I spent some 4 years as an officer in the Navy and spent time on watch, aircraft observation etc.

On sighting the two lights, I held a 5 cent ~~piece~~ piece (nickel) at arms' length from my eye and the coin just covered the two objects. I should guess that they would have been the width of a penny apart if that coin had been held at arms' length.

The objects moved very steadily and gave no other appearance than that they were two stars. My impression (~~which, of course, could~~ I could find no way of verifying) was that these objects were about $\frac{1}{2}$ to a mile apart and at a fairly high altitude perhaps over 50,000' hence they would have been moving at a speed of something like 700 - 1,000 miles per hour - This was the impression I had but again could not be verified without at least two observers -

IN REPLY REFER TO: 5D 24-21

Approximately 8 miles north of
Forest, Ontario, Canada, 26 July 1952
SPECIAL INQUIRY

TO: Commanding Officer
Air Technical Intelligence Center
Wright-Patterson Air Force Base
Ohio
ATTN: ATI

1. The following information was received from the 25th CSI District Office, Detroit, Michigan, by Spot Intelligence Report, dated 4 August 1952:

"Mr. and Mrs. [REDACTED], Flint 3, Michigan, were on a weekend trip to Canada when they observed two strange objects in the sky at 0024 hours, EST, on 26 July 1952. Mr. [REDACTED] stated that he and his wife were in their automobile listening to the Democratic Convention when his wife said, 'Look.' Immediately he saw two objects in the sky.

"a. The [REDACTED] location at the time was on Canadian Route No. 21, approximately eight miles north of Forest, Ontario, Canada. They were staying at a motel in Ipperwash Park. Mr. [REDACTED] pinpointed his approximate location as 43 Degrees, 10 Minutes North, 82 Degrees West.

"b. The objects appeared to be two balls of light that traveled in a pattern of one trailing the other. They were of a whitish color and were of the intensity of a bright star or planet. The light lasted for approximately one and one-half minutes and was a steady light. Both lights remained visible for the entire period of time. At the time of the sighting they were at an 80 degree elevation and disappeared at 85 degree elevation. Mr. [REDACTED] stated he took a nickel from his pocket and held it at arm's length. The nickel covered the area between the two objects. The objects stayed in the same relative position to each other during the entire period of visibility.

UNCLASSIFIED

5D 21-21

SUBJECT: Unconventional Type Aircraft

7 Aug 1952

"c. The objects, when sighted, were west of the observers and were flying in a south or southeastern direction. Mr. [REDACTED] alleged they were headed for the Cleveland area instead of the Detroit area. Visibility was good as there were no clouds in the sky and there was no moon. There are no cities near, thus no reflected lights. While sitting in their automobile, the [REDACTED] had been watching for falling stars. They had seen some during the evening, but said they had lasted for only a few seconds at a time and were of a different color than the unidentified objects.

"d. Mr. [REDACTED] stated that the unknown objects held their altitude, which was very high. He did not know what the means of propulsion was as there was no apparent sound connected with the flight. The speed of the unknown objects was estimated to be considerably faster than the 300-400 miles per hour of the average commercial airliner.

"The observer appeared to be sincere in reporting these unknown objects to the Air Force. During the World War II period, he had served on an aircraft carrier so was familiar with flight patterns of conventional aircraft at night. Presently, he is the [REDACTED] of the Social Science Research Project, Institute of Human Adjustment, University of Michigan, with office at [REDACTED], Flint, Michigan.

2. The foregoing is furnished for your information and any action deemed appropriate. No further investigative action is contemplated, and the files of the Office of Special Investigations are considered closed in instant matter.
