Occurrence:

02 MAY 76, Sunday Trotter, Howard age 18 YRS. L2-C1 Tudor Twp. R.R. 3 Madoc Ontario was putting cattle in a pasture field north of their farm when he noted 3 large holes in the field. These holes were viewed by Trotter, Reginald and son Trotter, Elmer as well as some neighbours. No explanation could be given for these holes.

12 May 76 Wednesday Trotter, Elmer reported findings to CFB Trenton.

NARRATIVE

12 MAY 76 Wednesday the farm of Trotter, Reginald was visited and in a field north of the farmhouse consisting of 11 acres, the following was found.

3 holes were found as shown with measurements above. All holes ranged from 8" to 10" deep with square outside edges.

The sod from these holes is shown by shading, completely intact as though lifted from holes and then

placed to the east in the same pattern as the holes.

Neither the sod nor the soil in the bottom of the holes was depressed.

There were no tracks of vehicles in this area and the field has not been plowed for five years.

There are no farms north of Trotter's and there are no roads to permit vehicles.

There have been no reports of unusual occurrences in this area to our knowledge.

Photographs:

Photographs were taken of each hole including section of sod from each one as well as location shots.

RE - OBJET: **PILON Rachelle**
DOB: 28-2-55
Unidentified flying objects

JUN 3 0 1976

1. Further to telex dated 16 MAY 76 regarding sighting of UFO on the 15-5-76.

2. Miss Rachelle PILON of 4825 Edouard-Montpetit, apt. 2, Montreal, Quebec was interviewed in the presence of her boyfriend Marcel POLIQUIN, DOB: 23-12-52, 5717 De Laroche, Montreal, Quebec who was also present at the time of the sighting. Both corroborated sayings on telex but a few more details were obtained.

3. The approximate height of this object was not 5,000 feet as mentioned previously but 500 feet. It should be noted that these subjects stated that they do not use any alcohol or drugs.

4. During the interview, Miss PILON and Mr. POLIQUIN appeared frank and sincere. However, the investigator feels that this incident is questionable even though the witnesses actually believed they saw something.

CONCLUDED

Telephone call taken by BATT 21/4/76
from PAUL GREY
2461 HEATON ST.
OTTAWA K1G 1S1

E. 50°
D.

Seen Sunday evening - 18 April
from front porch of residence (Hawthorne
Meadows), about 10 P.M., looking SW.
Bright object flashing red & blue seen
over neighbour's roof ("about 1 yard above
roof"). Stationary; got close to roof
and dropped out of sight after about 45
minutes.

This seems to be a perfect description
of a twinkling star setting behind
an object in a westerly direction.

Later (about 11 P.M.) he mentioned
sighting to neighbour and they saw
a second object, this time in north-west.
Described as stationary but "moved
away". Observer seemed to mean that
it faded out. (Gradually dropped
into the increasing haze toward the
horizon?)

AND GOOD FAITH. INTERVIEW CONDUCTED AT NOON, 24 HOURS AFTER
ALLEGED SIGHTING. HE WAS NOT DRINKING. HE NOTED HE WAS NOT
DRINKING AT TIME OF ALLEGED SIGHTING. HE WAS ARTICULATE AND
SPOKE IN REASONED TERMS ALTHOUGH HIS ATTEMPTS TO DEFINE
ALTITUDES AND DIMENSIONS OF OBJECTS WERE PERHAPS OVER-PRECISE
D. THE OBSERVER WAS STANDING IN THE SALES LOT OF SUBURBAN MOTORS
FOR DURATION OF SIGHTING. SAVE FOR ONE ABSENCE
E. APPROXIMATELY 15 PEOPLE IN SITU ALSO OBSERVED THE SIGHTING.
TWO WHO CONSENTED TO GIVE THEIR NAMES WERE: DOUGLAS MURPHY
1120 MAY STREET, VICTORIA-BC TEL NO AND SIN TO FOLLOW
MICHAEL MCKENNA, 2859 GLEN LAKE ROAD VICTORIA BC TEL 478-1493
(SIN TO FOLLOW). BOTH ARE EMPLOYEES OF SUBURBAN MOTORS
F. AT 2010 GMT THE OBJECTS WERE SIGHTED BY BENNETT. THEY
APPEARED TO BE AT AN ALTITUDE OF 500-1000 FEET. THE OBJECTS
WERE DESCRIBED AS PERFORMING RANDOM MANOEUVRES IN BOTH VERTICAL
AND HORIZONTAL PLANES WITHIN AN AIRSPACE BLOCK ABOUT 15-20 TIMES
THEIR DIAMETER. BECAUSE OF SOLAR REFLECTION AS THEY ASSUMED
VARIOUS ATTITUDES OBSERVER SAYS HE NOTED THAT TOP OF OBJECTS
WAS HIGHLY REFLECTIVE (AS CHROME) WHILE UNDERSIDES APPEARED
TO BE KHAKI-COLOURED WITH MINIMAL REFLECTIVE PROPERTIES.

PAGE 3 ROWEN 243 UNCLAS

THEY APPEARED TO BE THE SIZE OF LARGE BIRDS WITH SHEPT-BACK
GULL WING CONFIGURATION. THERE APPEARED TO BE VIRTUALLY NO
FUSELAGE, WINGS BEING THE PREDOMINANT FEATURE. THE UNDERSIDE
APPEARED TO BE LINED WITH NEAT ROWS OF VENTS. THE VENTS RUNNING
PORT/STARBOARD IN FORE AND AFT ROWS. EACH ROW WAS SEPARATED BY
WHAT APPEARED SIMILAR TO A REINFORCING MEMBER. OBSERVER CLAIMS
HE NOTED CLEARLY THAT LEADING EDGES WERE THICK AND ROUNDED
TAPERING TO KNIFE EDGES AT TRAILING EDGES. AT EACH WINGTIP
APPEARED TO BE A NOZZLE AS, FOR EXAMPLE, A JET EXHAUST
OBSERVER IS OF THE OPINION THAT, IN FACT, A TUBE RAN ROUND THE
ENTIRE LEADING EDGE TO CULMINATE IN THESE QUOTE THRUST NOZZLES
UNQUOTE. OBSERVER WAS IMPRESSED BY THE FACT THAT DESPITE THE
RAPID AND RANDOM NATURE OF THE MANOEUVRES EXECUTED BY THESE
OBJECTS THERE WAS ABSOLUTELY NO FLEETING OF THE RELATIVELY THIN
WINGS. THERE WAS NO NOISE OF ANY KIND ACCOMPANYING THE MANOEUVRES.
WHAT FUSELAGE THERE WAS HAD A NOSE LIKE THAT OF A FROG. THE TWO
OBJECTS HAD NO PARTICULAR DIRECTION TO THEIR MOVEMENTS BUT
APPEARED TO BE WAITING TO ESTABLISH FORMATION. THEY WERE
JOINED BY THREE MORE IDENTICAL OBJECTS AFTER AN UNSPECIFIED PERIOD
OF TIME - ONE OF THESE APPEARED TO HAVE CLOSED UP FROM THE

PAGE 4 ROWEN 243 UNCLAS

QUADRA/HILLSIDE ST AREA. A SECOND OBJECT WAS SIGHTED AT 2026
GMT. IT IS DESCRIBED AS A PERFECT SPHERE WITH ABOUT THE SAME
REFLECTIVE INDEX AS A MEDIUM-BRIGHT MOON. IT WAS BLUISH-WHITE
WITH A WHITE CORONA THAT ALMOST TOUCHED ITS SKIN. IT REMAINED
STATIONARY FOR 45 MINUTES AND THEN MOVED PARALLEL TO THE EARTH
NW BY W. IT DESCRIBED A COURSE BEGINNING OVER CORDOVA BAY (ABOUT
FIVE TO SIX MILES FROM THE OBSERVER) AND LAYING SAANICH INLET
(ALSO APPROX SIX MILES FROM OBSERVER) IT TRANSITED APPROXIMATELY
45 DEGREES OF ARC WITHIN 60 SECONDS BEFORE BECOMING OBSCURED
WHEN IT PASSED IN FRONT OF A LINE OF CLOUDS. SHORTLY PRIOR TO
THE LARGE OBJECTS DISAPPEARANCE ONE OF THE SMALL OBJECTS FLEW
RAPIDLY SOUTH. THE OTHERS WERE NOT OBSERVED AS THEY DISAPPEARED.
THEY WERE SO THIN THAT WHEN THEY PRESENTED A FORE AND AFT LINE
TO THE OBSERVER THEY COULD NOT BE EASILY SEEN
G. THE DURATION OF THE SIGHTING WAS JUST OVER ONE HOUR. IT SHOULD
ALSO BE NOTED THAT MR. BENNETT LEFT THE PARKING LOT WITH A
CUSTOMER TO ENTER THE OFFICES OF SUBURBAN MOTORS FOR ABOUT 15
MINUTES DURING THE SIGHTING
H. THE OBSERVER REPORTS HE FELT THAT THE LARGE SPHERICAL OBJECT
DESCRIBED WAS SOMEHOW IN CONTROL OF THE OTHER OBJECTS SIGHTED.

PAGE 5 ROWEN 243 UNCLAS

AS A FOLLOW-UP INQUIRIES WERE MADE OF GONZALES HOME OBSERVATORY
VICTORIA COLONIST, VICTORIA TIME AND VICTORIA INTERNATIONAL
AIRPORT. THERE HAD BEEN NO SIGHTINGS REPORTED TO THESE SOURCES.
A SKETCH OF THE OBJECTS AS DESCRIBED BY MR BENNETT WILL FOLLOW
BY MAIL. FURTHER ATTEMPTS ARE BEING MADE TO INTERVIEW OTHER
WITNESSES. REPORT WILL FOLLOW

E. APPROXIMATELY 15 PEOPLE IN SITE ALSO OBSERVED THE SIGHTING.
TWO WHO COMMENTED TO GIVE THEIR NAMES WERE DOUGLAS MURPHY
1120 HAY STREET, VICTORIA BC TEL NO AND KEN TO FOLLOW.
MICHAEL MCNEEN, 2830 CLEN LAKE ROAD VICTORIA BC TEL 478-1483
WAS TO FOLLOW. BOTH ARE EMPLOYEES OF SUBURBAN MOTORS.
F. AT 2400 HRS TWO OBJECTS WERE SIGHTED BY BENNETT. THEY
APPEARED TO BE AT AN ALTITUDE OF 200-1000 FEET. THE OBJECTS
WERE DESCRIBED AS PERFORMING RANDOM MANOEUVRES IN BOTH VERTICAL
AND HORIZONTAL PLANES WITHIN AN AIRSPACE BLOCK ABOUT 15-20 TIMES
THEIR DIAMETER. BECAUSE OF SOLAR REFLECTION AS THEY ASSUMED
VARIOUS ATTITUDES OBSERVER SAYS HE NOTED THAT TOP OF OBJECTS
WAS HIGHLY REFLECTIVE (AS CHARGE) WHILE UNDERSIDES APPEARED
TO BE WHITE-COLOURED WITH MINIMAL REFLECTIVE PROPERTIES.

PAGE 3 REVEN 243 UNCLAS

THEY APPEARED TO BE THE SIZE OF LARGE BIRDS WITH SWEEP-BACK
DULL WING CONFIGURATION. THERE APPEARED TO BE VIRTUALLY NO
FUSELAGE, WINGS BEING THE PREDOMINANT FEATURE. THE UNDERSIDE
APPEARED TO BE LINED WITH NEXT ROWS OF VENTS, THE VENTS RUNNING
FORWARDWARD IN FORE AND AFT ROWS. EACH ROW WAS SEPARATED BY
WHAT APPEARED SIMILAR TO A REINFORCING MEMBER. OBSERVER CLAIMS
HE NOTED CLEARLY THAT LEADING EDGES WERE THIN AND BOUNDED
TAPERING TO KNIFE EDGES AT TRAILING EDGES. AT EACH WINGTIP
APPEARED TO BE A NOZZLE AS, FOR EXAMPLE, A JET EXHAUST
OBSERVER IS OF THE OPINION THAT, IN FACT, A THIN BAN ROUNDED THE
ENTIRE LEADING EDGE TO COORDINATE WITH THESE QUOTE THIN NOZZLES
UNQUOTE. OBSERVER WAS IMPRESSED BY THE FACT THAT DESPITE THE
RAPID AND RANDOM NATURE OF THE MANOEUVRES EXECUTED BY THESE
OBJECTS THERE WAS ABSOLUTELY NO FLICKING OF THE RELATIVELY THIN
WINGS. THERE WAS NO NOISE OF ANY KIND ACCOMPANYING THE MANOEUVRES.
WHAT FUSELAGE THERE WAS HAD A NOSE LIKE THAT OF A FROG. THE TWO
OBJECTS HAD NO PARTICULAR DIRECTION TO THEIR MOVEMENTS BUT
APPEARED TO BE WAITING TO ESTABLISH FORMATION. THEY WERE
JOINED BY THREE MORE IDENTICAL OBJECTS AFTER AN UNSPECIFIED PERIOD
OF TIME - ONE OF THESE APPEARED TO HAVE CLOSED UP FROM THE

PAGE 4 REVEN 243 UNCLAS

SHADRA/HILLING ST AREA. A SECOND OBJECT WAS SIGHTED AT 2000
HRS. IT IS DESCRIBED AS A PERFECT SPHERE WITH ABOUT THE SAME
REFLECTIVE INDEX AS A MEDIUM-BRIGHT MOON. IT WAS SLIVER-WHITE
WITH A WHITE CORONA THAT ALMOST TOUCHED ITS SKIN. IT REMAINED
STATIONARY FOR 45 MINUTES AND THEN MOVED PARALLEL TO THE EARTH
NW BY W. IT DESCRIBED A COURSE BEGINNING OVER CORDOVA BAY (ABOUT
FIVE TO SIX MILES FROM THE OBSERVER) AND LAYING SHARCK INLET
(ALSO APPROX SIX MILES FROM OBSERVER). IT TRANSMITTED APPROXIMATELY
45 DEGREES OF ARC WITHIN 45 SECONDS BEFORE BECOMING DISCOVERED
WHEN IT PASSED IN FRONT OF A LINE OF CLOUDS. SHORTLY PRIOR TO
THE LARGE OBJECTS DISAPPEARANCE ONE OF THE SMALL OBJECTS FLEW
NORTH-SOUTH. THE OTHERS WERE NOT OBSERVED AS THEY DISAPPEARED.
THEY WERE SO THIN THAT WHEN THEY PRESENTED A FORE AND AFT LINE
TO THE OBSERVER THEY COULD NOT BE EASILY SEEN.
G. THE DURATION OF THE SIGHTING WAS JUST OVER ONE HOUR. IT SHOULD
ALSO BE NOTED THAT MR. BENNETT LEFT THE PARKING LOT WITH A
CUSTOMER TO ENTER THE OFFICES OF SUBURBAN MOTORS FOR ABOUT 15
MINUTES DURING THE SIGHTING.
H. THE OBSERVER REPORTS HE FELT THAT THE LARGE SPHERICAL OBJECT
DESCRIBED WAS SOMEBODY IN CONTROL OF THE OTHER OBJECTS SIGHTED.

PAGE 5 REVEN 243 UNCLAS

AS A FOLLOW-UP INVESTIGATION WERE MADE OF COMPLEX SOME OBSERVATORY
VICTORIA COLONIST, VICTORIA TIME AND VICTORIA INTERNATIONAL
AIRPORT. THERE HAD BEEN NO SIGHTINGS REPORTED TO THESE SOURCES.
A SKETCH OF THE OBJECTS AS DESCRIBED BY MR BENNETT WILL FOLLOW
BY MAIL. FURTHER ATTEMPTS ARE BEING MADE TO INTERVIEW OTHER
WITNESSES. REPORT WILL FOLLOW

BKLT/25 RE UFO SITING 4 1/2 DEGREES ABOVE HORIZON, 10 DEGREES WEST OF NORTH, BAKER LAKE, NWT, 24 JUN 74 AT 2:30 PM CENTRAL STANDARD TIME, 25 JUN 74. MR KENNETH MCCULLOCH (B: 15 MAY 29) THE GIC UPPER AIR STATION AT BAKER LAKE, NWT REPORTED THAT AT 0545 GREENWICH TIME, 24 JUN 74, HE WAS AT WORK IN THE OFFICE OF THE UPPER RAMWINSIDE BUILDING WHEN HE MADE THE INITIAL UFO OBSERVATION. THE CONDITION OF THE SKY WAS CLEAR DAYLIGHT WITH THE SUN JUST BELOW HORIZON. THE TIME OF THE OBSERVATION WAS CONTINUOUS FROM 0545 TO 0645 GREENWICH TIME. HE DESCRIBED THE OBJECT AS A POINT SOURCE, WHITE IN COLOR. IT WAS NOT POSSIBLE TO ESTIMATE THE ALTITUDE BUT THE OBJECT WAS APPROX 4 1/2 DEGREES ABOVE HORIZON, 10 DEGREES WEST OF NORTH. THERE WAS NO MOVEMENT. THE OBJECT GRADUALLY FACED. THERE WAS ONLY ONE UFO. IT WAS NOT PRESENT THE FOLLOWING NIGHT. THE OBJECT WAS OBSERVED THROUGH AN EIGHT POWER ELKOW TELESCOPE AND THROUGH A SET OF 10 X 50 BINOCULARS. TO CONFIRM THE SITING, MR MCCULLOCH WENT TO THE TRANSPORT CANADA AERADIO OFFICE AND POINTED THE OBJECT OUT TO THE OPERATOR ON DUTY, MR DONIS PAUL MAJER (B: 29 MAR 53). MAJER CONFIRMED THAT HE SAW THE WHITE LIGHT AND THAT THERE WERE NO OTHER OBSTACLES IN THE SKY. HE HAS NOT BEEN INVOLVED IN ANY PREVIOUS UFO SITINGS AND HAS NO PARTICULAR INTEREST IN SAME. MR MCCULLOCH IS AN

turn off

Zeit spotted it in sky take
2 big red lights 2 on each
side whitest - yellow
red one in centre
pulsating - like revolving
red light - to left seen
out of car window -
first stationary then moved
to left. Pulled over to
side of road - came down
low - moved very smoothly -

crossed H_W to right. Followed
 it then lost it for a while.
 Saw it again Prince of Wales and
 Baseline intersection. - trees obstructed
 view.

Under observation for about
 1 1/2 hours.

in city - Used binoculars, got a
 great variety of colours. Saw four
 more of the objects with flashing
 colours - not like other stars.
 Maybe - stars

Note:- This report, and discussion of it with the
 originator, leads to the following conclusions:-
 - This first sighting was undoubtedly an
 aircraft with its landing lights on.
 - Subsequent observations with binoculars
 were probably stars.

Dear Sir:

Re: U.F.O. Sighting
Salmon Arm, B.C.

1. On 8 JUL 76 at approximately 10:40PM (Pacific daylight time) a call was received at this Detachment office from a Mr. Herbert J. REVEL of Salmon Arm, B.C. REVEL stated he and his wife Elizabeth REVEL observed a U.F.O. from his residence on North Broadview Road. REVEL was facing in a westerly direction towards Fly Hills overlooking the town of Salmon Arm. He stated the object appeared to be a very bright red light hovering over Fly Hills and then moved rapidly across the sky to the South changing to a very bright green. The object then disappeared. REVEL observed the object for approximately three minutes. The conditions at the time were overcast.

2. Immediate attendance was made at the REVEL residence at which time he indicated the direction the object travelled. I was unable to see object or anything unusual. Attendance made to location where object disappeared however nothing located.

3. REVEL and his wife were the only persons who observed this object and no other reports were received. REVEL appears to be of good character and was very sincere about the object which he definitely felt was a U.F.O.

Yours truly,

E.A. Roggeveen

the apro bulletin

The A.P.R.O. Bulletin is the official copyrighted publication of the Aerial Phenomena Research Organization, Inc., (A.P.R.O.), 3010 E. Kleindale Rd., Tucson, Arizona 85712, and is issued every month to members and subscribers. The Aerial Phenomena Research Organization, Inc., a non-profit corporation established under the laws of the State of Arizona and a federally recognized scientific and educational tax-exempt organization, is dedicated to the eventual solution of the phenomenon of unidentified flying objects. Inquiries pertaining to membership and subscription may be made to the above address.

VOL. 24, NO. 9

TUCSON, ARIZONA

MARCH, 1978

THE JOHNNY SANDS CASE

Notice To Members

We can appreciate your concern regarding our delayed publication schedule for the Bulletin. The following will give some insight regarding our current situation.

Early in April both Jim and Coral Lorenzen had severe cases of the flu. While recovering from the flu, Jim Lorenzen began experiencing the painful symptoms of Angina Pectoris. Increasing discomfort indicated the necessity of an Angiogram (a surgical procedure) which was performed on Monday May 3rd. The results dictated that a Cardiac-bypass be done as swiftly as possible. Mr. Lorenzen underwent surgery that night at 10 pm; the operation was completed shortly after midnight. His condition is now stable and all indications are for a rapid recovery. This type of surgery does involve a lengthy recuperation period and we will be most grateful for your patience as we return to our normal routine.

At this time we wish to express our gratitude for the prayers and expressions of support from the many friends of APRO who contacted the Tucson office.

Sheila Kudrle
Office Manager

Sargeant Moody Abduction Case

Since the details of the Sgt. Moody abduction case were publicized in a recent issue of the National Enquirer APRO has received many calls informing us of the case. It can now be disclosed that Sgt. Moody was the anonymous Mr. X in the abduction case reported in the September 1975 issue of the APRO Bulletin. At the time it was the expressed wish of the witness that strict confidentiality be maintained. It was also determined that details of the occupants be withheld to prevent prejudicing future reports. Additional information on this case will be published in the future.

Artist's rendition of being described by Sands.

More Walton Verification

On Monday, March 22, 1976, Mrs. Mary Kellett, the mother of Travis Walton, came from her home in Snowflake, Arizona to Phoenix to take a polygraph test in order to attempt to clear up some points concerning her alleged part in the mysterious experience of her son. It had been printed in the press, for instance, that she and Travis were "UFO buffs" prior to his experience.

Also, Philip Klass had reported two different rumors to APRO concerning Mrs. Kellett which, if substantiated, would cast some doubts on the case: (1) That when Mrs. Kellett was notified of the incident involving Travis' disappearance she was calm and collected and had responded with "I'm not a bit surprised," or words to that effect. (2) That Marshall Flake of Snowflake had

(See Walton - Page Four)

The last extended, intensive period of UFO activity took place in the fall months of 1973 and at this time it appears that the fall months of 1975 and the early months of 1976 duplicated the "flap" of 1973 with one major difference - whatever the UFOs are - "they" seem to be getting bolder, and in the "abduction" cases under study at APRO there are emerging threads of continuity in relation to descriptions of occupants as well as the objects themselves. We are also encountering "warnings" to the victims concerning what they will remember or what they can talk about if they do recall their experiences.

A case in point is that of Johnny Sands, 30, a country-western singer who, at the time of his alleged close encounter, was living in Las Vegas, Nevada where he was trying to promote his first recording and was appearing in a show. A polygraph test administered by Robert L. Nolen of Robert H. Nolen Associates of Las Vegas indicates no deception.

Again, as in the past, the occupants are a new type, as can be seen by the accompanying sketch, which was done by a professional artist to Mr. Sands' specifications. Mr. Sands' account is as follows:

He had been out driving to the surrounding towns to check on how well his record was faring at the radio stations and on jukeboxes. He had left Pahrump at 10 p.m. and was driving on the Blue Diamond road, and at about 10:30 p.m., about 22 miles out of Las Vegas, he saw an unusual aircraft. He didn't pay much attention to it, he said, although it seemed to follow him for about 3 miles. At this point, the car's engine began sputtering so he pulled off the road and got out of the car. He walked around the car, removed the gas tank lid and shook the rear end of the car to determine whether he had any gas. He could hear the gas splashing around in the tank, so he replaced the cover and went around to the front of the car and lifted the hood. It was at this time, looking up, he said, that he saw the craft above him at what he estimated to be about 1,000 feet altitude. Sands said it was about 60 feet long and shaped like the Goodyear blimp, with a large, round ring at the midsection.

U.F.O. Report
Red Deer District, Alta. 24 JUL 76

1. Mr. Darrell BECK of 4020 - 52 Street, Red Deer, Alta. (Ph 347-2928) reported to this office at 12:30 AM that he had observed a U.F.O. at approx. 12:05 AM.

2. He advised that he was at a point approx. 12 miles east of Red Deer, Alta. when he looked up at the sky in a southerly direction. He saw a red light about the size of a bright star at the 10 o'clock position. This red light moved rapidly across the sky to the left in a zig zag pattern and faded out at approximately the 8 o'clock position.

3. The duration of sighting was approx. 30 seconds to a minute.

4. Mr. BECK was in a sober condition, and appeared embarrassed in reporting this incident, but thought that he had better report what he had seen. There is no further information available.

28 JUL 76

1. At 12:45AM, Dale WILLIAMS, Rocky Mountain House, Alta. called this detachment office and reported that he had just observed a U.F.O. The following information was obtained from him:

- (1) The sighting was at 12:40AM, 28 JUL 76 (MDST).
- (2) The sky was clear.
- (3) The sighting was by Dale WILLIAMS (B: 08 AUG 55), Box 42, Rocky Mountain House, Alberta.
- (4) WILLIAMS was on a farm 6 miles east, 3 miles north & 1/2 mile east of Rocky Mountain House at the time of the sighting.
- (5) Other persons who saw the U.F.O. were:
Lance HALLETT, Rocky Mtn. House, Alta.
Anna KOHTOLA, Rocky Mtn. House, Alta.
Mr. & Mrs. Vilgo E. KOHTALA, R.R. #1, Rocky Mtn. House, Alta.
Crystal & Lynda KOHTALA, Rocky Mtn. House, Alta.
- (6) The description given was that it was very bright with red, yellow and green lights and was oval shaped.
- (7) The duration of the sighting was one hour.
- (8) The object moved at least 20 times in all directions and the movements were very quick. It was seen south-west of the observer and very high up. This object was seen to move in all directions; up, down, away and then quickly return to the original position.

2. The on call member of this detachment made a patrol upon receipt of this information, however the object had travelled a great distance to the south-west by this time and could only be made out to be multi-colored lights.

There were no other reports made to this detachment regarding any similar sightings. Reliability of the witnesses is unknown.

- (7) The duration of the sighting was one hour.
- (8) The object moved at least 20 times in all directions and the movements were very quick. It was seen south-west of the observer and very high up. This object was seen to move in all directions; up, down, away and then quickly return to the original position.

2. The on call member of this detachment made a patrol upon receipt of this information, however the object had travelled a great distance to the south-west by this time and could only be made out to be multi-colored lights.

There were no other reports made to this detachment regarding any similar sightings. Reliability of the witnesses is unknown.

BOA-IVO

Dear Prof. Mac Neil,

Just recently I seen
and photographed a cigar
shaped object and a domed
craft. The incident began
at about 1:30 AM when a
brilliant white object shot
across the sky and dissappeared
in a few seconds. A moment
later it shot back along
its first path and again
dissappeared. I got my
camera and waited for
it to appear again and
it did, travelling rapidly
from North to South. I
aimed my camera at the
spot that I had seen it
and waited for it to shot
back again, it did and
pressed the shutter release

and obtained a fairly good photo of it. This was about 1:40 AM. I then sat down on the grass and watched for it again and in a few minutes I saw it in the eastern part of the sky shooting rapidly from south to north. I again held my camera at the spot where I seen it and shot another picture when it flew back. This was about 1:45 AM. After developing the picture [I have a polaroid camera] I watched the sky but didn't see anything for about a half hour. At about 2:15 AM I noticed a brilliant white object moving very slowly in the western part of the sky and going from North to south. It stopped and hung motionless in the air. I took a picture of

it and while I was pressing the shutter release I seen it began to move through the rangefinder and then streak away. When I removed my eye from the camera it had totally disappeared. I feared that I might have snapped too late, but this was not the case. I will describe this craft as being like a straightened out banana with a dome on top. It was tremendously bright but there was no other lights on it, it just glowed white. The picture shows a domed craft although it is slightly blurred, and different from the other objects. These were bright orange or white cigars which appeared

to be a foot in length
and about 2 inches thick.
They were bigger than
this though because they
were extremely high up.
The domed craft however
didn't seem to be too
away. Many people have
called up the radio down
here and reported the
strange bright cigar, which
always travel from south
to North and back again.
At no time did I observe
any sound coming from
the objects, although I
must say they were
the brightest objects I
had ever seen. The
next day on showing
the pictures I was
called a fool and re-
ceived many explanations
ranging from the reflection
of the flashlight in a
window [I didn't use
a flash] to the moon

shining from behind
a cloud. [The moon was
in a different part of the
sky and clearly visible
at all times.] A few
people believed me, including
two policemen who
referred me to you. They
told me not to give the
pictures to the newspapers
until I had talked or
written to you, so I
didn't. The date the
on which I took the
pictures was July 10, 1976.
There were no witnesses
to the photos, but on
the next night [July 11]
I got four other people
to witness any new
photographs. They are
now a witness to one
of the photos taken that
night and will testify
to its being genuine.
If you wish to see

these pictures I will
gladly send them to
you and you may keep
them. They are not
faked and I will swear
to that. I hope that
you take me seriously
and ~~see~~ write me. Like
I said I will send you
the pictures if you wish
them and you may keep
them as I have no
use for them and no one
believes me anyway. They
all think it was an air-
plane or the moon. I look
forward to hearing from
you.

- Yours Truly,
Eugene Tison.

P.S. - As I said, my camera
is a polaroid so I had
no negatives to tamper
with.

RE: OR/EN: **Unidentified Flying Object Sighting
Reserve Mines, C.B. Co., N.S.
10 and 11 July 76.**

N76/054

1. First Sighting: 1:40 am 10 July 76.
Condition of Sky: Lightly clouded
Observer: Eugene Frison, Reserve Mines, C.B. Co., N.S.
Location of Observer: One hundred yards north of the intersection of #4 Highway and Wilsons Road, Reserve Mines.
Luminosity: Real bright white, glowing.
Colour: White.
Form: Like a stick about a foot long and two inches thick.
Duration: About two seconds.
Sounds: None.
Position in the Sky: To the north about halfway up in the sky.
Movement: From where Frison first saw it, it shot across the sky in an arc-shaped flight and disappeared at the horizon to the south.

~~AUG 6 3 1976~~
AUG 10 1976

2. Second Sighting: A few seconds after 1:40 am 10 July 76.
Condition of Sky: As above.
Observer: As above.
Location of Observer: As above.
Luminosity: As above.
Colour: As above.
Form: As above.
Duration: About five seconds.
Sounds: As above.
Position in the Sky: First sighted from the south near the horizon.
Movement: To the north in an arc-shaped flight and stopped about halfway up in the sky; it disappeared a second or two after it stopped.

PROPERTY OF THE POLICE SERVICE
IS LOANED TO YOU BY THE POLICE SERVICE
NOT TO BE REPRODUCED OR TRANSMITTED IN ANY FORM OR BY ANY MEANS
OR PERSON WITH OUT THE WRITTEN PERMISSION OF
THE R.C.M.P.

3. Third Sighting: 1:45 am 10 July 76.
Condition of Sky: As above.
Observer: As above.
Location of Observer: As Above.
Luminosity: Not as bright as the first two.
Color: As above.
Form: No form discernable.
Duration: About five to ten seconds.
Sounds: As above.
Position in the Sky: First sighted about halfway in the sky a little east of south.
Movement: It moved in an arc towards the north and disappeared

(cont'd)

RE: - OBJET:

PAGE

76-700-136

2.

behind some houses. It had travelled real high in the sky. To quote Frison 'probably as high as those planes you can see the trails from in the sky'. It then re-appeared moving towards the south on the same path as it had taken before. It stopped in the same spot as it first was sighted then disappeared.

4. From 1:45 am to 2:15 am for three times Frison saw a similar object about five minutes apart. It would appear slightly west of south about halfway up in the sky. Its movements were the same as the second sighting.

5. Seventh Sighting: 2:15 am 10 July 76.
Condition of Sky: Same.
Observer: Same.
Location of Observer: Same.
Luminosity: Same brightness but it looked closer.
Colour: Same.
Form: Like a cigar with a dome on top.
Duration: Approximately 10 to 15 seconds.
Sounds: None.

Position in the sky: First sighted about a quarter way up in the sky a little north of west.

Movement: It moved real slow from north to south and stopped for about five seconds. It moved in a straight path.

6. Eighth Sighting: 1:10 am 11 July 76.
Condition of Sky: Lightly clouded.
Observers: Eugene Frison, Blair Frison, Parker Murphy, Jimmie Murphy and Dale Frison.
Location of Observers: Same.
Luminosity: Real bright white, glowing.
Colour: Same.
Form: Oblong and kind of round, much the same as the others.
Duration: Less than five seconds.
Position in the sky: Halfway up in the sky to the north-west.
Movement: It moved very fast in a straight flight towards the north east. Then disappeared by fading out.

7. INVESTIGATORS COMMENTS:

I believe that Eugene Frison (8 Sept 59) is a reliable witness to the fact that the four photographs that he showed me are in fact pictures of what he saw in the sky as described above. He is not an avid nor professional photographer so would not be able to create pictures such as he showed me. His camera is a Polaroid model valued at \$30. It might be noted also that in his statement he said that when he was taking the third picture

(cont'd)

RE: - OBJET:

PAGE

76-700-136

3.

the object disappeared as he was looking at it through the camera. It might be noted that picture number three shows what appears to be either movement of the object or movement of the camera itself. Frison could not give specific information about the size of the objects, the distance they were from him nor the altitude of them.

8. ATTACHMENTS:

Attached are pictures taken off the pictures that Frison had shown me. This was done by Cst. Gaudet of Sydney I Dent Section.

- (1) Item one is a picture of Frison's second sighting.
- (2) Item two is a picture of the third sighting.
- (3) Item three is the seventh sighting.
- (4) Item four is the eighth sighting.
- (5) Item five is a statement given to me by Eugene Frison,

the observer. Statements were not taken from the other four people who were with Frison during the last sighting as they were all younger children from age ten years to fourteen years.

ATTACHMENT

Reserve Mines
C.B. Co., N.S.
15 July 76.

Statement of Eugene Frison (ED: 8 Sept 59)
of Reserve Mines, C.B. Co., N.S.

Almost two weeks ago I heard on a local radio station that people were seeing unidentified objects in the sky. Around 1:30 am 10 July 76 I was out in our yard around my tent; at 1:40 am I saw something to the north about halfway up in the sky. It looked like a stick about a foot long and two inches thick. It was glowing white all over, steady. It shot straight across the sky in an arc shaped flight. This took about two seconds and disappeared before it reached the horizon. The sky was a little cloudy but the object didn't go through any. The light was real bright. The whole thing was glowing.

Then a few seconds later a similar object appeared in the same spot the other one disappeared. It shot across the same path the first object took then stopped in the same spot where the first object was sighted. When it stopped I took a picture with a Polaroid camera - worth about \$30. This object was a little west of north.

About five minutes after my first picture was developed I saw another object about halfway in the sky a little east of south. This looked the same as the first one I saw. It moved in an arc towards the north and disappeared behind some houses. It had travelled real high in the sky. It appeared running from north to south on the same path as before. It is probably as high as those planes you can see the trails from in the sky. It stopped in the same spot as I first saw it. Then I took a picture of it. It disappeared as soon as it stopped. This was around 1:45 am 10 July 76.

From 1:45 am to 2:15 am. Then for three times about five minutes apart a similar object appeared slightly west of south halfway in the sky and did the same movements as the second one I saw. It would disappear in the same spot as I first saw it. This happened about three times. I tried to take pictures but I missed them.

At 2:15 am 10 July 76, I saw an object about a quarter way up in the sky to the west and a little to the north. This object was of the same brightness as the others but it looked closer. I can't estimate the distance. It was glowing same as the other objects. It moved real slow, it stopped about the same height in the sky. It moved from north to south. It stopped for a few seconds, about five. When I looked at it through the view finder I was pressing the button and it disappeared. When I took my eye from the camera it was gone. This object looked like a cigar with a dome on top. It was a very bright white and steady.

Statement of Eugene Frison (cont'd)

I watched the sky for about another half hour and I didn't see any more objects. Then I went into the house.

The next night I got four fellows to stay in the tent with me. We started looking at the sky about 12:30 am 11 July 76. Around 1:10 am we saw an object appear about half way up in the sky in the north-west. It was the same as the objects I saw the night before. About the same distance away as the first two objects I saw. As soon as it appeared it started moving towards the north east. It was moving fast. I snapped a picture of it halfway in its flight. This object was flying straight, there was no arc in its flight. It disappeared halfway in the sky by fading out. Blair Frison, Parker Murphy, Jimmie Murphy and Dale Frison were with me at this time. We watched the sky a few minutes after that and didn't see anything else.

UFO Report plume in ou 5/8/76 File Référence

Observateur: M^r Lionel Hotté

Adresse: 114 Batelier
Ottawa, Ont
235-3668

Dates et Heures: 1 Juin 1976 } entre 3 et 5 hre p.m.
6 Juillet 1976 } (local Ottawa)
7 Juillet 1976 }
présentiment d'une apparition le 21 Août 76 (?)

Lieu: au dessus du canal rideau entre le parlement et
le château Laurier - Endroit précis: où passait
l'ancien chemin de fer.

Description: coquille, forme allongée de l'amanite
rayures et cercles plus clairs (genre hublot).

Couleurs: noir et blanc
grande brillance

Autres observ: 2, désirent garder l'anonymat.

INDEXED BY	J. M. 4-3
MAIN FILE CHANGED TO	

Je tiens à vous mettre au courant
qu'un étrange phénomène s'est produit au-dessus
de la rivière Rideau en date du 1er juin et
que ce même phénomène s'est reproduit le 6 et le
7 juillet vers 4 p.m.

L'endroit exact se trouve entre les
rues Sussex et St Patrick, décombres de pierres
près des ponts Minto.

Je n'ose affirmer catégoriquement
qu'il s'agit de soucoupes volantes, de vaisseaux
de l'espace ou d'extra-terrestres mais il
ne semble pas exister d'autres explications.

J'en ai fait mention dans le
journal Le Droit sous forme de lettre
ouverte le 2 juillet.

Il y a d'autres témoins mêlés à cet
événement mais dont le témoignage diffère
quelque peu: J.C. Harte, Sandra Bourque, Claudette
Lalonde.

En ce qui a trait aux preuves, je
détiens des photographies que les experts ne
peuvent expliquer, plusieurs dessins et croquis
exécutés sur le champ, et un vieux document
en sanscrit que personne ne peut expliquer
l'origine ou le contenu.

Mon entourage me conseille fortement
de pousser l'analyse plus loin: Centre de
Recherches, l'Université et le Musée national.

Veuillez me croire, je n'ai rien
à gagner par de telles révélations. Je suis
professeur au secondaire, ne bois pas, ne
fume pas de stupefiant et on m'appelle
parfois "vieux jeu, straight and square".

HFX 47 REPORT ON UFO SIGHTING

(1) 3AUG76 12:25AM

(2) COND. OF SKY : CLEAR

(3) IDENTITY OF OBSERVER: MR NORMAN ABRAHAM STEIN
518 YOUNG AVE HALIFAX NS
422-3930

(4) LOCATION OF OBSERVER: 103 HWY BETWEEN HUBBARDS AND
TANTALLON, APPROX HALF WAY.

(5) IDENTITY OF OTHER PERSON SIGHTING: NIL

(6) DESC OF SIGHTING : BRIGHT BLUE, OVAL SHAPED APPROX 30'
DIAMETER WITH A 20' TAPERING TAIL, TRAVELLING PARALLEL
TO AND APPROX 40' OFF THE GROUND. NO SOUND TO IT.
TRAVELLING AT A VERY FAST RATE OF SPEED.

(7) DURATION OF OBSERVATION: 15 SECONDS

(8) OTHER INFORMATION: APPROX 10 MIN PRIOR TO THE SIGHTING
MR STEIN STATED HE SAW A BRIGHT RED LIGHT ACCROSS THE ROAD AND
EXTENDING INTO THE WOODS. THE LIGHT WAS APPROX 25' WIDE AND
EXTENDED TO AN UNKNOWN DEPTH INTO THE WOODS. MR STEIN STATED
IT LOOKED LIKE A FOREST FIRE WITHOUT SMOKE. HE ALSO STATED THAT
HE SAW TWO PEOPLE STANDING IN THE RED LIGHT BESIDE THE ROAD.
THE FIGURES WERE THOSE OF ADULT HUMANS, NO FURTHER DESC.
AVAILABLE.

HALIFAX DETACHMENT RCMP PTROL CAR 144 CST MACKINNON WAS
PATROLLING THE AREA AT THE TIME OF THE SIGHTING BUT DID NOT
SEE ANYTHING OUT OF THE ORDINARY.

MR STEIN APPEARS TO BE REASONABLY INTELLIGENT AND HAVE NO REASON
TO DOUBT HIS CREDIBILITY.

AUG 31 1976

Dear Sir:

Re: U.F.O. Sighting
Canso, Guysborough Co., N.S.

On August 24th, 1976, a Mr. Leo Joseph KENNEDY, Canso, N.S. reported to our office that he observed an unidentified object in the sky near his home at approx. 11:45PM E.S.T., August 22nd, 1976. The sky was cloudy at the time and Mr. KENNEDY stated that he had just gone outside to put his dog out as he usually does when his attention was attracted to a bright pulsating white light approx. 4 miles away. He described the object as being three cornered with three leg-like affairs protruding from the bottom. Each leg had a steady red light at the end. The object was motionless for approx. 1 1/2 minutes and then flew away. The craft made no noise and flew at an angle taking approx. 10 minutes to completely disappear. Mr. KENNEDY could not estimate its height but stated that it flew higher than a helicopter but lower than a jet.

Mr. KENNEDY

was sober. I have no reason to doubt the fact that KENNEDY did see something as he is not a chronic reporter of such things.

N76/068

Yours truly,

Gordon D. Goldsworthy, Cst.

Wayne Lenahan

2066 Blackburn Rd

Ottawa Ont. K2A-3K5 PH 729-4214

Observed looking east in bedroom window towards Parille road

age 16, Dec 25, 1959: date of birth.

Time first sighted: 2:05 a.m., at first, in the east moving slowly towards the house in a waving motion for a short while when first noticed.

then it stopped & remained stationary.

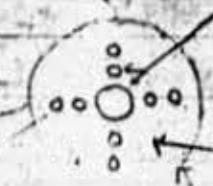

It was at a 70° angle when I observed it.

2:05 - 2:10 a.m.

Description: it was round & black, port holes or lights could be seen on the craft, being of a bright yellow, with one large light in the centre of the craft, and a no. of eight smaller round lights, being around this larger light in a cross like fashion, two lights above, two below, two to the right, & two to the left, each being of equal size & distance from the main light. Hazy blue boosters or exhaust could be seen being emitted from the craft in the same manner being of between low & medium intensity. This I observed a few seconds later after first sighted by the use of my binoculars being of power of 7x35. () bright yellow, perfectly round

- no sound could be heard.

each smaller circle of equal size

- hazy blue boosters or flames

black

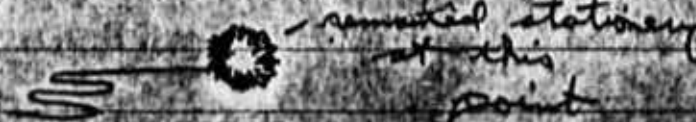

circumference of craft could hardly be seen.

a.m.

- 2:20 notice another craft of the same description later in the distance, being at 90° angle
- it was a smaller more distant craft & is slowly approaching position near other large craft, but still small & distant.

looked like 2h

- A) 2:05, before the use of my binoculars the craft was a bright white light of high intensity, being about 7x the size of a star.

- 2:35 - still in same position & stable
- boosters more noticeable

oo  light, hazy blue

- 2:40, notice that craft no. 1 seems to be growing smaller
- possibly rising higher
- small similar object (craft no. 2) is still going towards other, at a very slow speed
- the far lower right.

 lower moving in this direction very slowly

A.M.

- 3:00 still the same

- 3:10, still the same, but slightly higher (craft no. 1)

- 3:10, observe ship no. 3, smaller than craft no. 2

about 2 ft above lower darker trees

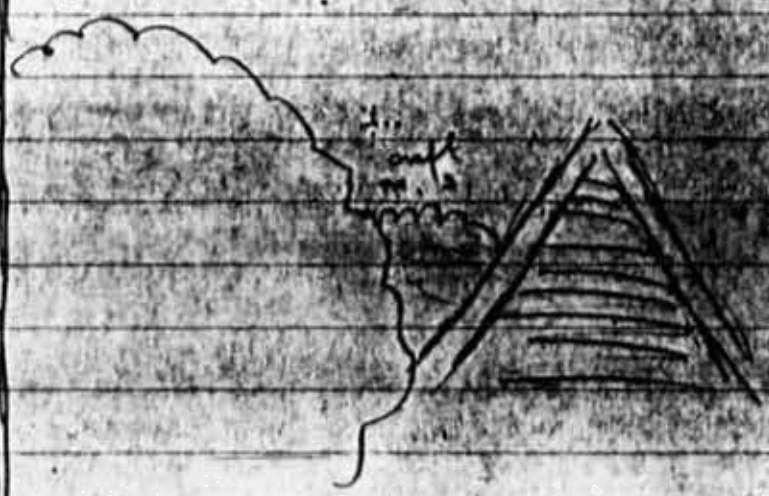

Idea: possibility, largest one observed may be mother ship

2:10 Witness: my mother was my only witness, she described while looking under binoculars as looking like a spaceship.

- 3:14 ship no. 2 getting very closer to no. 1 (craft)

craft no. 1

craft no. 2

part of
my
window

A.m.

- 3:27 - still stable

- 3:33 - still the same now & stable
... (no change)

- 3:35 - signing off, Good night

- duration of observation: 2 hr. & 30 min.
plus.

subject went to bed & slept where still in
same position.

Tues. Aug. 31/76

Wayne Lenahan
2066 Blackfurnis
Road
Ottawa, Ont
K2A 3K5
729-4214

Day of observation:

Thursday 31
~~Mon. Aug. 30/76~~

Tuesday 26

Similar to sighting of ~~Wed. Aug. 25/76~~ August.
Observed from bedroom window from the east on ^{Towards} Denille Road.
First observed at 3:35 AM, a clear night

- no clouds whatsoever.

Tuesday 26

- Smaller than craft of ~~Wed. Aug. 25/76~~ because
of much higher altitude

- When observed with the human eye had brightness
of high intensity & was a white, round, bright light
seen at an 80° angle, from 4-5x the size of
a normal star.

- no sound could be heard.

- it was round, & of similar description of night
of ~~Wed. Aug. 25/76~~. but was higher & smaller

- seen for a period of 5. min. but when going to
bed still in same position.

- remained stable all through time of sighting

- no other witnesses

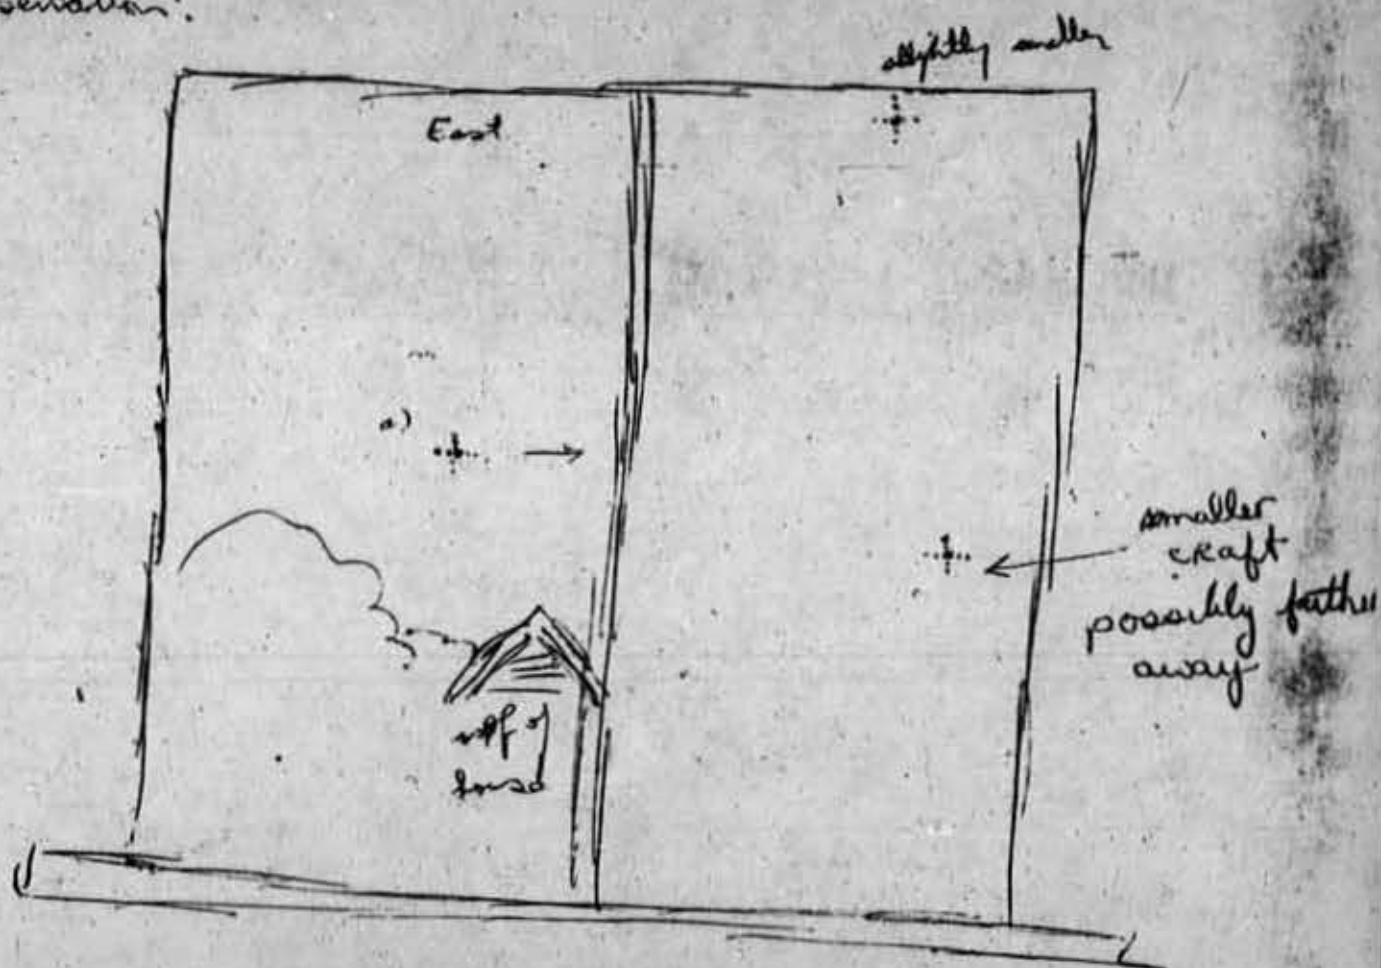

- when under use of binoculars it was the ~~same~~
same description of earlier date (ref. ~~Wed. Aug. 25/76~~)
Tuesday 26

- no. of UFO's - 3

- largest UFO being of 80°, the two smaller craft
being the size & lighter intensity of stars, being of
same description as larger craft & sighting
of before, being at an altitude of 60-65°.

mt
andoy

observation:

- don't think these U.F.O's were any satellites (man-made)
- & stationary at all time.
- then craft a) during observation moved slowly towards the south at a constant speed

possibility of Jupiter in East sky -

- very bright in Fall -

File Référence

Ottawa, September 30 1976.

Dear Mr Wayne Lenahan,

Regarding the report you brought in to this office in August and after speaking with Dr McIntosh on the subject, we would think that the subject you and your friend have been seeing was the planet Jupiter, very bright and low on the horizon at this time of the year.

Various atmospheric and psychological effects make this planet appear to wander around when it is near the horizon. The fact that this object has been seen repeatedly would also suggest this conclusion. The horizontal and vertical lines seen were due to a reflexion of the light through the window and if you look carefully you will see them disappear when you look from outside.

Yours sincerely,

Annie Claude (Miss)
Planetary Sciences Section.

TYPES OF "FLYING SAUCERS"

One of the most troublesome aspects of UFOlogy is the seemingly infinite variety of reported objects. It is, in fact, something of a stumbling block to those who believe in the physical reality of UFOs.

With too much of a good thing, most theories become cluttered with assumptions and logical conclusions, involving motive, origin, propulsion,

composition, etc., that are not supported by the facts: the UFO reports themselves.

People look for patterns in their lives. UFOlogists are no exception, except we try to organize the unfathomable.

UFO space artist Hal Crawford has here illustrated the most commonly reported UFO types. Crawford states, "UFO researchers usually cite ex-

tremely general patterns, yet ignore the fact that separate reports describing identical objects are the exception, not the rule.

"Many theories have been advanced to explain the various types of UFOs. Any theory, no matter who puts it forth, must be backed by all data. Exclusion of data is no less than scientific sin."

In studying the UFO chart, the higher the horizontal number, the more complex and structurally specialized the UFO. Although the difference between A-I and A-II are negligible, UFOs like C-III and C-IV show definite progression in complexity.

The heavy black lines separate the types vertically by arbitrary classification, according to shape, and do not connect them in any way.

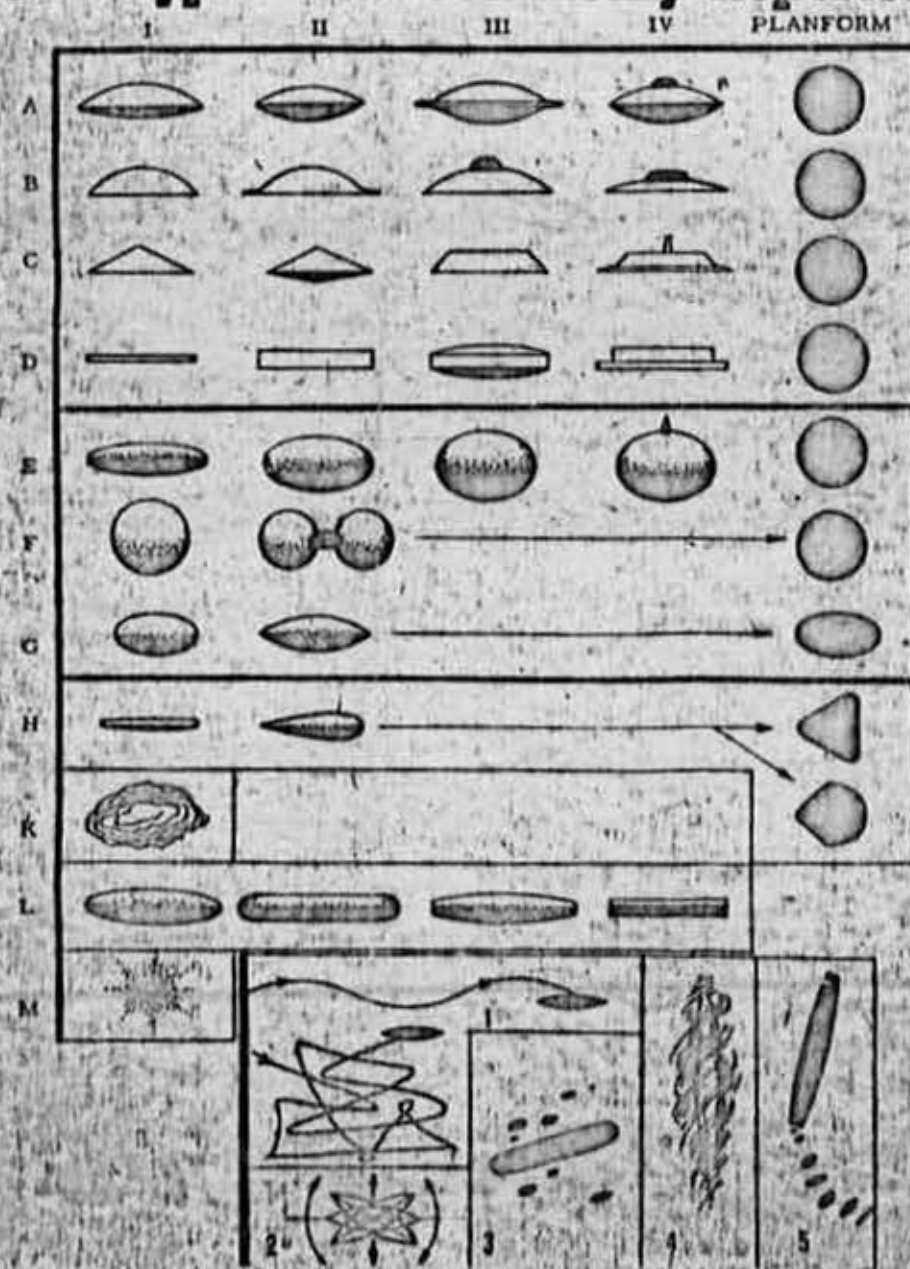

Types A through H are fairly obvious representations of different UFO shapes. Type K is "a polymorph (literally, "many formed") which seems to have the power of changing its shape, size and color. Often they resemble clouds, except they behave in an un-cloudlike manner: appearing suddenly in a cloudless sky, moving strongly against the wind, making noise, and dropping various kinds of junk such as rocks, metallic objects or small animals, often reptiles.

Types L are the huge "cigar-shaped" mother ships, apparently with functions similar to an earthly aircraft carrier. These are usually hundreds of feet in length.

Type M is the "nocturnal meandering light," which is the most common nighttime UFO. These reports are also among the most difficult to verify, as great masses of data on aircraft and astronomical phenomena must be studied to rule out the possibility of planes or meteors. Class M UFOs at a distance could be any type if viewed more closely.

At the bottom of the chart are illustrated characteristic patterns of UFOs in flight: 1) wobbling, darting movements; 2) a "falling leaf" motion when ascending or descending; 3) a mother ship surrounded by an escort of smaller craft; 4) a rotating motion, sometimes accompanied by a cloud cover; and 5) the releasing or collection of much smaller discs or spheres.

Dist of telephone report from Laurie Blackby
NRC 1958 (32295) to B.A.M.

Place: on Hwy 17 9 miles W. of North Bay.

Time: Sept 2, Sunday, 8:40 P.M.

Weather: clear (some cloud to north)

Object brighter than Jupiter in south
direction at 35° elevation. Remained
stationary for 15-20 minutes. Darkened
and moved off to the east very rapidly
(fraction of a second). Changed direction
& went south(?) again very fast, into cloud bank.
Total time 35 to 40 minutes.

Watched interceptors from North Bay
take off.

UFO SITING

C/N reports UFO siting, following details obtained:-

- a) Date & Time: 1 AUG 76 @ 10 P.M.
- b) Sky: extremely clear
- c) Observer: George GOWRYLUK (BD: 25 MAR 13)
- d) Position of Observer: 2 miles west of Beausejour corner on NBR 44 Hwy in a car.
- e) Other Observers: 1. John HAWLICK - Pasadena California
2. Alf HAWLICK - Brandon, Manitoba.
- f) UFO described as a solid red mass with sharp edges, took up area of DC-8 from distance of 1/2 mile although it had no real definite shape, very very bright and extremely red, approximately 12° above the horizon from a distance of 1/2 mile, moved slowly to the left and disappeared into horizon although it did not fade. Several other cars ahead of c/n also observed same as he stated. They all stopped on the hwy. to watch it. Total duration of siting approx. 30 seconds.

OBJET:

Wayne ERICKSON ---- Sighting of U.F.O.
Kinuso, Alberta --- 21 SEP 76

FILE 4712-5
ENCL. #29
DEL TO <i>Mrs. A. Claude</i>
RECEIVED BY <i>J. H. W.</i>
MAIN FILE CHANGED TO:

1. Investigation of the c/n sighting has failed to locate any further witnesses to the sighting. ERICKSON appears to be sincere and factual in his sighting. He seemed knowledgeable on aircraft having possession of a Commercial Pilots License XDC-9286. He is part-owner of the Kodaik Lodge Hotel at Kinuso and when being interviewed in the A.M. showed no signs of having over consumed alcohol the evening before. I had talked to him on the phone at approximately 9:30 P.M., 21 SEP 76, and again during our conversation on the phone, he displayed no indication of drinking or being intoxicated to any degree. Statement, Appendix "A" attached.

CONCLUDED HERE.

RE - OBJET:

Wayne ERICKSON ---- Sighting of U.F.O.
Kinuso, Alberta --- 21 SEP 76

PAGE

Appendix #1

Statement of Wayne ERICKSON of Fairview, Alberta (D.O.B: 16 Oct 50)

On the 21st of September, 1976, at approximately 5:15 P.M., I was in my room at the Kodiak Lodge Hotel, Kinuso, Alta. I was looking out the window towards the south when I noticed an object flying in a Westerly direction. This object appeared flat and round with a hump in the centre, much like a fried egg. The object did not appear to have any wings. It was flying at about 6000 feet and at a speed of approximately 150-200 miles per hour. This object changed directions abruptly, more of a fluttering motion. It did this very fast and always maintained a Westerly direction.

It appeared silver coloured at first and then as it proceeded West, it changed to a white. It was travelling towards the direction of the sun. This vehicle may have been going in a more south-westerly direction than west. I only saw the one object. There was no-one else present with me and no-one else saw it that I know of. There was no noise and it appeared close enough that if it was an airplane there would have been noise. I have a commercial pilots license #XDC 9286 and am familiar with most types of airplanes. I judged the size speed and altitude with reference to a CESNA 402. That is, it appeared to be about the same size as a CESNA 402 would be at 6000 feet. The object appeared to be about two miles away when I first seen it. I maintained a visual contact with it for approximately one minute. I had not been drinking prior to this sighting. I am part-owner of the Hotel and I was preparing to paint.

Wit:

22-9-76
10:24 P.M.

Signed: Wayne ERICKSON

Report of Unidentified Flying Objects
September 23, 1976

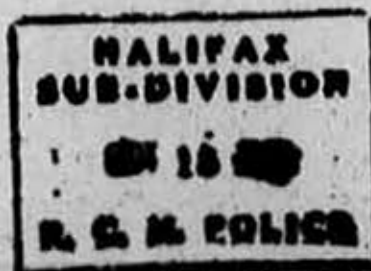

OCT 27 1976

1. Further to our message #67, Mrs. Myrna JOLIVIT of 10 Lyla Drive, Lawrencetown, was contacted on 4 OCT 76 and she advised that on the 23 SEP 76 at approximately 9:00PM, Atlantic Daylight Time, she saw a very bright light in the sky looking south from her residence over the Atlantic Ocean. JOLIVIT reported the sky to be clear at the time with no stars. The object seen is described as being flat on the top with rounded sides and a bright fiery bottom. The object ascended from the sky to the ocean on three (3) separate occasions. After about ten (10) minutes it had ascended and continued out of sight. The object left no trail as it ascended and made no sound.

2. Mrs. Mary COVE, Apt. 813, Stoney Brook Manor, Halifax, N.S. was at the JOLIVIT residence on the 23 SEP 76, and confirmed the sighting on the above date and time. COVE could offer no other information regarding this object.

065. THIS IS FROM CST ST PIERRE FROM THE R C M P DETACHMENT IN RICHIBUCTO, KENT CO. N.B.. AT 3.30 AM ON THE 3 OCT 76 I RECEIVED A CALL FROM A REJEAN ROBICHAUD (DOB: 08 JAN 50) HE INFORMED ME THAT HE HAD JUST SEEN AN UNIDENTIFIED FLYING OBJECT. THIS HAPPENED IN OUR DETACHMENT AREA ON HIGHWAY 480 APPROX. FIVE MILES FROM HIGHWAY 11 KENT CO. N.B. THE SKY WAS CLEAR THERE WERE A FEW STARS IN THE SKY THE TEMPERATURE WAS QUITE COOL ABOUT 35 TO 45 DEGREES FAREN.

THIS IS WHAT HAPPENED DESCRIBED TO ME BY ROBICHAUD:

3 Oct 76 AT 2:55 AM ROBICHAUD WAS HEADING WEST ON HIGHWAY 480 KENT CO NB A/N NOTICED A RED GLOWING OBJECT IN THE SKY IT WAS ABOUT 4 TO 5 MILES SOUTH OF HIM AT FIRST HE THOUGHT THAT IT WAS THE SUN OR MAYBE THE MOON. ROBICHAUD STOPPED HE SHUT OFF HIS LIGHTS AND HE TURNED OFF HIS ENGINE IN ORDER TO HAVE A BETTER LOOK AT THIS STATIONARY OBJECT IN THE SKY AS SOON AS HIS LIGHTS WERE TURNED OFF THIS OBJECT STARTED TO GO UP AND DOWN IN THE SKY SLOWLY THEN IT STARTED HEADING NORTH TOWARDS HIM. AT THIS POINT ROBICHAUD PANNICKED HE TURNED ON HIS CAR ENGINE AND HIS LIGHTS HE TURNED HIS CAR AROUND AND HE HEADED EAST HIGHWAY 480 IS A VERY TREACHEROUS HIGHWAY HE TOLD ME THAT AT SOME POINTS HE HIT SPEEDS OF 115 MPH THIS RED GLOWING DISC SHAPPED THING CAUGHT UP TO HIM VERY FAST IT FOLLOWED HIM ALONG THE ROAD IT STAYED OVER HIS CAR. IN FACT HE SAW IT CATCHING UP TO HIM IN HIS REAR VIEW MIRROR. AT ONE POINT WHILE THE FLYING THING WAS OVER HIS CAR THERE WAS A RED GLOW COMING FROM IT. THE PAVEMENT, THE INSIDE OF THE CAR AND THE SURROUNDING AREA WERE ALL RED. WHEN ROBICHAUD FINNALLY GOT TO A SMALL GROUP OF HOUSES HE SLAMMED ON HIS BRAKES AND HE RAN OUT OF HIS CAR AND HE SOUGHT REFUGE IN THE HOUSES. THE THING STOPPED AT ABOUT 100 YARDS FROM WHERE HE WAS IT HOVERED SILENTLY OVER THE PAVEMENT AT ABOUT 20' IN THE AIR. IT THEN TURNED SIDEWAYS IT BECAME A LITTLE BRIGHTER IT THEN TOOK OFF INTO THE SKY NOT TO BE SEEN AGAIN. THE UFO WAS ABOUT THE SIZE OF A HOUSE, IT DID NOT MAKE ANY NOISE AND IT WAS RED IN COLOR SIMILAR IN COLOR TO BURNING COALS IN FIRE. IT HAD NO WINDOWS NO WINGS

THIS IS ROUGHFLY THE SHAPE OF THE THING BEST I CAN DO ON TELEX

065. THIS IS FROM CST ST PIERRE FROM THE R C M P DETACHMENT IN RICHIBUCTO, KENT CO. N.B.. AT 3.30 AM ON THE 3 OCT 76 I RECEIVED A CALL FROM A REJEAN ROBICHAUD (DOB: 08 JAN 50) HE INFORMED ME THAT HE HAD JUST SEEN AN UNIDENTIFIED FLYING OBJECT. THIS HAPPENED IN OUR DETACHMENT AREA ON HIGHWAY 480 APPROX. FIVE MILES FROM HIGHWAY 11 KENT CO. N.B. THE SKY WAS CLEAR THERE WERE A FEW STARS IN THE SKY THE TEMPERATURE WAS QUITE COOL ABOUT 35 TO 45 DEGREES FAREN.

THIS IS WHAT HAPPENED DESCRIBED TO ME BY ROBICHAUD:

AT 2:55 AM ROBICHAUD WAS HEADING WEST ON HIGHWAY 480 KENT CO NB. A/N NOTICED A RED GLOWING OBJECT IN THE SKY IT WAS ABOUT 4 TO 5 MILES SOUTH OF HIM AT FIRST HE THOUGHT THAT IT WAS THE SUN OR MAYBE THE MOON. ROBICHAUD STOPPED HE SHUT OFF HIS LIGHTS AND HE TURNED OFF HIS ENGINE IN ORDER TO HAVE A BETTER LOOK AT THIS STATIONARY OBJECT IN THE SKY AS SOON AS HIS LIGHTS WERE TURNED OFF THIS OBJECT STARTED TO GO UP AND DOWN IN THE SKY SLOWLY THEN IT STARTED HEADING NORTH TOWARDS HIM. AT THIS POINT ROBICHAUD PANICKED HE TURNED ON HIS CAR ENGINE AND HIS LIGHTS HE TURNED HIS CAR AROUND AND HE HEADED EAST HIGHWAY 480 IS A VERY TREACHEROUS HIGHWAY HE TOLD ME THAT AT SOME POINTS HE HIT SPEEDS OF 115 MPH THIS RED GLOWING DISC SHAPED THING CAUGHT UP TO HIM VERY FAST IT FOLLOWED HIM ALONG THE ROAD IT STAYED OVER HIS CAR. IN FACT HE SAW IT CATCHING UP TO HIM IN HIS REAR VIEW MIRROR. AT ONE POINT WHILE THE FLYING THING WAS OVER HIS CAR THERE WAS A RED GLOW COMING FROM IT. THE PAVEMENT, THE INSIDE OF THE CAR AND THE SURROUNDING AREA WERE ALL RED. WHEN ROBICHAUD FINALLY GOT TO A SMALL GROUP OF HOUSES HE SLAMMED ON HIS BRAKES AND HE RAN OUT OF HIS CAR AND HE SOUGHT REFUGE IN THE HOUSES. THE THING STOPPED AT ABOUT 100 YARDS FROM WHERE HE WAS. IT HOVERED SILENTLY OVER THE PAVEMENT AT ABOUT 20' IN THE AIR. IT THEN TURNED SIDEWAYS IT BECAME A LITTLE BRIGHTER. IT THEN TOOK OFF INTO THE SKY NOT TO BE SEEN AGAIN. THE UFO WAS ABOUT THE SIZE OF A HOUSE. IT DID NOT MAKE ANY NOISE AND IT WAS RED IN COLOR SIMILAR IN COLOR TO BURNING COALS IN FIRE. IT HAD NO WINDOWS NO WINGS

RE: - OBJET:

Joseph Réjean Emery ROBICHAUD (D.O.B. 8 Jan. 50)
Unidentified Flying Object
3 Oct. 76, 3:00a.m.

At 3:30a.m. on the 3 Oct. 76, I received a call from Réjean Emery ROBICHAUD stating something very unusual had happened to him. He asked me to meet him about five miles up from Hwy. 11 on Hwy. 480.

I immediately proceeded there. When I arrived I met ROBICHAUD. There was no smell of liquor on his breath his eyes were clear and normal. He did not seem to be under the influence of any kind of drug.

ROBICHAUD was very pale and he was very nervous. He appeared quite frightened.

There were no clouds, it was clear, there were a few stars in the sky, the temperature was quite cool about 15 to 45 degrees Faren.

This is what happened described to me by ROBICHAUD:

At 2:55a.m. ROBICHAUD was heading west on Hwy 480, Kent Co., N. B. A/A noticed a red glowing object in the sky, it was about 4 to 5 miles South of him, at first he thought that it was the sun or maybe the moon. ROBICHAUD stopped he shut off his lights and he turned off his engine in order to have a better look at this stationary object in the sky, as soon as his lights were turned off this object started to go up and down in the sky slowly then it started heading North towards him. At this point ROBICHAUD panicked he turned on his car engine and his lights, he turned his car around and he headed East. Hwy. 480 is a very treacherous Hwy., he told me that at some points he hit speeds of 115 m.p.h. This red glowing disc shaped thing caught up to him very fast it followed him along the road, it stayed over his car. In fact he saw it catching up to him in his rearview mirror. At one point while the flying thing was over his car there was a red glow coming from it the pavement, the inside of the car and the surrounding area were all red. When ROBICHAUD finally got to a small group of houses, he slammed on his breaks and he ran out of his car and he sought refuge in the houses. The thing stopped at about 100 yds. from where he was, it hovered silently over the pavement at about 20' in the air. It then turned side ways it became a little brighter it was about the size of a house, it did not make any noise and it was red in colour similar in colour to burning coals in a fire. It had no windows, no wings. No propellers of any kind, it was absolutely quiet.

RE: - OBJET:

U.F.O. - Sighting of:-
Bedford/Waverley, Hfx. Co., Nova Scotia 14 OCT 76

14 OCT 76

1. At approximately 11:00 P.M. this date, I was working radar on the # 102 Highway approximately two miles north of the Bedford interchange. I was on a long dark stretch of Highway checking cars coming southbound around a bend. No cars were in the area at this particular time. Then I noted some lights come into my rear view mirror; I responded by holding the hand-held radar on the bend as if to intercept the lights of the vehicle approaching. Within seconds I realized there was no car and the light(s) were no longer there.
2. I looked up in the sky to my rear and approximately three-tenths of a mile behind me and approximately 600 feet in the air, I noted three extremely bright lights horizontally together. At this point I thought it was a helicopter hovering with its search lights on, so I shut the police car motor off and stepped outside the vehicle, still observing these lights, but not hearing any sound whatsoever. I heard nothing! I then noted the lights turn sideways, then I noted red and blue flashing lights present on this object. I might add at this time that I did not see any solid object or anything that these lights might be attached to. At this point, the lights started moving east of Highway # 102 and away from me towards Waverley.
3. Feeling certain I wasn't seeing things, I called for any other cars in the area and Cst. RIDDELL, who was in the Fall River area, responded. I asked him if he noted anything strange in the sky above the Waverley/Fall River area, to which he described exactly what I had seen and added that the object was still moving towards Waverley and becoming stationary again over the Waverley area. I then called the Airport Detachment and had them contact the Tower, who subsequently advised they had nothing in the air at that time, nor anything on radar.
4. I then moved location to the # 118 Highway to get a better view but lost sight of the object. Cst. RIDDELL maintained his position and continued to observe it. He then advised me that it was moving again in a westerly direction. I regained sight of the object as it moved across the sky at a high altitude, west of my point on the # 118 Highway, and then again became stationary. The object seemed to go to an extreme height and took on the appearance of a star except for very prominent flashing red and blue lights. This was observed by numerous people and many calls came into the Detachment. The object remained stationary in the sky until approximately 2:00 A.M. at which time I retired for the evening.

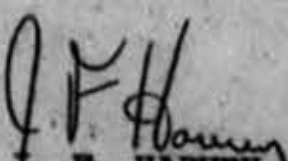

...../2

U.F.O. - Sighting of:-

76-085-114

5. The object was observed at the low altitude for approximately eight to ten minutes and then approximately two and a half hours at its high altitude.

RE: - OBJET:

UNIDENTIFIED FLYING OBJECTS
Sightings of - Lower Sackville
Halifax County, N.S. (16/17 OCT 76)

16 OCT 76

At 11:45 P.M., this date, a call was received at this office from Mr. & Mrs. Percy WEBSTER of 39 Hillside Avenue, Lr. Sackville, stating there were three unidentified flying objects in the area of their residence. An immediate patrol was made by the writer to the WEBSTER residence and upon arrival and with the aid of the complainants' binoculars I noted three unidentified flying objects. All of them were round in shape and had red flashing lights on the bottom and also a flashing white light. There was a stable green light which appeared to be located inside the objects. At this time the objects were stationery; however, I noticed that they began to move and when they did, the lights changed to a turquoise color. As the objects began to move, their altitude became greater. There was no sound or smell. The sky was clear at this time.

2. An immediate check was made with the Halifax International Airport Tower and it was learned that there were no airplanes or helicopters in this area at this time and nothing was registering on their radar.

3. Other witnesses are Mr. & Mrs. Robert BEDFORD of 37 Hillside Ave., Lr. Sackville, and Percy WEBSTER, age fifteen years, son of Mr. & Mrs. Percy WEBSTER.

4. Upon discussing this matter with the WEBSTERS, it was learned that the unidentified flying objects had been seen earlier in the evening; however, had not reported it. At that time the objects appeared to have been round, cigar shaped with four lights. They were flat bottom and had three long windows. Complainant also stated that one of the objects appeared to dock on top of another for about two minutes and then they split again and each went off in their own direction. These objects were visible to the writer for approximately two hours and when I left the scene, they were still there.

5. I might add it is the opinion of the writer that there is no possibility at all that what I saw might have been stars or even another planet as I was looking through the binoculars and therefore, would have been able to tell the difference.

RE: - OBJET: **Mrs. Christina Victor BEATTIE -
Complaint of Unidentified Flying Object
Spryfield, N.S.
23 OCT 76**

25 OCT 76

1. Patrolled to 18 Braeburn Road, Spryfield, N.S., and contacted complainant. She advised that her two children, Gordon Victor Alexander BEATTIE (B: 7 May 66) and Johan Blanch Marie BEATTIE (B: 10 May 68) all of 18 Braeburn Road, Spryfield, N.S., were the ones who saw the U.F.O.

2. Both Gordon and Johan BEATTIE were interviewed. Also interviewed at the same time were Daniel Victor STEELE B: 27 Jul 63, 7 Braeburn Road, and Jennifer Lynn Steele B: 21 Sep 65 of same address, who were with the BEATTIES at the time of the sighting.

3. Following information was obtained:

(a) Date and Time of sighting: 7:45 p.m. 23 Oct 76

(b) Condition of sky: Clear.

(c) Observer: Gordon Victor Alexander BEATTIE B: 7 May 66
18 Braeburn Rd., Spryfield, N.S. 477-8019

(d) Location of Observer: Beside residence at 7 Braeburn Rd., Spryfield, N.S. The BEATTIES and STEELES were playing at this location.

(e) Other Observers were: Johan Blanche Marie BEATTIE B: 10 May 68,
18 Braeburn Rd. Spryfield, N.S.
Daniel Victor STEELE B: 27 Jul 63,
7 Braeburn Rd., Spryfield, N.S.
Jennifer Lynn STEELE B: 21 Sep 65,
7 Braeburn Rd., Spryfield, N.S.

(f) Description of UFO: Large bright white light, like headlight out of car. Bright red light at rear; possibly flames. No sound from same and saucer shaped.

(h) Drawing of Object: As seen by Johan BEATTIE approximately one hour after sighting; drawing number 1. Also drawing made by Johan BEATTIE on 25 Oct 76 when she thought previous one had been lost; drawing number 2. Also drawing by Gordon BEATTIE on 25 Oct 76; drawing number 3. Copies of drawings attached.

RE: OBJECT

76-700-1013
76H-085-100-4

PAGE

2

CONTINUED FROM PAGE ONE...

4. All four people seem fairly intelligent for their age. Gordon BEATTIE is very interested in planes and other things military. He is definite it was not a plane. He is very familiar with all types of craft flying out of CFB Shearwater. His parents advised that the children were not afraid before seeing the object, but are since. Parents also checked papers for Saturday, Friday and Thursday to make sure they did not read about UFO and make the story up. Mrs. BEATTIE phoned Halifax International Airport and was advised only two planes were flying around at that time. One plane from CFB Greenwood to Shearwater; other plane from Bermuda to Halifax International Airport. UFO was travelling in a Northerly direction and just disappeared. Message #64 forwarded to National Research Council, Meteor Center, Ottawa.

5. No further action required.

CONCLUDED HERE.

1. Patrolled to 18 Braeburn Road, Spryfield, N.S., and contacted complainant. She advised that her two children, Gordon Victor Alexander BEATTIE (B: 7 May 66) and Johan Blanch Marie BEATTIE (B: 10 May 68) all of 18 Braeburn Road, Spryfield, N.S., were the ones who saw the U.F.O.
2. Both Gordon and Johan BEATTIE were interviewed. Also interviewed at the same time were Daniel Victor STEELE B: 27 Jul 63, 7 Braeburn Road, and Jennifer Lynn Steele B: 21 Sep 65 of same address, who were with the BEATTIES at the time of the sighting.
3. Following information was obtained:
 - (a) Date and Time of sighting: 7:45 p.m. 23 Oct 76
 - (b) Condition of sky: Clear.
 - (c) Observer: Gordon Victor Alexander BEATTIE B: 7 May 66
18 Braeburn Rd., Spryfield, N.S. 477-8019
 - (d) Location of Observer: Beside residence at 7 Braeburn Rd., Spryfield, N.S. The BEATTIES and STEELES were playing at this location.
 - (e) Other Observers were: Johan Blanche Marie BEATTIE B: 10 May 68,
18 Braeburn Rd. Spryfield, N.S.
Daniel Victor STEELE B: 27 Jul 63,
7 Braeburn Rd., Spryfield, N.S.
Jennifer Lynn STEELE B: 21 Sep 65,
7 Braeburn Rd., Spryfield, N.S.
 - (f) Description of UFO: Large bright white light, like headlight out of car. Bright red light at rear; possibly flames. No sound from same and saucer shaped.
 - (h) Drawing of Object: As seen by Johan BEATTIE approximately one hour after sighting; drawing number 1. Also drawing made by Johan BEATTIE on 25 Oct 76 when she thought previous one had been lost; drawing number 2. Also drawing by Gordon BEATTIE on 25 Oct 76; drawing number 3. Copies of drawings attached.

CONTINUED FROM PAGE ONE...

4. All four people seem fairly intelligent for their age. Gordon BEATTIE is very interested in planes and other things military. He is definite it was not a plane. He is very familiar with all types of craft flying out of CFB Shearwater. His parents advised that the children were not afraid before seeing the object, but are since. Parents also checked papers for Saturday, Friday and Thursday to make sure they did not read about UFO and make the story up. Mrs. BEATTIE phoned Halifax International Airport and was advised only two planes were flying around at that time. One plane from CFB Greenwood to Shearwater; other plane from Bermuda to Halifax International Airport. UFO was travelling in a Northerly direction and just disappeared. Message #64 forwarded to National Research Council, Meteor Center, Ottawa.

5. No further action required.

CONCLUDED HERE.

Compl. of U.F.O. Sighting

Compl. reports that at approx. 6:00 PM to 6:30 P.M., 2 NOV 76, while returning from PROVOST to her residence she noted a large brightly lit round object in the sky for a twenty mile stretch of highway around the a/l. The light appeared to be suspended and glowed from a white light to a dark red and appeared to move after 1/2 hour and dissappear in the hills around the Grassy Lake area. Compl. feels this is definately not a star or planet, and was also witnessed by her husband, Stanley.

Cpt. OBYRNE, C.F.S. Alsask was contacted and advises no radar tracking of this object was recorded.

Calgary Terminal Tower was contacted and also advises no trace of this object on their radar screen.

As this matter occured in CORONATION Det. area a copy of this report is forwarded to that point.

C.C. Coronation Det.

RE:
OBJET:Statement of Mrs. Stan KRUKOWSKI of Sedalia, Alberta
Taken at OYEN, Alta. - 10:00 A.M., 3 NOV 76

PAGE

On the evening of November 2nd, 1976 while travelling South from PROVOST, Alberta my husband and I witnessed a large round red ball in the South West sky that hovered over the Sampson farm. It was red and now and then turned a bright white fluorescent light. When we arrived at the Sampson farm the light, which looked like a large orange, moved south to the KIRREMUIR area. We turned West on the No. 12 Highway and for a few miles could not see it except now and again because of the hills blocking the view. When we arrived at the MOULY farm the light was proceeding in a South West direction, but more West. By the time we reached Harry DELEF'S farm it was travelling due South and dissappeared in the Grassy Lake hills. At the horizon it was still the size of an orange.

Solar Science, Physics, Aero Engineer
 Intelligence Transport and Communication
 I have made a drawing of a U. F. O. and a
 study of its function for the past thirty two
 years at interval after the sighting of five of
 these objects during World War Two while I
 was in captivity I have kept it under my
 own conscience all these years I have had
 and other sightings in the Western Part of
 Ontario Province and seen a strip of lumber
 cut and burn in front of my eyes 1947
 Two years later as I was on my way
 back home I reported this what happen
 to an Ontario Police station and continued
 on my way and forgot it but it keep
 on my mind as I saw it, streaking
 like a cigar shape with a burning
 bluish like a simple welding torch
 the width it burned and cut trees was
 about thirty feet wide Since that time
 I have forgotten it now after having
 this incident on the 12 Oct 1975 while
 sitting in the living room at 8 pm
 just as the Program of the Walton came
 on the television for me only as there
 was my wife also a friend sitting
 in front of it went
 Blank with white snow

There was two person that came right out of this snowy television screen dressed in a silvery Bluish Gray suit with a complete round helmet made of clear plastic that I could see their face quite well the side burn no hair but the rest of their hair the same as us, my very first word to them as I could not say anything, this must of been to myself as I was stupefied. What they said was not to fear and that I had notice that my mind was read by them and I did not have to speak so for the few seconds my mind went on the belief of God right there this is what they said we don't belong to any religious sect or clubs but we are in the belief of our Creator that made this possible and they ask me to follow them I was sitting on a chair and I felt this elevation and we the three of us at the Entrance of what I am reproducing with their guidance as they are in my mind and its nearly a month over and they will not leave me as we entered this space ship as I am a new one I had a good look of this inside also how this is built, they told me that through my mind from theirs they will help me right till this space ship is built.

also this happen so fast going aboard this ship and the return to my chair I ask my wife and her friend if they had seen the screen go Blank and told them what had happen also told them that they were going to land in Ontario some where on Thanks given day the next day it was sighted and reported by a man in Ontario it was in the Newspaper the Sun on the 14 Oct 1975 also that there will be more and more sighting as they told me that it will see the gathering Scientist talking about the Mc Power that everyone in the surrounding of two hundred miles will be affected this very information I received it on the 12 Oct 1975 and this again was in the Sun news with the heading of Growth of reactors threatens Oceans also saying that this should apply to all Nations not only 10 Nation but all and find a solution to clean up this mess (not to pull your own way but to achieve it by all concerned this was told to me by them two person and they insist very soon as the warning was given to me as mercury Pollution and poison lakes, rivers, ocean

The other question was -

How old do they live? Same as you
but with a better understanding.
There is no such thing as Jealousie
Creed or Crime
as this Univer is for all to Enjoy

Where do they live & ask
87 seven days is your 24 hours in light
at the speed of the Sun ray is

How did they sleep.
as we are in surrounding life is weightless
needs of beds or chair is not needed

What do they Eat

food detached in compact form held by
one inch thick compresses also food that
we gather in space same way as
you gather fish where it is in the
sea that have been taken from Planets
Earth by Twisters and sent in space
and from other planets as well

But what are your needs here on this planet if you have everything else where

This question to my surprise el was astounded because el was not thinking as el was stupefied by it.

Simple as it is one should read the Laws of your Creator and you my brother you are in need as you are exterminating your own species its agents our belief and understanding By our Creator This is the reason we come to help you and all others, that the information that has been given you to passed on

How can el be the stopping to this
How can el start where.
What shall el do

this is where el advise you by your mind and your understanding of destruction of your past history you have been selected and this is the word after he said your mind is mine till this is at an end also when you are at rest your mind will go to someone else that will not rest as well until?

How come me of all?

because you have Pain from Past, present,
and this will not leave you in future
the pain is in you and will not leave you
you will succeed in getting this understand-
ing to others that will follow and help
you to the solution of correction

To my Point of View all they want
is the Gathering of all the Scientist through-
out the World and have a cleanup of dirt
made for a better chance to live
and the shutting of all nuclear reactors
cut down on Crime, mental, help industries
a better means of communications between nations
and a better understanding of ourselves
and our purpose in life

So they told me to get busy and start
a cleaning of what I had seen
and also told me that everything is
on this planet for this use in order to
stop the multi Hydro purpose by
using solar dynamics to supply
instead of disturbing Ecology
stop Bombarding the center of this
planet also Solating the sphere
there is cleaner way of travel and
easier way by having these Scientist
to Gather and see for themselves
what they have done with their quest

as you will help in restoring the Elements
for the Waters to purified as well as the
Atmosphere and stop the Grount to spread
also a rebuilding of transport by Electrical
rail right across the country also the
use of one way or the other transmiss-
sion line to the space ship that will
follow the Rotation of your earth and
this is how you will leave the North
intact from Extraction of what is left
to keep it to return to an old Age
you dont have much time

In the past you have had during the War
Balloons attache to cable this will be some
but in space and will provide you all
Electricity required for future and this
will mean an all new type of life
on this planet all countries will have its
own food and supplies and a new way
of happiness will progress to a world
Government Body as the world oil supply
is decreasing all will be stop as you
will even have cars all appliances
heat everything will come from the
energy produce above your head
and Energie line will come from the
Higest mountain Top to the space ship
Generator all nuclear device will be
use in an other form

as all is not in vain
So give them this and you have to
take part of it as you are now
The explanation of this ~~ship~~ space ship

By Solar operated and multiplied by
jet starter Seared producing enough energie
for the start off the outer Layer as the
suction is been in progress by the speed
of the outer Layer a compressed vacuum
air goes to the heart of the giant dynamo
The same as the scroll case of a Dam
but with air compression making this
dynamo producing all the energie for
the space travel and now as you have
to-day Radar: Solar and a lot more
attractive we would suggest to use
as a start in space above the Elements
station that produce your energie
and it is transferred by a means
of a ray back to heart to your
demand as a solar energie to
distribution and demand leaving
the Earth crust at ease for culture

also for your safety for Reentre back to the
planet
an all jet action to return some
procedure

it was told to approach my Member of
Parliament and give these documents
to the appropriate person and ask him
to open or to have a center of research
on U.F.D. not only from our country
but from all scientific center and
Physics center as I am alone to ask
and I am being neglected for my
action to take place towards helping
for the clean up of this rather messy
job" I hate writing and reading and
having had to plead for this

So if you are capable to do something
about this I will greatly appreciate it
Regardless who you are.

as for me I will reproduce this
small slip and I am going to prove
that certainly these messenger I
have seen and that have taken possession
of my mind to relay the message
it is for all to see and read as it
is as real as you have this letter in your
hand

I feel as I am writing all this that
someone else is doing it for me
when I finish I'll shake all over?
I am not afraid as my past can easily
tell you

Yours truly

Harold Pierre Homel

On the 02 December, 1976 a call was received at the Peace River Sub-Division concerning sightings of U.F.O.'s near Cadotte Lake Alberta. These sightings have occurred in the last two weeks of November and up to the 2nd of December, 1976. At the time of most sightings the sky was clear and usually they occurred between 6:30 P.M. and 7:00 P.M. On the December 2nd sighting the only known witnesses are Father BARATTO and Phil HAUGEN. Father BARATTO was operating a vehicle at the time of the sighting, HAUGEN was working at the school. The object was oval with colours of red, blue, green, yellow, pink and white. The object seemed to be hovering with a possible distance of two miles altitude. Approximately two weeks earlier a John HALCROW saw an object hovering approximately 300 yards from him, this object appeared at his trap line near Cadotte Lake as he lit a fire. The object is described as saucer shaped with colours of white, red, pink, blue, green, and yellow. HALCROW observed two silhouettes in the top of the saucer.

03 DEC 76

A patrol was made to the area of the first sighting by Cst. VANDERPLOEG and Cst. BREURKENS. At approximately 6:35 P.M. a group of Natives pointed toward the red planet Mars as it glowed red and disappeared as clouds crossed in front of it. Nothing else appeared in the sky for the rest of the evening. HAUGEN said that it was the same object he saw before.

As far as HALCROW's sighting, it is unknown. It is known that he is elderly and has poor eyesight, he has at present only one good eye.

CONCLUDED HERE.

Barker reported the sighting of a UFO while driving to work this AM. It came very close to his vehicle at one point and came to a stop in a field. He got to within a hundred feet on foot to it before it took off. It was not large but very bright and well lit. In his opinion he would have been able to place it in his vehicle should he have been able to get hold of it. He was requested to prepare a diagram and detailed statement. Barker is a reliable person (Very) and would not make such a story up.

Telex sent to National Research Council as per instructions.
S.U.I.

*Encl. to file. I personally inspected the snow covering the field and found no signs of it having been disturbed.

ARNOLD BARKER

Box 162 Boyle
ALBERTA

While travelling south on highway 46 two and three quarter miles north of Boyle, I sighted two bright lights. I thought this was unusual for an airplane because of the type of light. It seemed about one-half mile away?? at about a 130 o'clock position. The object was flying from west to east direction. I drove until the object was in a 90° angle from the truck and road. I then waited until the object was too close to the truck and too close overhead for me to see from my passenger side window. Up to this point, the object had two lights one behind the other and both flashing. Each light appeared to be approximately two feet by four feet square and close together about three or four feet apart.

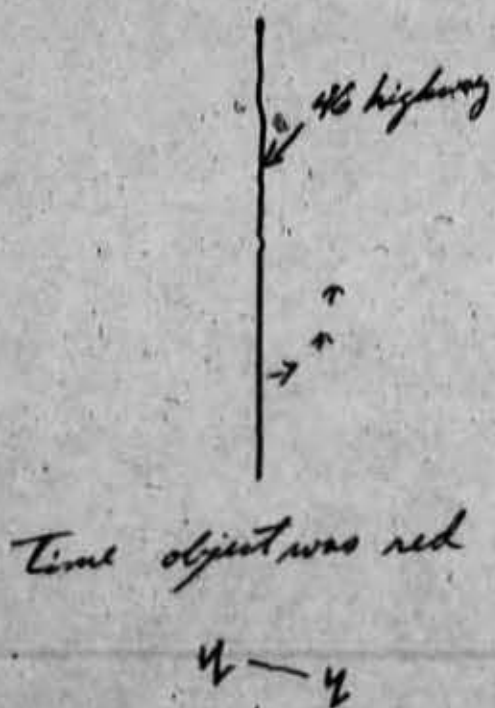

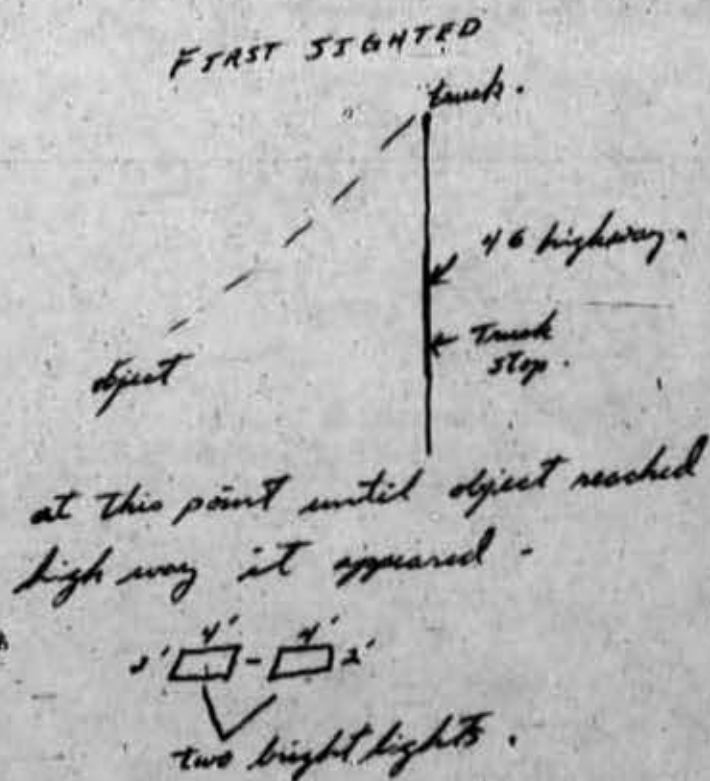

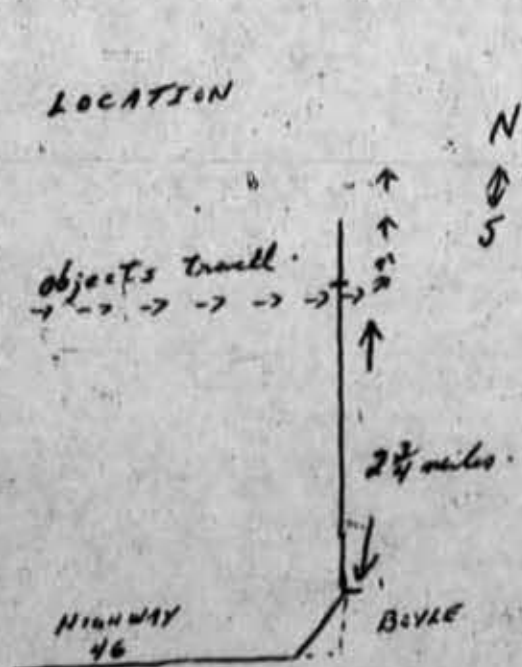

DEC 33 10 13 AM '76

②

the light itself was not a blinding light, but bright white. It was not until the object was directly over the ditch on my right side of the road that I realized that it was very low in flight and that it was not a plane. I jumped out of the truck so that I could get a better look at it as it passed over head and across the highway. By this time there were no white lights one in front of the other but two red lights side by side four feet apart and not flashing. Each red light was in sort of a zig-zag pattern about ten inches high. the lights seemed to be joined by something that gave off a faint light. Although my truck was running I heard absolutely no noise from the object while I was outside. The object appeared to be landing in the field on the east side of the road. Then it stopped about six feet to ten feet from the ground.

③ for a moment. It stopped about one-hundred
to one-hundred-fifty feet away from me. I made about
six to twelve steps in the direction of the object thinking
that I could reach it. then it moved in a northerly
direction. I then got into my truck and backed up
for about three-quarters of a mile to an intersection
where I could turn around. I was backing approximately
thirty miles an hour and the object by this time was
a white light again and stayed behind me at a
2 o'clock position. I then turned my truck around,
still travelling north and the object at more of a
one o'clock position gained distance from me. I
speeded up to seventy-five miles per hour for one and
one-half miles. When I stopped I sighted the
object on the horizon many miles away???

④ the object seemed to travel parallel to the road about three hundred yds off to the side some miles and just above the ground.

FROM BOYLE
TO NATIONAL RESEARCH METEOR COUNSEL OTTAWA 053-3715

THE FOLLOWING UNIDENTIFIED FLYING OBJECT SIGHTED 7:00 A.M. 15 DEC 76
BY A VERY RELIABLE PERSON ARNOLD BARKER OF BOYLE, ALBERTA. OBJECT SEEN
APPROX. 3 MILBS NORTH OF BOYEE. NO OTHER WITNESSES. OBSERVER DRIVING VEHICLE
ON HWY. #46 ON CLEAR OVERCAST MORNING AND SAW THE FOLLOWING DESCRIBED
OBJECT MOVING APPROX. 50 FE. UP AND TRAVELLING EAST ACROSS THE HIGHWAY.
IT APPEARED TO BE 6 FT. IN LENGTH AND 2 RECTANGULAR ALUMINATED MODULES
CONNECTED THE VERY NARROW BODY. THE LIGHTS APPEARED TO BE FLASHING VERY RAPIDLY
AND WERE NOT BLINDING. THIS OBJECT WENT UNDER THE POWER LINE OF THE
TOP OF A FIELD FENCE AND CAME TO A STOP APPROX. 6 FT. TO THE TOP OF THE
SNOW. OBSERVER REVERSED HIS VEHICLE AND STOPPED APPROX. 75 FT. FROM THIS
OBJECT. HE GOT OUT ON FOOT WITH THE INTENTION OF GETTING TO IT AND GRABBING
HOLD ON IT. IT THEN BEGAN MOVING RAPIDLY IN AN EASTERLY DIRECTION AND
LIGHTS CHANGED TO A REDDISH COLOR. HE THEN TURNED AROUND AND FOLLOWED
PARALLEL TO IT AT 75 M.P.H. AND CONTINUED OUT OF SIGHT AT A INCREASING
SPEED. DIAGRAM AND STATEMENTS WILL BE FORWARDED TO NATIONAL RESEARCH
COUNSEL ALONG WITH A REPORT.

REMARKS	A.C. MCNAMARA

16 Dec. 76

JAN 0 6 1977

1. At approximately 5:00PM on the above date Mr. Thomas Patterson contacted this office to advise that he could see a bright light in the sky just over Arctic Mountain, Carcross YT. Patterson stated he just observed the light and now appears to be moving slowly to the right.
2. Aeradio Whitehorse was contacted and they stated that the light wasn't from an aircraft or a satellite.
3. The writer also observed the light with a 45 power spotting scope but could not see anything other than the light. The object was nothing more than a light and was moving slowly to the south east over Carcross. Then at approximately 6:00PM the light disappeared. Since that particular evening there haven't been any other sighting reported of the light. Telex sent to National Research Council Ottawa.
4. On the evening of the sighting the sky was very clear with hardly a cloud in the sky.
5. Copy of this report forwarded to National Research Council Ottawa for their information.

MA/32 RE: SIGHTING OF UFO
MAYO YUKON 30-12-76

BE ADVISED WE HAVE HAD TWO SIGHTINGS OF UFO IN MAYO AREA. FIRST REPORTED 7:10PM P.S.T. AND OBSERVED BY ALBERT GENIER AND CST.D. J. HOPALUK, RCMP. CLOUD CONDITIONS AT TIME APPROX 7/10 AT 5500 FT AND THIS OBJECT BELOW CLOUD COVER. AT TIME OF OBSERVING THIS OBJECT BOTH PARTIES MENTIONED WERE IN REAR YARD OF RCMP DET MAYO YT. THE OBJECT WAS FIRST OBSERVED DUE WEST OF MAYO, APPROX 10 MILES AWAY AND APPROX 8 - 10 INS. IN SIZE FROM THIS DISTANCE. IT MOVED SLOWLY TO A SOUTHEAST DIRECTION FROM MAYO TO APPROX 10 - 15 MILES AWAY WHEN IT DISAPPEARED. THE ALTITUDE OF THIS OBJECT WAS BELOW 5,000FT. THE DESC. OF THIS OBJECT WOULD BE A ROUND BALL OF LIGHT YELLOW/ORANGE IN COLOUR AND PULSATING. THE LENGTH OF TIME OBJECT NOTED WAS APPROX 20 - 25 MINS.

A SECOND OBJECT LIKE FIRST IN DESC. AND APPROX SAME SIZE WAS OBSERVED AGAIN FROM MAYO AT 8:10PM P.S.T. CROSSING THE SKY SOUTH OF MAYO FROM EAST TO WEST DIRECTION APPROX 15 MILES OUT OF MAYO IT SEEMED TO LAND. THIS SIGHTING SEEN BY SEVERAL PEOPLE, LISTED AS FOLLOWS:

1. DONALD HUTTON
2. GERALD GRAHAM
3. RONALD PETER
4. GEORGE RONAGHAN
5. ALBERT GENIER

RE: - OBJET:

Lawrence Ritchie LOWE (B. 3 MAR 20)
Compl. of Unidentified Flying Object
Bridgetown East, N.S. 3 JAN 77

Bridgetown Message No. 77/1 dated 5 JAN 77 and Form A-151-1 dated 6 JAN 77 from C.O. "H" Division refers.

4 JAN 77

2. Lawrence Ritchie LOWE, @ Busby LOWE, Bridgetown East telephoned this office at 9.35 A.M. to report he sighted an Unidentified Flying Object from his residence at 8.40 P.M. on Monday 3 JAN 77.

3. At 11.00 A.M., I interviewed LOWE at his residence. He related he just happened to look out the pantry window on the west side of his house, located at the intersection of Trunk No. 1 and Saunders Road, when he saw a bright orange object in the sky at an angle of approximately thirty degrees to the ground and at an altitude of about 500'.

4. LOWE called to his wife, Hilda LOWE, to look at the half-moon shaped object. They looked at it for approximately ten minutes with their naked eyes and through 7 X 50 binoculars. LOWE stated the object was bright orange in colour initially, then would change to bright white in colour. When LOWE first sighted the U.F.O., it was stationary. He saw it move approximately five times upwards, downwards diagonally, and sideways. When viewing the bright orange object through the binoculars, LOWE stated he saw small white lights all around the edge of it.

5. As far as LOWE could determine, there was only one U.F.O. The sky was clear at the time of the sighting with the ground being snow covered. LOWE heard no sound from the U.F.O. although he was indoors at time of sighting. LOWE was unable to estimate the distance from his house to the U.F.O. but stated it disappeared in the westward sky and appeared to be dropping.

6. No other reports concerning this U.F.O. were received at this office. This report is being forwarded direct to the National Research Council, Ottawa with a copy to "H" Division H.Q., Halifax.

RE: - OBJET:	FILE 4712-5
Thomas Carlton BANKS "et al"	ENCL. 40
Report of U.F.O. Sighting	DIR. TO
Mile 963 Alaska Highway, Y.T. - 26 DEC 76	INDEXED BY
	MAIN FILE CHARGED TO

et al: Kenneth Peter SCHOFIELD. 26 DEC 76

1. At 7:35 PM a call was received at this office from the dispatcher Ambulance Service, Whitehorse General Hospital stating that they had just received a call via radio from their ambulance drivers who were proceeding north on the Alaska Highway at approx. mile 963. They reported sighting a U.F.O. At 9:00 PM the ambulance drivers, Thomas Carlton BANKS (B: 15 MAR 53) and Kenneth Peter SCHOFIELD (B: 24 SEP 20) returned to Whitehorse. They were spoken to briefly and a telex was forwarded to the National Research Council, Meteor Centre, Ottawa, Ontario.

27 DEC 76

2. On this date both BANKS and SCHOFIELD were interviewed. The following is submitted.

- (a) Date and Time: 7:30 PM 26 DEC 76 → 27/12/77 : 03:302
- (b) Condition of sky: Clear
- (c) Location of observers: Driving north in a motor vehicle on the Alaska Highway at approx. mile 963
- (d) Occurance of bursts: Saw the light at least six times.
- (e) Luminosity: Bright white light which seemed to turn to an off white color
- (f) Color: White, leaving no trail to tail.
- (g) Form: Bigger than a star but not as big as a full moon.
- (h) Duration: Approximately twenty minutes
- (i) Sounds: Nil
- (j) Position in sky: One thousand feet to ground level. Observed to the S.E. then veered to S.W.
- (k) Unusual Observations: Both observers thought the revolving red light on the ambulance stopped for a very short duration and they felt the object caused this.

3. After interviewing both observers it appeared that one had a vivid imagination however there is no doubt they did see something unusual. Both appear to be reliable persons. statements submitted by BANKS & SCHOFIELD.

4. Copy of this report forwarded to National Research Council, Planatory Sciences Section, 100 Sussex Drive, Ottawa, Ontario, K1A 0R6

AMBULANCE SERVICE

ESTIMATION: Haines Junction to pick up patient

DRIVER: Tom Banks

ATTENDANT: Ken Schofield

FIRST SIGHTING

The U.F.O. was first thought to be a bright star. Then erratic movement noticed.

Location: 1 1/2 mile north of Takhini bridge

Time: 7:30 p.m.

Bright white in color. Tremendous speed. It came at us head on. Schofield radioed station to confirm situation. It then "buzzed" us several times. We had no control of electrical system of ambulance. Speed, color, and manoeuvrability was like nothing we had ever witnessed. It did not "turn" but instantly reversed its course by the time we were at the Kushawa road and 15 minutes had passed. We were reporting by radio each sighting. At this time I attempted to flash beacon. U.F.O. paced us and bright light flashed back.

APPROACHING MENDENHALL

U.F.O. veered into draw of hillside to southwest. We thought it would crash but skimmed over mountain top and disappeared over Champagne area. We lost sight. We drove 2 - 3 mile. Crossed Mendenhall Bridge. Schofield continued to look to the left (U.F.O. to this point was always on south or left side of road), suddenly on right or north side of road I saw ground brilliantly lighted approximately 100 yards ahead through clearing, when reaching there, no light, no U.F.O. At Champagne picked up patient and returned to Whitehorse.

RETURN TRIP

We travelled back for 10 miles, before next sighting. By this time R.C.M.P. were behind us. Again on the south side of road. Now our right hand side. It appeared twice, although second time it was at first at tree level then seconds later it was out of sight at approximately 1000 - 2000 ft. then it was gone.

U.F.O. Characteristics - Tremendous speed, light, control curious (at one time on collision course with us. Flashing us) oval shaped. Possibly two of them - one in air on left of road for 15 - 20 minutes second on ground for seconds on right of road further north. Hard to describe due to say what to describe.

Tom Banks

Whitehorse, Yukon Terr.
December 28 1976

To whom it may concern re. U F O sighting

On December 26th 1976 we received a call to meet the Haines Junction Ambulance enroute to Whitehorse with a patient. We left W G H at 6:25 pm and proceeded north. My partner Tom Banks was driving. We had gotten a few miles past the Takhini Bridge on the Alcan Highway and I noticed a bright object in the sky very high which at the moment I thought was a star. I mentioned this to Tom. We got talking about stars and watched this one in particular. It was a clear night and there were a few stars out. This object which we thought was a star finally started to move and at a great speed into our area. Tom said should we report this on our radio to our base station in the W G H. I said no as we weren't sure what it was. For quite a while it was moving around to our left of the highway very low in the valley and over towards the mountain. At this point it was not travelling fast and I still kind of thought it was a plane. It acted to me as though it was lost or looking for something. At no time did I notice the red and green wing lights or the red flashing light that planes use in flight. All that I could see on this object was the one bright light. It did not seem to throw a beam of light in front of it. The object finally took off in a burst of speed and over a low spot in the mountain and to the west. It did not take long to lose sight of it. This is the time that I was positive that it was not a plane. We contacted our station in Whitehorse and told him what we had seen. The object soon reappeared again but did not drop so low this time. It appeared and disappeared quite a few times. The last time that it appeared it was heading right towards us at quite a speed. Tom said I am going to put the beacon ray on and see what happens. He did put it on and went for a short time and then stopped operating. It did not seem to last very long and was operational again. The object in the sky had seemed to come to a complete stop, reversed power and headed away from us again at a terrific speed. It disappeared through a draw in the mountains and was soon out of sight. When we got around Mendenhall we got into trees on the sides of the highway and could not see the valley. We met the other Ambulance north of Champagne and transferred our patient. Coming south we passed the R C M P vehicle. He turned around and was following us in to Whitehorse. He was not far behind us. I was not sitting in the passenger seat coming in as I was sitting in the back with the patient. Some time later Tom said there it is again. I came towards the front and looked into the sky but couldn't see anything. He pointed where to look and it was directly across the valley at eye level. It was close to the ground and hovering. I can not estimate how far away from us it was giving off a bright light. It was not a blinding light and it was not the size of a full moon. I would say that in my estimation this would be the closest that we were to this object and the valley is about 2 miles wide. I do not know how close it was to the mountains base at this time. The light seemed larger to me at this time than other appearances of the object. In total we must have sighted the object at least six times.

This is my version of what I saw and is a true statement.

Dear Sir:

Thank you for your letter of 13 January and its enclosure of sightings by three of your students. In 1968 the National Research Council of Canada assumed the responsibility for examining and consolidating all reports on this subject. Thus, this department's involvement is currently limited to observing and reporting incidents of UFO sightings to that department.

I have therefore taken the liberty of forwarding your letter to the Planetary Sciences Section of the National Research Council.

Thanking you most sincerely for your interest and action in this field, I remain

Report Of Unidentified Object(s) 22:55 Z

December 30, 1976 17:55:

Location (NE) 1 1/2 miles north of Clarendon, Ont. Palmerston Twnshp., Frontenac County.

Outside of Riddell's (Dave) home, the brothers, Steven and Raymond Riddell, saw an object about 300-400 yards from their home and about tree height.

Description:

It was circular and very bright and appeared to have prongs of about the same brightness emanating from the sides. Raymond heard something in the yard and went outside to see what it was and upon seeing this object, yelled to his brother Steven to come out and see it - Steven saw it and it seemed to remain in the same place for 10 seconds and disappeared at once.

January 10, 1977 21:30

Location - same location as Dec. 30/76.

Ken Reid had to go outside and looking up, saw a big ball of light with a beam coming straight out of it. Ken yelled for Steven to come out to see it. Steven said "-it was really glowing and down in behind the trees." It lasted about 45 minutes.

Dear Sir:

Dalton Sproule, Chris Dunham and Barry Massey saw a sighting as they were snowmobiling from Mosque Lake (about two miles southeast of Ompah). At 21:05 Dalton spotted the object and then Chris and Barry came and they saw it. As they were near the Palmerston Lake Centre, they called to Mr. & Mrs. Stanley Johnston who came out & saw it.

The object was white colour in the centre with bluish-green lights shooting from it. The object moved so slowly you had to observe it very closely as it moved.

It moved down behind the trees in a westerly direction then moved from behind the trees and moved in a northerly direction in about 20 minutes. From about 2 miles it looked about 3 times the size of a jet.

I hope that this report is of assistance to you.

Yours truly,

D. Alex McQuaid

RE: Richard FRITZ
UFO Sighting - 6 JAN 77
Sicamous, B.C.

In reference to the telex sent to you dated 12 JAN 77.

Statements were taken from the observers and are attached. Statements from Karen FRITZ and Linda FRITZ are not attached as they are younger and say they can't explain what they saw.

Neighbourhood enquiries indicate that only those mentioned observed the UFO.

An article on weather balloons is attached with the thought that this may have been what they saw. Unable to ascertain if there were any in this area on the date in question.

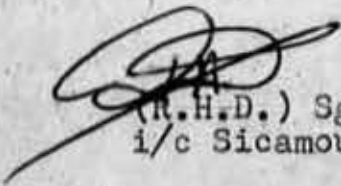

On 16 FEB 77 the writer contacted Mr. FRITZ to see if he had anything to add regarding this matter. He stated he has seen the UFO twice since the first two sightings. On 17 FEB 77 at 1840 hours Mr. FRITZ contacted the writer and said the object was in the sky again. From the FRITZ residence I saw the "light" he has been concerned about. The sky was clear with a slight fog moving in. The object was in the western sky. The light appeared to be larger than a star and gives off a brighter light. (Stars

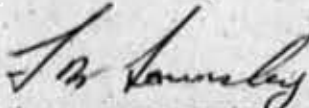

.....2

PAGE TWO

were out that night to compare to.) The light was in the same position in the sky and gave off a white light. It appeared to be at a high attitude and got bright and then faded out and bright again. Possibly due to clouds or fog. Observed until 1920 hours when vision was prevented by fog.

Await reply as to actions to be taken or possible explanation.

(R.H.D.) Sgt.

(F.W. TOWNSLEY) Cst.
Sicamous Detachment

/dymz

STATEMENT OF Richard FRITZ taken at his place of residence, Sicamous, B.C.

10 JAN 77 1300 hours

There were two sightings the first on 6 JAN 77 around 5:00 PM - 5:30 PM. The second on 7 JAN 77 5:30 PM.

The first night the sky was clear there were stars out. The object was stationary and stayed in view for two hours. It was a single object, larger than the stars. After two hours it clouded over and it couldn't be seen anymore. I was watching it from my front room window and after from outside, in the SW sky over Sicamous. It seemed to change shape. It was rectangular, blue-red to naked eye. Never notice it to change colour through field glasses. My eyes bothered me after awhile. Changed to a cone shape with a bright light on top and saucer on bottom. There were lines from the base to the open. A light seemed to move around the object. Then it changed to a pencil shape and a light would shoot out of it. It was way too big to be a star. The second night 7 JAN 77 we watched it for 1/2 hours and it was pretty well the same. The second night Ernest OLSON took the motion pictures.

OLSON Residence - Sirvios
1325 11 JAN 77

Statement taken by F.W. TOWNSLEY

STATEMENT OF Ernest George OLSON (B: 28 MAR 38) P.O.B. Langibarg,
Sask., Unemployed, General Delivery, Sicamous, B.C.

Thursday the 6th of JAN 77 I saw what looked like a larger than full sized star. I then used my camera with a zoom lens, it was then that I saw the object looked larger than the stars. It was circular with rings around it. Rings were different colours, mostly green and red and sometimes they would kind of glow together. It then looked like prongs sticking out of the main body. Then a separate light seemed to move around the big object. After that it was just like a big light with no detail that I could see. I was watching it for 3/4 hours. I was watching from inside through the window & then outside the house. It seemed to drift a little to one side slowly. It was clear that night, I could see the stars. This was around 6:00 PM just around the time the power was going on and off. The camera I used was a Cannon 514XL with a canon zoom lens C-8. You couldn't watch it to long, it would start your eyes to water.

(F.W. TOWNSLEY) Cat.
11 JAN 77 1345

Ernest G. OLSON
SIGNED:

The object I seen in the sky on January 6/77 was round and red green in colour was hard on the eyes. It didn't seem to move.

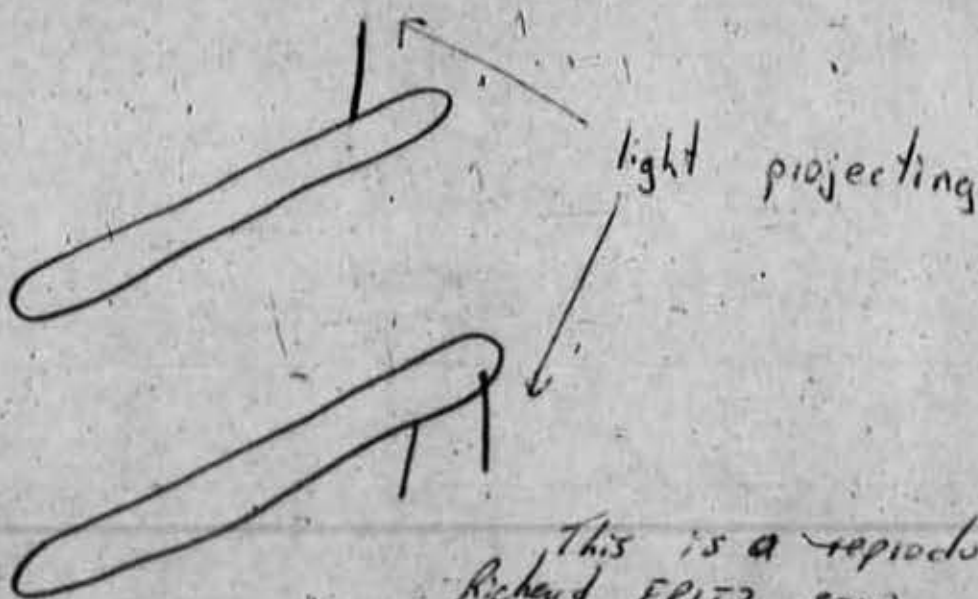

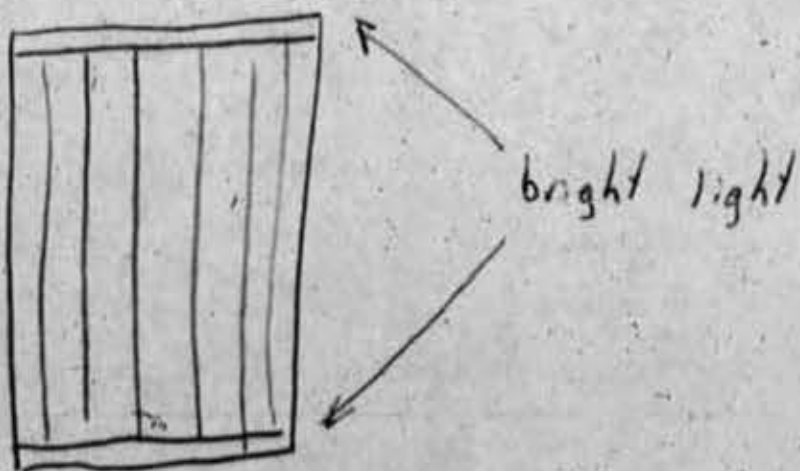

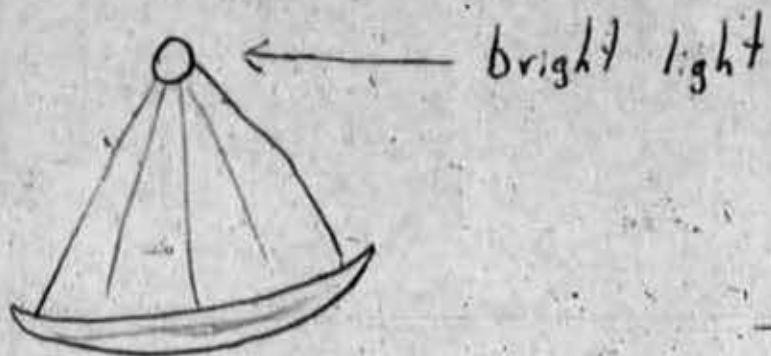

The approximate time I first saw it was 6:00 PM. The following evening was about 5 PM Jan 7. It's a very difficult thing to explain.

Mrs. Florence FRITZ

Age 49

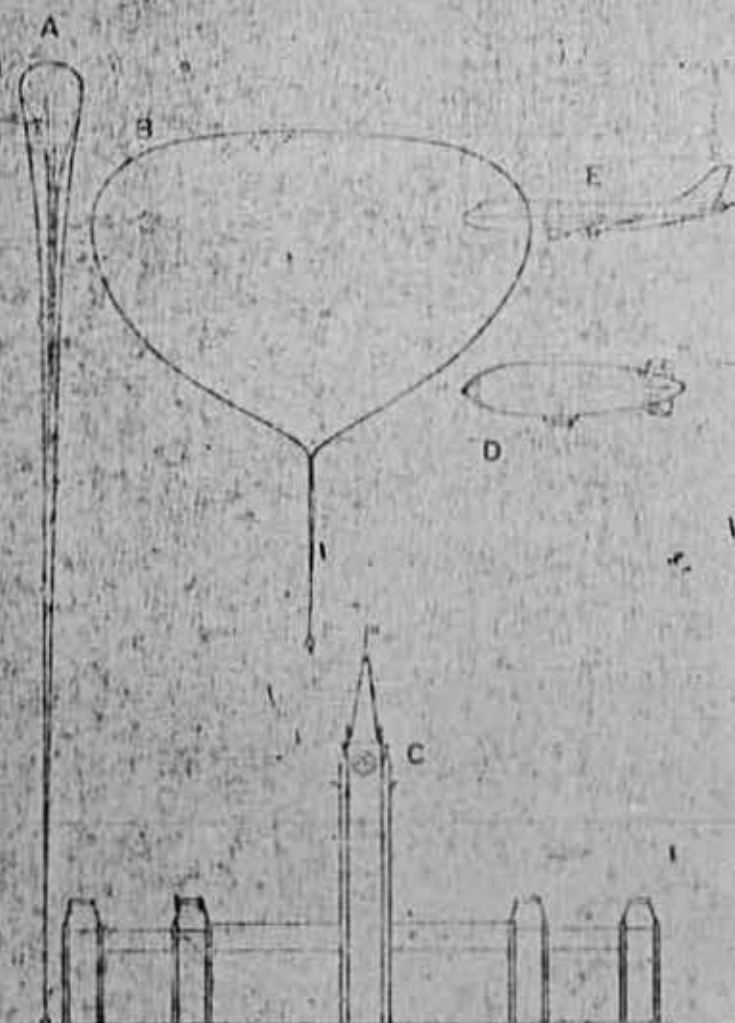

What I saw was a coned shaped object. It had a reddish orange color at the tip and different colours coming out from the end of it. When the object went away it went into a line a little bigger than a pencil. Within 10 seconds it was gone. This object appeared January 6, 1977.

Karen FRITZ
(13 yrs)

This is a reproduction what
Richard FRITZ saw.

Balloon launching

MISS MERLE W. COYNE, NRC/NCAR

Relative sizes:

- A. A scientific balloon at launch stands 790 feet (237 m) high.
- B. At float altitude the largest flown from Yorkton contains 15 million cubic feet (450 000 m³) of helium gas and measures 340 feet (102 m) wide by 270 feet (81 m) high.
- C. The Peace Tower of the Parliament Buildings in Ottawa stands 301 feet (90 m) high.
- D. The 192 foot-long (57 m) Goodyear "blimp" with a volume of roughly 200,000 cubic feet (6 000 m³).
- E. A Boeing "jumbo" jet is 231 feet (69 m) long.

Dimensions comparées:

- A. Un ballon scientifique mesure 790 pieds (237 m) de haut au moment du lancement.
- B. À leur altitude de croisière les plus grands ballons lancés de Yorkton contiennent 15 millions de pieds cubes (450 000 m³) d'hélium, leur hauteur atteignant 340 pieds (102 m) et leur largeur 270 pieds (81 m).
- C. La hauteur de la Tour de la Paix des édifices du Parlement, à Ottawa, est de 301 pieds (90 m).
- D. Le dirigeable Goodyear a 192 pieds (57 m) de long pour un volume approximatif de 200 000 pieds cubes (6 000 m³).
- E. Un quadricycle Boeing "jumbo" a 231 pieds (69 m) de long.

Almost immediately, the control and command electronics in the payload are activated and radio contact is established with the ground. At the same time, scientific instruments in the gondola begin to receive and transmit atmospheric data as they will throughout the entire flight.

About three hours after launch, the balloon reaches its float altitude and begins a slow drift westward. The flight's path is, of course, governed by the direction of winds at this level (up to 145,000 feet) (44 000 m) while its duration depends upon wind speed. Although the trajectory and flight duration can both be estimated before launch, deviations are nonetheless possible and can lead to failure of the mission. So it becomes important to know the position of the balloon at all times for purposes of air traffic safety (required by Transport Canada), control and recovery.

Accordingly, balloons in flight are tracked constantly by the Pine Tree network of radar stations operated by the Department of National Defence. Also, each balloon is followed closely by a pursuit aircraft which maintains radio contact with the payload instruments. A number of safety devices built into the balloon ensure that any flight can be terminated instantly on command.

To ground observers during evening hours, high altitude scientific balloons resemble large, bright, circular objects in motion, looking unlike airplanes or common stellar phenomena. This visual effect is created at very high float altitudes where a balloon's plastic skin picks up and reflects light earthward from the sun. (The same process illuminates our Moon in the night sky.) At lower altitudes during hours of darkness, each rig is marked with flashing lights. Little wonder that rushes of balloon sightings are often reported as U.F.O.'s.

About 24 hours after ascent, each balloon is destroyed by radio signal, allowing the payload equipment to descend by parachute in the area east of Calgary, Alberta. The pursuit aircraft follows the descent closely and relays the landing position to a downrange recovery team on the ground. Finally, the payload is recovered by ground transportation or by helicopter depending upon the type of terrain. The many hours of planning and weather monitoring before touchdown optimize the chances of landing the equipment undamaged in a suitable impact area.

After recovery, the scientists' task of analyzing and interpreting data begins. During August, a solar telescope was flown by scientists from the University of Calgary while a program devised by the Atmospheric Environment Service of Environment Canada combined 12 experiments for simultaneous measurements of key stratospheric gases. Among these were chlorine compounds and oxides of nitrogen which play vital roles in the chemistry of the Earth's ozone layer.

Another balloon, launched for American scientists from the National Center for Atmospheric Research (NCAR), carried an experiment called the Cryogenic Whole Air Sampler designed to collect atmospheric constituents at many altitudes.

"The whole operation," notes Mr. Charko, "aroused a good deal of interest from international organizations some of whose members attended these launchings as observers."

"Already," he adds, "we've received numerous proposals from scientists for experiments to be sent up in the coming months and in fact, besides two launches set to go in January, we're well under way with plans for another series next summer." □

Up, up and away To the stratosphere and back

Modern versions of an old standby, the helium balloon, are adding new wrinkles to the field of atmospheric science. A series of balloon-borne probes into the stratosphere were recently flown from Yorkton, Saskatchewan, using Canada's new mobile launch facility.

Unhindered by vibrating or polluting engines, the free balloon is in many ways an ideal laboratory for studying the subtleties of the atmosphere.

A mobile balloon launch facility, recently established at Yorkton, Saskatchewan, has become Canada's link in the growing international network of scientific support services. During the month of August, a series of large scientific balloons were launched from the site in support of Canadian scientists from the Atmospheric Environment Service of Environment Canada, the Universities of Calgary and York as well as a number of scientists from the United States. The eight-week program was organized by NRC's Space Research Facilities Branch.

Why Yorkton? "For many reasons," explains Project Manager Ron Charko. "High altitude winds for example. They're critical for a successful balloon flight. Also, the balloons drift hundreds of miles in the air before they land, so the long stretches of open country west of Yorkton offer many areas in which to bring them down. Add to that the low density of air traffic in the region and the series of radar tracking stations already in place along the balloon flight corridor and you come up with an excellent launch site.

"Don't forget," he adds, "there's also a built-in advantage for scientists working in northern latitudes where geophysical conditions are ideal for their studies."

In recent years, balloon technology has progressed to such a point that a scientific launch facility can provide support for experiments not only in atmospheric sciences but also in the fields of astronomy and other space sciences.

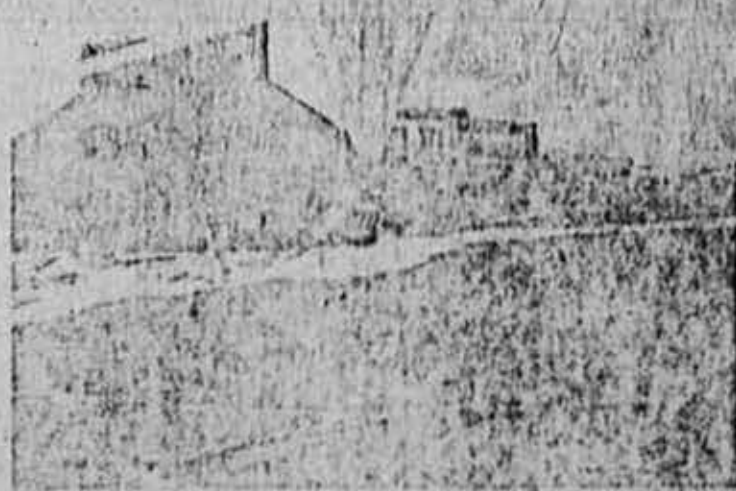

The development in the United States of a plastic film which could be easily sealed and would withstand the harsh environment was a major breakthrough in balloon design and manufacture. Although remarkably resilient, the skin of a modern balloon bubble measures less than one thousandth of an inch in thickness, about three times thinner than the material in a common plastic garbage bag.

The largest of the balloons flown from Yorkton fills a volume of 15 million cubic feet and can float instrument payloads weighing some 2,500 lb. (1,100 kg), the equivalent of a small car, to altitudes exceeding 100,000 feet (30,000 m). When deflated and spread out on the ground, its mammoth plastic skin can comfortably cover the area of a football field.

The size of these balloons, in fact, determines the size and complexity of a suitable launching facility. Small balloons, up to 250,000 cubic feet (7,000 m³), require no special heavy ground equipment and can therefore be launched by a small scientific group with little or no outside assistance. With larger balloons, however, launching is a complex task which requires the coordination of numerous technicians with specially designed machines and electronics.

At the outset, weather patterns play a vital role in any scientific balloon launch. At the mercy of fickle winds and changing weather, flight crews may wait for days until conditions are optimal. Only then can the operation begin.

In preparation, wind profiles are recorded up to altitudes of 60,000 feet (18,000 m). Near the ground, surface winds must be slow enough to ensure a safe, effective take-

A balloon bubble taking shape. Helium gas flows in through the long, extended sleeves on either side. The spool in front of the helium trailer restrains the balloon until lift-off.

Ballon en cours de gonflage. L'hélium pénètre dans l'enveloppe en empruntant les longues manches placées de chaque côté. Le treuil monté à l'avant du camion aviateur retient le ballon jusqu'au lancement.

for the proper direction and speed since turbulent shear winds could easily rupture a balloon during ascent. Finally, measurements are made on the strength and direction of high altitude winds which determine the flight path of a large balloon; the eventual distance travelled can vary from 250 miles (400 km) to as much as 1,000 miles (1,600 km) from the launch site.

At length, the expected moment arrives. The winds are just right. The skies are clear. The nearest thunderstorm is many miles and towns away on the distant prairie. Transport Canada personnel at Yorkton airport confirm that a balloon flight won't interfere with air traffic. Countdown begins.

The most common technique for launching balloons is the dynamic launch, executed with a mobile vehicle which supports the payload. This flexible approach lets the launch crew compensate for changes in surface wind direction which might otherwise give the balloon an awkward or misdirected lift-off. First, the prostrate balloon is filled slowly with helium gas while it is held down by a large spool attached to a weighted trailer. Next, as the inflated bubble is released, a launch vehicle manoeuvres the payload so it stays directly under the ascending balloon. When the balloon train is fully extended, the payload is finally set free by the launch vehicle, and the
