OPERATIONAL COMMAND

AIR STAFF INSTRUCTION NO 3/A/5

INTELLIGENCE - REPORTS ON UNUSUAL AERIAL SIGHTINGS

INFORMATION

1. Many persons throughout the world have reported seeing unusual objects in the air; these are referred to as unusual aerial sightings (more generally referred to as unidentified flying objects (UFOs)). Careful investigation of reports received by intelligence authorities in the UNITED KINGDOM, AUSTRALIA and the UNITED STATES has shown that most of the incidents can be positively attributed to definite causes. However, no explanation has been found for some of the unusual aerial sightings and a vast amount of manpower has been spent in pursuing numerous cases.

2. The Royal Australian Air Force is responsible for the investigation of reports of Unusual Aerial Sightings (UASs) in AUSTRALIA. On 1 May 1984 the UAS policy and investigative procedure was revised. The essence of the policy change involves the Formation Intelligence Staff, in consultation with Command, ascertaining the defence or national security implication of an UAS report, and deciding if further investigation is warranted. This is intended to decrease the number of UAS reports that require full investigation, while still designating the RAAF as the first point of contact.

EXECUTION

3. The investigation of a report of an UAS is to be based on a questionnaire which is shown in Annex A and is designed to record all necessary details of the observation and provide the information on which an investigation can be based.

4. On receipt of a report of an UAS the appointed Formation UAS officer (normally the Formation Intelligence Officer) is to attempt an allocation of reliability. Those reports which suggest a defence or security implication are to be further investigated by sending the proforma (Annex A) to the person reporting the sighting for completion unless the situation is deemed to warrant urgent attention in which case the investigating officer is to take immediate investigative action. In such cases all relevant information should be passed verbally to Command to ensure appropriate advice and assistance is obtained. When the completed proforma is received at a RAAF Base, Officers Commanding are to ensure that an adequate examination of the report is carried out, and Part 2 of the UAS proforma is completed with as much detail as possible. The UAS proforma and investigation findings, if any, are to be despatched without delay to Department of Defence (Air Force Office), with an information copy distributed to the appropriate Command.

5. Local investigating officers may reply to reports, either

current as at 870210

orally or in writing, providing they are completely satisfied that their investigation has determined the most probable cause of the sighting. When reports are dealt with locally, a copy of the report and reply is to be forwarded to Director of Air Force Intelligence and Security (DAFIS) and Command Headquarters for record purposes.

6. Should there be any doubt as to the security or defence implication of the initial report the matter should be referred to Command for investigation. If the initial report is assessed at Unit level as being of no threat to the security or defence of Australia the observer is to be referred to the following applicable civilian UFO research organization:

a. Australian Centre for UFO Studies

ANNEX B TO
HQOC ASI 3/A/5

SUGGESTED REPLY TO UFO ENQUIRIES

1. The investigation of reports of unusual aerial sightings in Australia is carried out by the Royal Australian Air Force. Preliminary investigation of the reports is conducted at the nearest Royal Australian Air Force base. The reports are then forwarded to the Department of Defence (Air Office) where an investigating team completes the investigation.

2. Between January 1960 and December 1973 815 sightings were reported to the Royal Australian Air Force. 90 per cent of the sightings were attributed to causes which include aircraft, satellites, meteors, space debris re-entry, meteorological balloons, stars and planets. Seven per cent of reports were either received too late or did not provide sufficient information to permit proper analysis and evaluation. Three per cent of reports were attributed to unknown causes.

3. The United Kingdom Air Ministry has stated that on an average, 90 per cent of the sightings it investigates are explainable by causes ranging from meteorological balloons and meteors to aircraft lights. The other 10 per cent probably remain unexplained because of lack of reliable information.

4. The University of Colorado, under contract to the USAF, spent two years processing and investigating all American reports. The findings were published in 1968, by Bantam Books, as the 'Condon Report'. The general conclusion was that 'nothing has come from the study of UFOs in the past 21 years that has added to scientific knowledge' and that 'further extensive study of UFOs probably cannot be justified in the expectation that science will be advanced thereby'. A panel of eminent scientists, chosen by the US National Academy of Sciences, has examined and endorsed the Condon Report.

5. The USAF 'Project Blue Book' investigation of unidentified aerial objects between 1953 and 1965 analysed 7,641 UFO reports. The conclusions were:

a. 80 per cent of sightings were natural phenomena, hoaxes, birds or man-made objects;

b. 17 per cent of sightings provided insufficient data to permit thorough analysis and evaluation; and

c. three per cent were unidentified.

ANNEX B

6. United States and Soviet space exploration has found no evidence to support the theory of life on planets in our solar system. The Mariner series of space exploration to Mars appears to have proved it a 'dead' planet. The only other source of extra-terrestrial life, therefore, would have to be in another solar system. The nearest visible star to Earth is Alpha Centauri which is about 25 million million miles away. Even if life forms existed there and were capable of space travel at speeds currently known to man ie about 25,000mph, they would take about 115,000 years to reach Earth. Consequently, the probability of extra-terrestrial life forms visiting Earth is extremely remote.

Mr D. Hakanson
Meteorological Office
CHARLEVILLE Qld 4470

Dear Mr Hakanson,

I refer to your report of an unusual aerial sighting in which you noted specific radar returns on 16 and 17 November 1985.

Subsequent investigation has provided no details of RAAF aircraft at that altitude, airspeed or time. Previously, reports similar to yours have been traced to an equipment malfunction.

A civilian organisation, UFO Research Queensland (PO Box 111, North Quay, Qld, 4000), also investigates such phenomena, and you may care to contact them for their investigation of the sighting.

Yours faithfully,

R.D. JENKINS

P&O
ORIANA

On Wednesday 8th May 1985 I was watering the Northern side of my Unit which is one of a Villa pair at the Golden Age Retirement Village (G.A.R.V.)
The time was 3.20 PM on a clear sunny day with a cloudless blue sky. I was facing South.
Something made me look up first I looked to the West + then to the East.
It was then that I saw a 747 slowly traveling towards me.
It was traveling due West, flying low + slowly + if it kept on course had to pass over my Unit which was in front of me.
I never took my eyes off it from first sighting it
It was a small flat circle of vapourous bright light + a could see no depth to it or solid shape
It took 10 mts to reach me + I could look up underneath it (It was soundless)
For 1-2 seconds while it was just about to pass over my unit the vapourous light parted, so that I clearly saw a triangle (Δ) within the circle which looked as

2

P&O

ORIANA

though it was formed by 3 clear fluresent light globes. Then the vapour closed over & as I watched it pass over the unit When it had done so It changed course towards the South West I could have watched it out of sight, but considered I had been enough & continued watering the garden.

I feel I was meant to see this UFO. If its destination was SW It didnt have to fly over my Unit first.

For the record, I am 49 & can read the bottom line of the eye test chart with both eyes Perfect & sensetive hearing, much travaled & with more than average intelligence & not given to flights of imagination.

My neighbour was on holiday & the one in the Unit behind was away serving on the jury There wasn't a person in the

over

garden whose attention I could draw to the 76 & I certainly wasn't going to take my eyes off it to look for anyone. I would be interested to know if there were any other sightings

12. Any additional comments you wish to make.

In answer to questions 6 & 7.

The object first appeared above on our right, and travelled across and down to our left and onto the ground. We are not sure which is North, South, East or west in that area.

When we first saw the object, high on our right, it was a red ball trailing off to blue. But when we saw it on the ground it was all blue with blue haze.

Dear Mr Wynward,

Thank you for the prompt return of your detailed report. The information supplied by you has enabled an investigation into the phenomenon to commence.

From information so far supplied, it is not possible to determine whether or not you and Miss Hinds were exposed to any radiation or in fact if there was any radiation emanating from the object. May I suggest, if you have any doubts concerning your health as a result of this incident, a visitor to your local hospital or family doctor for an examination may help alleviate your fears.

Yours faithfully,

IT WAS SAUCER SHAPED ON THE BOTTOM AND ABOUT
15 FEET FROM ONE SIDE TO ANOTHER. ON THE SIDE
IT WAS ABOUT 5 FT HIGH. I COULD JUST SEE
THE CHROME OR PEWTER METAL ON SIDE ONLY.,
(BECAUSE OF THE BRIGHT LIGHT RADIATING FROM IT).
IT WAS JUST ABOVE TREE HEIGHT (ABOUT 40 FT) ↓

Description/sketch of object

AND ~~ABS~~ ANGLED. (SEE SKETCH) I THOUGHT IT WAS A LIGHT OF SOME KIND AT FIRST BECAUSE IT WAS PERFECTLY STILL. (IT DID NOT MOVE THROUGH THE ENTIRE OBSERVATION.) IN THE CENTRE WAS A BLUE; (ALL LIGHT COMING OFF WAS EQUAL TO FLEURESCENT IN BRIGHTNESS.), LIGHT ABOUT THE SIZE OF A LGE PLATE AND I GOT THE IMPRESSION IT WAS THROBBING BUT I'M NOT EXACTLY SURE. (IT COULD HAVE BEEN BASKETBALL SHAPED.) ALTHOUGH LIGHT WAS RADIATING FROM ALL OVER THE OBSECT, (LIKE AURA) THE LIGHT WAS STRONGEST COMING FROM THE UNDERSIDE OF THE CRAFT. IT MADE NO SOUND AT ALL. ENCLOSED IS A SKETCH I MADE ON THE 28.1.85 WHILE FRESH IN MY MEMORY. ALSO IS A SKETCH MADE BY MY GIRLFRIEND DEBBIE AS SHE SAW IT THROUGH THE BACK WINDSCREEN. (AS WE WERE DRIVING AWAY.) DEBBIE ALSO SAW IT DISSAPPEAR BEFORE HER EYES INSTANTLY. THE LIGHT COMING OFF IT WAS WHITE. (NOT INCLUDING BLUE LIGHT)

NOTE! I WOKE DEBBIE WHILE DRIVING DIRECTLY UNDER IT, BRINGING US WITHIN ABOUT 40 FEET.
