REPORTING OF FIREBALL AND METEORITE OBSERVATIONS

1 The National Research Council Associate Committee on Meteorites is anxious to receive reports of any sightings of very bright meteors or fireballs and is launching a country-wide publicity effort to bring this to the attention of the Canadian public.

2 A fireball is a bright meteor with a luminosity which equals or exceeds that of the brightest planets. It is usually seen moving rapidly across the sky and sometimes a trail of glowing particles is left behind. The meteor may explode with a burst of light and a loud sound. This may happen several times during a single fall.

3 When a sufficient number of fireball observations are obtained over an area 100 miles or more in extent, it becomes possible to combine the observations and predict the most probable area in which meteorites associated with the fireball may have reached the surface of the earth. Since freshly fallen meteorites are of considerably more interest than old falls, sightings should be reported as soon as possible.

4 All reports shall include as much of the following information as relevant:

(a) Date and time of sighting (GMT to be used)

05 2130 Z JAN/66

(b) Condition of sky (Clear, cloudy, haze, etc)

CLEAR

(c) Location of observer (either precise position on ground or geographical reference)

NOVA SCOTIA

NEW ROSS

(d) Occurrence of bursts (number and approximate positions along path)

NIL

(e) Luminosity (brightness compared to planets or moon and occurrence of shadows cast by nearby objects, if any)

NIL

(f) Colour (distinguish between colour of fireball and any persistent train or trail after passage of fireball)

(g) Form (size in relation to moon and shape)

OVERALL 200 FEET IN LENGTH

LARGE CIRCLE WITH TAIL

(h) Duration (both of fireball in motion and persistent train or trail in sky)

FOR 15 MINS

OBJECT WAS OBSERVED

(j) Sounds (description of sound and time interval between sighting the fireball and hearing the sounds)

NIL

(k) Position in sky (positions of beginning and end of fireball path, both azimuth and elevation)

OVER 200 NOT ASCERTAINED

(l) Any other unusual observations

passed to RCC at 1850 local

FOR CFOC ATTN OPS. DATCO RECEIVED NUMEROUS CALLS CONCERNING SIGHTING
OF UNIDENTIFIED FLYING OBJECTS DURING PERIOD 0030 - 0440Z 8 AUG.
MR JOHN GERRARD 41 FERNWOOD PARK AVENUE, ^{BALMY} BALMY BEACH, IN WOODBINE
EAST, CALLED IN A FAIRLY COMPREHENSIVE REPORT AT 0320Z. ZD TOWER
ASKED POLICE CONSTABLE, NO 55 DIVISION, OPP TO GO TO MR GERRARDS
HOUSE TO OBSERVE THE OBJECT. BESIDES GERRARD AND CLARK THREE OTHER
PERSONS WERE PRESENT. THE OBJECT WAS GENERALLY DESCRIBED BY THESE
OBSERVERS AS LARGER THAN ANY STAR, DUMBELL SHAPED, TRAILED BY A
BALL OR HALO, ICE BLUE IN COLOR, AND SHINY. THERE WERE NO NOTICEABLE
C WB BEACH-BALMY WA DUMBELL SHAPED

PAGE 2 RCCPGJ 29 UNCLAS

AERIALS OR PROTRUSIONS. IT ZIG ZAGGED ACROSS LAKE ONTARIO IN A ^{GENERALLY} GENERAL
EAST-WEST DIRECTION, ALTHOUGH IT HOVERED AT TIMES. WHEN MOVING
HORIZONTALLY ITS MOTION WAS RAPID; IT SOMETIMES CLIMBED AND
DESCENDED EXTREMELY FAST. REPORTS DESCRIBED THE WEATHER AS CLEAR,
DARK, STARLIT NIGHT WITH GOOD VISIBILITY. ZD WX: SKY HAZY, VIS 6 HAZ,
NO STARS VISIBLE. BALMY BEACH IS 10-12 MILES SE OF ZD

K UNUSUAL OBJECT IN SKY OVER DOUGLAS ONTARIO. IT APPEARED AS RINGS OF WHITE LIGHT MOVING TOWARD VILLAGE AND FLEW SOUTH OF THE VILLAGE WHEN TWO ROWS OF RED LIGHT APPEARED. THE OBSERVER REPORTS THAT THESE RED LIGHTS REMAINED FOR A SHORT PERIOD WHEN IT TOOK ON ITS ORIGINAL APPEARANCE AND GLIDED EARTHWARD AND APPEARED TO LAND IN THE VICINITY OF THE CNR STATION. AFTER A SHORT TIME IT BECAME AIRBORNE AND PROCEEDED OVER THE VILLAGE WHERE IT SEEMED TO REMAIN MOTIONLESS OVER THE AREA OF THE RC CHURCH. LATER IT ROSE AND REMAINED ONLY AS A CLOUD SPOT BUT STILL COULD BE DETECTED BY MEANS OF BINOCULARS.

REMARKS: THE ABOVE REPORT RECEIVED BY UNSIGNED LETTER POSTMARKED OTTAWA ONT IS BEING RETAINED ON UNIT FILE.

Oct 1967

Dear Dr. Lettice

This is information regarding U.F.O. that I thought should be reported. I am not signing this as I wish to be unknown, but on Oct 25 1966 around 10.30 pm I saw the following object in a certain area. It resembled to wedding bands of light  and was quite low. After watching it for awhile it put on two rows of red lights  each light was about the size of an egg. Then they went out and the white light bands reappeared. & it floated down earthward. & all was darkness for awhile until it reappeared coming from the ground, then it hovered over the town of Douglas for a long time.

finally moving away & going
into a cloud of mist which it
seemed to form about itself.

Now in Sept. 1967 my neighbours
saw 3. in the same area.
(1 made sound)

Around 9.30 p.m. They hung
around for a couple of
hours. On October 8 around

11 p.m. I thought it was
a man walking up the
railroad track with a
flashlight, but a car came
along & the object which
I thought was someone
walking rose floated
away across a field,
not high but only light
visible (no sound) then

it backed up & back into
the location the others

were observed. It seemed to be in
trouble & did not want to be seen.

This location is along the
C.N.R. track west of

Douglas Station between the
 1st & 2nd crossing but
 they always seem to be
 just a little east of the
 2nd Crossing. We were
 wondering why do they
 always come to that
 particular area & why
 do they always seem to
 go down around Brennan's
 farm.

STATEMENT

Mr. Robert GAUTHIER of Riviere Ewa, Abitibi (10 miles west of Malartic on  
Route 59) Telephone No. RH-2491 - at 1430 hrs 30 Jan 67 : - states,

I closed my gas station around 1230 a.m. on the 27 Jan 67 then  
I went to bed. Around 1245 a.m., while I was in bed, I heard a big  
explosion which shook the house. I thought it was the furnace which  
had exploded. I looked towards the lake whilst it was still moonlight,  
and I saw a black spot. The same morning around 0745 a.m. I went and  
saw the black spot in question. The hole in the ice was approximately  
11" to 15" in diameter. I examined this hole in the ice with a bar, and  
it appears that the hole was dug in the ice at an angle of 45 degrees  
and came from the direction of north-west. The hole in the ice was  
not there previously. I notified the Provincial Police. The hole is  
approximately 20 - 25 feet from the beach, which is on my property.

Signed.. Robert Gauthier.

The above statement was taken (in French) by JHM Bergeron Const. 23882  
NMP Val D'Or.

The above statement was translated from French to English by 84774 LAC

1 At 1330 hrs 27 Jan 67, the writer received information from the Royal Canadian Mounted Police Detachment at Val D'Or, that it was believed an unknown object had fallen at the rear of a house near Malartic, Abitibi, P.Q. The source of information was a Mr. Robert GAUTHIER, aged 32 years, whose residence is on Route 59, Riviere Heva - 10 miles west of Malartic, Abitibi, P.Q. Postal address is General Delivery, Riviere Heva, Abitibi, P.Q.

2 At 1530 hrs 27 Jan 67, RCMP Constable Raymond BERGERON, No. 23832 of Val D'Or Detachment, accompanied the writer to the residence of Mr. Gauthier to conduct enquiries regarding this incident. The investigators were unable to contact Mr. Gauthier at this time. However, on a second visit during the afternoon of 30 Jan 67, Mr. Gauthier was interviewed and a statement obtained which is attached to this report as Appendix A.

3 It appears that at 0045 hrs 27 Jan 67, Mr. Gauthier was asleep in the bedroom of his home when he was awakened by an explosion which shook his house. He thought at first, that this explosion had originated from his house furnace, but when he looked out of his bedroom window and south over Lake Beauveillé, which is adjacent to his property, he saw in the moonlight, a 'black spot' on the ice-covered lake. At 0745 hrs that same morning, Mr. Gauthier went to investigate this 'black spot' and discovered it to be a hole in the ice, about twelve to fifteen inches in diameter. This hole was nowhere previous to the explosion. There were no footprints in the snow surrounding this hole. He probed this cavity with a metal bar and established that some object had smashed through about two feet of crusted snow and then through the thick ice of the lake. The hole was at an approximate angle of forty-five degrees and consistent with having come from a north-westerly direction. This hole was situated at the rear of his home and approximately ten to fifteen yards from the lake bench. Mr. Gauthier had then passed this information to the Quebec Provincial Police who had notified the RCMP.

4 Examination of the ice was made by the writer and Constable Bergeron in company with Mr. Gauthier, but there had been considerable freezing and drifting snow since the incident, therefore it was not possible to pin-point the exact location of the entry of this object. However, Mr. Gauthier indicated the approximate position of the object's entry into the ice. The writer then marked this indicated position with a makeshift flag placed in the ice.

5 Message No. AS47 dated 30 Jan 67 was sent from this unit to CANFORCED OPS., also for the information of Mr. W.M.A. WARREN, Regional Representative for Sighting of Unidentified Flying Objects, 30 52nd Ave., Lachine, P.Q. This is in accordance with Air Defence Command Instructions, Vol. 2 - 2.01/19.

John: This is  
the correct  
to you about this afternoon  
W. H. Warren

Mr. Wm. A. Warren,  
30 52nd Ave.,  
Lachine, P.Q.

Dear Sir:

Attached is one copy of an R.C.A.F. Air Force Police report dated January 31st, 1967 concerning an unidentified falling object which fell in the Val d'Or, P.Q. area on January 27th, 1967. It is understood that a message reporting this incident was forwarded to you on January 30th, 1967.

As of this date the entry hole in the ice is still identified by a wooden marker. May it be noted that the temperature at the time of impact, and for the remainder of the night, was  $-25^{\circ}$ . The hole, when examined by Mr. Gauthier, had diminished by freezing to 12 to 15 inches in diameter. When eventually located, some twelve hours later, the hole had diminished further to about 8 inches in diameter.

Val d'Or authorities report that to date no further examination of the area has been made by any agency.

MOVING BUT COMPARISON WITH A HOUSE CHIMNEY SHOWED THAT THE OBJECT WAS MOVING SLOWLY SOUTH TO NORTH. THE OBSERVER REPORTED THAT THE STARS WERE VISIBLE BUT VERY DIM COMPARED TO THE OBJECT. SHAFTS OF LIGHT SEEMED TO EMANATE FROM THE OBJECT AT IRREGULAR INTERVALS. NO SOUND

II S/SGT BARBER DESCRIBED THE OBJECT AS VERY BRIGHT, WHITISH, STATIONARY, AND LOW ON THE WESTERN HORIZON

III CONST GOODHAND DESCRIBED THE OBJECT AS WHITISH WITH A RED TINGE. IT WAS LOW ON THE HORIZON TO THE WEST AT AN ESTIMATED ANGLE OF INCLINATION OF 20 DEGREES. IN RELATION TO A NEARBY CHIMNEY, THE OBJECT WAS MOVING SLOWLY SOUTH TO NORTH

N67/028

Uplands releases weather balloon  
with trailing light at 01:15 E.D.T.  
∴ could not be this.

May be just aircraft, with heavy  
sky.

Too slow for fireball, too fast for  
satellite.

67/037

NAME Mr. John Cabel  
ADDRESS 353 Arthur St.  
CITY Oshawa  
PROV. Ontario  
DATE Friday Oct 6th 1967  
DATE OF SIGHTING Mon. Oct 9th 67

- (1) What TIME DID YOU SIGHT THE OBJECT 6.00 to 7.00 AM EST.
- (2) What COLOUR WAS THE OBJECT Object was changing colour fading from red to bright orange
- (3) DID OBJECT MAKE ANY SOUND Object made no sound
- (4) LOCATION OF SIGHTING Curtis, Ontario  
Near Pinks farm south east of Oshawa  
About three miles
- (5) WHAT SHAPE OF OBJECT Object appeared disk shape and appeared larger as they near ground
- (6) WHERE IN SKY DID OBJECT APPEAR Object appeared to the south east at 4,000 to 5000 ft alt.
- (7) WHAT DIRECTION DID OBJECT TRAVEL disappeared

(8) WHAT WAS THE WEATHER CONDITIONS Cloudy with  
light fog in some areas

(9) DRAW PICTURE OF OBJECT

(10) DID OBJECT HAVE TAIL FLAME No tail flame

67 11 20 20 U.F.O. FIREBALL REPORT 67/149 \*

YEAR MONTH DAY 15 15 EST OBSERVER MRS. JOHN A. LUCAS

WEATHER SOME CLOUD ADDRESS 821 SPAINLAND DRIVE OTTAWA

LOCATION OF OBSERVER WHEN FIREBALL SEEN in ON HWY 4A between FINCH & CHESTERVILLE

LAT LONG BURSTS LUMINOSITY COLOUR

Had driven thru snow storm & out into clear interval. M. fired several, some white, some darker ones. Watched it. It changed to long and then and moved off quickly to SW. Sounded like jet engine and then disappeared from view. Slightly left of 20/11/67. U.F.O. started telephone. Reported by Mrs. J. A. Lucas.

DATE 20/11/67 RELIABILITY REPORTED

N 67 / 051

I suggested following explanation:  
 When I was in driving and unable to  
 watch cloud continuously. At one point  
 when she looked back up at the sky  
 she had lost sight of the original  
 small white cloud and her eye was  
 caught by the forming vapour trail  
 of a high flying jet. That is, the vapour  
 trail was just beginning and was of  
 a similar size and colour to her original  
 little cloud. Its elongation and motion  
 was simply the combination of the  
 aircraft's motion at the head of the vapour  
 trail and its less rapid diffusion and  
 disappearance at the rear end of the vapour  
 trail.

## Mysterious Object In Sky Over Nelson Area

NELSON—A mysterious, fiery object appeared suddenly over Nelson at the weekend, then vanished to the south as it flew on a north to south track.

The unidentified flying object was described variously as an "orange ball" with orange sparks appearing to drop from it, and as a "UFO with sparks" falling away from it.

Some of the first to see it were members of the O. Schleiermacher family, who said it was visible twice as it appeared through gaps in a partial cloud of cover over Nelson.

The reports came from residents on Kootenay Lake's north shore.

Mrs. Schleiermacher said they

watched it during a two to three-minute period.

She id, "It seemed to come just over the top of the mountain (500-foot Nelson or Elephant Mountain) and it was very low.

"There was no noise and, it looked at first like a helicopter on fire with sparks falling from it."

Other residents, including motorists, reported seeing the UFO.

RCMP said they had received no reports on the object.

Bob McAllister of Rossland, an astronomer, told The Times at the weekend that from his investigation into the report the object seemed to be a fireball.

Trail Times, Jan. 2, 1962

## UFO May Be Work Of Children

NELSON—Several UFOs have been plaguing the Nelson area.

Mrs. Marilyn Horser of Nelson together with other Nelson residents reported seeing four of the objects Friday evening hovering over Elephant Mountain.

She said she gazed in disbelief as the UFOs zig-zagged over the sky. It seems all they saw were lights.

The UFOs which have been appearing in the same area in Nelson for the past three nights are being investigated by the RCMP.

A Glenmerry resident told The Times this morning that her son last night saw what he described as a "flying saucer" over Glenmerry. It was flying towards the moon, and was a very bright red color. It was apparently flying low, and as it approached the moon broke in a burst of speed and flew over the mountains above Glenmerry.

A local astronomer said he has been speaking to a number of people about the UFOs and as yet has not come to a positive conclusion. He says he believes they must be the work of some pranksters who think they have something going.

The Province, Jan. 4, 1962

## He COULD believe in UFOs

WOLFVILLE, N.S. (CP) — Rupert H. MacNeill, geology professor at Acadia University here, says reports of unidentified flying objects are not merely figments of the imagination and the number of reports he had received has increased since his recent appointment to the National Research Council's meteorite committee.

"When you see these things and they are described, they are just not imagination," he said.

He added that the objects sighted usually fall into two categories — rounded balls of fire and elongated, torpedo-shaped objects.

He said it is possible some sightings are pieces of rockets or satellites shot into space from earth, but not all.

"Some of it might be, but not so much of it as seen by so many people. In any case, this material would not come down and just hover; it would wham right in and probably burn up by extreme friction before it came down to our atmosphere."

Stories like these do not help the situation

## Hoax Over

## Boys Confess To Nelson UFO Scare

NELSON — A Nelson boy and his brother have confessed they started Nelson's UFO scare here recently.

The boys, not identified, were residents of the North Shore residential area across Kootenay Lake's West Arm from Nelson, where the reports came a little over a week ago.

The boys said they had sent up light plastic dry cleaner bags with 16 birthday candles attached to straws and floated them into the air.

The balloons were made by fastening four straws together in the shape of a cross which was taped to the plastic bag.

The lighted candles filled the bags with hot air, causing it to rise. The candles gave a weird glow from a height.

The boys said they had started the project as a serious exper-

iment but when they heard a hot air balloon had been mistaken for a UFO, they decided to set off balloons at opportune times, such as the five o'clock traffic rush hour.

The objects were reported at about 2 a.m. Friday and Saturday, a week ago, causing residents and motorists some apprehension. Newsman and radio offices were called for information and RCMP investigated the incidents.

Pier chief R. S. Owens said the balloons could conceivably cause no danger. Is one exploded from over inflation it might catch fire, burning the person handling it. It might also land somewhere and cause a fire.

The children's parents had arranged that the experiments be stopped.

Dear Sir:

The attached newspaper clippings  
tell the story of the "fireball" which  
I reported to you last week.

UFO's began popping up all  
over the district!

Yours truly,

R. D. McAllister

# FIERY OBJECT STARTLES NORTH SHORE RESIDENTS

7/19/77  
Nelson Daily News, Dec. 30, 1967, p. 1

A mysterious, fiery object appeared suddenly from behind Nelson (Elementary) Mountain Friday evening and set North Shore residents talking of "reconnaissance craft" from a distant planet.

The UFO (Unidentified Flying Object) was spotted by 12-year-old Frank Schleiermacher while he was in the driveway of his parents' house across the lake at about 5 p.m.

"I saw a bright, whitish color with a small beam coming out of the top," he said. "The beam was going back and forth and little particles were falling from the bottom of it."

The mystery object disappeared behind a cloud and Frank ran indoors to call his mother and aunt.

The UFO became visible again through a gap in the clouds and together with her sister-in-law and son, Mrs. Schleiermacher watched in awe "for two or three minutes."

"I don't know what it was," she said later. "It seemed to come just over the top of the mountain and it was very low. There was no noise and it looked at first like a helicopter on fire with sparks falling down from it."

The UFO came up over the mountain in the vicinity of the new CBC-TV tower.

Apart from the Schleiermachers, many other people spotted it and several drivers

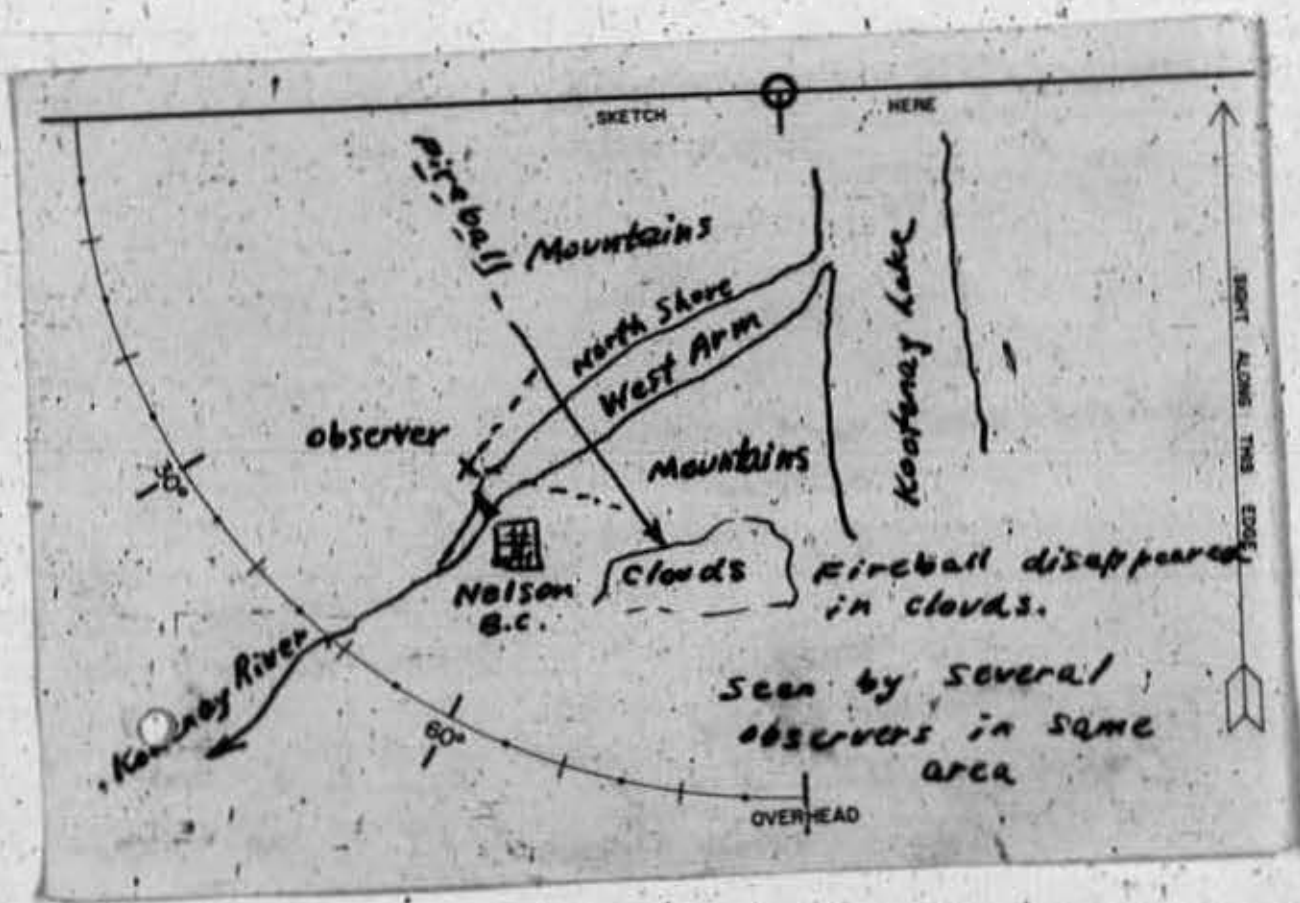

along the North Shore road halted their vehicles to get a better look.

The object headed south across the lake, often being lost to sight behind the low cloud base, and finally disappeared from view.

The theory that it may have been a helicopter or aircraft in

trouble was dispelled when Air-Sea Rescue officials in Vancouver said they had received no reports of aircraft in difficulties or of any unusual sightings.

RCMP said they had received no reports and had no knowledge of what the UFO might have been.

Sir:

I am enclosing a sample of material which came from the atmosphere some where and fell in a shiny mass the size of a golf ball approximately. It caught my eye shining in the sun and when I caught it, it fell apart into thousands of pieces of metal as enclosed. They seemed to possess magnetic properties, and I was wondering if these were remnants or parts of the magnetic needles which were sent up by the Americans some time ago. Maybe I'm mistaken but I would like to know what they are and they descended from the atmosphere.

Yours truly

JW Macmillan

Mr. J. W. McCormick  
Plantagenet  
Ontario

Dear Mr. McCormick:

The substance which you sent to us consists of strips of metal-coated plastic. It has the property that a large cloud of it in the air is a good reflector of radar waves. If dropped by aircraft it will confuse radars and hide them from observation. It comes in small balls that normally break apart when dropped from an airplane. It appears that you caught a piece which had not broken up.

During world war II it came to be called "window" or "chaff".

Yours sincerely,

*P. A. L.*

Dear Dr. Rattie:

An interesting story concerning a UFO was related to me recently by a technician at our Forest Products Laboratory in Ottawa. You may have received other information about this sighting but I believe you may be interested in the version.

Our technician had obtained this information directly from the person who had made the sighting. Saturday evening, June 3, 1967, our technician was with friends in a cottage beside Lake Ripissing after a day of fishing on the lake. A local resident, Mr. Arcand, had the job of checking the buoy lights at rocky outcrops or islands in the water. He entered the cottage at about 11:45 PM in an agitated state and described seeing an object or lights on the water between two islands while he was making his rounds in a boat. This sighting apparently took place near Oak Island.

He noticed two greenish lights which appeared to be about seven feet apart and a white light between and a little to the back of the other two lights. He approached the lights believing that people in a boat might be in trouble and got to within about 100 feet. At this point the lights or object suddenly rose from the water with a "whoosh" and vanished into the night sky. At this time he was aware of a peculiar odour quite unlike that of gasoline or

any other odour he had encountered before. He believed that he had seen these lights for about 25 to 30 seconds.

Later the technician and others on the fishing trip heard that two boys reported being startled by a brilliant white light which flashed down from the sky about 10 P.M. on Saturday June 3, 1967 as they were fishing on the lake. The father of one of the boys assured them that they probably just saw a meteor or meteorite.

This might be a promising sighting to investigate.

Yours sincerely

J. F. Shields

SightingSept 1967  
Near Dr. Kestee

This is information regarding  
 U.F.O. that I thought should be  
 reported. I am not signing this as  
 I wish to be unknown, but on  
 Oct 25, 1966 around 10.30 pm I  
 saw the following object in a  
 certain area. It resembled to  
 wedding bands of light  and  
 was quite low. After watching it  
 for awhile it put on two rows  
 of red lights  each light  
 was about the size of an egg. Then  
 they went out and the white  
 light bands reappeared. & it  
 floated down earthward.  
 & all was darkness for awhile  
 until it reappeared coming  
 from the ground, then it  
 hovered over the town  
 of Douglas for a long time

finally moving away & going  
into a cloud of mist which it  
seemed to form about itself.

Now in Sept. 1967 my neighbour  
saw 3. in the same area.

<sup>(1 made sound)</sup>  
Around 9.30 p.m. they hung  
around for a couple of  
hours. On October 8 around

11 p.m. I thought it was  
a man walking up the  
railroad track with a  
flashlight, but a car came  
along & the object which  
I thought was someone  
walking rose floated  
away across a field,  
not high but only light  
visible (no sound) then  
it backed up & back into  
the location the others  
were observed. It seemed to be on  
trouble & did not wait to be seen.  
This location is along the  
C.N.R. track west of

Laugher Station between the  
1st & 2nd crossing but  
they always seem to be  
just a little east of the  
1st Crossing. We were  
wondering why do they  
always come to that  
particular area. & Why  
do they always seem to  
go down around Brennan's  
Dam.

N67/061

REPORT FROM MR. ROSS CRAIK, KENTVILLE, ON A SIGHTING IN  
KENTVILLE+ N.S.

The night before the Shag Harbour appearance, Mr. Craik reports seeing an orange, pulsating object for about 15 minutes over the Continental Can area of western Kentville. He reports this object to have changed colour from the Orange pulsating colour to a bluish colour when the object moved away. Several others were in the area but no one seemed to have seen it, as far as we know. However, there was no sound from the object either. It appeared to be about the size of a pin-point of light from where Mr. Craik saw it, and he suggested it was about the size of the red obstruction light on the TV towers on the look-off. This would make it pin-point in size. He later called his friend, Ray Parr, who lives on Glenview Ave., and Mr. Parr made a tape of the conversation. This tape is available.

*Would seem to be

ACK

A description of an unusual flying phenomena given by Mr. Emerson Smith of Brooklyn, N. S.

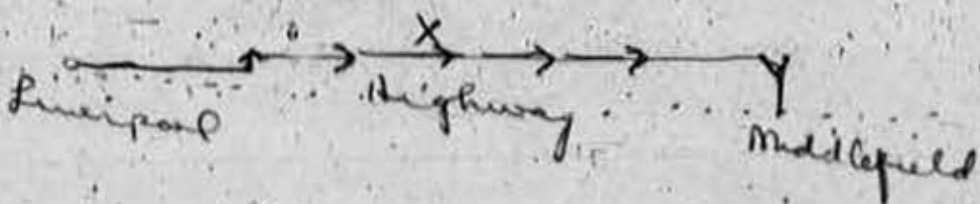

In October he, with two companions, was travelling west about 10:30 p.m. on a country road between Liverpool and Middleton, parallel to the highway. This was a scenic drive along the Mersey River. The night was very clear and starlit. At the point marked X Mr. Smith and his friends sighted the object which he described to me as follows:

"It was large and orange-yellow, spherical like the moon or setting sun, and was surrounded by a paler halo of light. It was above the horizon about a distance ten times its diameter. It changed color from orange-yellow to yellow. We watched it for about ten minutes during which time it sank steadily towards the horizon, finally disappearing. The most remarkable thing was the streak of oblong light it left (like an eraser mark) for about a minute."

The account is particularly interesting to me because Mr. Smith has always believed that unidentified flying objects exist only in the imagination.

## Search for a 'Thing' SAT OCT 7<sup>th</sup> 1967 Well, what is it, or was it?

Canadian Press

SHELBURNE, N.S., Oct. 7

Three more navy divers from Halifax were to join the underwater search today off nearby Shag Harbor for an unidentified flying object reported to have disappeared in the water there Wednesday night (OCT 4<sup>th</sup>).

A navy spokesman said last night the four-man navy diving team already there found no trace of the object during their noon-to-sunset

search yesterday.

The divers, searching in pairs in water 20-30 feet deep, reported good visibility and a fine, sandy sea bottom.

Meanwhile, in Ottawa, a spokesman for an RCAP department that checks out reports of unidentified flying objects said the department was "very interested" in the report from Shag Harbor.

"We get hundreds of reports every week," he said, "but the Shag Harbor incident is one of the few where

we might get something concrete."

Today's search was expected to end at 4 a.m.

A local resident who first saw the object called BUMP who arrived in time to see it floating and finally disappearing beneath the water.

The navy spokesman said residents could not describe the shape of the object but said it was over 20 feet long and was dark with four white lights.

The first thing I noticed when I stepped out of the car was the cold. It was a sharp, biting cold that seemed to seep into my bones. I pulled my coat tighter around me and walked towards the entrance of the building. The air was thick with the scent of old wood and the faint, sweet smell of flowers. I had heard that the gardens were beautiful, but I had never seen them before.

As I walked, I noticed the way the light filtered through the trees, creating a dappled pattern on the path. The sound of birds chirping in the distance was a pleasant surprise. I had been told that the birds were rare, but here they were, singing their hearts out. I stopped for a moment to listen, feeling a sense of peace I had never experienced before.

The path led me to a large, ornate house with a grand facade. The windows were tall and narrow, and the doors were made of dark wood. I stood in front of the house, looking up at the intricate carvings on the roof. The house seemed to have a life of its own, a history that I could almost feel. I took a deep breath and stepped forward, ready to explore the mysteries that lay within.

The interior of the house was a masterpiece of architecture. The walls were covered in tapestries of various patterns and colors. The floor was made of polished stone, and the ceiling was high and vaulted. I walked through the rooms, admiring the details of the furniture and the artwork. The house was a treasure trove of history and art, a place where time seemed to stand still.

As I continued my journey, I discovered more and more about the house and its inhabitants. I found old letters and journals that told me of the lives of the people who had lived there. I saw the remains of a once-great library, with books scattered across the floor. The house was a place of secrets and mysteries, a place where the past was always present.

In the end, I found what I was looking for. It was a small, hidden room at the back of the house, a place that had been forgotten by time. In this room, I found the answers to the questions that had been haunting me. The house was not just a place of beauty and art, but a place of power and mystery. It was a place where the boundaries between the living and the dead were blurred, and where the secrets of the universe were hidden in plain sight.

Should more information be desired, I will endeavor to dig it up, whenever I will not venture in any kind of an explanation or identification of this sighting, but as a member of R.E.S. I am forwarding this information in the hope that it might be useful in the research and study of Aerial Phenomena and R.E.S.'s R.S. I am enclosing a newspaper clipping from the "Central Star" which may be of interest.

Pilot Officer Bob Ralph,  
115 Portland Place,  
Suttonfield, Quebec  
697-3297 (MTL)

Flight 300-4th. Position : V300, 45 N.W. east of St. Jean.

Altitude : 12,000 ft. Outside air temp. Stand plus 10.

Magnetic heading : 338 deg. Magnetic track : 281 deg.

True air speed 256 kts. Ground speed : 211 kts.

Time of observation : 19:15 EDT (checked clock)

Flying on top of layered cloud, well below us.

The Captain drew my attention to an unusual set of lights to the south. One large bright white light and 5 small ones. It looked like a large kite about 20 deg. above the horizon at 90 degs to the aircraft. While we were looking at this set of lights we saw a big fire ball that started as a very bright white light and grew into a large red ball. It then turned violet in color then light blue. We saw two of these. I checked the clock. The first one was at 19:19 EDT the second at 19:21. At 19:35 EDT one large pear shape cloud glowing pale blue was drifting slowly eastward.

F/O Bob Ralph who is presently training to become a Captain had written the basic flight informations, time and position on a piece of paper. He also made a diagram at the time, photostat included.

NOTED BY [initials]  
REFERENCE TO-

Gentlemen,

A friend of mine, a captain for Air Canada who knows I am interested in the study of U.F.O's and aerial phenomena told me about a very interesting sighting he and his crew had on the night of October 4th 1957.

Air Canada flight 305-4th was proceeding westbound on V 300 between Sherbrooke VOR, Québec and St Jean VOR, Québec, when their attention was drawn to a strange light in the distance, south of their position at 20 deg. elevation above the horizon. It was followed by two large explosions higher in the sky. Here is the actual description given to me by each crew member.

[REDACTED]

We were flying at 12,000 ft above a thin layer of cloud when my attention was drawn to a very bright light. A rather strange irregular rectangular bright light, bigger and brighter than surrounding stars. As I was telling the First Officer we saw a series of smaller lights behind and slightly separated that seemed to be forming a tail to the bright light. It looked like a kite in its general form. The time was about 19:15 EDT. The F/O and I watched this for a while, wondering what it was when higher in the sky and to the left there was a large explosion orange in color and circular in shape surrounded by

dark blue ragged rim. This was very bright and bigger than the moon. It then became pale blue and turned into a bluish cloud. Approximately 40 secs later, a second explosion, the same in appearance but slightly higher and bigger took place. We watched in amazement as both huge orange clouds became blue and changed shape as they drifted slowly eastward. The whole thing lasted for 15 or 20 minutes. When we looked again for the kite like lights, they were gone, nothing left but the stars.

I had asked [redacted] on our first talk to draw me a diagram of what he had seen. This was on the 5th of Oct. On the 6th as I was sorting out this material I realized that it would be better to have three original diagrams, as a copy of this report was to go to three different places. I did not have the first diagram with me when I asked him to draw the others. Only after looking at all three did I realize it would be better if I sent a photostat of all three. You will notice that on the second and third diagram the position of the two fire balls, as [redacted] called them, is reversed. This might have a definite meaning to a trained investigator. [redacted]

[redacted] is unaware of this fact. I have known him for 14 years and he is not the type to go around making up stories. He also requested that I do not get him involved in any correspondence or telephone calls. If further information was required, it would have to come from me. I assured him that his request would be ~~respected~~ respected.

Sighting Oct 8, 1967

Dear Dr. Kettie

This is information regarding  
U.F.O. that I thought should be  
reported. I am not signing this as  
I wish to be unknown, but on  
Oct 25 1966 around 10:30 pm I  
saw the following object in a  
certain area. It resembled to  
wedding bands of light  and  
was quite low after watching it  
for awhile it put on two rows  
of red lights  each light  
was about the size of an egg. Then  
they went out and the white  
light bands reappeared. & it  
floated down earthward.  
& all was darkness for awhile  
until it reappeared coming  
from the ground, then it  
hovered over the town  
of Douglas for a long time

2  
finally moving away & going  
into a cloud of mist which it  
seemed to form about itself.

New in Sept 1967 my neighbour  
saw 3. in the same area  
(made sound).

Around 9.30 p.m. They hung  
around for a couple of  
hours. On October 8 around

11 p.m. I thought it was  
a man walking up the  
railroad track with a  
flashlight, but a car came  
along & the object which  
I thought was someone  
walking rose floated  
away across a field,  
not high but only light  
visible (no sound) then  
it backed up & back into  
the location the others  
were observed. It seemed to be

This <sup>trough & did not meet the sun</sup> location is along the  
C.N.R. track west of

3  
Laugher Station between the  
1st & 2nd crossing but  
they always seem to be  
just a little east of the  
2nd Crossing. We were  
wondering why do they  
always come to that  
particular area. & Why  
do they always seem to  
go down around Brennans  
Farm.

SWELLED HARD. TWO WEEKS LATER I THOUGHT I WAS TAKING PNEUMONIA. MY CHEST OR RIBS IN FRONT GOT SORE. MY THROAT GOT SORE AND STILL IS. MY FOREHEAD GOT GREASY AND LATER SEEMED TO DRY UP. NOW MY EYES ARE SORE AND I HAD TO GET MY GLASSES CHANGED BUT THEY ARE STILL SORE. I REPORTED THIS TO THE RCMP AND THOUGHT THE AIR FORCE WOULD CONTACT ME AND I'D GET SOME HELP BUT HAVE HEARD NOTHING. I TRIED TO TALK TO MY DR AND HAVE ASKED HIM FOR PENICILLAN BUT HE REFUSED. I GUESS HE THINKS I'M NUTS. CAN YOU TELL ME ANYTHING ABOUT THE THING WHAT KIND OF RADIATION, ATOMIC, ELECTRO-MAGNETIC, SOLAR OR WHAT? WHAT MEDICATION? I WOULD LIKE TO TALK TO THE CREW ON THE PLANE THAT CHASED IT SOMETIME. ANY HELP YOU CAN GIVE I WILL GREATLY APPRECIATE.

MY HANDS WITH ONE EYE AND THEN THE OTHER. IT SEEMED AS I LOOKED AWAY FROM IT THAT I COULD NOT BELIEVE MY EYES AND IT WAS DIBBICULT TO VISUALIZE WHAT I HAD SEEN. IT FOLLOWED ALONG BESIDE AND AT THE REAR OF OUR TRAIN FROM JUST 1/4 MIL PAST WENTWORTH NEARLY TO WESTCHESTER AND THEN FOLLOWED THE TOP OF THE MOUNTAIN RANGE TOWARD THE WEST. AS IT DRIFTED AWAY FROM OUR TRAIN IT TIPPED TO A 45 DEGREE ANGLE, THE REAR TOP END TO THE LEFT AND LATER ROLLED ON TO 1/4 TURN SO THE FLAT SIDES WERE UP AND DOWN. SHORTLY, A JET FROM A HIGH ALTITUDE CAME IN SIGHT DIVING, AT THE SAME ANGLE THE DEMON WAS POSITIONED, AND DIRECTLY TOWARDS THE EXHAUST END OF THE UFO. THE UFO THEN LEVELLED OUT AND A THIN SHORT EXHAUST WAS SEEN FROM BEHIND IT UNTIL, IT TOOK ON THE SHAPE OF A CIGAR AND IT JUST LOOKED LIKE A CLOUD, WITH THE JET PLANE PURSUEING IT. THE JET NEVER CAUGHT UP WITH IT AS FAR AS I COULD SEE WHEN THEY WENT OUT OF SIGHT (WE ARE NOT AT NAPPAN) TOWARD THE WEST AND TO THE LEFT OF THE SUN, TIME 350 PM AST. TWO MEN ON THE TRAIN WITNESSED THE QUOTE THING UNQUOTE. A SLEEPING CAR CONDUCTOR AND AN INSPECTOR FROM MONTREAL, I HAVE THEIR NAMES. ONE WEEK AFTER, THE HAIR ON THE BACK OF MY HANDS DISAPPEARED AND MY HANDS SEEMED TO WITHER UP SOME, THEY FELT FUNNY. MY EYES GOT SORE AND SEEMED

NG7/066

Dear Sir:

I read in the paper where you would like to get reports of strange objects in the sky. Yesterday morning (Dec 21<sup>st</sup>) at five o'clock A.M. I happened to be up and looked out the window saw not very far off it seemed a big ball of light with a neck on top and a funnel shape on that. It stayed about three minutes then started to turn red then down to a pink & manoe then went out like a light turned off. Don't know how long it was there before I saw it. I live in Highway about a mile from the main highway of New Minas turning up by White Spot in New Minas. The light was to the south very low. (over)

thought this might be some  
help to you. it never moved stay  
just in one place.

METEORITE/UFO REPORT OF SIGHTING

N681005

Date of sighting: 31 Dec 1967  
Day Month

Time of sighting: approx. 10 p.m. (Circle correct one).

Condition of sky (clear, cloudy, haze, etc.) Clear

Location of observer (as precise as possible) Middletown,

Queens Co., N.S.

Name of ~~observer~~ <sup>reporter</sup> Nancy Kempton (not sighted by N. Kempton)

Name and addresses of ~~others~~ <sup>those</sup> also observing:

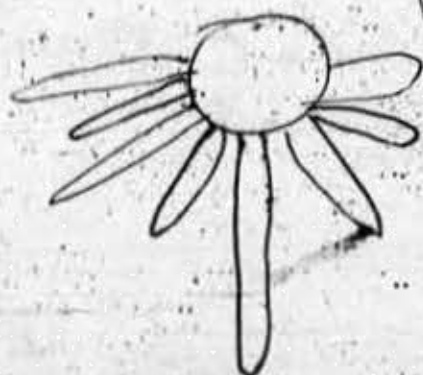

1. Helma Lowell Middletown
2. Forest Lowell
3. Raymond Selig

Description of sighting:

1. Shape - Spherical
2. Size (compared to a known object) Smaller than moon
3. Colour(s) (including any changes) Bright red to pale red
4. Altitude (in degrees above the horizon). (a) at first sighting Fairly high  
(b) at last sight above trees
5. Movement: (a) direction it was going. Just lowering  
(b) speed —  
(c) hovering (if any), height, duration, etc. Ten min.  
first time — one or two min. second time  
(d) any change in speed —
6. Number of objects observed One
7. How long was it observed 10 first time and one or two min. later on
8. Description of any sounds heard — ? (Observers were inside house)
9. Was the sighting seen  
\* (a) through a glass window Yes No — Large picture window  
(b) from a car — Yes No  
(c) in the open — Yes No

\* Observers said they were too nervous to  
(Over) go outside to view it

10. Other information and narrative report.

Bright red  
paling then  
brightening

Lower ray (or appendage) was longer than others.

Finally, it disappeared like the turning out of a light. No motion, speed, blinking, or sound were observed, object was still.

Return to: Professor R. H. MacNeill  
Acadia University  
Wolfville, N. S.

Reported by Fancy Kempton \*  
Address: Middlefield  
Fredericton, N.S.

\* not sighted, only reported by  
(once, please)

Unfortunately, I myself did not see the object although it was in full view from my home had I been looking at that time.

Object was viewed from here.

Highway  
Home of Dowells

Mr. Selig was a visiting neighbour at the home of the Dowells that evening.

Object <sup>W</sup> may have been a little farther to S with than in this sketch.

Another object was viewed near here in October (evening before incident in Shelburne harbour). This was yellow. Viewer was Mr. Emerson Smith of Brooklyn and two companions. The object was moonlike, changing color from deep yellow to pale near horizon finally sinking out of sight and leaving afterglow visible in the open.

Middlefield is directly under path of planes from Greenwood to Yarmouth, but perhaps this has no bearing on matter.

Report received from Mrs. <sup>Charles</sup> ~~Carol~~ Forbes  
Southview Avenue  
Kentville, N. S.  
relative to a sighting at 3 a.m., 7 January 1968.

She reported that the object she saw was orange in colour with a blue tinge on the bottom which resembled a series of exhausts coming from the bottom of the object. The object appeared to be approximately the size of the sun, but of course not as bright. The object moved in from the north, slowed and stopped, hovered for approximately an hour and a half over what would be, from her observation point, the Cornwallis River. She reported that it at times gave off "balls" of fire from the bottom part of it, which resembled what one might see from the exhaust of an engine when the carbon would be well burned and you would get a blue flame. Eventually, the object turned and came towards their house, at which time Mrs. Forbes headed for bed. She was asked why she did not call her husband to see this, but her answer was that it would probably have disappeared by the time he got there and he would have been somewhat annoyed at being disturbed. There were reflections on the windows and blue flashes from this object, with these so-called "star balls" falling from the bottom. She heard nothing and was and was, by her own admission, too scared to open the door to view it from that point. At one time she thought it might have the appearance of disintegrating, but it did not. These were the times, I presume, when there would be spurts of balls of fire falling "from underneath". All in all, a remarkable experience. I am attaching a copy of the rough notes I made on it when she phoned this sighting in.

## UFO seen on Valley farm

**DEEP RIVER (Special)** — An unidentified flying object, the second seen north of Ottawa in 14 hours, interfered with a family's television reception and disrupted their supper Thursday evening.

The object was spotted three miles south of Deep River on the farm of W. J. McCarthy off the Wylie Road.

Miss Mary McCarthy, 65, a retired CPR wire operator said her 16-year-old nephew Lee Elliott, one of six children of Mrs. Dan Elliott who also live at the farm, had first sighted the object from the supper table.

16 feet across

Miss McCarthy described it as being extremely bright and about 16 feet in diameter. It remained in a stationary position on a hill she said about 1/4 of a mile from the farm house.

She said the bright yellow lights would dim at short intervals but that the object also appeared to have red lights glowing from its outer rim which seemed to leave and return again.

"When the object was spotted at 6.43 p.m., the television set went on the blink," she added.

Two of Mrs. Elliott's children Francis, 8, and Jammie, 3, cried during the ordeal but older sisters Cathy, 12, and Margaret, 13, began to draw pictures of the object.

Miss McCarthy said, "I

was more curious than scared. If the snowmobile was working, I would have gone to investigate."

Cut off TV

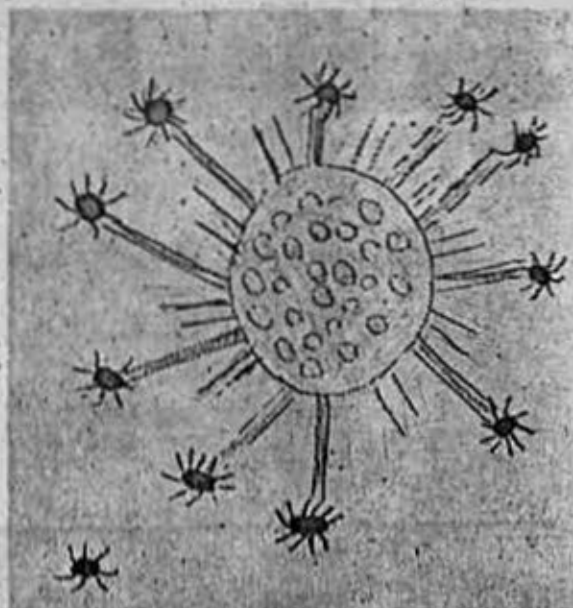

"When the object disappeared about 40 minutes later the television reception was restored," she added.

Miss McCarthy said she had telephoned the town police department and neighbors William Gleason and Mrs. Eddid Hogue when the object was sighted. The two neighbours arrived to witness the spectacle but the

police cruisers came — after it had vanished.

Another sighting of an unidentified flying object was reported by three Ontario Provincial Police officers about 6 a.m. Thursday.

"A brightly lighted" object was seen in the sky one mile south of Killaloe Station by OPP Constable Ted Wark. He radioed two other OPP officers near Barrys Bay who reported seeing a similar object. Barrys Bay is 40 miles south west of Deep River.

The Elliott girls Cathy, 12, and Margaret, 13, made this drawing of the object

CITIZEN SAT 10 FEB 68

## Area UFO just flares from planes

**PETAWAWA (Special)** — The Canadian Forces Base here has solved the mystery of the "unidentified flying object" seen by residents Thursday night in the Pembroke area.

Capt. Ken Parks, an information officer at the base, said planes were shooting flares in the area at the same time residents spotted the object.

A number of persons reported seeing a bright blinding light ringed with small red lights.

Sighting 8 March 08<sup>h</sup> U.T.  
Belleville area

N681015

1. Reported to Radio str CJBQ (Trenton-Belleville) by LN employee, Brighton, Ont. Man was on duty; attention drawn by explosion. Went outside. Heard like train whistling by. Duration estimated as couple of minutes. Memory of newscaster buzz and notes lost.

N681016

2. Mrs. Jane D. Orland, Worker, Ont. Awakened by explosion. Went to living room; looked out window facing west. Bright white light moving toward south. Heard, like group of airplanes. Duration of time light visible about 1 minute. Did not move as fast as falling star. As bright as full moon. Weather clear, stars showing. Time at end of event: 0305 E.S.T.

3. Mr. Van Vaals, Worker. N681017  
"Heard buzzing sound coming in. There was a loud bang which shook the house. Then buzzing went away. Duration: about 3 minutes at most. Mr. Van Vaals did not get out of bed to look. He is accustomed to the sound of aircraft from Trenton. Not like anything he had ever heard before."

Flying Saucers.

Feb 18 1968

Ralph Chamberlain

1661 Grant Av.

Lincoln Park Mich 48146

Dear Sirs.

On Friday evening Feb 16 about 7 Pm to 7.30 I noticed over the Detroit River and Windsor Ont. a disk shape Glowing white. with a white light trail above and below going out from it 180 d. it was on edge. as a silver dollar standing on a table. ( with the moon as a dime alongside it.)

on sat evening with my 7 x 50 I watched in same area a saucer unit that became three white saucers small and then as one again. making z shaped and other types of saucer capers. sometimes white with a blueish ( with naked eye ) but small white with 7 x 50. while over Wyandotte Mich way I saw a cigar shape about 20-30 mm long in my 7 x 50 unit. WITH DISTINCT RED AT TOP WHITE CENTER AND BLUE BOTTOM STAYED IN SAME SECTION.

LOOKING AT IT WITH NAKED EYE ONE WOULD SAY IT WAS A STAR BUT A LITTLE BRIGHTER.

while a shop time keeper with a cottage near BobLo island on the canadian side at about 6 P. one night his wife stepped on porch and back in quickly a saucer was in lake erie low. this is two years in a row she has seen one there. I asked him to have his wife write it up and send in to the Navy, she did.

today feb 23 I saw a nice red bright light over Dearborn from home then as I drove to work at 4.10 am I saw it still but it was moving NOT AN AIRPLANE THOU.

I have 20 hrs. in cessana and piper cherokee.

Mr B A Mc Intosh,

We heard over Radio last evening  
that you requested any one that seen an  
thing in the air would they report it  
Well on Wed Mar 13 we seen a orange thing  
up in a tree not far from our Place my grand-  
son ~~then~~ went down & got part way up the  
tree it looked like a light brown sheet  
with orange color Paper fastened to ce  
loops from that a white boy do not  
knowing what it might be he came  
on back & I called the O.P.P. at Belleville  
They came down & got it down out of  
tree they said it was a weather  
ballon the boy was Plastic

with an airo<sup>20</sup> about 12" x 10" it was  
printed on the box if found send to mailing  
in U.S.A. so the C.P.P. took it with them,  
hoping this information will help you.

Mr. A. F. McQuarrie  
Officer in Charge  
Department of Transport  
Weather Office  
Gonzales Observatory  
Victoria, British Columbia

Dear Mr. McQuarrie:

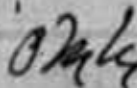

Thank you for your letter of March 14. I will acknowledge Mr. Corey's observation. His photograph looks like a typical star trail to me but there may have been some other origin for the light. I will make some suitable comments in my reply to him.

Please note that my address is simply:

Dr. Peter M. Millman  
National Research Council  
Ottawa 7, Ontario

We have just recently taken on the responsibility for filing and cataloguing all reports of sightings in the sky that come to the Government. Apart from the fireball and meteor reports, we do not solicit unidentified object reports and we only investigate reports that seem to be of scientific interest.

Sincerely yours,

Peter M. Millman

PMH/vm

Mr. H. W. Corey

2

March 28, 1968

seems to bear out this hypothesis.

Thank you for your interest in submitting these observations for study.

Sincerely yours,

Peter M. Millman  
Head of Upper Atmosphere Research

PMM/vm

c.c. Mr. A. F. McQuarrie

P.S. By the way you should tell your friends not to get frightened by what they see in the sky. We have never had any evidence of dangerous things in the sky apart from man-made aircraft during war and the possibility of being struck by lightning in a thunderstorm. Meteorites do fall but the chance of one hitting a person is extremely remote, and the authentic cases of such an event in the whole history of the human race can be counted on the fingers of one hand.

March 28, 1968

Mr. M. W. Corey  
431 Blythe Avenue  
Hannam, British Columbia

Dear Mr. Corey:

Your interesting observations outlined in your letter of March 11 have been forwarded to me by Mr. McQuarrie at the Comales Observatory. I have placed your observations on our file of aerial phenomena which is maintained at the Meteor Centre.

I cannot give you a full explanation of what you and your friends have seen as there is not enough data to do this. However, I can make a few comments which may or may not be applicable. These stem from my experience of over forty years in dealing with observations of things seen in the sky.

You mentioned that you had some films with an interesting image on them but that apparently you erased an image on the emulsion while attempting to clean the negatives. Unless you destroyed the emulsion completely, you would not erase a true image and this leads me to suspect that what you had was some kind of a fault or mark rather than an image in the emulsion. There are many types of these and they often can be erased when cleaning a negative.

The second comment refers to the print of your picture taken at 9:20 p.m. on January 29, and your observation of the same date. I cannot be sure of what you saw but I can say that, in the position you gave just at that time and from your latitude, the bright star Vega was just below your horizon. Frequently, an anomalous refraction will enlarge the image of a star in this position and bring it up above the horizon giving it various peculiar notions as the refraction effects vary. The image on the picture you took looks very much like a bright star image and has about the right motion. I am not saying this is what you actually saw, but it certainly is a possibility and the picture

Dear Dr. Millman,

From time to time this office receives reports of Unidentified Flying Objects. Dr. Wright has suggested that you might be the best "contact man" for matters of this type.

Mr. M. W. Corey, 431 Blythe Avenue, Nanaimo, has submitted several reports in the past. I am attaching his latest report, together with a photo for your examination and action as warranted.

Kindest regards,

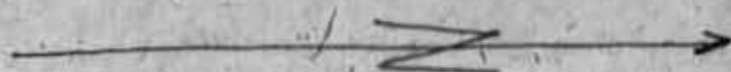

A. F. McQuarrie  
Officer in Charge.

March 11, 1968.

Mr. A.F. McQuarrie  
Gonzales Observatory  
Dear Sir:

Further to our conversation at my home I would like to submit the following information. I wrote to the Research Council and was told that they had no information or equipment at their disposal for me to use, but suggested that I contact the Vancouver Branch of the Royal Astronomical Society of Canada as they felt certain that they would be able to assist me in this matter. This I have now done and will wait for their reply.

When we last met I told you that I had two sightings on film that were taken over Nanaimo at night around the 9th of October. These were developed by Dakin's studio here, but required special carriers to be made for the enlarger. While attempting to clean the negatives after inserting them into the carriers I apparently erased the image on the emulsion. The drawings enclosed are approximately what was shown on the negatives but about 1/50th that size.

The next sighting was made by A. Hulse and wife of 591 Hamilton Ave., Nanaimo at 0650 hours November 21/67. N68/023

"A huge green glowing ball by the Rangers tower up on Mt. Benson. About the same shade of green as a neon sign green. It remained motionless for about ten minutes and then simply vanished from sight. Both Mr. Hulse and his wife were very frightened by its appearance and disappearance.

The photo I am enclosing was made by myself with a f 1.2 camera I made and was taken at 21:20 hours Jan. 20/68. I hope the enclosed sketch will be explanation enough. N68/024

I trust this will be helpful to you.

Yours truly

*M.W. Gorey*

Mr. Ralph G. Chamberlain  
1661 Grant Avenue  
Lincoln Park, Michigan 48146  
U. S. A.

Dear Mr. Chamberlain:

Thank you for your letter of March 26.  
I do not think you need to send the material you mention  
across the border. If U.S.A.F. Blue Book has already seen  
it, this is sufficient. In general, we do not concern  
ourselves with material that has fallen South of the Canadian  
Border since this is properly investigated by agencies in the  
U.S.A. We are always happy, however, to have fireball obser-  
vations whether they come from Canada or the United States.

With best wishes,

Sincerely yours,

Peter M. Hillman

Upper Atm. Re.

Dear Sirs.

Saw A Saucer Blinking in sky Sunday March 24 Th at 0345 am  
from my Home in Lincoln Park Mich it was North of Boblo island.  
High and stationary

also I have a 2 1/2 or so pound of metal with what looks like radio  
type of wires or condensers in it somethat mettalic.

and jagged broken off. I found it on my stone driveway in 64.  
used for two years on top of my tv as decorational.

checked it out with U.S.A.F. BLUE BOOK. TOLD ME IT WAS A  
BERYL METAL ALLOY. ( Note.)

But no explaninational of the wires it has.

be glad to send it one way if you wish too look it over and  
tear it down ok with me.

Ill have to box it up oversized U.S. MAIL I HAVE BEEN GETTING  
RECENTLY SEEMS TO COME BANGED UP. perhaps i had better mail it  
in windsor after work some day.

Sincerely Ralph G. Chamberlain

Dear Sirs.

March 29 and 31 at 3-4 am again.

Unit appeared both days in morning again over dearborn Mich way.

This unit has round disk with a semi teardrop of solid white leaning from

6 o clock towards 5 o clock see drawing.

i could see in sky high up with naked eye and using 2 power opera glasses rated 16 miles distance noted the saucer part on top was like looking at a basketball with red lights piloting in glass all around.

this on the 29 while going to work at 4 am.

on 31 at 3.20 am till about 3.45 am then light could covered it.  
did not see while driving to work.

FOR CFC. POSSIBLE UFO REPORT. THE FOLLOWING REPORT RECEIVED IN THIS OFFICE CONCERNS AN IMPRESSION ON THE GROUND IN THE RED DEER AREA WHICH LOCAL PEOPLE ARE CONCERNED ABOUT. LOCATED ON PROPERTY OWNED BY CONRAD HANSEN LOUSANA, ALTA. THERE IS AN OVAL SHAPED IMPRESSION BURNED INTO ONE OF HIS PASTURES. IT IS 28 TO 20 FEET IN LENGTH AND 8 TO 10 FEET ACROSS. THERE ARE FOUR ROUND HOLES 6 IN ACROSS 3 IN IN DEPTH WITH A SMALLER HOLE ON EITHER SIDE OF THE LARGER ONES. GRASS IS COMPLETELY BURNED AWAY AND A LARGE ROCK IN CENTER OF AREA BURNED AND BLACKENED. THIS OFFICE CONTACTED MAJOR KELLY, BASE COMMANDER AT CANFORBASE PENHOLD AND INFORMED HIM AND SUGGESTED THAT POSSIBLY NRC OR RCMP DET RED DEER LOOK AT THIS IMPRESSION AND RECORD IT ON FILM, IF POSSIBLE, BEFORE INCLEMENT WEATHER DESTROYS IMPRESSION. POSSIBLY NCR WOULD BE INTERESTED.

Captain S. B. Goddard  
Canadian Forces Base Penhold  
Mynarski Park, Alberta

Dear Captain Goddard:

Thank you very much for your co-operation in investigating the recent report of an incident on the farm of Mr. Hansen. It is very helpful to have someone run these things down to earth. I am afraid that the more I study this field, the more I realize how much hoaxing has occurred on the part of pranksters and publicity seekers. Please pass on my thanks to those who assisted you in this matter.

Sincerely yours,

Peter M. Millman

The following report was received by phone, July 8, 1968 from:

Mr. Champagne

Phone 2-5368

Saturday evening, July 6th, 1968 at 8:53 EDT. I saw in the general direction of the Pole Star what appeared as a bright star. With the aid of binoculars it appeared to be 100 miles out. After observing it 4 to 5 minutes with the binoculars it exploded or seperated. A smaller section flew off the main one in a Northern direction some distance from the larger one. An example of the distance- 1000 x diameter. While they seperated at a terrific speed there appeared to be smoke or haze between them and then inside of one minute both faded out. Observed the time - 8:57 PM.

The object appeared like a very brilliant white star--equal in magnitude to the evening star. The observed object was stationary.

The object was observed by Mr. Champagne with the binoculars and by his wife with the naked eye.

Unidentified Flying Objects

On Wednesday, June 19th, 1968, at approximately 10:30 p.m. an unidentified flying object was seen in the sky above Frobisher Bay in a northerly direction. The object appeared to be a star moving very slowly across the sky in a west to east direction. The local camera enthusiasts were out in full force. The object disappeared sometime after midnight.

The Department of Transport meteorological officer in Frobisher Bay is of the opinion that the object was an experimental or weather balloon at a height of well over 100,000 feet.

There have been no reports of landing by little green men or other weird non-world creatures. Furthermore, there have been no reports that all our women are pregnant.

*D. Davies*

D. Davies  
Regional Administrator

Received from Mr. A. Stevenson, Administrator of the Arctic, and member of the Associate Committee on Meteorites, and forwarded as a non-meteorite sighting.

Mr. Stevenson has been informed it is being sent on.

RE:  
OBJET:

Unidentified Flying Object. - Shediac, West., Co., N.B.

8 JUL 68

8 JUL 68

1. On the above date Cst. B. Richard contacted this office, advising that he had sighted an unidentified flying object in the north east sky over Shediac, West., Co., N.B. at approximately 9.30 P.M. He stated that he observed the object for about 15 minutes through binoculars. After being stationary at about two to ten thousand feet in a clear visible sky, it suddenly disappeared vertically in about a minute's time. Cst. Richard gave a description as follows: Egg shaped

Three bars lengthwise

One bar across

Bars coloured yellow and blue

Rest white

No lights of any description

2. Other people who also noted this object in the sky were Mrs. Dorothy Goguen, wife of Chief of Police, Shediac, N.B., Mrs. Bernard Richard and Mr. and Mrs. Omar Goguen of Shediac, N.B. These people are all of good character and are known to be respectable citizens of this community and are reliable.

9 JUL 68

3. On the above date The Department of Transport Meteorology Centre at Moncton Airport was contacted. They stated that they had many calls during the previous night concerning the matter. They said it could possibly be the planet of Venus which appears in the month of July. However, they stated that it would appear in the north west not the north east as where the U.F.O. was reported sighted. Several people working in the tower at the airport viewed the object through binoculars and stated that it looked like a weather balloon, probably from the U.S.A. The Meteorology Centre concluded that it was almost definite that the U.F.O. report was a weather balloon which is released about four times a day at different points. He stated this balloon could possibly have drifted from either Portland or Caribou Maine, U.S.A.

CONCLUDED HERE

RE  
OBJET

Unidentified Flying Object. Sighting of,  
Tobin Road, Sydney Mines, N.S.. 12-7-68.

" 12 JULY 68 "

- At approximately 9:45 P.M., Cst. H.D. WATTS received a telephone call from Victor PYE, Tobin Road, Sydney Mines, advising that something had landed in a field across from his home and started a fire in the grass. He was unable to contact the Sydney Mines Town Police who police this area.
- Cst. WATTS and I patrolled to the scene where PYE was contacted. He advised that at approximately 8:00 P.M. he was in his living room watching T.V. when all of a sudden he heard a loud bang that shook the house and he saw a blue flame in the sky outside. The power in the house went out for a few seconds then came back on. He looked out the front door and saw a small grass fire burning across the road from his place. He and several other local residents ran over and put the fire out. Harold RASMUSSEN, Diggin St., Sydney Mines; who lives approximately 100 yards from PYE, advised that at approximately 7:50 P.M. he saw what appeared to be an object similar to a car headlight with flames trailing, coming towards the ground from the direction of Sydney Harbour, which would be an East to West direction. The object, which made a roaring noise as it passed him, struck the power lines in front of PYE'S home causing a loud bang and a blue flash and smoke to appear around the power lines. He ran over to the scene where he noted the grass fire. The grass burned in a 3 sq foot area and in a perfect circle. A small rock, about the size of an orange, was found in the centre of the burnt grass. This, along with samples of the burnt grass and dirt were collected and brought to this office. Numerous other residents in the area were questioned but all they could say was they heard a loud bang and the power went off momentarily.
- The local radio stations broadcast this incident which resulted in hundreds of persons coming to the scene causing a major traffic snarl. Cpl A.A. MATHESON and Cst. S. CLARK were called to the scene to assist. Members from the Eastern Light and Power Company, Sydney, advised that at 8:00 P.M. a green light on their control panel in Sydney indicated there was a power shortage in the vicinity of Tobin Road. They investigated it and found that some object had struck the power lines in front of PYE'S house causing the lines to become pitted and very shiny for a distance of 10 feet in both directions from the point of impact. Residents on Shore Road on the Sydney Harbour waterfront, were questioned but none saw or heard anything at around 8:00 P.M.. Message # 25 was forwarded to Sydney Sub/Division advising of the incident.

" 17 JULY 68 "

- Mr. John DOUGLAS, Geological Survey of Canada, Ottawa, Ont., telephoned Cpl MATHESON and requested that we forward the rock and other samples to his office so they could be examined.

RE:  
OBJET:

Unidentified Flying Object.

PAGE  
Two.

(CONTINUED FROM PAGE ONE).....

" 7 AUGUST 68 "

5. The rock and samples were forwarded to Mr. DOUGLAS along with a letter advising the circumstances surrounding the incident.

6. From the investigation conducted, it is felt that the object was a meteorite and not a U.F.O.. In view of this, this file will be closed.

Re: Unidentified Flying Object. Sighting of.  
Tobin Road. Sydney Mines. N.S. - 12-7-68

Receipt is acknowledged of your report dated August 21st, 1968.

2. It is noted this incident occurred on July 12th, however, no report submitted until some 40 days had elapsed. Such tardiness cannot be tolerated and I will not anticipate having to bring this to your attention in future.
