Subject: Sighting of Unknown Object

Dear Sirs:

On the evening of Aug. 8, 1952, at approximately 19:55 hrs., while standing in the front yard of Mr. [REDACTED] in North Downey, California, we sighted a very small object, flying very high, on a course of nearly 360°.

At first, both [REDACTED] and myself figured it was a weather balloon, but after I located the object in the field glasses, I realized it was traveling much too high and too fast. So we came to the conclusion it was an extremely high flying aircraft, although I couldn't make out any shape that resembled aircraft, as the object appeared round.

I kept the object in the glasses for a period of approximately five minutes, when it was practically direct overhead, when, from this object another object emerged, gaining speed slowly at 90 degrees to the original object (approx. 270 degrees) and leaving a thinly distinguishable trail, the color of which resembled the original object and the one that left it. The object that left the original object was about one quarter the size of the original. The colors of these objects, in the glasses, appeared slightly golden, yet, when seen with the naked eye, appeared to have the color of the first stars to appear in the evening, which, by the way, is what we thought it was until we assured ourselves it was moving.

If there was an aircraft (military) that was flying extremely high and released a rocket powered aircraft, as I have read about in magazines, then that is what I saw, and, because of the extreme height the sun was still shining on it, and explains the color.

If there were no flights of this kind, then I (we) have sighted something for your records. Either way, I would appreciate an answer to this letter, as I am quite a fan of your organization, and this is the first sighting in nearly two years of intermittent observation, that I have seen anything I couldn't explain to myself.

Please be advised that I have been a pilot (civilian) since 1930, put in three years instructing R.A.F. Cadets during the last World War, and haven't flown for over two years, as pilot. I am 40 years of age, and have lived in and around this area for 37 years.

Yours Sincerely,

[REDACTED]
Downey, California

So that this can be properly considered, I held a Commercial Pilot's license number [REDACTED] during the second World War, and have held, up to 5 years ago (since 1932) a pilot's license. This is my first sighting and is a subject I am deeply interested in. I will not attempt to judge the altitude, except to say it was extremely high. The sighting took place at an hour of that day in which the sun had dipped below the horizon, and only the extreme height of the object allowed it to be seen as it was high enough to still be in the light of the sun. I lost sight of the object as it came directly overhead. I lost it in the glasses, due I think, to its being farther west and I could no longer observe the reflection of the sun. As my letter stated, another object appeared to leave it, at a 90 degree angle, leaving a faint smoke and gaining speed very slowly. The original object left no trace of exhaust at any time. The fact that, even with the aid of binoculars, the size of the object wasn't appreciably larger, leads me to believe it was extremely high. However, the binoculars used were not a too powerful set.

The second sighting of this object was practically identical with the first, and the course practically the same. However, no binoculars were used and no object was seen to leave it. This second sighting about 2 1/2 weeks later, and somewhat shakes my belief that it can't be explained as identifiable object.

More information I cannot give you. Hoping this will be of some use to you in your files, I remain

Respectfully
