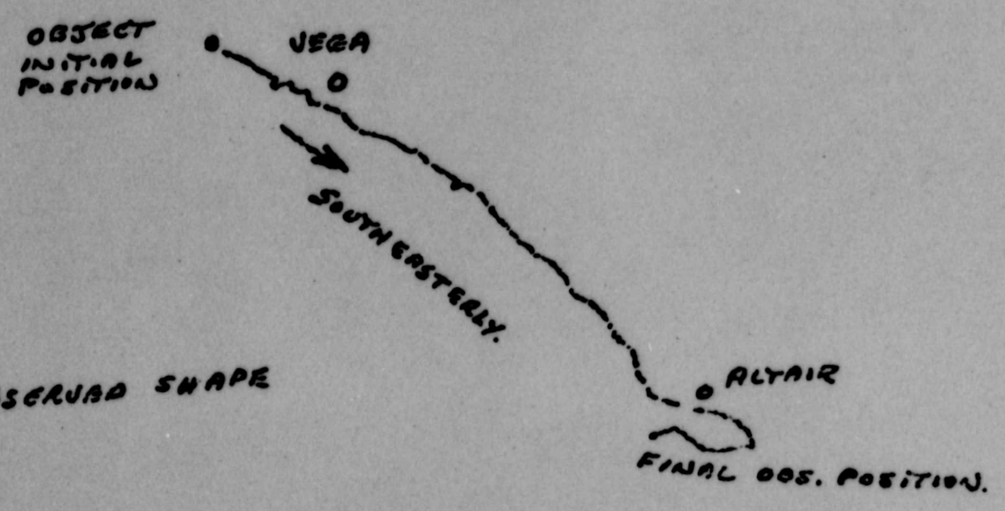
SKETCH B

19. In Sketch C please show the observed features of the object such as;

A. Apparent shape, (were edges pointed or rounded), NO OBSERVED SHAPE

B. Apparent direction of motion (show by arrow), and

C. Other details, exhaust, trails, tails, surfaces, etc. NONE



SKETCH C

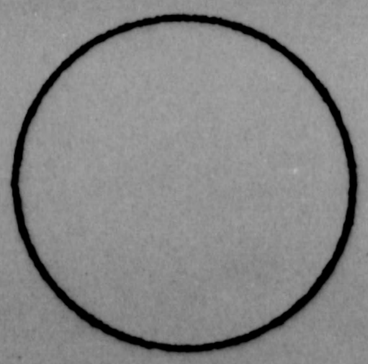
20. The sun and the moon are shown below as they appear in their correct relative size. In this sketch D, show the apparent size of what you saw.

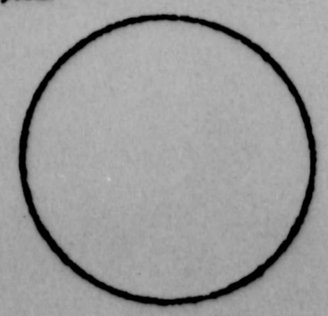
SUN

OBJECT

INITIALLY - THEN GROWING SMALLER AND FAINTER

MOON





SKETCH D

21. In your own words please describe the sighting you observed. Use sketches if desired. All observations from the time of first sighting to the time of dissappearance are important. Include a description of the weather, wind, and cloud conditions at the time of this sighting.

WEATHER HOT 95° F WIND NW 2 SKY CLEAR.

THE BRIGHT AMBER-COLORED BODY ABOUT THE BRILLIANCE OF SIRIUS WAS OBSERVED FIRST ABOUT 10° NW OF VEGA AND MOVING ERRATICALLY IN A GENERALLY SOUTHEASTERLY DIRECTION. THE FIRST 10 OR 15 DEGREES WERE TRAVERSED IN APPROXIMATELY 30 SEC. THE LAST 25° APPEARED TO TAKE ABOUT 20 MINUTES. THE MOTION OF THE BODY WAS HALTING AND ERRATIC AND THE BRILLIANCE OF THE BODY BECAME LESS AND LESS AS IT APPROACHED ALTAIR. THE APPARENT MOTION BECAME SLOWER BUT STILL ERRATIC AND FINALLY THE OBJECT BECAME INVISIBLE ABOUT 20 MINUTES AFTER THE INITIAL OBSERVATION

22. Your full name: [redacted]

23. Your address: [redacted] EAST MEADOW, N.Y.

24. Your occupation: AIRLINE PILOT.

25. Last school you attended: UNIVERSITY OF WASHINGTON

26. Year of last attendance at this school: 1938

27. Please list the names and addresses of persons who discussed this sighting with you. It is not necessary to list the names of officials or investigators.

MR AND MRS [redacted] (CO-OBSERVERS)

28. Further comments which you believe are important should be entered here. Use additional sheets of the same size if necessary.

MR [redacted] WHO ALSO OBSERVED THIS OBJECT ADVISED MR SEVERAL DAY AGO THAT HE AND ANOTHER NEIGHBOR OBSERVED A SIMILAR OBJECT AT ABOUT THE SAME TIME (1130 PM EDT) BUT ON SAT JULY 5. HE DID NOT REPORT THIS OBJECT WHICH HE SAYS WAS OBSERVED FOR ABOUT THE SAME LENGH OF TIME, AND IN THE SAME GENARAL SKY AREA
