Note: There is one other aspect of this whole situation which is not an OGI, yet, but is of CIA interest because it is of interest to national security: that is:

~~The~~ mass flying ~~mass~~ of reports could

- (a) produce mass hysteria
- (b) jam overload our radar warning system
- (c) overload communication facilities.

is not an OSI job, but is of
CIA interest because it is of
interest to national security.
That is:

~~The~~ mass flying ~~which~~ CTO
reports could:

- (a) produce mass hysteria
- (b) jam overload our
radar warning system
- (c) overload communication
facilities.
