RESUME

THIS IS UNEVALUATED INFORMATION

SOURCE

[REDACTED]

In early November 1955 we received a letter from [redacted] Kive, Belgium Congo, requesting price and delivery information on a short, compact, 60x telescope which we manufacture for apartments. The following paragraphs are taken from [redacted] letter:

As you Americans do not want to tell us what the so stupidly called 'flying saucers' are, and above all, what they want (and this may be very important in the future), I send your excellent telescope for myself and my observation group which I am just creating.

The UFO Unidentified Flying Objects are coming more and more over this country, and owing perhaps to the very nature of this land and its beautiful sights, we here look more often in the sky than the busy Americans.

"When talking me the prison, please remember that the parking must be almost army-plated, because otherwise the local vehicles may destroy the telescope even before it reaches me."
