Guide for CIRVIS Reporting.

1. CIRVIS report identification: At 2320Z Montreal ACC contacted 21 Sqn regarding a report from A/C call sign JZA 731 observing numerous lights at altitude.

2. Identification of object(s) sighted: JZA 731 reported seeing multiple lights.

A. For identifiable objects, include number and identification of aircraft, vessel, missile, or individuals seen: JZA 731 reported seeing approximately 40 lights in the sky at 48:37:48N, 068:37:39W, over the St. Lawrence River.

B. For unidentifiable objects, give a description including shape, size, number, formation, and any discernible features or details: 40 lights, unknown alt and speed, traveling in groups of 15.

C. Include any observed identification (i.e., insignia, lettering, flags, etc.): No information.

3. The position of the object. Include the date and time (GMT) of the sighting. This can be indicated by any of the following methods: Time of reporting was 2337Z on 26 December, 2019.

A. Latitude and longitude: 48:37:48N, 068:37:39W.

B. Over the radio fix: No information.

C. True bearing and distance from a radio fix: No information.

D. Over a well-known or well-defined geographic point: Over the St. Lawrence River.

4. Description of the course of the object: Heading eastbound in groups of 15.

A. Altitude: No information.

B. Direction of travel: Eastbound.

C. Speed: No information.

D. Description of flight path and maneuvers: Continuous heading.

E. What first called attention to the object: No information.

F. Angle or elevation with azimuth when first noticed: No information.

G. How long was the object visible: No information.

H. Angle or elevation with azimuth upon disappearance: No information.

I. How did the object disappear: No information.

5. Manner of observation: Visible in sky by JZA 731 A/C.

A. State how observed: ground-visual, ground-electronic, air-visual, air-electronic. (If electronic, specify system): No information.

B. Were optical aids (telescope, binoculars, etc.) used: No information.

6. Conditions when sighting the object: No information.

RELEASED UNDER THE ATIA - UNCLASSIFIED INFORMATION
DIVULGUÉ EN VERTU DE LA LAI - RENSEIGNEMENTS NON CLASSIFIÉS

A. Location of observer. If the sighting is made while airborne, include aircraft type, identification number, altitude, heading, speed, and home station: A/C C/S JZA731.

B. Light conditions (Use one of the following terms: day, night, dawn, dusk): No information.

C. Weather conditions (ceiling, visibility, clouds, thunderstorms, temperature, winds, etc.): No information.

7. Interception or identification action taken: No information.

8. Location, approximate altitude, and general direction of flight of any air traffic or balloon releases in the area that could possibly account for the sighting: No information.

9. Preliminary analysis of the possible cause of the sightings: No information.

10. Existence of physical evidence, such as materials and photographs: No information.

11. Name, organization, and means of contacting the reporting individual: JZA731 contacted Montreal ACC who then contacted CADS, 21 Sqn.

0615Z : UFO phenomenom was observed in repentigny Quebec at 0500z. It was reported by from the police at A red disk with a bleu ring was observed by several people and policemen doing their patrol. The disk decent about 50 meter from the ground and split in several direction. The small object coming from the disk was white in color. The policemen did and investigation of the ground and they discover no burning of the ground , the object was not making any noise and they could not smell anything like gas burning or any other smell. they observe that phenomen for about 10 min and after they observed the same disk at (height) the star level and it disapeared. The repentiny advise the Dorval Tower and they did not see that observation but they give the telephone number of CADS. We fill up they report and send that to the as per check list .....pm

0000z: New Zulu Day.

0020z:

0133z: At 0015z, CADS received a call from the Winnipeg Shift Manager that there had been three separate sighting of lights by three different A/C pilots. The first one reported that the light looked like a shooting star, the second pilot reported that the light looked ground based and the third pilot reported that the light was above the A/C. Date and time of sighting was approx 0050z on 09 Oct 12. Flight level of the sightings was between 360 - 380. There was no specified direction that the light was headed. One pilot reported that the light appeared to be going at the same speed as a shooting star. All reported the sightings in the vicinity of Sault Lookout. As per the UFO checklist, a report of the sightings was faxed to Mr. Chris Rutowski and a copy has been placed in the MCC "pass along" items...ca

0437Z: At approximately 0315z, 03/31/2013, CADS received a call via Voice Page from Gander Domestic Low reporting that a pilot operating a low level A/C flying flight planned from CYHZ to CYDF reported an unknown object descended at a very fast speed in front of them in the vicinity of CYJT.

0439Z: CADS SD contacted Gander Shift Supervisor via Phone @ approximately 0328z, 03/31/2013 re: this incident and received the fol info from the Shift Supervisor: In an approximate time span of 10 minutes around 0305z, 4 Different A/C operating @ FL 350 reported similar sightings of a rapidly descending large object emitting bright lights in the vicinity of Stephenville. Said object appeared to be 'breaking up' and the Hi-Level pilots were unable to determine its colour and/or other specifics except that it resembled 'a large vehicle' and appeared to be travelling much faster than a normal A/C. The Shift Supervisor reported that the object was heading at a roughly 060 Hdg. He also received an additional report from a pilot operating a low level A/C C/S:Jazz Air 886 FP'd from CYHZ to CYDF. Jazz Air 886 reported that an object appeared to have impacted somewhere in the vicinity of Stephenville, however, indicated the speed of the object was 'slower than a meteor but faster than an airplane.' The low level A/C also reported that the object resembled a 'space launch vehicle.'. // ..Passed to CANR DDT...bk

2218Z. CIRVIS report. Edmotnon ACC called with information that a informed them of an incident last night. He observed at 715pm local (High Prarie AB) 3 red lights in the sky, hovering at the approximate height of a cell phone tower, center light blinking and the other two solid. Observed for a few moments and then it took off, heading west and was not seen again.

STATUS: VIEW ACCESS:

DESCRIPTION:	
ACTIONS:	0000z: New Zulu Day. 0020z: 0133z: At 0015z, CADS received a call from the Winnipeg Shift Manager that there had been three separate sighting of lights by three different A/C pilots. The first one reported that the light looked like a shooting star, the second pilot reported that the light looked ground based and the third pilot reported that the light was above the A/C. Date and time of sighting was approx 0050z on 09 Oct 12. Flight level of the sightings was between 360 - 380. There was no specified direction that the light was headed. One pilot reported that the light appeared to be going at the same speed as a shooting star. All reported the sightings in the vicinity of Sault Lookout. As per the UFO checklist, a report of the sightings was faxed to Mr. Chris Rutowski and a copy has been placed in the MCC "pass along" items...ca 0200z: Pubs and Codes Checked.....am 0215z: 0300z: 0606z: Superseded Codes Destroyed.....am 1000z:

s.15(1)

	0439Z: CADS SD contacted Gander Shift Supervisor via Phone @ approximately 0328z, 03/31/2013 re: this incident and received the fol info from the Shift Supervisor: In an approximate time span of 10 minutes around 0305z, 4 Different A/C operating @ FL 350 reported similar sightings of a rapidly descending large object emitting bright lights in the vicinity of Stephenville. Said object appeared to be 'breaking up' and the Hi-Level pilots were unable to determine its colour and/or other specifics except that it resembled 'a large vehicle' and appeared to be travelling much faster than a normal A/C. The Shift Supervisor reported that the object was heading at a roughly 060 Hdg. He also received an additional report from a pilot operating a low level A/C C/S:Jazz Air 886 FP'd from CYHZ to CYDF. Jazz Air 886 reported that an object appeared to have impacted somewhere in the vicinity of Stephenville, however, indicated the speed of the object was 'slower than a meteor but faster than an airplane.' The low level A/C also reported that the object resembled a 'space launch vehicle.'. // ..Passed to CANR DDT...bk 0600z Code destruct complete...bk 0700z REN computer pass word changed. 12:32:Z

1234z: Received a call from Winnipeg Centre, passing a CIRVIS Report. The following information was collected: Person Reporting : saw 4 lights orange in colour and V in Shape 4nm north of Winnipeg Airport (YWPG). The observation was made at 0251z 28 September 2013. The lights were moving NNW at an estimated speed of 100 - 120 knots, at an altitude of 1-2 thousand feet. No A/C Beacon was observed. Outside contidion was night, Skies were broken with no low lying cloud. Although this information doesnt really fulfill requirements in NI 10-19 as a CIRVIS Report, this information was passed to CANR. Winnipeg Centre will be sending a hard copy via Fax .....dm

AAL 107 turned north and only a single radar hit was detected behind him and at a radar altitude of 38,200 feet. This single hit was passed to Moncton center. After approx 15 miles AAL107 turned back onton flight plan heading and reported seeing an aircraft with a rotating white light on his left side and behind him. CADS did not have any radar contact on the trailing aircraft. 2346z: 2350z: CZ 452 TOI 2 (TOI 1 AAL 107, A/C that reported incident) extrapolated track from PIREPS...dts 2359z:

1100z approximately 20x Strange lights observed visually heading from North to South over DLP following what seemed to be a path towards an extremely bright stationary object in the sky. 3 of the strange objects changed direction to form a triangular shape just to the left of the stationary object. These objects were moving fast at a consistent speed.
