I am the above named person and I live at the address under my wife's name.

At 7pm on Sunday the 9th of February 1997 I was at the rear of my house that overlooks Banbury Road. I was with my two daughters.

Something caught my eye in the sky so I looked up and saw a blue (in colour) object spherical in shape with blurred edges and a more prominent solid blue colour in the centre.

The object moved from the direction of the railway over our house towards Mous Hill in a south westerly direction.

What amazed me was the speed of the object. It flashed overhead. I had it in sight for no more than two seconds, the object made no sound whatsoever.

I saw this object with my naked eye. I would estimate that the object was not less than 1000' up. I judged this with the height of the mill and the surrounding hills.

At the time the weather was fine it was good clear visibility. As far as I
