NOTE OF ACTION AND FILING

Sighting # 16 was the subject of a letter to the Minister and as such was treated as a "Ministerial". All data and the reply is held on 5 69/8/975.

The most probable cause was a sighting of a Cessna aircraft operating at Fairbairn airport.

Salyut Elements Separate, Signals Lost

Salyut space station orbited by the Soviet Union Apr. 3 suffered a catastrophic malfunction Apr. 14 that ripped the vehicle's solar cells and boom-mounted rendezvous radar and radio transponder from the spacecraft's main body and left the vehicle tumbling in space without telemetry return.

Breakup of the spacecraft was violent enough to divide the separated parts into 15-25 pieces, many of which already have decayed from orbit. At least three of the pieces were large enough to provide good tracking data shortly after the failure, but one also has since decayed.

The failure might have occurred while the Salyut was out of range of Soviet ground stations, preventing the Soviets from obtaining reliable data as to the cause of the accident.

Failure of the Soviets to launch a manned Soyuz spacecraft for a rendezvous with the Salyut (AW&ST Apr. 16, p. 19) may have averted a major space tragedy, although a crew on board the spacecraft might have prevented the trouble.

It is believed the Soviets delayed the liftoff of a Soyuz because of extreme solar flare activity, which revealed itself on Apr. 4, one day after the Salyut's launch. A launch pad booster or spacecraft malfunction might also have precluded a Soyuz launch, because the Salyut station was boosted into a high parking orbit Apr. 8.

The main hulk of the Salyut is expected to decay and re-enter the earth's atmosphere about September.

Destruction of the Salyut in the manner observed could have resulted from some type of explosion or possibly a wildly firing thruster, which could have sent the spacecraft into tumbling maneuvers too great for the solar panels and other appendages to withstand.

The almost immediate orbital decay of some Salyut debris lends credence to the theory that the spacecraft suffered an explosion.

The quick decay of pieces indicates an explosion that applied retrograde forces to some debris, thrusting it backward along the orbital track where it would lose altitude much more quickly than those pieces blown forward along the orbital track.

Loss of the Salyut is expected to have a more serious effect on the Soviet manned program than the death of the three Soyuz 11/Salyut crewmen almost two years ago. That fatal mishap was traced quickly to a decompression accident (AW&ST July 5, 1971, p. 12).

The latest mishap marks the fourth time in two years the Soviets have clearly failed in a space station exercise. Besides losing three cosmonauts in the Soyuz 11 tragedy, the Soyuz 10/Salyut mission also ended in a partial failure when the Soyuz crew failed to enter the Salyut once docked with it (AW&ST May 3, 1971, p. 14).

The Soviets also failed in an attempt to orbit a second functional Salyut in July, 1972, when it did not achieve orbit because of a booster malfunction (AW&ST Apr. 9, p. 21).

Other problems believed to have occurred in the Salyut program are indicated in the 1969 Soyuz 6, 7 and 8 triple manned flight launched by the Soviets in October of that year.

Originally set for May, 1969, Soyuz 6 is believed to have been designed as a solo engineering flight. The mission was delayed, however, because of pressure at Baykonur to launch the Luna series.

The follow-on mission to Soyuz 6 was to have been the launch of another Soyuz, in conjunction with a boilerplate Salyut where rendezvous and possibly docking could have been tested in preparation for a manned long-duration mission with a Salyut in 1970.

Soyuz 6's delay into the fall of 1969 is also believed to have led to a decision to fly Soyuz 7 and the boilerplate Salyut in a joint flight with Soyuz 6.

Problems eventually occurred with the Salyut, however, which would have pushed the joint flight into the winter of 1969 when manned missions were undesirable. Instead of waiting for Salyut, the Soviets readied Soyuz 8 and subsequently launched it in connection with Soyuz 6 and 7.

A relatively quick decision to launch a third manned spacecraft during October probably prompted the selection of an experienced crew consisting of cosmonauts Vladimir Shatalov and Alexei Yeliseyev, who had flown on the Soyuz 4 and 5 missions the previous January.

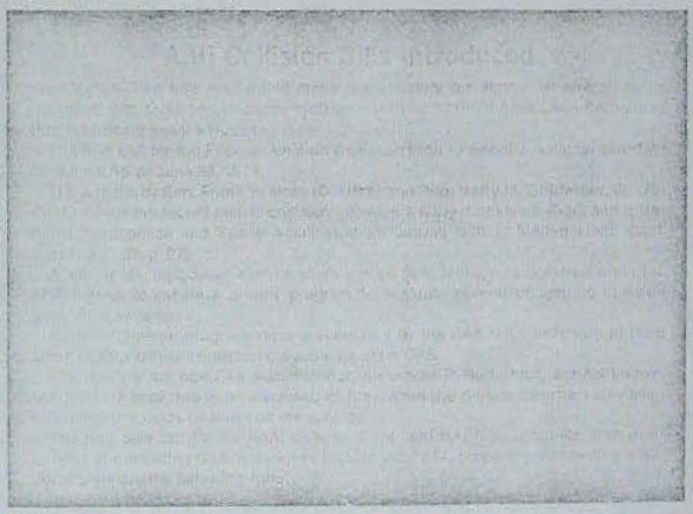

A month later, in November, 1969, tracking data indicate the boilerplate Salyut was launched but failed to achieve orbit. Observers said the boilerplate failure transmitted telemetry "quite similar" to a later successful Salyut boilerplate launch.

Without a Salyut vehicle in which to conduct tests, the Soviets flew the 18-day Soyuz 9 mission in June, 1970, to collect medical data on extended flights.

In December, 1970, a second boilerplate Salyut was launched successfully and tested under the guise of Cosmos 382. The successful test of the second boilerplate spacecraft set the stage for the Soyuz 10 and 11 missions, which rendezvoused with the only successful Salyut ever launched. With the Salyut inoperative, the Soviets are left with at least one SL-13 launch vehicle mated to a Soyuz spacecraft.

The Soviets are not expected to postpone manned flights until their linkup with an Apollo spacecraft under the Apollo Soyuz Test Project in July, 1975, so a manned Soyuz flight using the existing hardware might take place soon in spite of the Salyut loss. For the Soviets not to use the existing Soyuz/SL-13 combination or other vehicles this year would mean a delay of more than four years between Soviet manned flights.

Had it been flown, this month's Salyut/Soyuz mission probably would have drawn from a group of cosmonauts in training for such flights including Pavel Popovich, who piloted Vostok 4; Valery Bykovsky, pilot of Vostok 5; Boris V. Volynov, who flew on Soyuz 5, and Georgi G. Shonin, who flew on Soyuz 6.

580/1/1 Pt 23 (15a)

- 4 JUN 1973

Mr M. Fenton,
48 Basin Road,
LAUNCESTON TAS 7250

Dear Sir,

With reference to your report of an unusual aerial sighting on 15th May 1973, it has been determined that the most probable cause of the sighting was orbiting debris of the Russian space station, SALYUT.

The Salyut space station was orbited by the Soviet Union on April 3rd but suffered a major malfunction on April 14th that caused the vehicle's solar cells and boom mounted radar and radio transponder to separate from the main body. Subsequent tumbling of the vehicle caused further break up, and observations have since been made of items of debris re-entering Earth's atmosphere. The main hulk of the Salyut and other items are maintaining orbit and are expected to decay and reenter the atmosphere by September.

The sighting was also witnessed by an observer at Riverside and his report is almost identical to yours.

We trust that this explanation is satisfactory and thank you for your interest.

Yours faithfully,

G. J. Odgers

(G.J. ODGERS)

REPORT ON UNUSUAL AERIAL SIGHTING

Part 1 - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer ....A.D. EVANS..... Age ....35.....

2. Address of observer .....175 Alanvale Road.....

.....Newnham..... Phone ...26 3054..

3. Occupation of observer ....Teacher.....

4. Date and time of start of observation ..15th May 1973....5.50 a.m.

How certain is the date? ....Certain.....

How accurate is the time of start?..Approx.....

5. Duration of observation ..About 5 minutes.....

How accurate is your estimate? ..Within a minute or so.....

6. Observer's location at time of sighting Fairway Cres. Riverside...

.....

How familiar is observer with this locality? .....Very.....

7. Weather conditions at time of observation .....Clear.....

.....

8. Describe any aids/equipment used in the observation .....No Aids.....

.....

9. Where was object first observed? :

a. Relative to your surroundings .....Due south in vicinity.....

.....of Southern Cross.....

b. angle of elevation .....30° from horizon.....

c. compass angle bearing .....180°T.....

d. how accurate are these estimates? .....Approx.....

10. What first attracted observer's attention? .....Moving lights.....

.....

11. If there was more than one light/object : .....

a. how many were there? ..1 leading followed by 6 others.....

b. in what formation were they? 1 in advance 4 in line behind 2 behind but slightly to west of formation

12. What was the colour of the light or object? .....

Yellowish white (star coloured)

RESTRICTED

DECLASSIFIED

13. What was the brightness? (compare with full moon or common light source at a stated distance, e.g. ordinary street light at 100 yards)
Bright as Southern Cross stars

14. What was the apparent size at nearest approach? :
a. relative to Venus or Moon Satellite size
b. relative dimensions in inches at arm's length (about 20 inches from the eyes)

15. What were the bearing and elevation angles at nearest approach and how were these values assessed? Directly overhead (about 70°/80°)

16. Was any method of propulsion obvious? No

17. Describe any sound heard, including changes in pitch and intensity
None

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? 80°/30°

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances
5 mins for approx 50° radius

20. Give duration of any stationary phases None

21. Describe any deviations or manoeuvres None

22. Describe any trail of exhaust, vapour or light seen No

23. Where was object last observed :
a. relative to your surroundings Towards NE
b. angle of elevation Approx. 40°
c. compass angle bearing NE

24. What was the manner of its disappearance? Gave up looking

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching ground identations, residual magnetism or radioactivity etc) No

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity
School teacher dealing in Maths and Science

27. How many witness to the sighting? None known

~~RESTRICTED~~ UNCLASSIFIED

28. Do you know of witnesses to similar sightings in the area?

.....No.....

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation? .....Satellite.....

.....

30. What are your main reasons for excluding this explanation?

...Formation behind the leading light.....

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

REPORT OF UNUSUAL AERIAL SIGHTINGS

Part 1 - Report by Observer

1. Name of observer Nigel van HAMBURG Age 28

Address 27 Duntroon Ave., ROSEVILLE 2069

State NSW Postcode 2069

Occupation Air Traffic Controller

Phone (home) 4064402 (business)

2. Exact location of observer Control Tower. MASCOT AIRPORT

3. Start of observation: Date 12MAY73 Time 1355Z ~~am/pm~~

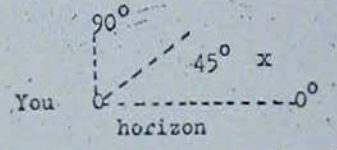

End of observation: Date 12MAY73 Time 1800Z ~~am/pm~~

4. Accuracy of date pos times pos

5. Weather conditions at time of observation, referring to cloud, wind visibility etc. Fine. Nil cloud. Calm QNH1014/1013. Temp 9°C Dewpoint 8°C. Vis 25Ml. light mist forming from 1800Z

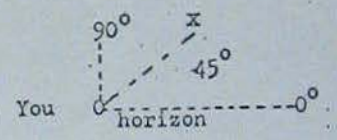

6. In what direction was the sighting first observed? 020°M

At what angle to the horizon?

7. In what direction was the sighting last observed? north (000°)

At what angle to the horizon?

8. Estimate of distance and/or altitude from observer unknown

9. Describe the object(s)/light(s) in your own words, referring to the number, colour, size, shape, brightness (relative to full moon/star), movement, sound, speed, method of propulsion, manner of disappearance and any other unusual features. If possible provide a sketch.

/2 (cont'd)

Description/sketch of object

The object, when first seen, appeared as a bright, suffused light with occasional red, blue and green flashes. The flashes appeared to be on the periphery of the white light as a segment of a halo. The appearance of the object did not change when viewed through a pair of 7 x 50 binoculars except to be more visible. There was no apparent movement of the object except that it appeared to oscillate with the flashes. The object was kept under observation for 4 hours in which time it moved from 020 deg to north and climbed to an elevation of about 45 deg from the horizon. At this time the object had assumed the appearance of a star.

At approximately 1600Z, the captain of a FOKKER FRIENDSHIP aircraft reported that a light appeared to be formating on and following his aircraft on the starboard side. The aircraft had just departed from MASCOT and was climbing over the city at an altitude of 5000 feet. A series of turns made under supervision of SYDNEY RADAR proved that the light was a star. The appearance of the light was consistent with that observed by the Air Traffic Controller.

Mr van Hamburg is now convinced that the light was from a star as the light, without the colour changes, was viewed in the same position on the two following nights.

/10. Have

Part ? - Unit Report

10. Have you any photographs of the sighting, or is there any physical evidence of fragments, scorching or ground indentations? No

11. How many other witnesses to the sighting? (Please provide names and addresses if possible) FOKKER FRIENDSHIP PILOT (name not given)
Unidentified woman telephone caller from West Ryde

12. Any additional comments you wish to make.

This sighting was initiated by a telephone call from a woman in North Ryde to the Senior Operations Controller, Mr C McRAE, DCA MASCOT. (extract of DCA SOC Log attached). The information was passed to the Tower Operator, Mr N van HAMBURG, who was unable to sight the object at first but who eventually made a sighting in a position different to that given by the woman caller.

Pollution level not significant

Details of terrain and natural and/or man-made features in the area. (Attach map with significant points marked, if possible) viewed seawards over the city lights.

Part 3 - Investigating Officer's Evaluation

1. a. Date of interview 18 JUNE 73

b. Place if interview SYDNEY AIRPORT

2. Names and addresses of persons interviewed (include phone numbers where applicable)

1. Nigel van HAMBURG
27 DUNTROON AVE
ROSEVILLE 2069

2. Robert POWELL
Senior Ops Officer
MASCOT AIRPORT

3.

4.

3. Narrative evaluation of personalities of witnesses (include any relationship with UFO organizations and their interest in subject matter).

Mr C. McRAE, who submitted the report to HQOC, was not available for interview as he was involved in a court case. Mr McRAE received the report from the original caller, whose name was not recorded in the log.

Mr NIGEL van HAMBURG, Duty Air Traffic Controller, made the sighting from the Air Traffic Control Tower. He has been employed as an ATC Controller for 6 years and is regarded as very reliable.

4. Investigating officer's evaluation of possible cause(s).

Mr McRae is certain that the object seen was a star as he saw it on the two following nights; but without the technicolour effects. The initial sighting co-incides with the position of VEGA and so does the subsequent track, but the final elevation is somewhat low. RASELHAGUE and ALPHECCA are two other possibilities. It is interesting to note that the Control Tower does not contain a compass rose to confirm visual bearings, consequently all bearings and elevations of visual sightings are estimates based on the apparent relationship to the airfield runway.

(b) in what formation were they?.....

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer MR C McCREA Age

2. Address of observer C/ DEPARTMENT OF CIVIL AVIATION MASCOT NSW Phone 669 4876

3. Occupation of observer SENIOR OPERATIONAL AIR TRAFFIC CONTROLLER MASCOT ATC

4. Date and time of start of observation 12 MAY 73 2355 HRS

How certain is the date? CERTAIN

How accurate is the time of start ACCURATE

5. Duration of observation FROM 2355 TO APPROX 0100

How accurate is your estimate? ACCURATE

6. Observer's location at time of sighting MASCOT TOWER

How familiar is observer with this locality? COMPLETELY FAMILIAR

7. Weather conditions at time of observation CLEAR SKY - NO CLOUD BUT SLIGHT HAZE

8. Describe any aids/equipment used in the observation MASCOT AIRFIELD ORIENTATION. FOR AZIMUTH:- EXTENDED HAND FOR ELEVATION

9. Where was object first observed:

(a) Relative to your surroundings 020° MAGNETIC FROM MASCOT CONTROL TOWER

(b) angle of elevation ABOUT 5°

(c) compass angle bearing 020°

(d) how accurate are these estimates ESTIMATING ACCURATE

10. What first attracted observer's attention? CALL BY WOMAN (NAME NOT GIVEN) FROM N. RYDE THAT SHE HAD OBSERVED THE OBJECT IN THE EASTERN SKY) MCCREA THEN OBSERVED FROM TOWER

11. If there was more than one light/object:

(a) how many were there? ONE

(b) in what formation were they?

12. What was the colour of the light or object? WHITE LIGHT WITH OCASIONAL RED / GREEN FLASHES OBSERVED THROUGH BINOCULARS

13. What was the brightness? (compare with full moon or common light source at a stated distance, e.g. ordinary street light at 100 yards) BRIGHT

14. What was the apparent size at nearest approach:
    (a) relative to Venus or Moon .....
    (b) relative dimensions in inches at arm's length (about 20 inches from the eyes).....

15. What were the bearing and elevation angles at nearest approach and how were these values assessed? 020 FROM MASCOT TOWER - 5° ABOVE HORIZON.

16. Was any method of propulsion obvious? No.

17. Describe any sound heard, including changes in pitch and intensity No.

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? LOW ON HORIZON.

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances..... ONLY SLIGHT MOVEMENT OBSERVED BETWEEN 2355HRS - 0100HRS

20. Give duration of any stationary phases..... SLOW MOVING

21. Describe any deviations or manoeuvres..... NONE

22. Describe any trail of exhaust, vapour or light seen..... NONE

23. Where was object last observed:
    (a) relative to your surroundings MOVING FROM E SLOWLY THROUGH N.
    (b) angle of elevation LOW (ABOUT 5°)
    (c) compass angle bearing 020 - 000 (APPROX)

24. What was the manner of its disappearance? NOT RECORDED

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc) NO

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity ..... EX RAAF AND ATC FOR MANY YRS.

27. How many witness to the sighting?..... AT LEAST FOUR .....

28. Do you know of witnesses to similar sightings in the area?..... CAPT SID FOSTER OF AIRLINE OF NSW WHO WAS BRIEFED BEFORE TAKE OFF TO LOOK OUT FOR OBJECT. HE REPORTED SIGHTING BY R/T.

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?..... JUPITER .....

30. What are your main reasons for excluding this explanation?..... HONR -

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

Signature..... Date..... 23 May 73

(Spoke to Mrs. Hockey and the phone — he later agreed that it was most likely JUPITER)

Dear Sir,

With reference to your report of an unusual aerial sighting on 13th March 1973, we regret that because of the delay in receiving this report, our investigating team has been unable to conclusively determine its cause.

Normally, logical explanations are available in answer to sighting reports and we feel that the most likely cause of your sighting was an aircraft entering the final approach circuit for Perth Airport, but due to destruction of traffic information pertaining to that date, this theory is impossible to verify.

We hope that this explanation will be satisfactory to you and thank you for your interest.

Yours faithfully,

REWRITE of REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form)

1. Name of observer ANTHONY SHAUN FOLEY. Age 41.
2. Address of observer No. 1 ROKEBY RD. SUBIACO. WA 6008 Phone.....
3. Occupation of observer .....
4. Date and time of start of observation 13 MAR 73. 9PM
   How certain is the date? .....
   How accurate is the time of start Made Phone call to Dept. of CIVIL AVIATION SOMEWHS AFTER NOT KNOWN HOW MANY MINS AFTER
5. Duration of observation ABOUT 1 MINUTE.....
   How accurate is your estimate? .....
6. Observer's location at time of sighting.....
   NO 1 ROKEBY RD SUBIACO.....
   How familiar is observer with this locality?.....
   WENT AROUND AREA SOMETIMES.....
7. Weather conditions at time of observation.....
   CLEAR EVENING.....
8. Describe any aids/equipment used in the observation
   EYES.....
9. Where was object first observed? :
   (a) Relative to your surroundings ..... OVAL OFF THOMAS ST, ONSLOW RD AND ST SHENTON PARK NEAR SIR CHARLES GAIRDNER HOSPITAL
   (b) Angle of elevation STRAIGHT UP. TURNED SOUTH
   (c) compass angle bearing 87½ DEGREES WITH NO COMPASS
   (d) how accurate are these estimates .....
10. What first attracted observer's attention? ..... UNUSUAL LIGHTS IN SKY.....

/11.

11. If there was more than one light/object: SEEMED SEVERAL LIGHTS CLOSE TO ONE ANOTHER
    (a) how many were there? RED & WHITE LIKE ..... SHAPE
    (b) in what formation were they? ..... WHITE LIGHT REDLIGHT IN CENTRE
12. What was the colour of the light or object? ..... RED AND WHITE
13. What was the brightness? (compare with full moon or common light source at a stated distance, eg, ordinary street light at 100 yards) ..... ABOUT BRIGHTNESS OF STARS
14. What was the apparent size at nearest approach:
    (a) relative to Venus or Moon .....
    (b) relative dimensions in inches at arm's length (about 20 inches from the eyes) .....
    ABOUT 8 FT LONG 4" TO 8" WIDE
15. What were the bearing and elevation angles at nearest approach and how were these values assessed? STRAIGHT THEN TURNED ARC LIKE SOUTH THEN ..... SOUTH WEST TO COAST
16. Was any method of propulsion obvious? ..... NO
17. Describe any sound heard, including changes in pitch and intensity ROSE FIRST NOTICED ABOVE GROUND LEVEL TO ABOUT 200FT IN SKY
18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? ROSE TO ABOUT 200FT STRAIGHT UP TURNED IN SOUTH DIRECTION THEN DESCENDED
19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances .....
    .....
20. Give duration of any stationary phases .....
21. Describe any deviations or manoeuvres TURNED SOUTH THEN DESCENDED .....
22. Describe any trail of exhaust, vapour or light seen WHITE RED WHITE TRAIL .....
23. Where was object last observed? :
    (a) relative to your surroundings SOUTH WEST OF ADDRESS .....
    (b) angle of elevation STRAIGHT UP TURNED SOUTH .....

/(c)

(c) compass angle bearing. 8 1/2 degrees will no compass

24. What was the manner of its disappearance? SIMILAR TO SWITCHING ELECTRIC LIGHT OFF

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity, etc)? 15 DAYS AFTER SOMEB. DRY GRASS AT CORNER OF OVAL AND THOMAS ST AND OFF THOMAS ST & ONSLOW RD SHENTON PARK [CAUGHT FIRE?]

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity .....

27. How many witnesses to the sighting? .....

28. Do you know of witnesses to similar sightings in the area?.....

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation? WHITE & RED LIGHTNING

30. What are your main reasons for excluding this explanation? DID NOT SEEM TO BE A USUAL OBJECT OR LIGHTS IN SKY

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

ANNEX E

REPORT ON UNUSUAL AERIAL SIGHTING

Part 1 - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form)

1. Name of Observer ..... Age.....

2. Address of Observer.....
.....Phone Number.....

3. Occupation of Observer.....

4. Dat & Time of Start of Observation....13 MAR 73 0400.....
How certain is the date?.....
How accurate is the time of start?.....

5. Duration of Observation.....
How accurate is your estimate?.....

6. Observer's location at time of sighting.....
.....
How familiar is observer with this locality?.....

7. Weather conditions at time of observation.....
.....

8. Describe any aids/equipment used in the observation.....
.....

9. Where was object first observed?:
a. Relative to your surroundings.....
.....
b. Angle of elevation.....
c. Compass angle bearing.....
d. How accurate are these estimates?.....

10. What first attracted observer's attention?.....
.....

11. If there was more than one light/object:
a. How many were there? .....
b. In what formation were they?.....

/ 12. What was

12. What was the colour of the light or object? RED + WHITE

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards)
NO VT BRIGHTNESS OF STARS

14. What was the apparent size at nearest approach? : about 8 feet long.
a. relative to Venus or Moon
b. relative dimensions in inches at arm's length (About 20 inches from eyes) POINT 8 FEET LONG 4 inches to 8 inches width

15. What were the bearing and elevation angles at nearest approach and how were these values assessed? STRAIGHT THEN TURNED ARC LIKE sound
John describes N South West to South

16. Was any method of propulsion obvious? NO

17. Describe any sound heard, including changes in pitch and intensity
Low Just wind about 200 ft high ground

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?
Rest to POINT 200 FEET straight up turned in South East direction
Then disappeared

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances... about 10 mph fast

20. Give duration of any stationary phases disappeared

21. Describe any deviations or manoeuvres Went North East then disappeared

22. Describe any trail of exhaust, vapour or light seen WHITE RED
WHITE TRAIL

23. Where was object last observed? :
a. relative to your surroundings South West of house
b. angle of elevation straight up then South
c. compass angle bearing NE again West 90° disappeared

24. What was the manner of its disappearance? SUDDENLY TO SOMETHING ELECTRIC LIKE OUT

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity, etc)
18 days after rain from dry grass at corner of road 20 ft there
a colour Red Yellow Pale

/ 26. State any

State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity.

.....

27. How many witnesses to the sighting? .....

28. Do you know of witnesses to similar sightings in the area?

.....

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?

WHITE + RED LIGHTING ?

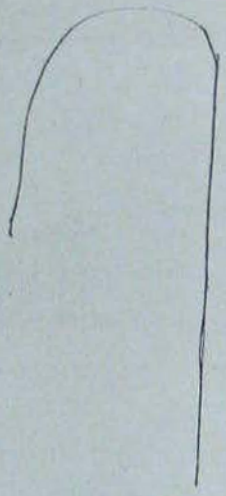

.....

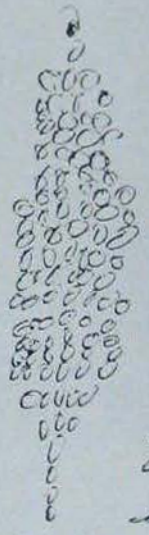

30. What are your main reasons for excluding this explanation?

.....

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form if needed.

WHITE + RED - LIGHTS.

8 7½ degrees 3

with no compass

NUNAWADING VICTORIA

G.L & S.M. AUGUSTINI

580/1/1 Pt23 (11a)

G.L. & S.M. Augustini,
6 Koala Avenue,
NUNAWADING VIC 3131

Dear Mr & Mrs Augustini,

With reference to your report of an unusual aerial sighting on 8th April 1973, it has been determined that the most probable cause was the crescent moon setting.

At 9.00 pm on 8th April the moon was visible to the WNW low on the horizon, and during the period of the sighting would have disappeared below the horizon. Pollutants in the air over Melbourne would account for the changing shape of the object and the bright orange glow described in your report.

Returned herewith are your two negatives. We trust that this explanation is satisfactory, and thank you for your interest.

Yours faithfully,

G. J. Odgers

Dear Sirs,

I enclose negatives of photos my husband took of a U.F.O. We have told your Melbourne office that they were blank, but they asked us to send them to you.

Yours faithfully
Sylvia Augustin.

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer GARY LYSLE AUGUSTINI / SYLVIA MAY AUGUSTINI ..... Age 28 .....

2. Address of observer. 6 KOALA AVE NUNAWADING .....
MELBOURNE VICTORIA ..... Phone 877.1048 ... 8738309 Bus

3. Occupation of observer.. LADIES HAIRDRESSER .....

4. Date and time of start of observation. 8-4-73 ... about 9-18 PM .....

How certain is the date? EXACT .....

How accurate is the time of start? ALMOST EXACT .....

5. Duration of observation.... 10 MIN APPROX .....

How accurate is your estimate? ALMOST EXACT .....

6. Observer's location at time of sighting.... ABOVE ADDRESS FROM KITCHEN WINDOW & SIDE FENCE STANDING ON TOP .....

How familiar is observer with this locality? VERY FAMILIAR .....

7. Weather conditions at time of observation..... VERY CLEAR NIGHT .....

8. Describe any aids/equipment used in the observation.... TRAK PILOTES. & HAVE GOOD EYESITE FROM LATE INSURANCE TESTS.

9. Where was object first observed? : JUST PAST STOPPING TOWN

a. Relative to your surroundings... LOOKING FROM OUR HOUSE ...

b. angle of elevation... IT WAS THE SAME HEIGHT PLANES COME IN FROM TASMANIA

c. compass angle bearing.....

d. how accurate are these estimates?.....

10. What first attracted observer's attention?.. A BRIGHT ORANGE TO RED FIER LIKE GLOW IN THE SKY. .....

11. If there was more than one light/object :

a. how many were there?..... ONE .....

b. in what formation were they?... LARGE HALF MOON LIKE & CHINESE SHOE SHAPE

12. What was the colour of the light or object?..... ORANGE TO RED.

RESTRICTED

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards)... FIRE FROM 4 MILES LIKE WHEN BOWRAVEN SCOTT WAS ON FIRE (approached towards Scott but not permitted set fire to for seeking angular building - will report)

14. What was the apparent size at nearest approach?:

a. relative to Venus or Moon... SAME SIZE AS ½ MOON THE FOLLOWING NIGHT

b. relative dimensions in inches at arm's length (about 20 inches from the eyes).....

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?.....

16. Was any method of propulsion obvious? A SMALL PROPELLOR LIKE ON A HELICOPTER

17. Describe any sound heard, including changes in pitch and intensity .....

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? SAME AS THE PLANES THAT GO TO TULLA FROM TASMANIA

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances ... ABOUT THE SAME AS THE PLANES MENTIONED .....

20. Give duration of any stationary phases... IT WENT SLOW AT THE BEGINNING OF OBSERVATION

21. Describe any deviations or manoeuvres... SEEMED TO CHANGE SHAPE.

22. Describe any trail of exhaust, vapour or light seen... ALWAYS BRIGHT ORANGE TO RED NO EXHAUST SEEN

23. Where was object last observed :

a. relative to your surroundings... GOING OVER HORIZON.....

b. angle of elevation.....

c. compass angle bearing.....

24. What was the manner of its disappearance? FAST) IT SEEMED TO GO SMALL

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc)... PHOTOS BEING DEVELOPED.

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity.....

.....

27. How many witness to the sighting? MY WIFE + I.....

~~RESTRICTED~~

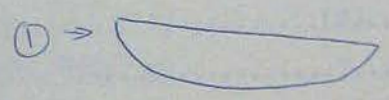

28. Do you know of witnesses to similar sightings in the area?...NO.....

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?....NON.....

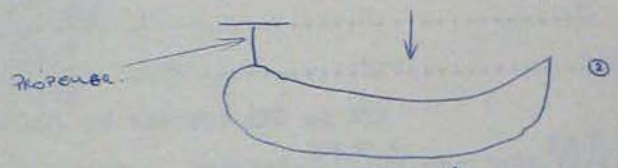

30. What are your main reasons for excluding this explanation?.....
.....NEVER SEEN ANYTHING LIKE THIS BEFORE.....

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

FIRST SIGHT THROUGH WINDOW BRIGHT RED TO ORANGE.

THEN MOVING N^TH EAST CHANGED SHAPE TO

IT SLOWED DOWN WHEN THIS HAPPENED

- 5 JUN 1973

Miss R. Brockfield,
2 Knox Street,
NOBLE PARK, VIC 3174

Dear Miss Brockfield,

With reference to your report of an unusual aerial sighting on 10th May 1973, it has been determined that the most probable cause was the re-entry to Earth's atmosphere of the space vehicle 1973-018C.

Extracts of information contained in the Space-warning Bulletin, issued from the World Warning Agency for Satellites, shows that the space vehicle 1973-018C was an associated item of equipment involved in the launching of MOLNIYA 2, (1973-018A). MOLNIYA 2 is a Russian satellite which was launched on April 5 and carries apparatus for transmitting television programmes and multichannel radio communications. 1973-018C was predicted to decay from orbit and re-enter the atmosphere on May 10.

From your description of the sighting, the investigating team is of the opinion that you saw the commencement of re-entry of 1973-018C on a trajectory through the southern hemisphere. The unusual lighting of the object was probably due to variations in atmospheric density and separation of smaller items from the main body.

We thank you for your interest and trust that this explanation is satisfactory.

Yours faithfully,

G. J. Odgers

- 5 JUN 1973

Mr J. Terrey,
82 Minto Road,
MINTO NSW 2566

Dear Sir,

With reference to your observation of an unusual aerial object as reported by you to the Army Duty Officer (Sgt. Lang) at Moorebank, and subsequently to the Royal Australian Air Force Operations Officer at Richmond, it has been determined that the most probable cause was an unusual sighting of the star CANOPUS.

On the evening of 22nd May 1973, Canopus was situated in the south western quadrant at 25° elevation and magnitude of -1. Additionally, a significant temperature inversion of 6.5°C at 2,800 feet altitude was in evidence. Sgt Lang has confirmed the sighting and has stated that he is positive that it was of a star and that when viewed by the naked eye, it appeared to pulsate, oscillate and change colour from white to a dull reddish purple. This colour change occurred when thin white cloud drifted across the line of view, as seen through binoculars.

Apparent pulse, oscillation and colour change are common optical illusions when incandescent bodies are viewed through temperature inversions or an atmosphere of greater than normal density variation.

We trust that this explanation is satisfactory and thank you for your interest.

Yours faithfully,

G. J. Odgers

7. Weather conditions at time of observation.....cold and clear...
   .....
8. Describe any aids/equipment used in the observation.....
   .....none.....
9. Where was object first observed? :
   a. Relative to your surroundings...south west.....
      .....
   b. angle of elevation.....about 30 deg.....
   c. compass angle bearing....not known.....
   d. how accurate are these estimates?.....guess.....
10. What first attracted observer's attention?..peculiar colour and size.....
11. If there was more than one light/object :
   a. how many were there?.....one.....
   b. in what formation were they?.....

/12. What was

12. What was the colour of the light or object? changing white/red/purple

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards) duller than the brightest star but larger

14. What was the apparent size at nearest approach? :

a. relative to Venus or Moon. twice the size of the largest star

b. relative dimensions in inches at arm's length (about 20 inches from eyes). larger than a match head at arms length

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?

guesses

16. Was any method of propulsion obvious? no

17. Describe any sound heard, including changes in pitch and intensity. none

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?

no major change in position

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances. none

20. Give duration of any stationary phases. one hour plus

21. Describe any deviations or manoeuvres. oscillating

22. Describe any trail of exhaust, vapour or light seen.

none

23. Where was object last observed? :

a. relative to your surroundings. same place

b. angle of elevation

c. compass angle bearing

24. What was the manner of its disappearance? still visible

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity, etc)

no

/26. State any

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity.

none

27. How many witnesses to the sighting? reported to army at MOOREBANK

28. Do you know of witnesses to similar sightings in the area?

Army Sgt reported to have seen it.

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?

no guess

30. What are your main reasons for excluding this explanation?

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form if needed.

This report is the substance of a telephone call. The observer declined to complete the form 'In case I'm just making a fool of myself'.

Cloud thin cirrus

Investigating Officers Remarks

1. The report was originally made to ARMY AVIATION DUTY OFFICER (Sgt LANG) at MOOREBANK, who, after hearing the report, referred Mr TERREY to the Operations Officer at RAAF RICHMOND.

2. Sgt LANG confirms the sighting. He stated that he viewed it through binoculars (7.50 x 10) and he is positive that it was a star. When viewed by the naked eye, the object appeared to be pulsating and oscillating and changing colour from white to a dull reddish purple. When viewed through the glasses, it was at times visible as a white light similiar to other stars but changed colour when thin white cloud drifted across it. The object was first sighted at 2030K and was still visible at 2345K when the Sergeant has to leave to perform other duties.

UMINA
NSW

MRS. JOHNSON

580/1/1 Pt 23 (8a)

- 6 JUN 1973

Mrs M. Johnson,
46 Birdwood Avenue,
UMINA NSW 2257

Dear Mrs Johnson,

With reference to your report of an unusual aerial sighting on 2nd May 1973, it has been determined that the most probable cause was the sighting of two Mirage aircraft.

At the time of sighting, two Mirages were carrying out training in the Richmond - Gosford area. This training involved climbing subsonic intercepts and included the use of afterburners. No significant temperature inversion was apparent in the area and consequently viewing conditions were optimum. The vibrating sound heard would have been the noise associated with the use of afterburners.

We trust that this explanation of your sighting is satisfactory and thank you for your interest.

Yours faithfully,

G. J. Odgers

For Information:

Headquarters Operational Command (Attention: CC INTELL O)

REPORT ON UNUSUAL AERIAL SIGHTING

1. Attached is a report on an unusual aerial sighting submitted by Mrs Marie Johnson of 46 Birdwood Avenue Umina New South Wales. Mr Harry Griesberg of the Central Coast UFO Research Bureau assisted with compilation of the report including the taking of compass bearing angles the day after the sighting. Mrs Johnson mentioned at that time that she had only recently moved to Umina from Bexley in Sydney, and was quite used to seeing aircraft flying overhead to and from Mascot Aerodrome.

2. The sighting took the form of a series of red and white lights as per the sketch, over a period of 3 minutes. However, in a telephone conversation with the writer early on 3rd May, Mr Griesberg described the sighting as "3 lights initially, and later one long light similar to a neon light". The object was first observed bearing 230° elevation 45°, and disappeared out to sea bearing 150° elevation 15°.

3. Two Mirage aircraft were active in the Gosford/Sydney area, at 35,000 feet executing climbing subsonics, ATD WLM 1827 hours, ATA WLM 1940 hours. No planets or major stars were visible. No temperature inversions were recorded. No satellites etc, were visible.

4. Allowing for a slight variation in reported times, the two Mirages executing climbing subsonics, which includes the use of afterburner, would fit the description given.

5. Forwarded for your further investigation.

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

CENTRAL COAST U.F.O. RESEARCH BUREAU
REF: R20

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer... Marie Johnson ..... Age. 29..
2. Address of observer.. 46 Birdwood Ave .....
..... Umina 2257 ..... Phone. 415996
3. Occupation of observer..... House wife .....
4. Date and time of start of observation.... 2-5-73 - 7.35pm
   How certain is the date?..... certain .....
   How accurate is the time of start?.... certain .....
5. Duration of observation..... about 3 mins .....
   How accurate is your estimate?..... Approx GUESS ....
6. Observer's location at time of sighting... In back yard
   .....
   How familiar is observer with this locality?... Am resident
   ..at this address .....
7. Weather conditions at time of observation..... clear - No clouds
   ...1. No Moon .....
8. Describe any aids/equipment used in the observation.... None .....
   .....
9. Where was object first observed:
   a. Relative to your surroundings... above house Next ....
   ..door .....
   b. Angle of elevation.... 45° .....
   c. Compass angle bearing.. 230° .....
   d. How accurate are these estimates?.... by compass .....
10. What first attracted observer's attention?.... lights .....
    .....
11. If there was more than one light/object:
    a. How many were there?..... 5 .....
    b. In what formation were they?. ...see ~~set~~ sketch .....
12. What was the colour of the light or object?.... red & white
13. What was the brightness? (Compare with full moon or common light source at a stated distance, eg, ordinary street light at 100 yards)
    ...Same as full moon .....
14. What was the apparent size at nearest approach:
    a. Relative to Venus or Moon.....
    b. Relative dimensions in inches at arm's length (about 20 inches from the eyes). 20 cent at arms length ....
    to cover all lights
15. What were the bearing and elevation angles at nearest approach and how were these values assessed?.... 45° .....
    .....
16. Was any method of propulsion obvious?..... No .....

/17. Describe

17. Describe any sound heard, including changes in pitch and intensity
Sound of slow moving aircraft - only vibrating

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? both 45°

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances. Seemed to move faster than fast moving plane

20. Give duration of any stationary phases... See reverse Page

21. Describe any deviations or manoeuvres... changed direction

22. Describe any trail of exhaust, vapour or light seen... —

23. Where was the object last observed:
a. Relative to your surroundings... out to sea
b. Angle of elevation... 15°
c. Compass angle bearing... 150°

24. What was the manner of its disappearance?.. disappeared in distance

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc)... NIL

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity...
Mr Griesberg of C.C.U.F.O.R.B. helped

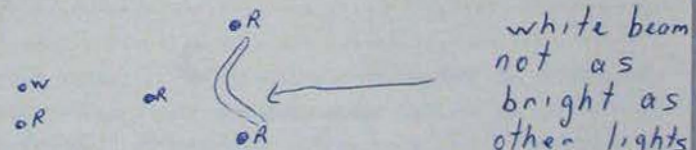

27. How many witnesses to the sighting?.. two myself & mother

28. Do you know of witnesses to similar sightings in the area?.. No

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?.. Plane

30. What are your main reasons for excluding this explanation?.. too many lights - just moved from Sydney near Airport have seen many planes.

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form,

W - white
R - Red

KORUNG VALE VIC KORNA GROVER

580/1/1 Pt23 (6a)

13 JUL 1973

Miss Lorna Grover,
7 Crown Road,
IVANHOE VIC 3079

Dear Miss Grover,

With reference to your report of unusual ground markings sighted near Korong Vale on 14th April 1973, investigations have not been conclusive in determining the cause.

A possible cause, however, considered feasible by the investigating team, is that the markings were made by some type of farm machinery. Enquiries conducted in the Wedderburn district did not produce any other witnesses who may have been able to aid in the determination of the cause and we are, therefore, unable to substantiate the above theory. Additionally, the time lapse between the date of the sighting and the report being submitted precluded early investigation and by the time an investigating officer visited the area, the markings were no longer visible.

We regret that we are unable to provide a positive explanation for the markings, but should reports of similar markings be received in the future your report will be re-examined.

Thanking you for your interest.

Yours faithfully,

G J Odgers

(G.J. ODGERS)

RECEIVED
15 MAY 1973
H.Q.S.C.
REGISTRY

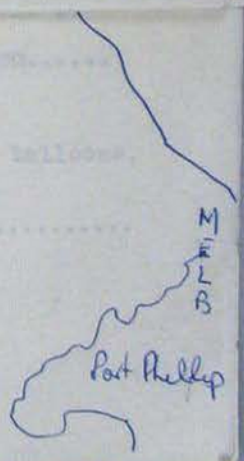

Dear Sirs,

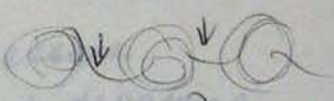

Lacking more specific direction I use the above heading to report tracks seen before Easter at Korong Vale, Victoria.

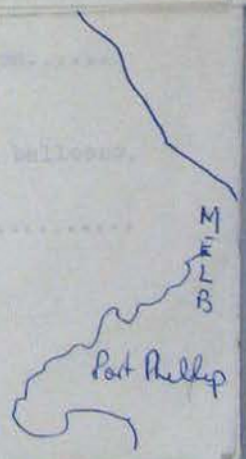

I am a trained observer, being an art and craft lecturer at Melbourne Kindergarten Teachers College.

On Saturday 14th April around midday or later I drove into K.V. from Wedderburn where I was staying in the Bakehouse, owned by Mr. H.R. Hughan. As I approached

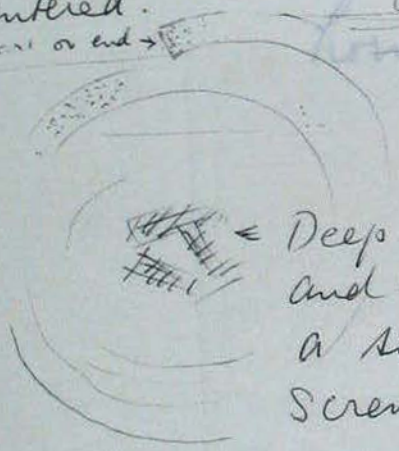

5/6/73

the town I noticed, over the sandy car tracks, on the other side of the road four spiral tracks, each distinct, with at the centres deeply impressed and scuffed marks. At first I thought these could have been made by children or some farm machinery I was unfamiliar with and having seen children not far distant related ideas to their presence. I made a point of driving back that way and went on the wrong side of the road to avoid driving over the spirals and slowly inspected them closely. I felt that had there been connection with children or motor scooters etc there would have been connecting lines like  but each spiral started (or ended) with a crisp, light edge quite unlike the heaviness of even a bicycle track. I

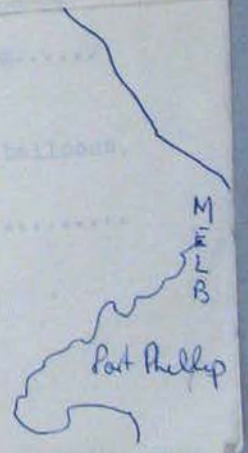

would say the lines were six inches in breadth, the impression was lightly textured but not with anything approximating a tyre tread pattern. The diameters were about 8–10 feet and each spiral lay was characterised by a clean, edge, crisp commencing or ending edge and the central pressure marks. There were no footsteps or other indications of any means of making the marks, but I have continued since then to sieve through my mind to find any possible source I have ever encountered.

Car tracks scarcely depressed by "pattern" of stipple texture.

< Deep marks pressure and movement indicating a sort of agitated screening action.

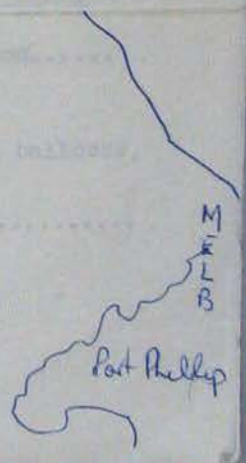

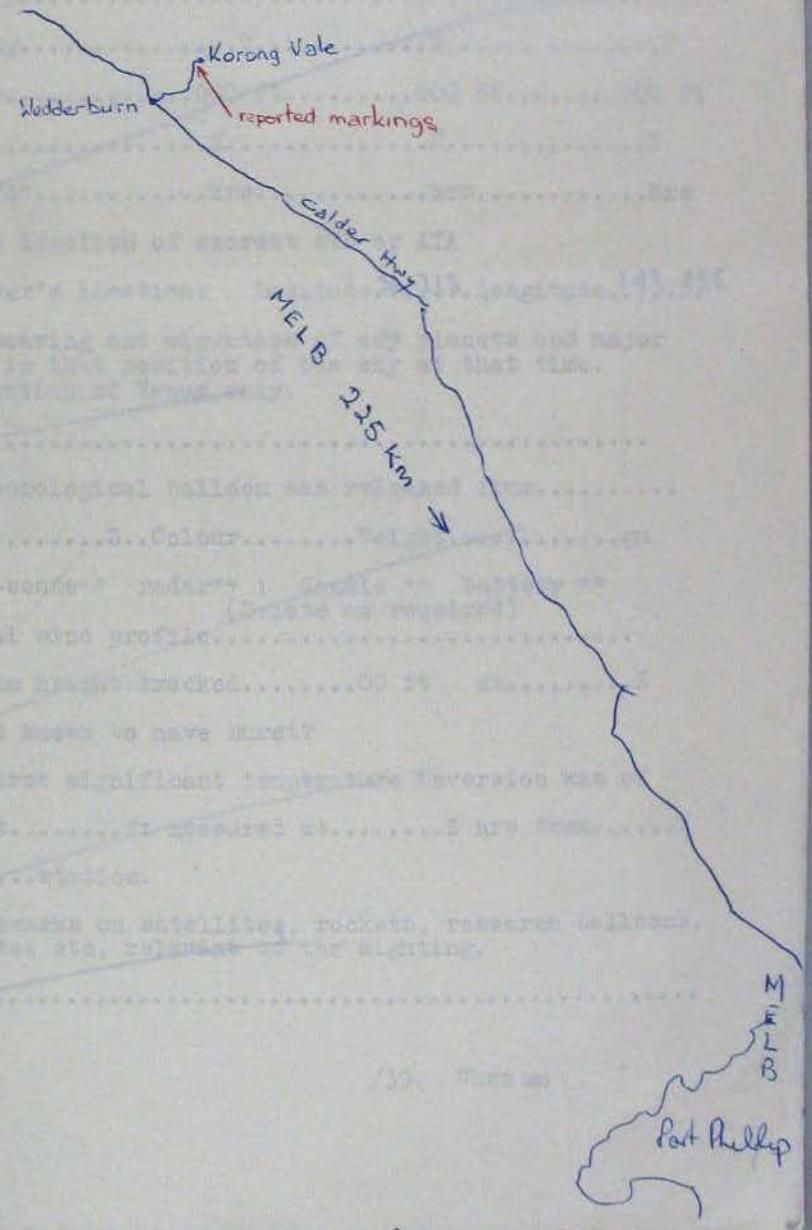

I may add that my almost immediate return was related not to deep curiosity about the tracks but to having gone to a garage for petrol and discovered I had no purse. Not knowing about Saturday pm petrol selling in Wedderburn I was intent rather on getting back there in time, in case of closing, than the tracks.

But I have continued to puzzle about this set of four spirals.

Yours sincerely,

Nona Grover

15 JUN 1973

580/1/1 Pt23 (6a)

Mr M.H. Taylor,
Flat 18, 980 Lygon Street,
NORTH CARLTON, VIC 3054

Dear Sir,

With reference to your report of an unusual aerial sighting on 6th May 1973, it has been determined that the most probable cause was the space vehicle designated 1973-018B burning-up on re-entry into Earth's atmosphere.

Information contained in the Space Warn Bulletin, issued by the World Warning Agency for Satellites, shows that the space vehicle 1973-018B was an associated item of equipment involved in the launching of MOLNIYA 2 (1973-018A). MOLNIYA 2 is a Russian satellite which was launched on 5th April 1973, and carries apparatus for transmitting television programmes and multichannel radio communications.

Although the predicted decay date for 1973-018B was 3rd May, irregular fluctuations in solar activity can greatly affect upper atmosphere density thus making accurate predictions very difficult. Should further information come to hand to indicate that 1973-018B decayed on a date other than 6th May, further investigation will be conducted.

For your information, of the 6397 man-made objects catalogued since 1957, 2902 were still in space on 29th April 1973.

We trust that this explanation is satisfactory, and thank you for your report.

Yours faithfully,

G. J. Odgers

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer MARK HEDLEY TAYLOR Age 25 YEARS
2. Address of observer FLAT 18, 980 LYGON STREET, NORTH CARLTON, 3054 Phone 622241 (BUSINESS ONLY)
3. Occupation of observer SOLICITOR
4. Date and time of start of observation 6th MAY 1973 at 6.40 PM.
   How certain is the date? POSITIVE
   How accurate is the time of start? WITHIN 5 MINUTES EITHER SIDE.
5. Duration of observation APPROX. 5 MINUTES
   How accurate is your estimate? AN APPROXIMATION ONLY.
6. Observer's location at time of sighting NORTH CARLTON (LYGON STREET) - MY RESIDENCE
   How familiar is observer with this locality? VERY
7. Weather conditions at time of observation CLEAR SKY - STARS EVIDENT - COOL EVENING.
8. Describe any aids/equipment used in the observation. NONE USED
9. Where was object first observed? :
   a. Relative to your surroundings FAIRLY HIGH IN THE SKY AS A CONSIDERABLE AMOUNT OF LOWER HORIZON IS ~~OBLITERATED~~ BY HOUSES.
   b. angle of elevation 45° to 50°
   c. compass angle bearing NORTH WEST OF MY LOCATION (SEE SKETCH FOR Q.31)
   d. how accurate are these estimates? APPROXIMATIONS ONLY.
10. What first attracted observer's attention? MOVEMENT OF A LIGHTED BODY - I FIRST THOUGHT IT WAS AN AEROPLANE.
11. If there was more than one light/object :
    a. how many were there? NOT APPLICABLE
    b. in what formation were they? DITTO.
12. What was the colour of the light or object? YELLOW TO ORANGE WITH A WHITE TAIL.

~~RESTRICTED~~

PROBABLE 1973-01RB or 1973-01BC. / MOLNIYA 2 launched APR 5

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards) NOT AS BRIGHT AS A STREET LIGHT — MORE LIKE A TORCH AT 100 YDS.

14. What was the apparent size at nearest approach?:

a. relative to Venus or Moon... VERY LIKE A LARGE STAR NO WHERE NEAR THE SIZE OF THE MOON.

b. relative dimensions in inches at arm's length (about 20 inches from the eyes)..... I COULDN'T REALLY ESTIMATE.....

15. What were the bearing and elevation angles at nearest approach and how were these values assessed? WEST / APPROX 60° ELEVATION / GUESSWORK ONLY.

16. Was any method of propulsion obvious?.... NO .....

17. Describe any sound heard, including changes in pitch and intensity ..... NONE HEARD .....

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?. MAX. 60° to MIN 25°-30° (THEN DISAPPEARED FROM VISION)

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances .. SLIGHTLY ..... FASTER THAN A COMMERCIAL JET AEROPLANE VIEWED FROM A DISTANCE.

20. Give duration of any stationary phases.... NOT APPLICABLE .....

21. Describe any deviations or manoeuvres..... NONE MADE .....

22. Describe any trail of exhaust, vapour or light seen..... WHITE TO SILVERY TAIL MANY TIMES THE OBJECTS LENGTH.

23. Where was object last observed :

a. relative to your surroundings. FROM CARLTON IT LOOKED LIKE IT WOULD BE OUT OVER RINGWOOD OR SLIGHTLY FURTHER SOUTH. EAST

b. angle of elevation..... 25° to 30° .....

c. compass angle bearing..... SOUTH EAST OF MY POSITION (SEE Q 31)

24. What was the manner of its disappearance?.. GRADUAL INDISCERNABLE..

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc)..... NO .....

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity... NO .....
..... SUCH FORMAL TRAINING .....

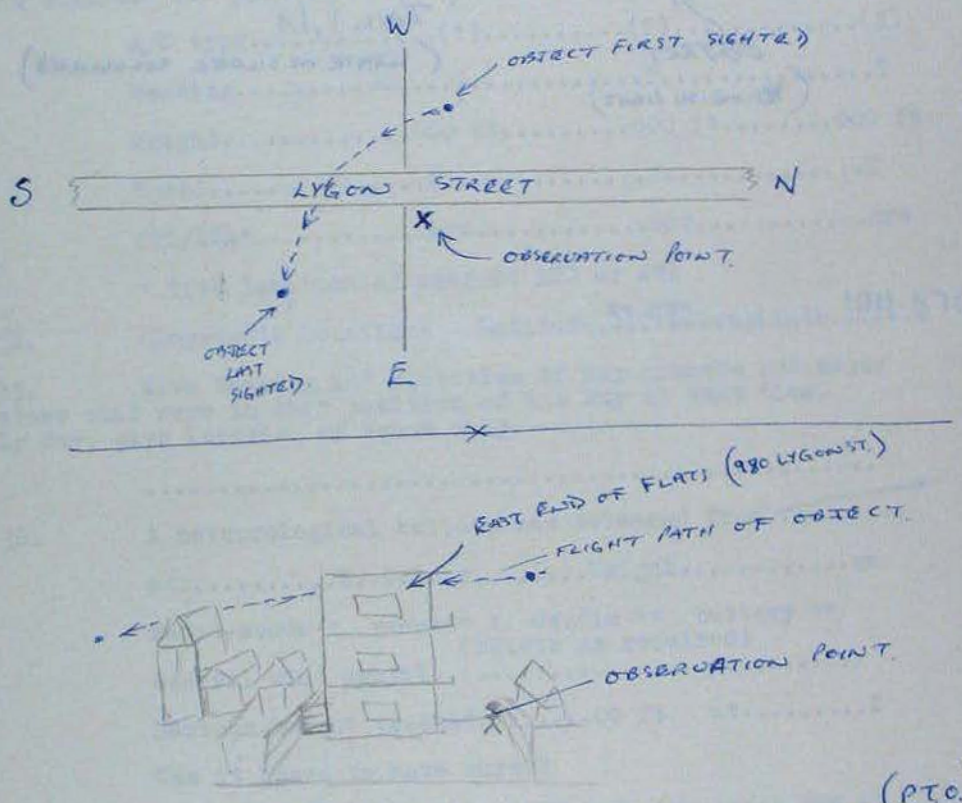

27. How many witness to the sighting?..... NONE .....

28. Do you know of witnesses to similar sightings in the area? NO.....

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation? A COMET OR LARGE FALLING STAR (BUT TRAVELLING APPROX. HORIZONTAL TO EARTH NOT VERTICALLY TO IT.)

30. What are your main reasons for excluding this explanation? I DO NOT EXCLUDE THE POSSIBILITY OF A COMET FOR ALTHOUGH I HAVE NEVER OFFICIALLY OBSERVED ONE THAT IS WHAT IT MOST CLOSELY RESEMBLES.

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

(P.T.O.)

SIGHTING #5

CROYDON VIC

J.R.T. EMERTON

DAF/

18 Northcott Ave
Croydon 3136 4/1/73.

Mr G.T. ODGERS P.R. RAAF
CANBERRA.

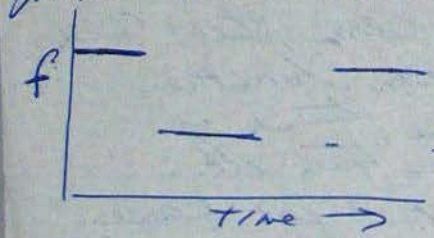

FYS Getting back a while since I've had heard "that" noise, but as I've been doing building alterations for some time now, your letter was misplaced for a time. It came to light again the other day when everything was being restored once more to its usual position. Enclosed is a questionnaire type but just what I had to have one last say (just for the record, & the interest of accuracy). Attached is a map of the area in which we live, it is clearly traced & acts as a diagram in most outside sounds (outside the immediate area surrounding our home) but over the years (about 30) the birds here I've been able to identify sounds as follows. AAA etc Ambulances & police cars on Maroondah Hwy, BBB etc the screech of tyres as the local lads do "wheelies" around the roundabout at the four ways at Maroolbark CCC etc Sound of trains to & from as far as the Dorset Rd Cutting & Bridge, DDD etc police cars, ambulances taking Lincoln Rd, EEE The Railway Bell at the Maroolbark level Crossing (but only on a clear, still cold night) Sounds from any other location are infinitely muted by some kind of accoustics caused by trees etc.

The sound we heard that night came from DIRECTLY overhead, rising so quickly to-

Puck an intensity that my first impulse was to dive under a table & stop my fingers (old Soldier training) & when he clashed, outside I carefully followed the direction with hands cupped to ears (also a la old Soldier trying listening for approach hostile aircraft) until it was no longer audible.

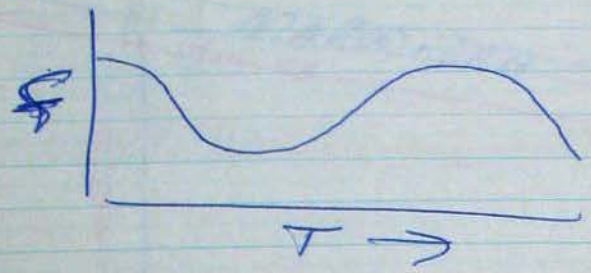

As I explained earlier, I had made a very accurate stab at the frequency & was able to reproduce it in our lab at work. The only modification I had to do was to produce a few overtones by the addition of a small capacitor to the O/P of the oscillator. This to an ear not trained would make very little difference to the sound reproduced, but was done only to give an accurate reproduction. The sweep from one f to another was done manually. It would have been very much more accurate if our Automatic sweep could have been adjusted, but ~~to~~ which sweep only on the range .3 Kc to 3.6 Kc.

The second point in your argument was that our Ambulance has a 2 fundamental Beep & does not ~~smoothly~~ change from one tone to another. It is like this! —

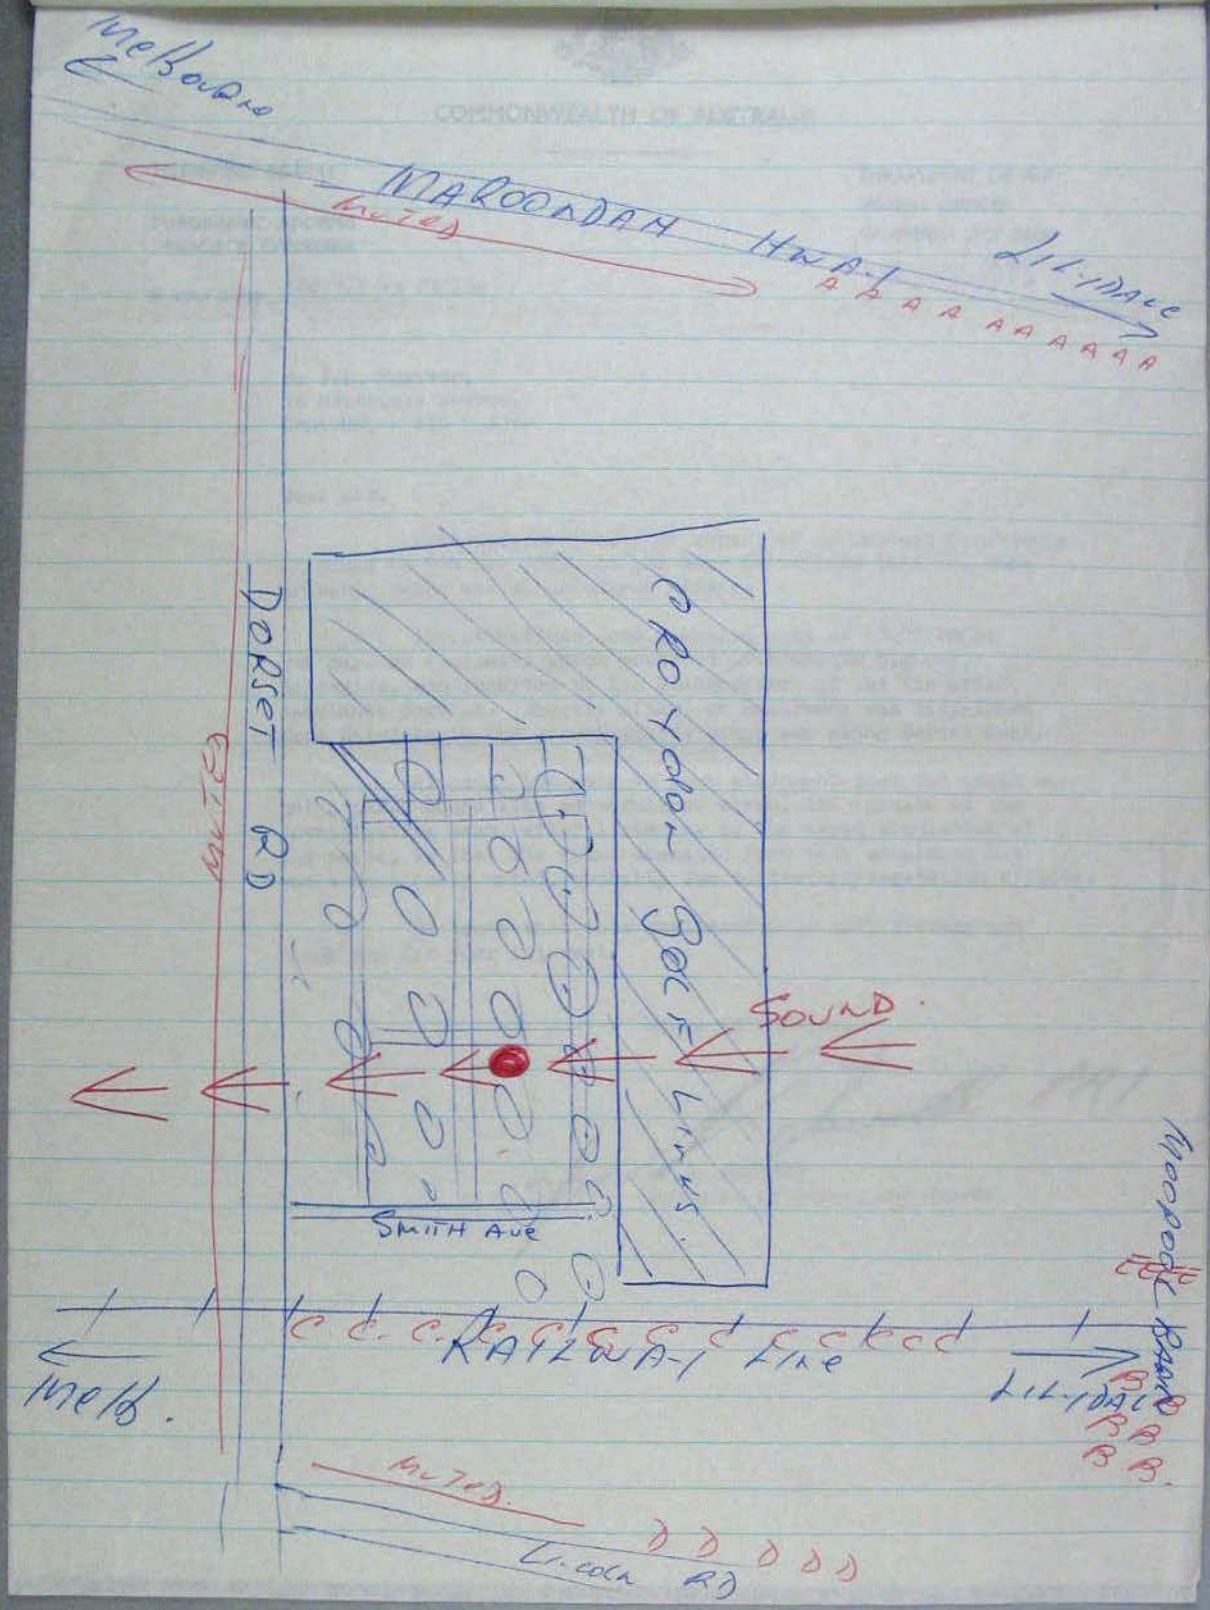

~ is full of HARSH (ODD?) HARMONICS.

The case I described, however has

v has almost no distortion!

Yours Sincerely
J. R. Forman

19 JUN 1973

Mr J.R. Emerton,
18 Northcott Avenue,
CROYDON, VIC 3136

Dear Sir,

With reference to your report of an unusual occurrence of sound on 9th May 1973, it has been determined that the most probable cause was an ambulance siren.

Investigations have revealed that at 10-07 PM on 9th May, an accident, which occurred in Mountain Highway, Bayswater, was reported to the Headquarters of the Victorian Ambulance Service. Shortly after, an ambulance was dispatched from Lilydale to the scene and its route was along Dorset Road.

Although you said in your statement that the sound was not a harsh sound like an ambulance siren, the opinion of the investigating team, after listening to the taped simulation of the noise, is that the sound emanated from this ambulance but was acoustically muted, probably due to terrain/vegetation effects.

We trust that this explanation is satisfactory and thank you for your interest.

Yours faithfully,

(E.J. ODGERS)
Director of Public Relations

SITTING IN LOUNGE WITH WIFE QUIETLY TALKING. SUDDENLY WE BOTH HEARD THE NOISE WHICH REACHED CRESCENDO IN ABOUT 5 SECS. BOTH STARTLED. THEN BOTH RAN OUTSIDE — COULD HEAR NOISE GRADUALLY FADING. IT APPEARED TO COME FROM EAST THEN LOW OVER HOUSE & GRADUALLY FADED TO INAUDIBLE IN APPROX 20 SECS AFTER IT PASSED OVER. I CHECKED DIRECTION WITH COMPASS & SEEMED TO BE HEADING 260°. WHEN WE CAME INSIDE AFTER A COUPLE OF MINUTES THE ELECTRIC CLOCK IN KITCHEN SHOWED 10.40 PM.

THE NOISE WAS A WHISTLE CHANGING FREQUENCY AT APPROX 1 CYCLE/SEC THE HIGHEST FREQUENCY WAS IN VICINITY OF 1KC — I-LIKE & THE LOWEST FREQUENCY ABOUT 500 CYCLES.* I WENT INTO LAB AT WORK FIRST THING NEXT MORNING & CHECKED FREQYS WITH OSCILLATOR. IT STRUCK ME THEN HOWEVER THAT THE SOUND I HEARD DID NOT APPEAR TO BE SINUSOIDAL BUT RATHER A HETERODYNE PRODUCING THE RANGE OF SOUND DESCRIBED. THE SOUND AT ITS LOUDEST PREVENTED (OR WOULD HAVE PREVENTED) CONVERSATION AT NORMAL LEVEL. THERE WAS NO OTHER SOUND SUCH AS AN AIRCRAFT ENGINE, HELICOPTER BLADES ETC. NO NOTICABLE DOPPLER. DEFINATELY NOT A HARSH SOUND LIKE NEW AMBULANCE SIREN

* THE FREQY CHANGE WAS NOT 2 TONE BUT A SMOOTH CHANGE OR VARIATION — THE RATE OF CHANGE CONSTANT.

REPORT ON UFO SIGHTING

AT AMBERLEY ON 5TH MAY 1973

1. LAC JONES R.J., Security Guard, was on duty at the Phantom flight lines when he noted the unusual lights, first at 1825K, and then at 1854K.

2. Nature of Sighting. He states that at 1825K he noticed a star-like object appear from the north and stop directly above the base. A second object followed, and as it approached the first one, they both moved off towards the south. Then, a similar object came from the east and flew between them, disappearing to the west. The first southerly one veered off slowly to the east and disappeared, while the second one continued out of sight to the south. At 1854K, he saw another light similar in appearance, appear from the north but more to the west. It disappeared as it entered the glare of an overhead security light on a nearby hangar.

3. Remarks on the Sighting. LAC JONES' estimate of bearings may be a little inaccurate. After questioning, he qualified his statement 'from a northerly direction', by saying that the objects appeared 'just west of the northern end of the strip, about two or three degrees,' and crossed the strip to the south. Two or three degrees is impossible to judge. Subsequently, assuming that it was about 10 degrees, and assuming that he knew where the end of the strip was, the direction of approach can be estimated to be about 330° to 150° true. Also, as he was standing facing the west, the overhead estimation could have been a little out. Quite possibly, it could have been well to the west, as the object was very high in the sky.

4. Aerial Activity. The only civil aircraft movements recorded at the time were jets leaving Brisbane airport at 1820, 1822, 1840 and 1842 local on an outbound track of 189°M to Sydney, and a southbound 707 about 200 nms to the west. None of these would be visible from Amberley. The only satellite activity that even remotely coincides with direction and time is PAGEOS I at 1838K. This had an azimuth of 103°, elevation 52°, and heading 183°.

5. Possible Causes. Three out of the four objects could have been satellites, meteorites or some such thing. However, the first object sighted reportedly stopped, started, and then turned. This is not consistent with the movements of bodies of that nature. No explanation can be found for that one.

(R.M. BERTRAM)
Sqn Ldr
82 Wing Intell O

14MAY73

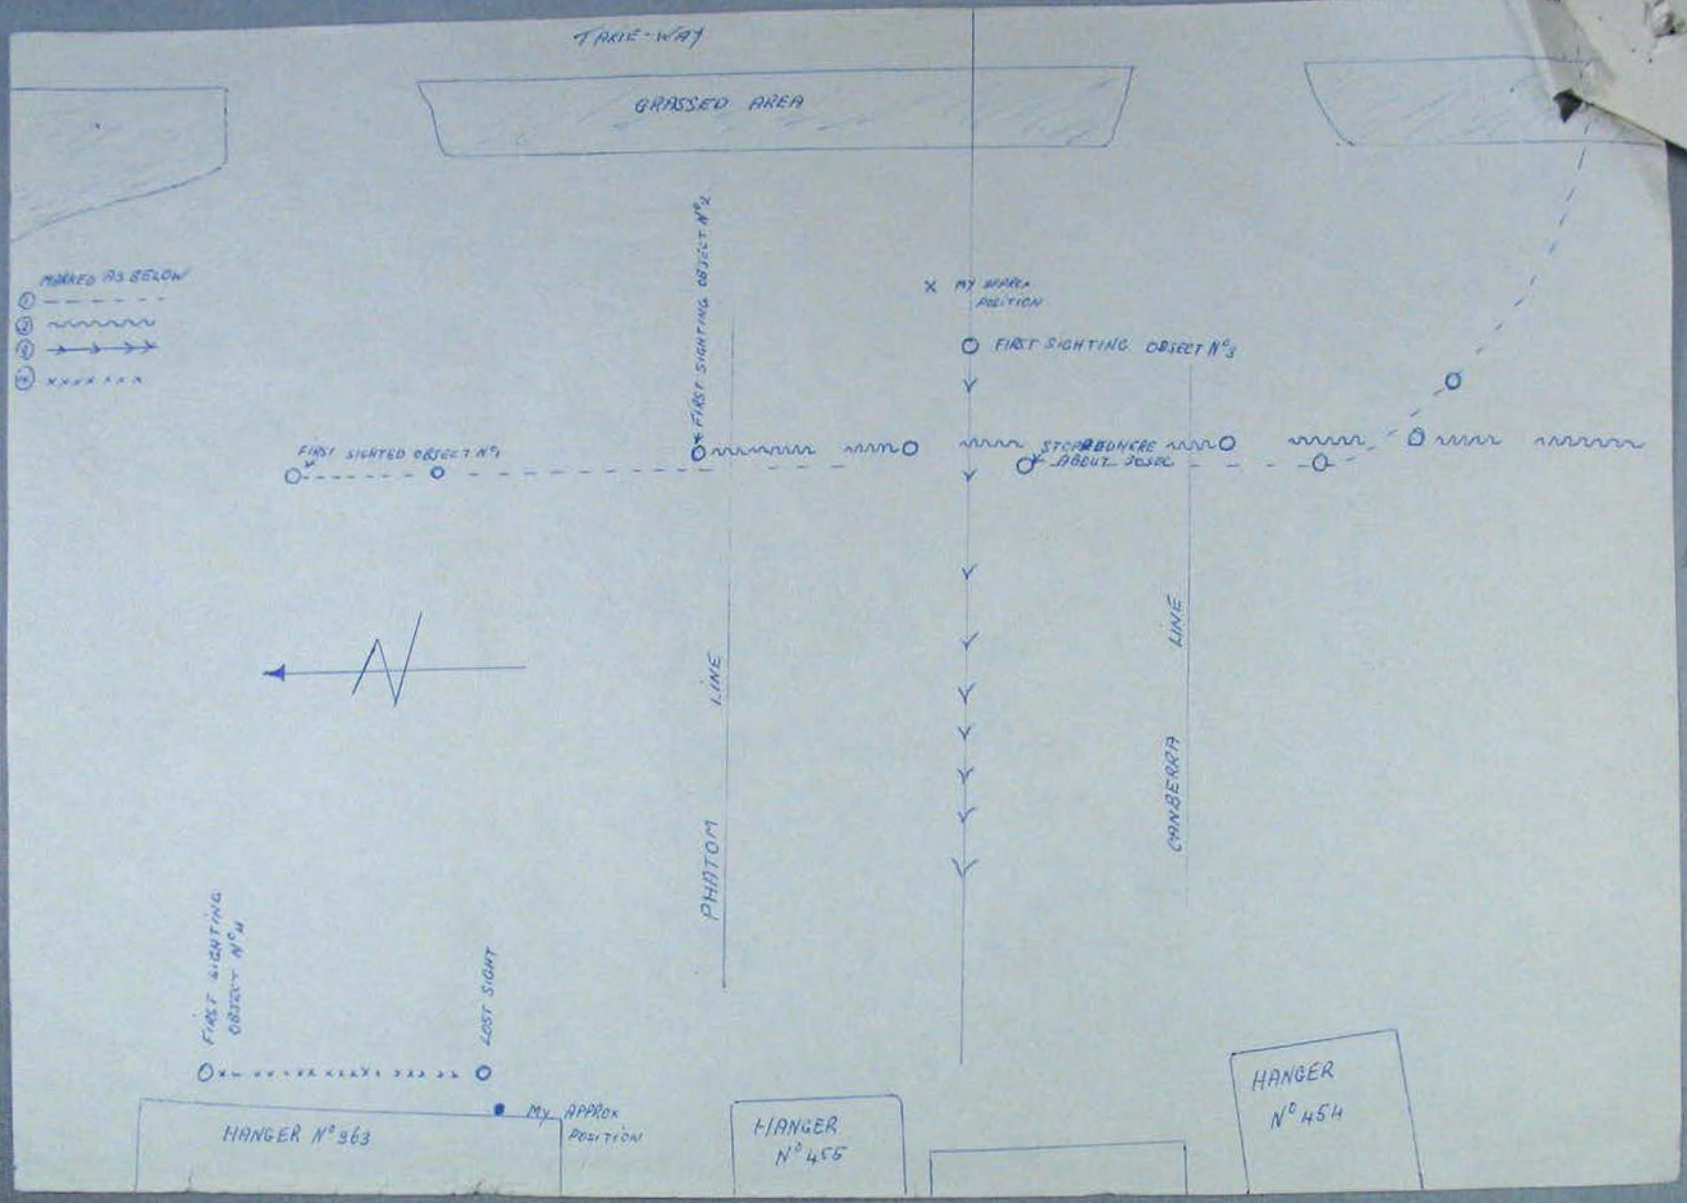

At 1825 hrs. I noticed a star-like object come from a northerly direction and stop above the base. Then I noticed another object, come from the same direction as the first, this object was of the same shape as the first.

When the second object came with-in 3" to 4" from the first, the two of them started moving in a southerly direction, as they did a third object coming from an easterly direction passed between them. The third object seemed to continue in a easterly direction.

I watched the first two which were still moving slowly south, when the first object started to turn in an easterly direction very slowly, while the second object continued south.

The size of these objects were about the size of a one cent piece held in the fingers, with the arm out straached above the head.

At 1854 hrs another sighting, object same as before accept a bit smaller. It was moving the same direction as the first two from "north to south" I lost sight of the object when it passed over the glare of the security light I was sitting under.

UNUSUAL AERIAL SIGHTINGS - 5 MAY 73

With reference to your report of unusual aerial sightings at RAAF Base Amberley on 5th May 1973, investigations have determined that the most probable causes were orbiting space vehicles and a meteorite.

Normally logical explanations are available for reported sightings and the investigation of your report covered aircraft movements, planet/star positions, meteorological measuring devices and phenomena, and space vehicle movement.

At the time of sighting, there were 2902 man made objects in space, and predictions are made for viewing of selected long lived satellites of optimum visible magnitude. Other bright objects seen could be short lived satellites or rocket stages, decaying objects rendered incandescent on re-entry to Earth's atmosphere or meteorites.

In the opinion of the investigating team, the sightings were probably as follows:

a. First Object - unpredicted space debris which was in slightly different orbit and of greater apogee to the object sighted second. This accounts for the apparent higher speed of the second object. The reported short stationary period was probably due to an optical illusion which occurred whilst focussing on both objects simultaneously.

b. Second Object - Satellite PAGEOS I which was predicted to be visible from the Brisbane area on a heading of 183°T at the reported time of sighting.

c. Third object - unpredicted space debris.

/d. Fourth obje

d. Fourth Object - meteorite or space debris entering Earth's atmosphere.

We trust that this explanation is satisfactory and thank you for your interest.

Leichhardt
IPSWICH QLD 4305

UNUSUAL AERIAL SIGHTINGS - 2 MAY 73

With reference to your report of an unusual aerial sighting on 2nd May 1973, investigations have determined that the most probable cause was KIOWA helicopters returning to Amberley from navigational training.

Normally logical explanations are available for reported sightings and investigation of your report covered aircraft movements, meteorological measurement devices and space vehicle movement. From these, aircraft activity was the only feasible explanation, as helicopters were operating on the night and at the time of sighting. It was determined that helicopters completed their navigational training by tracking from Beenleigh to Amberley, turning south into the circuit and landing to the north. The speed, lighting and elevation coincide with the route of the helicopters, and as the Kiowa is a reasonably quiet aircraft, and coupled with a westerly wind, evidence of characteristic noise would be minimal.

We trust that this explanation is satisfactory and thank you for your interest.

RESTRICTED

REPORT ON UFO SIGHTING

AT AMBERLEY ON 2ND MAY 1973

1. AC GIRVIN D.B., Security Guard, was on duty in the Phantom lines in the north west section of the base, when he observed the lights.

2. Nature of Sighting. He first noticed a bright white light over Leichardt, residential suburb between Amberley and Ipswich. It moved from left to right at about aircraft speed, and then disappeared for a short while. It reappeared further south as if either the object has flown behind something or the light had gone out while the object had kept moving. The second light followed it about a minute later and did the same thing. AC GIRVIN could not give an estimation of height, but indicated, during an interview on 14 May, the elevation. This was judged by the investigating officer to be about 20°-30°. Both lights disappeared over the fuel farm, a bearing of approx 140° T from his position.

3. Helicopter Activity. The Army was flying navexs that night, in 'Kiowa' helicopters, from 1900K to 2245K. The planned route was Amberley (058°T) - Brisbane - Coolangatta - Bromelton (333°T) - Amberley, at 5000ft. These aircraft carry a white light in addition to the normal navigation lights. The white light would dominate at any distance.

4. Other Activity. There was no other activity that could be associated with the sighting in any way. The satellite, Pageos I, passed at 2134K with an elevation of 49° and direction of 183°, but the aximuth of 262° and the time do not coincide.

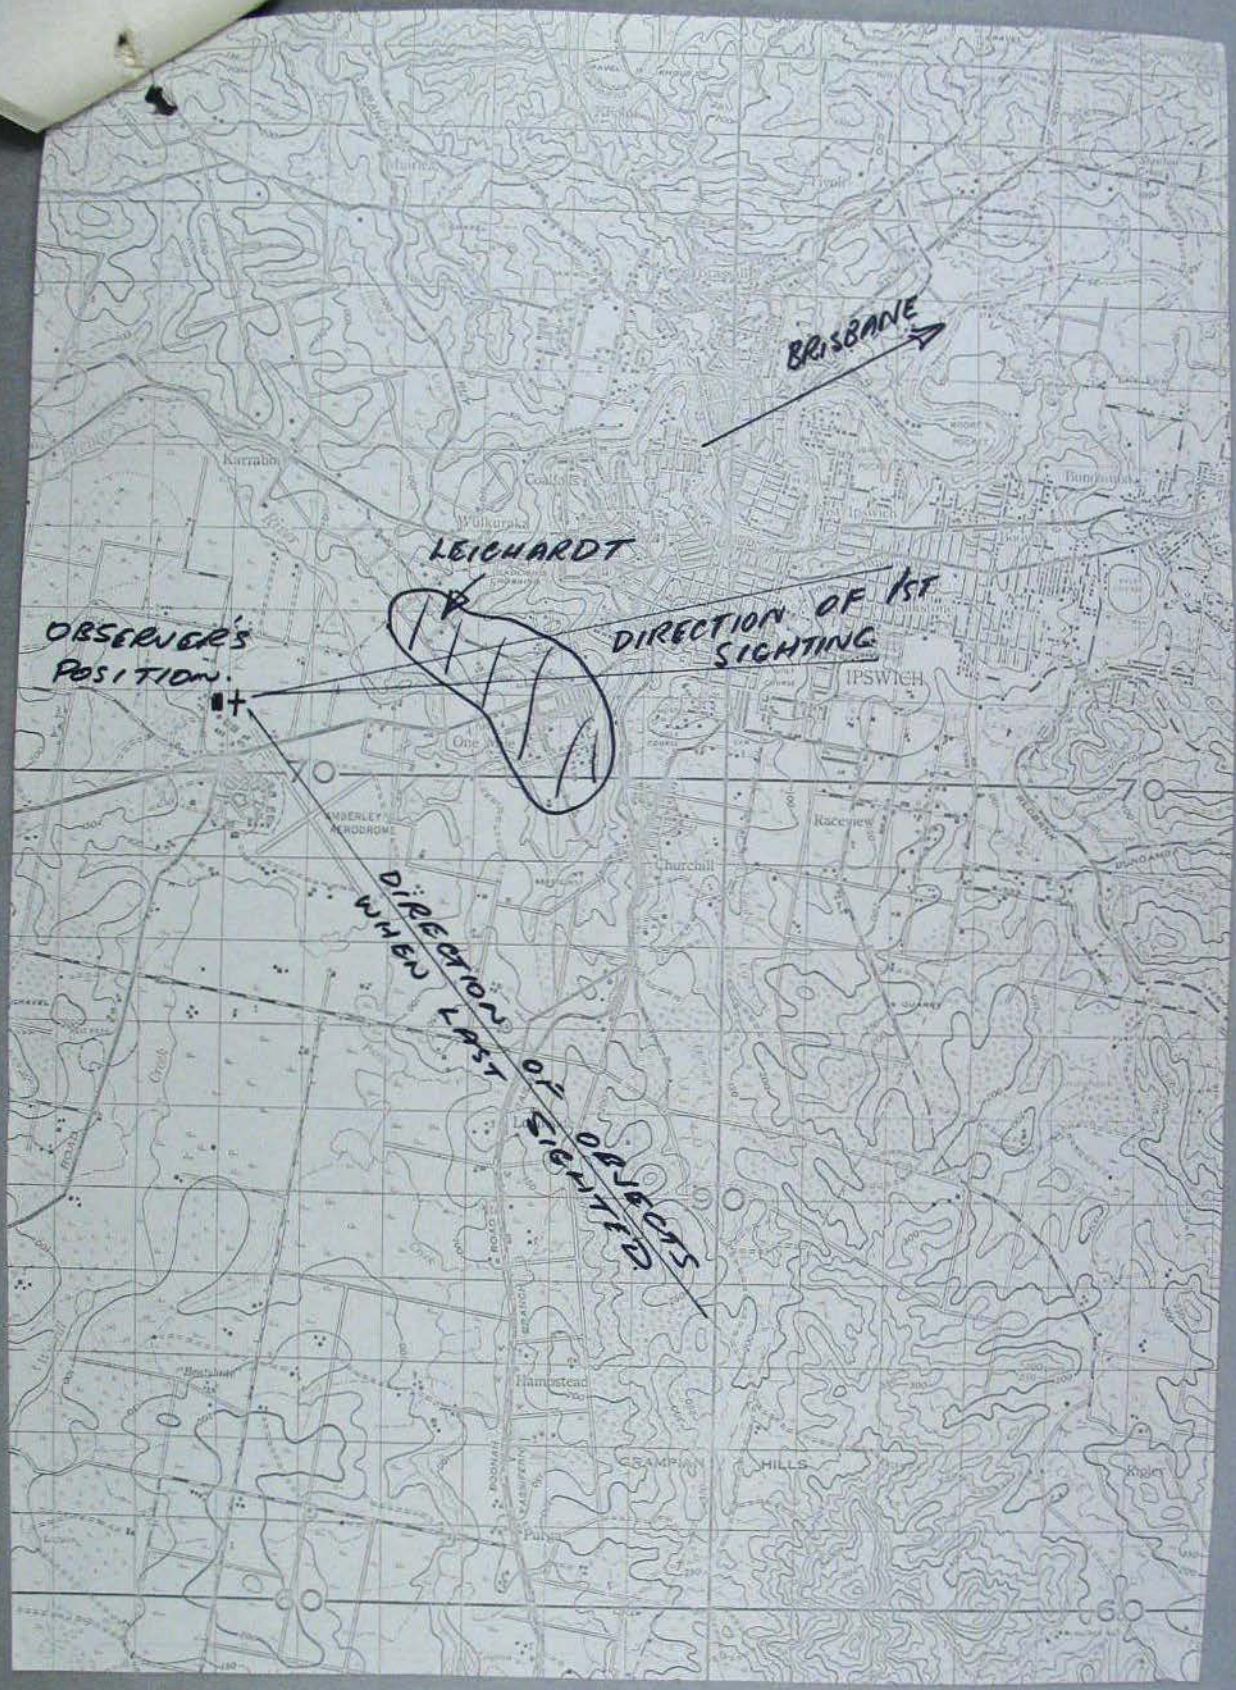

5. Probable Cause. The lights were probably helicopters that had departed from their route and flight plan. The speed, appearance and elevation coincides within reason, and the position is possible. The 'Kiowa' is a reasonably quite aircraft, and this, coupled with the westerly wind, could account for the lack of noise. AC GIRVIN was not concerned about the lights and was only prompted to report them after he had seen LAC JONES report in the guard log book seven days later.

Helis in fact came onto Deeleigh 4MB + landed to the North on pad. Tk 279°T.
Use choppers as reason!

14 JUN 1973

Miss J. Kimber,
CLAREDALE Via AYR,
QUEENSLAND 4807

Dear Miss Kimber,

With reference to your report of an unusual aerial sighting on 6th April 1973, the opinion of the investigating team is that the object sighted was a high flying balloon, and this theory has been subscribed to by personnel involved in balloon research in Australia.

Balloon launchings are conducted in Australia by numerous organizations including The Department of Supply, The Department of Science, the Bureau of Meteorology, and international agencies approved by The Department of Civil Aviation. Unfortunately, enquiries made of these organizations resulted in no record of launchings from within Australia during a reasonable period of time prior to your sighting. However, information was gained from these organizations that launchings from other countries are common, and balloons circumnavigate the Earth relaying scientific information to interested agencies.

It is thought that this sighting was of an internationally launched balloon which was drifting westward on an easterly wind at 70,000 feet. Meteorological records of wind for 6th April show that westerly winds were prevalent up to 55,000 feet then they veered through north to become easterly at 65,000 feet. Although you assessed the altitude of the object sighted as being approximately 30,000 feet, this was probably an underestimate, as the actual size of the object is unknown and records show that underestimation of altitude is normal in these sightings.

Concerning the light pattern observed on the object, it is considered that this was the result of the reflection of the sun on the material of the balloon, as the sun would have been relatively low in the eastern sky.

We trust that this explanation is satisfactory and thank you for your interest.

Yours faithfully,

(G.J. ODGERS)

11th May 1973

Department of Air (Attn: DAFI)

DAFI For Information

Headquarters Operational Command (SO INTEL)

UNIT EVALUATION OF UNUSUAL AERIAL SIGHTING

1. The following aspects were investigated and considered by the Formation Counter Intelligence Officer (FCIO) in his attempt to find a satisfactory explanation for the sighting referred to in the attached enclosures 1 and 2:-

a. Aircraft. There were no known civil or military aircraft operating in the area at the time.

b. Visible Satellites. None of the twelve highly luminous satellites listed by the Weapons Research Establishment in the predictions bulletin received fortnightly at this headquarters can be related to the sighting.

c. Meteorological Balloons. The OIC Meteorology Townsville, when contacted, stated that no balloons would have been in the area at the time from either Townsville or Mackay.

d. Meteorological Conditions. Weather conditions at the area of the sighting indicated a minimum of cloud, no significant temperature inversion was present and the wind was from the north west at approximately 8 knots.

e. Celestial Bodies. Enclosures 3 and 4 are photo copies of the relevant sections of the Air Almanac. Originally it was thought that an eclipse of Jupiter or Mars may have produced an astronomical phenomenon which would account for the sighting. However, this has subsequently been discounted because of the movement of the object from 40°

/2

through the theodolite it was a line of lights
the sketch is how it was through the theodolite

elevation to 15° elevation [illegible]

2. After consideration of all the information gained in the evaluation process, this headquarters is unable to offer any probable explanation as to the nature of the occurrence.

(W.G. CANNIFFE)
Flying Officer
for Officer Commanding

REPORT ON UNUSUAL AERIAL SIGHTING

Part 1 - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form)

1. Name of observer ..... Miss Judi KIMBER ..... Age ..19.....
2. Address of observer .CLAREDALE.....
..... VIA AYR ..... Phone ..827-207...
3. Occupation of observer .Clerk-Typist.....
4. Date and time of start of observation ...0800K 6Apr73.....
How certain is the date? ....Positive.....
How accurate is the time of start? ..... As Above .....
5. Duration of observation .....70 mins.....
How accurate is your estimate? ....Quite Accurate.....
6. Observer's location at time of sighting .Marandah Irrigation Commission
.Office.....
How familiar is observer with this locality? .Has been in area 7 years
.....
7. Weather conditions at time of observation .Fine - Lt cloud cover.....
extending to 15° above horizon.....
8. Describe any aids/equipment used in the observation Binoculars and...
Theodolite.....
9. Where was object first observed?
(a) Relative to your surroundings ....WSW.....
.....
(b) Anlge of elevation .....40°.....
(c) Compass angle bearing .....240° approx.....
(d) How accurate are these estimates? .Quite Reasonable.....
10. What first attracted observer's attention? .....Sighted by workers who....
reported it observer.....

19-4-73

F/O Kennicott,
H/Q R.A.A.F. Base,
Townsville Q.10.

re Sighting from Clarendale - 6th April, 1973.

At approximately 8am on 6th April, Mr. L. Rocco, a Water Officer, reported that a spot had been seen from the new pumpstation site in the Burdekin River, three quarters of a mile from the Clare I.W.S. Office.

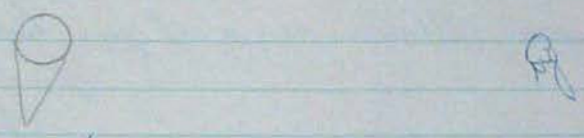

I went home to get a pair of binoculars and lost sight of the spot. I did not see it until I got back to the Office verandah.

We lined it up with the Workshop roof, some 50 yards from the Office. It was 40° from the horizon in a W.S.W. direction & seemed to be moving in the same direction in its own orbit.

It has been approximated at 30,000 feet high and 200 feet long.

Thirteen people sighted it through both the theodlite and binoculars during the 70 minutes it was in sight. I saw it last about 15° from the horizon. The weather conditions were exceptional with a light cloud cover extending to about 15° above the horizon. I lost it when it reached the cloud cover.

Through the binoculars, it seemed to be as follows.

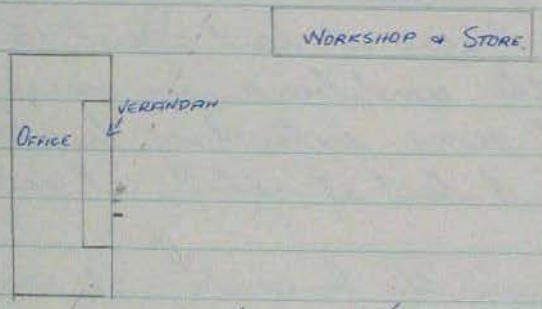

It was shining a silver colour. Through the theodolite it was a line of lights the sketch is how it was through the theodolite

The gold circle was around the last 2 sections and was a haze. It could have been a reflection from the sun or a balloons.

Three men, one being the policeman S/Const. A. Henry. O.I.C. of Clare Police Station, saw a blue & red colouring on the lights, the red going into a gold towards the end.

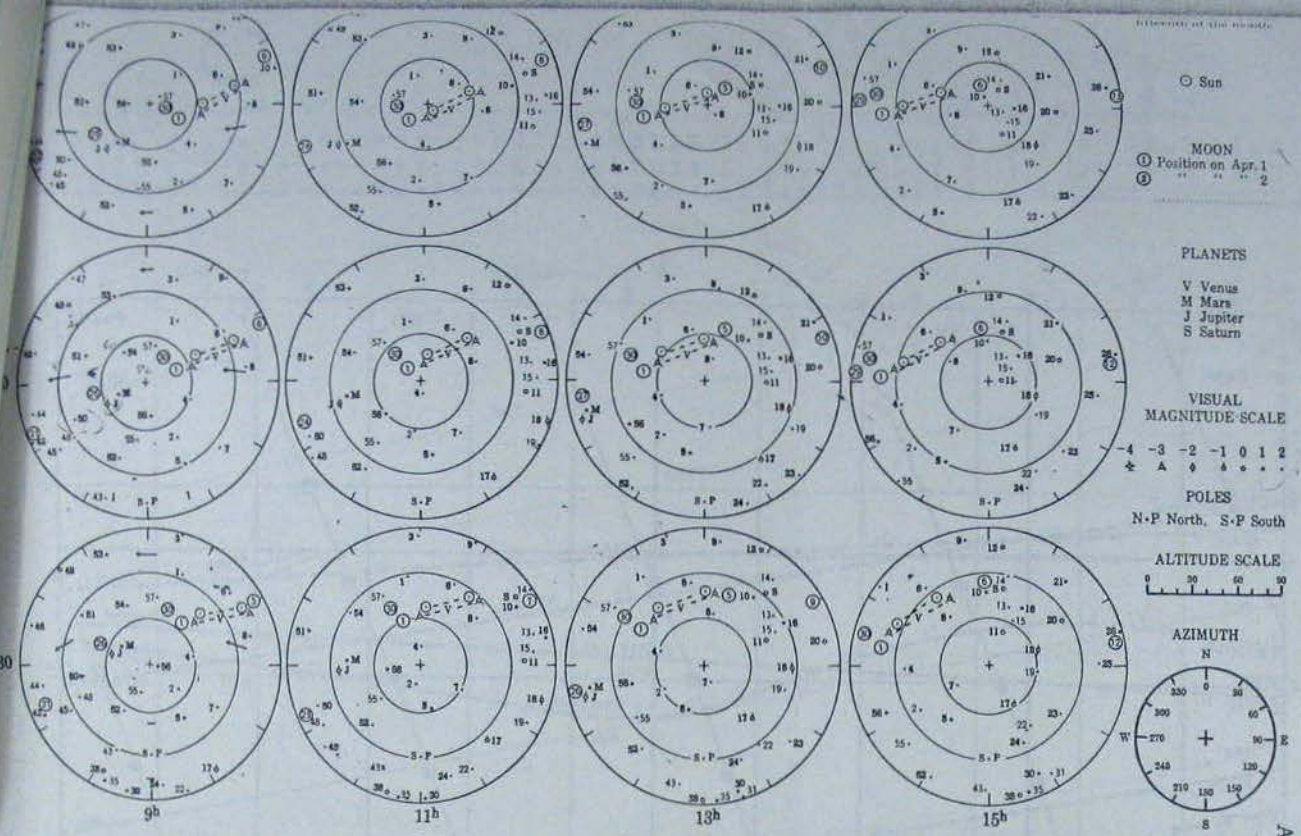

All spots were very shiny
The 'x' is at the bottom of the back steps of the Office where the theodolite was set up. We lined it up in a line from the end of the roof.

* OBJECT.

I hope this will be of some help to you. Please ring if you have any more queries

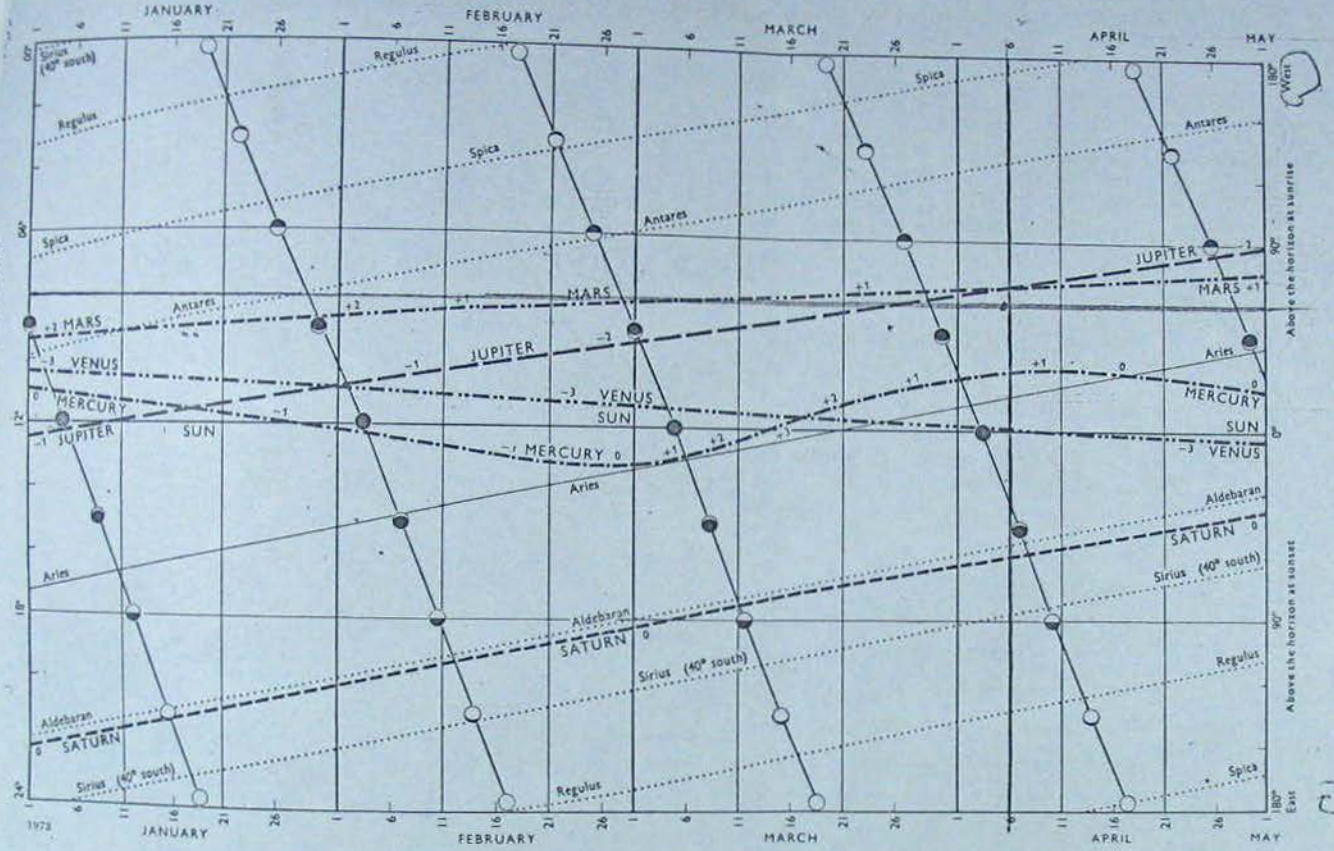

Yours faithfully
Jude Kumber.

31 MAY 1973

Master P. Baker,
Wandin East Road,
WANDIN EAST, VIC 3139

Dear Peter,

With reference to your report of an unusual aerial sighting on 22nd April 1973, it is regretted that the observation cannot at this stage be logically explained.

A great deal of interest has been generated from your report and a theoretical explanation which is impossible to prove is that the sighting was actually a mirage, or refracted image, from a vehicle moving along Old Baker Road. At the time of sighting, the position of the sun would have been such that reflection from a car could have been refracted through the lower atmosphere to appear as a flying object. At the time of sighting we must assume that many other people would have been outdoors in your area. If the object were solid it would be logical to assume that some of those people would also have reported sighting an unusual object. As they didn't, we believe that your position relative to the sun was critical.

Perhaps your parents or your teacher may be able to explain the refraction process mentioned in paragraph 2. We thank you for your report and trust that the suggested explanation is satisfactory to you.

If in the future, further reports relating to your sighting are received, further investigation may be warranted.

Yours faithfully,

for (G.J. ODGERS)

① Peter, Lorraine and Michael:

We were walking North along a fence in my father's property when our attention was attracted by a flying object. It was flying slowly towards us at a height of about 80 - 100 ft.. It was not spinning but had flashing amber lights all around its side. As it drew near us it slowed down for a few seconds. Lorraine hid in a drain. Michael and I stood and watched it. It then resumed its approach speed and left heading South. After about 25 yds. it instantly disappeared.

Signed: Peter Baker.

Witnessed: J.J. Flatt

② Jim:

I was walking South near my house when I looked up and saw a flying object which appears to be identical to the one described by Peter. It approached at about walking pace from the South. It slowed down near me for a few seconds. I stood and watched it. It then departed in an Easterly direction towards Seville and disappeared. This was at about 3.30 P.M. 22/4/1973.

Signed: Jimmy GAUDION

Witnessed: J.J. Flatt

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards).....DULL.....

Unidentified.

R O GIBBS
HQSCU

1. I interviewed Mrs Baker, the mother of Peter and Lorraine, and Mr Baker the children's grandfather on 7MAY73. The adult Bakers vaguely recall the children seeing something "odd" a fortnight ago. Mrs Baker had not known the children had completed Part 1 of this report. Wandin East is a fruit and vegetable growing area about 30 miles East of Melbourne. The State School attended by Peter and Lorraine and James Gaudion has one class and one teached, Mr Flattley.

2. I visited the Wandin East State School and spoke with Mr G.J. Flattley. He told me the Baker children had reported the sighting to him on Monday morning, 23APR73. He had asked if any other children had seen the subject of the report and Gaudion claimed he had. Mr Flattley said that Peter Baker is a level-headed child and he has no cause to doubt his statement. He said the children had told him the story simply and without embellishment and this had led him to believe they were not "making it up ".

3. Peter Baker stated that the object shown in Part 1 travelling roughly NNW to SSE at walking speed. It was not spinning, pitching, rolling or yawing and travelled at a constant height of about 100'. The amber lights were flashing continuously at about 1 second intervals. The object was dull light grey with only the lights visible. When it passed overhead the bottom surface was bare. It disappeared instantly when it was about 100 yards away to the South. Lorraine told the same story. The Baker children seemed quite mature, were off-hand about the matter, and seemed reasonably reliable.

4. I then interviewed Mrs Gaudion and James Gaudion who live about 700 yards S-E of the Baker sighting (see map). James is a very vague child of about 10. Mrs Gaudion did not know about the report. James took me straight to a spot in his backyard where he said he had seen the object. He said it was mid-grey and appeared from behind tall pine trees to the East of the rear of the house, travelling roughly East. Not spinning, pitching, rolling or yawing; in level flight. Red-ish lights on top flashed on then off and stayed off. The object diminished in size towards the East but he looked away and wasn't very interested. He said he didn't tell his parents because he did not want to get into trouble. He was very unconcerned as a child of his age can be. His interview differed greatly from his written report where he seems to have copied Baker but he did not appear to be lying at the interview. It was not possible to ascertain an accurate time for the Baker or Gaudion sighting.

5. Inconsistencies included direction of travel, method of disappearance, the way the lights are said to have flashed and a difference in the reported colour of the lights.

6. The interviews did not determine whether the report is a hoax. The baker children seem reliable. Gaudion is very vague and unconcerned. The teacher seemed a practical, responsible person who accepted Peter Baker's report because he seemed to be telling the truth.

7. Michael Hall is a cousin of the Bakers' who lives 10 miles away. He was visiting the Bakers' with his parents on 22APR. I do not intend interviewing him because I did not find any significant difference in the descriptions given by the Baker children and Gaudion.
