RE: UFO RICHMOND BC 79NOV26 - RICHMOND FILE NO 79-032075
ON 79NOV29 AT APPROXIMATELY 0200 HRS PST A UFO WAS SEEN BY SUSAN VAN DEN BOOGARD, DOB 61NOV02 OF 8591 FRANCIS RD, RICHMOND B.C. IT WA A CLEAR NIGHT. SHE WAS AT HER HOME AND OBSERVED THE UFO TRAVELLING WEST O EAST OVER NORTHER RICHMOND. SHE DESCRIBED ITS SHAPE AS HAVING THE APPEARANCE OF AN UPSEIDE DOWN SAUCER WITH A GREY TOP. THE BOTTOM WAS FLAT AND DULL GOLD IN COLOUR WITH A BLACK CENTRE WHICH APPEARED TO PROTRUDE SLIGHTLEY. THRE WAS 4 LIGHTS EVENLY SPACED ON THE BOTTOM NEAR THE CIRCUMFERANCE AND ALSO WHAT APPEARED TO BE TRIANGULAR SHAPED VENTS. THE TOP APPEARED TO BE SPINING WHILE THE BOTTOM WAS MOTIONLESS. IT MADE A HUYMMING NOISE QUITE LOUD. SHE OBSERVED THE U.F.O. FOR APPROXIMATELY 2 MINUTES FROM A REASONABLE SHORT DISTANCE AT WHICH TIME SHE WENT TO GET HER PARENTS

SHE RETURNED APPROXIMATELY 1/2 MINUTE LATER AT WHICH TIME IT WAS DISAPPEARING TO THE EAST. THERE IS NO OTHER KNOWN OBSERVANCES.

FROM / DE: OIC RICHMOND TOWNSHIP DETACHMENT

SUBJECT / OBJET: Unidentified Flying Object Observed, Richmond, B.C. 79-11-29

Cpl. LUCAS of Richmond Detachment investigated an Unidentified Object observed at Richmond. On the 79-11-29 at approx. 0200 Hrs. Pacific Standard Time an Unidentified Flying Object was seen by Susan VAN DEN BOOGAARD, (B: 61-11-02), of 8591 Francis Road, Richmond, B.C. It was a clear night. She was at her home and observed the Unidentified Flying Object travelling west to east over Northern Richmond. She described its shape as having the appearance of an upside down saucer with a grey top. The bottom was flat and dull gold in colour with a black center which appeared to protrude slightly. There were four (4) lights evenly spaced on the bottom near the circumference and also what appeared to be triangular shaped vents. The top appeared to be spinning while the bottom was motionless. It made a humming noise quite loud. She observed the U.F.O. for approx. 2 mins. from a reasonably short distance at which time she went to get her parents. She returned approx. 1/2 mins. later at which time it was disappearing to the east. There was no other known observant. Susan VAN DEN BOOGAARD is 19 yrs. old, she lives with her parents and works at Vancouver Int'l Airport as an Insurance Sales Person. She seems intelligent and reliable and advises she had not been drinking prior to seeing the U.F.O. She did not appear to be the type of person who would imagine spotting a U.F.O. or making a false report. As she works at the Airport she is familiar with the appearance of aircrafts at nights. Details of the sighting were forwarded to the Area Control Centre at Vancouver Int'l Airport at the time of it being reported.

DATE: 79-12-05

SUBJECT / OBJET: RE: U.F.O. SIGHTINGS

This correspondence is in furtherance to our telex of the 3rd instant covering an alleged U.F.O. sighting by one Gail DACEY.

Please be advised that at 1758 hrs. 79 DEC 02, this office received a phone call from Gail (Mrs. Wayne) DACEY (DB: 08 MAY 48) of the NAPLES district, Alberta. NAPLES is located some 20 miles northwest of WESTLOCK, Alberta. Cst. D. H. McCORRISTON of this office subsequently attended at the DACEY farm, however, no evidence could be found which might remotely be connected with the apparition. The sighting and subsequent investigation occurred after sunset.

On 79 DEC 03, Cpl. R.W. MOW, also of this office, attended at the DACEY farm in response to information received from Mrs. DACEY to the effect that imprints of unknown origin had been found in the snow at or near the location of the sighting. Cpl. MOW'S examination of the imprints established that same were created by a young child (or children), probably DACEY'S off-spring, and definitely not connected in any way with the alleged sighting. The imprints were approximately 75 - 100 feet away from where the apparition was sighted.

From investigations conducted by Cpl. MOW and Cst. McCORRISTON, the following circumstances are provided. At approximately 1730 hrs. 79 DEC 02, DACEY'S Doberman Pincher dog began barking at the rear door (outside) of the DACEY residence. Mrs. DACEY responded to the back door to investigate what was causing the dog to become aroused. At the back door, she found the dog facing a northwest direction from the house, looking in that direction. She observed a bright blue object glowing some 300 feet to the northwest. Mrs. DACEY walked approximately 25 feet from the house in an effort to better identify what she was looking at, then apparently became frightened and returned to the house where she attempted to telephone her husband at work. Between other telephone calls made, she had occasion to observe the object over a period of approximately 15 minutes. The object was initially noted to be a very bright blue color however, as the observation continued, the color dimmed in intensity. The object was football shaped with a length estimated at 5 feet. According to Mrs. DACEY, the length was vertical to the ground. No sound could be heard eminating from the object, which remained suspended approximately 20 feet above the ground, probably due, according to Mrs. DACEY, to the dog's continuous barking. Mrs. DACEY'S two son's, Paul (12 yrs.) and David (9 yrs.) apparently also observed the apparition.

December 28, 1979.

Mr. John Pushie
Nova Scotia.

Mr. Pushie:

As requested I am sending you back the four photos and the negative you have send to us for examination.

I have consulted three astronomers and they were unanimous in the explanation of what you see on the night of December the 3rd, 1979.

If you look closely at the long exposure photo (3-4 minutes) beside the bright line you can see a fainter one 3/4" to the left of it and also a pair of faint lines above it which form a triangle of the following pattern:

The brightest line is the star Vega in the constellation of Lyra. As you can also deduce the xigzagging on the other photos occured not only on the brightest star Vega but also on the fainter one. That pattern was due to the instability of the camera and not to the objects (stars) moving.

I include a sky map to help you to identify the stars on your photos. I hope this will answer your questions.

Yours Sincerely,

Original Signed by

UFO SIGHTING

Reference: CFS Sydney DO 57 040230Z Dec 79

1. The enclosed photos and one negative are forwarded for your observation and information in conjunction with reference.

2. The observer, Mr. John Pushie, obtained these photos with a 35mm Minolta camera mounted on a tripod with shutter cable and time exposure. The camera had a 150 zoom lens, F stop of 3.5 and shutter speed on bulb setting was B. The first three photos designated A, B and C were shot at 30 - 40 second time lapses and the photo designated D was a 3 - 4 minute shot.

3. Mr. Pushie advises this office that the UFO was at a North direction from his house and he observed the object for approximately eight minutes, then when it started to descend and leave his sight because of the mountains it took approximately 40 seconds.

4. It is requested that these photos be returned to Mr. John Pushie, RR#3, Sydney, N.S., B1P 6G5. If any further information is required, he may be contacted at 902-562-4756.

RE: METEORITE/FIREBALL SIGHTING YELLOWKNIFE NWT 79-12-07
AT APPROX 0910 HRS 79-12-07, CST P. EVANS AND CST F. HARRISON OF THIS DETACHMENT WERE PATROLLING DOWNTOWN YELLOWKNIFE IN A POLICE CAR WHEN THEY OBSERVED A FIREBALL IN THE SKY SOUTH OF THE CITY. THE SKY WAS CLEAR AND SUNRISE HAD JUST OCCURED. THE OBSERVERS WERE LOOKING SOUTH AT A BEARING OF APPROX 210 DEGREES FROM THE CENTER OF THE CITY. THE OBJECT WAS VISIBLE AND APPEARED TO BE ROUGHLY CIRCULAR IN SHAPE, TRAVELLING RAPIDLY ACCROS THE OBSERVER'S LINE OF SIGHT, FROM WEST TO EAST. THE LEADING EDGE WAS LUMINOUS AND A TRAIN WAS PRESENT. BOTH THE OBJECT AND ITS TRAIN WER GREY IN COLOR. THE OBSERVATION ONLY LASTED 3 SECONDS, AND THE FIREBALL PASSED BEHIND A 10 STOREY BUILDING AND WAS OBSCURRED. THE SIZE OF THE FIREBALL COULD NOT BE SESTIMATED AS THE DISTANCE BETWEEN THE FIREBALL AND THE OBSERVERS COULD NOT BE ESTABLISHED. IT APPEARED TO BE LARGE AND WAS CLOSE ENOUGH TO BE CLEARLY SEEN AS A SOLID MASS. THERE WERE NO BURSTS OF LIGHT AND THE TRAIN PERSISTED ONLY BRIEFLY. THIS DETACHMENT HAS NOT RECEIVED ANY REPORTS OF OTHER SIMILAR SIGHTINGS.

THE FOLLOWING RECEIVED FROM PENTICTON DETACHMENT
QUOTE.....

Dec 11 01:30

2[illegible]30 HRS (PST) 79DEC10, PENTICTON DETACHMENT RECEIVED SIGHTING OF U.F.O.
IDENTITY OF OBSERVER(S):LLOYD WILLIAM NELSON STANLEY (DOB:10FEB42)
CAROL JUNE STANLEY (APPROX.35 YEARS)
HARRY GALLAGER (AGE 26YRS.)
ADDRESS OF OBSERVER:OKANAGAN FALLS, B.C.(9 MILES SOUTH OF PENTICTON)
DATE-TIME SIGHTING:17:45 HRS (PST) 79DEC10
LOCATION SIGHTING:SOUTH OF OKANAGAN FALLS APPROX. 6 MILES ON BACK ROAD AT A SAWMILL SITE.
SKY CONDITIONS: CLEAR - STAR FILLED.
DESCRIPTION: ROUND, ORANGE COLORED, APPEARED ON FIRE AND DISENAGRATING. ALTITUDE OF APPROX. 30,000 FT., TRAVELLING FROM SOUTH EAST TO NORTH-WEST. LAST SEEN RACING DOWN OVER APEX MT. AREA.
TIME OF VIEWING: 4-6 SECONDS
LLOYD STANLEY HAS SEEN A NUMBER OF FALLING/SHOOTING STARS. STATES THIS UFO TRAVELLING FASTER THAN A JET BUT DEFINETELY SLOWER THAN FALLING/SHOOTING STAR AND MUCH BRIGHTER.
ON STANLEY'S ARRIVAL AT HIS RESIDENCE HIS 14 YEAR OLD SON, DEAN WILLIAM STANLEY REPORTED SEEING THIS SAME UFO WHILST STANDING IN THEIR YARD. TIME AND TRAJECTORY COINCIDE.
CST. R.G. PETERSON OF PENTICTON DETACHMENT ON INTERVIEWING PARTIES CONCERNED, STATED THEY ARE ALL RELIABLE AND SINCERE.
ATTEMPTS BEING MADE TO CONTACT DR. W. R. DANNER REGIONAL REP. AT U.B.C., VANCOUVER. THERE HAS BEEN NO PRESS RELEASE.

SIGNED J.W. JOHNSON, SGT.

RE YOUR TELEX OF 21 JANUARY, REF CFAO 71-1, THE FOUR SIGHTINGS OF BRIGHT OBJECT LOW IN THE SOUTHWEST AFTER SUNSET ARE ALMOST CERTAINLY THE PLANET VENUS. THE FLASHING EFFECT IS DUE TO UNSTEADINESS OF THE ATMOSPHERE AS SEEN NEAR THE HORIZON. VENUS WILL REMAIN EXTREMELY BRIGHT AFTER SUNSET FOR SEVERAL MONTHS TO COME. PLEASE ADVISE R C M P DETACHMENT.

ON THE 80-01-04 ONE FRANK LEWIS OF BLACKIE, ALBERTA RESPONED TO OUR OFFICE ADVISING THAT AT APPROX. 2230 HRS 80-01-03 HE OBSERVED SOME STRANGE LIGHTS COMING FROM THE SKY. HE COULD NOT MAKE OUT EXACTLY WHAT THE LIGHTS WERE COMING FROM BUT STATED THAT THERE WAS ONE BRIGHT LIGHT AND ONE DULLER LIGHT. HE APPARENTLY TRIED TO LOOK AT THE OBJECT WITH FIELD GLASSES BUT COULD NOT SEE IT. AT THE TIME OF THIS SIGHTING THE OBJECT WAS APPARENTLY EAST OF HIS RESIDENCE, A DISTANCE OF FROM ONEEIGHT TO ONE HALF OF A MILE. THE SKY AT THE TIME WAS CLEAR WITH ICE CRYSTALS. THE C/N APPARENTLY OBSERVED THE VEHICLE FOR APPROX. ONE AND A HLAF HOURS AS IT MOVED IN A 25 MILE RADIUS OF HIS RESIDENCE. A 11 YEAR OLD GIRL WHO WAS ALSO AT THE RESIDENCE APPARENTLY ALSO VIEWED THE OBJECT BUT CAN NOT IDENTIFY THE VEHICLE OR OBJECT ANY BETTER, HER NAME WAS FOUND TO BE KIM DEVEY (B68-12-04) OF 9956 MILDE ROAD S.E. CALGARY ALBERTA (271-5893). ON 80-01-05 THE WRITER SPOKE TO THE NEIGHBORS ON EITHER SIDE OF THE C/N AND THEY ADVISED THAT THEY HAD SEEN NOTHING. NO AIRCRAFT WERE REPORTED IN THAT AREA ON THE NIGHT IN QUESTION. REPORT TO FOLLOW. REPLY ATTN CST MEHMEL

RE: - OBJET:

Frank LEWIS - Sighting of U.F.O.
80 JAN 03 near Blackie, Alberta

1. On 80 JAN 04 at 11:30 hours, the captionally noted complainant responded to our office and advised that at approximately 10:30 p.m. 80 JAN 03 he had observed a group of lights coming from the sky. He could not make out exactly what the lights were coming from but stated that there was one bright light and one duller light. He apparently tried to look at the object with field glasses but could not see it. At the time of this sighting the object was apparently east of his residence a distance of from one-eighth to one-half of a mile. The sky at the time was clear with ice crystals. The complainant apparently observed the vehicle for approximately one and one-half hours as it moved in a 25 mile radius of his residence. An 11 year old girl who was also at the residence apparently also viewed the object but cannot identify the vehicle or object any better. Her name was found to be Kim DEVEY, (DOB: 68 DEC 04), of 9956 Wilde Road S.E., Calgary, Alberta, (271-5893).

80 JAN 05

2. 11:30 hours - I responded to the farm of Janet Wilkinson who lives southeast of the complainant's farm. She was questioned regarding any possible sightings on her part. She advised that she had neither seen nor experienced anything out of the ordinary. She was asked if there had been any interference on her television or radio and she replied to the negative.

3. 11:50 hours - I responded to the farm of one Ed Johnson who lives directly west of the complainant's residence. He also advised that he had neither seen nor heard anything. He was also asked if he had experienced any sort of interference on his radio or television and he replied to the negative. It should be noted that at the approximate time of this occurrence he was watching television.

4. 11:56 hours - The area where this occurrence apparently took place was checked, however, we were unable to find anything which would assist us.

5. 14:00 hours - Due to the fact that it was felt that it was a helicopter I contacted a Mr. Fred Clark of Okanagan Helicopters of Calgary and he advised that there are helicopters which are fairly quiet but not so quiet that they couldn't be heard. He further advised that no helicopters would normally be out that time of night. He suggested I call the Ministry of Transport to see if they have any record of helicopters flying that time of night.

. . . /2

National Research Council of Canada/ Conseil national de recherches du Canada
RG 77, Vol. 309

6. 14:20 hours - I contacted the Air Traffic Controllers' Office in Calgary and was advised that around 02:40 hours 80 JAN 04 there was an Air Canada K1011 which was circling the area southwest of the airport. It apparently was dumping fuel. He further advised that the only helicopter they had landing was the CFAC traffic control helicopter and that it landed at 17:30 hours on 80 JAN 03.

7. We are unable to prove or disprove that complainant saw a U.F.O. We have investigated all possibilities and have been unable to determine what may have caused this. It should also be noted that the neighbours spoke highly of Lewis and advise that he has been a good neighbour and hasn't experienced any drinking problems.

Telex #01/80 forwarded to Ottawa as per Operational Manual I.3.E.22.

CONCLUDED HERE

National Research Council of Canada/
Conseil national de recherches du Canada

RG 77, Vol. 309

Statement of FRANK LEWIS of Blackie, Alberta, regarding possible sighting of U.F.O. at approximately 23:00 hours 80 JAN 03 near Blackie, Alberta.

About 10:30 p.m. my dogs began to bark. I looked out the window to the east of the house and about one-half to one-eighth of a mile I saw a bright odd light which seemed to be coming from no real source. For some time I couldn't and I got my field glasses. I then noticed a smaller light about 30 feet off the ground and behind the more noticeable light. I watched for some time and it appeared to do no more than patrol about a 25 mile area near my farm.

I did notice, however, that the microwave oven acted funny and electronic organ in the house would hum when it came close or within one-half mile of the buildings, also a compass would always point its needle to the source of the light.

I have no livestock but my dogs were really upset, Inas much as this cattle mutilation has been bad in our area I was concerned that maybe what I was watching may have some connection I watched for about 1½ hours in total.

A 12 year old girl staying with us saw the lights, saw the dogs bark.

I felt I should contact the R.C.M.P. but as it seemed an odd story did nothing that night. In the morning my dogs were not normal - seemed to be drugged, shocked or something. Never saw anything like it. By 10:00 a.m. seemed to be more normal.

I recall no noise or anything that would sound like a motor. It was a bright clear night but for some time it was not easy to see objects on the ground but easy in the air. I watched with field glasses from my house both inside and out. I timed the speed to be .41 - .42 seconds to the mile marked by road allowance - eastto west. Because of the action,speed and type of flight I felt I was watching a helicopter.

I have a problem with colour as my colour vision is not perfect but I believe there was a red glow to the light at times and seemed to be no marker lights or anything except this spot type light to ground.

I just asked myself why such a patrol action on my fields when nothing is there and thoughtthat what I saw should be known.

"Frank Lewis"

CONTINUATION – SUITE

PAGE

Statement of KIM DEVEY (DOB: 68 DEC 04) of 9956 Wilde Road S.E., Calgary, Alberta, (271-5893), regarding possible sighting of U.F.O. at approximately 2300 hours 80 JAN 03 near Blackie, Alberta.

I heard the dogs barking so I looked out the window and saw some lights about one-half block away.

(Description)

Fairly big.

(Reflection)

It wasn't up and down, it was across. First there was two lights and there came more (approximately 5 or 6) around five miles from Blackie. When woke up the morning the dog looked wobbly and right out of it.

(Colours)

All.

"Kim Devey"

OB 79-80 14JAN80 1900 HRS

SANDY MIZZONI 20 YRS 775-3185 OF LOT 14 CON 10 WEST GWILL TWP
CALLED TO SEE IF WE HAD ANY REPORTS OF UFO'S ON 13JAN80 (14/01)
SHE REPORTS SEEING TWO FROM HER RESIDENCE AT 1930-2000 HRS. 00:30
SHE, HER BROTHER RANDY 17 AND GRANDMOTHER PANSY WOODS 80 YRS
APPARENTLY ALL WATCHED THESE OBJECTS
DESC: TRIANGULAR IN SHAPE, AT LEAST 15 LIGHTS, BLUE AND RED WITH
A VERY BRIGHT LIGHT ON FRONT THEY WERE LARGE AS BIG AS A JUMBO
JET AND 250 FT TO 300 FT ABOVE THE GROUND MOVING SLOWLY SOFT
RUMBLING SOUND THE FIRST ONE CAME FROM THE NORTH EAST AND THE
SECOND FROM THE NORTH WEST SHE SAYS THEY COULD SEE THE OUTLINE
CLEARLY INSISTS THAT SHE WAS NOT UNDER THE INFLUENCE AND THAT SHE
IS NOT JOKING SHE REPORTS THAT IT WAS NOT AN AIRPLANE OR
HELICOPTER DOESN'T KNOW WHAT THEY WERE RANDY APPARENTLY WATCHED
THEM WITH BINOCULARS.

UFO Reporting Form

Please answer as many of the following questions as you can by filling in the blank lines or circling the appropiate answer(s). If you make an error and wish to change your answer, simply cross out the circle and circle your correct answer. All answers are used in the tabulation of a computer data-bank on UFO reports, thus it would be most helpful to provide as many answers as you can.

1. Date of the sighting: Day 16 Month _____ Year 1980
2. Time it was first seen: 7-7:30 AM/(PM)/Z Standard/Daylight Savings Zone: Nfld./Atl./East./(Cent.)/Mtn./Pac./Yuk./Other _____
3. Duration of the sighting was: [illegible] hrs. 10-15 mins. _____ secs. Less than 10 secs./10-30 seconds/30-60 seconds/1-5 minutes/ 5-15 minutes/(15-30 minutes)/30-60 minutes/An hour or more Time and duration were: clocked time /(estimated)/ guessed at
4. Your location was: Province Saskatchewan District or City Moose
5. Address or approximate location 33 Miles East on a farm
6. Did you move from this location to another? (No)/ Yes Moved to: _____
7. The location is: city business / city residential / rural / (open country) / woodlands / mountains / waterfront / at sea
8. The location is near: airport / railroad / power station / power lines / communications antenna / military base / river / lake / ocean / lighthouse / weather station
9. What brought your attention to it? It came into your view / you looks towards it /(another witness)/ bright light(s) / noise(s) / an animal's reaction / Other _____
10. What were you doing before seeing it? _____
11. Did someone show you where it was by: (saying where it was) / pointing to it ? Did you show someone else where it was by: saying where it was / pointing to it ? No / Yes / No one else
12. Did anyone else see it? Husband or wife / others in family / neighbours /(friends)/ strangers /(police)/ military / no one
13. Did any animals seem to react to it? Dog / cat / horse / cattle / tame birds / wild birds / farm animals / wild animals / insects / fish / none How did the animal(s) react? _____
14. Time of day: Morning twilight / dawn / morning / noon-time / afternoon / sunset / evening twilight / night
15. Sky was: Clear / scattered clouds / partly cloudy /(overcast)/ hazy / foggy / storming

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

16. The weather was: clear / light rain / heavy rain / snow / sleet / hail / lightning seen / thunder heard

17. The wind was: blowing hard / brisk / gentle / calm
Can you estimate the wind speed? No / Yes _____
Direction of the wind was: North / northeast / east / southeast / south / southwest / west / northwest / _____°
Did the wind change direction? No / Yes, towards _____
Did the wind speed change? Increased / decreased / remained same

18. The temperature was: Below freezing / freezing / cold / cool / mild / warm / hot Temperature measured was: _____° C / F

19. Could you identify the following objects in the sky? Were they seen during the sighting? Did the UFO resemble the object or not?

Objects	Identify	Seen	Resemble
Sun	(Yes) / No	Yes / (No)	Yes / (No)
Moon	(Yes) / No	(Yes) / No	Yes / (No)
Venus	(Yes) / No	Yes / No	Yes / No
Jupiter	Yes / (No)	Yes / (No)	Yes / No
Mars	Yes / (No)	Yes / (No)	Yes / No
Saturn	Yes / (No)	Yes / (No)	Yes / No
Sirius	Yes / (No)	Yes / (No)	Yes / No
Vega	Yes / (No)	Yes / (No)	Yes / No
Stars	(Yes) / No	(Yes) / No	Yes / No
Planets	Yes / No	Yes / No	Yes / No
Meteor (falling star)	(Yes) / No	Yes / (No)	Yes / (No)
Fireball	Yes / No	Yes / (No)	Yes / (No)
Comet	(Yes) / No	Yes / (No)	Yes / (No)
Satellite	(Yes) / No	Yes / (No)	Yes / (No)
Rockets or flares	(Yes) / No	Yes / (No)	Yes / (No)
Aircraft lights	(Yes) / No	Yes / (No)	Yes / (No)
Weather balloons	(Yes) / No	Yes / (No)	Yes / (No)
Searchlights	(Yes) / No	Yes / (No)	Yes / (No)
Northern lights	(Yes) / No	Yes / (No)	Yes / (No)
Mock suns	(Yes) / No	Yes / (No)	Yes / (No)
Noctilucent clouds	Yes / (No) ?	Yes / (No)	Yes / (No)
Lenticular clouds	Yes / (No) ?	Yes / (No)	Yes / (No)
Lunar haloes	Yes / (No) ?	Yes / (No)	Yes / (No)
Ball lightning	Yes / (No)	Yes / (No)	Yes / (No)
Glowing insects	(Yes) / No	Yes / (No)	Yes / (No)
Birds in flight	(Yes) / No	Yes / (No)	Yes / (No)
Kites	(Yes) / No	Yes / (No)	Yes / (No)
Sun-dogs	(Yes) / No	Yes / (No)	Yes / (No)
Crepuscular rays	Yes / No ?	Yes / (No)	Yes / (No)

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

20. Were you travelling in a vehicle when you saw it? (No) / Yes
Automobile / truck / small boat / ship / helicopter / airplane
Were you the: passenger / or driver (pilot) ?
Did you stop to watch it? No / Yes
How fast were you travelling? _____ kmh / mph / knots
In what direction: North / northeast / east / southeast / south / southwest / west / northwest / _____° / Other_____
Is the above speed: measured speed / estimated / guessed at ?

21. Was it seen through: (a window) / a windshield / in a mirror / a metal screen / eyeglasses / contacts / binoculars / camera / rifle scope / sun glasses / telescope / television monitor

22. Did you notice any interference with: AM-FM radio / CB radio / television picture / television sound / lights / alarm systems

23. Was it detected on radar? Do not know / (No) / Yes
By whom? _____

24. How many UFOs did you see? (1) 2 3 4 5 6 More: _____
Did they fly in a formation? No / Yes Triangle / V-shape / diamond shape / single line / Other_____
Did they move apart or stay together? Moved apart / stayed together

25. Was it only a point of light? No / Yes Like a star / brighter ?
Did it twinkle like a star? (No) / Yes
Was it brighter or darker than the sky? (Brighter) / darker

26. What was its shape (in general)? Round (globe) / (oval) / disc (saucer) / triangular / square / diamond / ring (donut) / cylindrical (cigar) / semi-circle (half moon) / crescent / no shape visible / Other through binoculars looked cigar shaped
Did it appear: clear and sharp / fuzzy / (blurry) / indistinct ?

27. Was it: luminous ((give off light)) / reflecting / shiny / dull / dark / transparent / opaque ?
Did it cast a shadow? (No) / Yes Did you see its shadow move across the ground? No / Yes Were there shadows on it? No / Yes

28. What was its surface colour? White / silver / gold / copper / grey / blue / red / yellow / orange / green / black / _____

29. Did you notice any markings on its surface? (No) / Yes
Describe them briefly. _____

30. (a) Could you see other lights on it? No / Yes How many? _____
What colour(s) was the light? White / red / blue / yellow / green / orange / Other It was like a light but kept changing colors
The second light? _____ The third? _____
The light was: Steady / slowly pulsated / faded on and off / flashed on and off / flashed very quickly (like a strobe light)
flashed from red to yellow to green to white etc kind of quick pulsating colors while it moved on

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

30. (b) Did the lights change colour? No / when it stopped moving / when it changed speed / when it changed direction / when still / when moving / (all the time) / Other_____

Did the lights turn off at once? (No) / when it stopped moving / when it changed speed / when it changed direction / when still / when moving / at several times / Other_____

Did it seem to have a searchlight or project a beam of light? (No) / Yes Ahead / behind / upwards / downwards / at its side(s)

31. About how large do you think it was? In length: Under 10 feet / 10-35 feet / 35-100 feet / 100-300 feet / more than 300 feet

In height: _____ In depth: _____

Compared to a full moon was it: (smaller) / larger / the same ?

At arm's length, could you cover it from sight with:

(one finger) / two / three / four / whole hand /larger than hand ?

Compare its size with the following aircraft.

Single engine Cessna: Smaller / larger / about the same

Boeing 727 jet: Smaller / larger / about the same

Boeing 747 Jumbo jet: Smaller / larger / about the same

32. Did you notice any noises from it? (None) / uncertain / definitely

The noise was like that of: A jet engine / propellar engine / helicopter / rocket / hum / whistle / crackling / thunder / explosions / dull thuds / Other_____

The noise was: Deafening / loud / clear / soft / barely heard

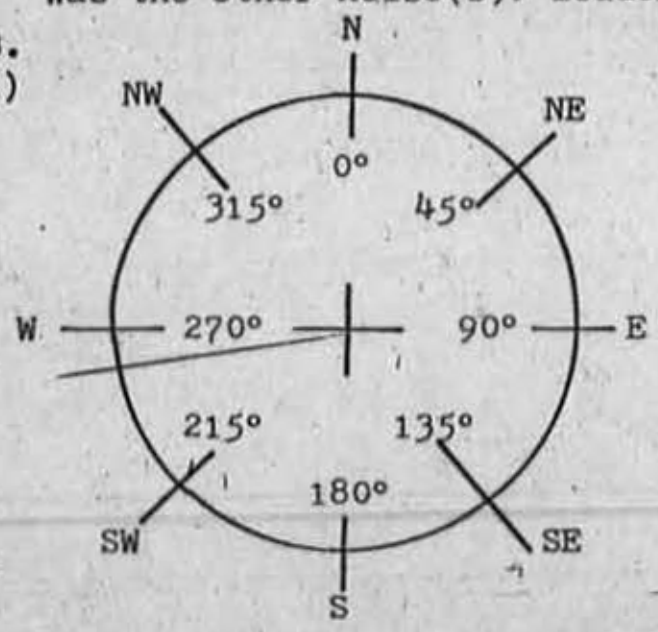

Did the noise sound: very distant / distant / nearby / close-up ?

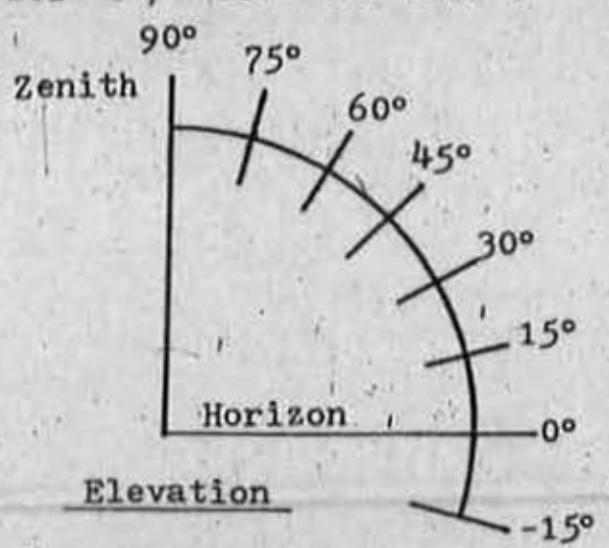

Was the noise it made: steady / fade in and out / off and on / slow pulsating / fast pulsating / short bursts / like an echo

Did you notice other noises? (No) / Yes What? _____

Was the other noise(s): louder / softer / about the same ?

33. (a)

In which direction did you first see it? West 260°

At what elevation did you first see it? 30°

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

33. In which direction did you last see it? West 270°
(b) At what elevation did you last see it? 0°
What was the highest elevation at which it reached? 60°
What was the lowest elevation it was seen at? 0°
(If you saw it from above be sure to indicate its angle as a minus figure. For example, -15° (below the horizon).)
Did it ever pass directly overhead? No / Yes / (Almost)

34. If you were in an aircraft, did it pass below? (No) / Yes / Almost
Did it orbit around the aircraft? (No) / Yes
What was the altitude when it was first seen? _____ ft. / m.
What was the altitude when it was last seen? _____ ft. / m.
In what direction were you flying? _____ °
What was your airspeed? _____ mph / kmh / knots
What was your groundspeed? _____ mph / kmh / knots
Was the altitude and velocities: measured / estimated / guessed at ?

35. How far away from you do you think it was? Under 30 feet / 30-100 feet / 100-500 feet / 500-2000 feet / Over 2000 feet
Was this distance: measured / estimated / guessed at ?

36. Did it appear to: spin / wobble / tumble / fall / break-up / explode / give off smoke / drop anything / drift aimlessly / change its shape / change its size ?

37. Did it remain stationary (in the same place)? Yes / No
When first seen, was it: stationary / (moving)?
When last seen, was it: stationary / (moving)?
Was it always in motion when you saw it? (Yes) / No
About what speed did it appear to be moving? An automobile / (a helicopter) / a propellar airplane / a jet / a rocket
What speed do you think it was? _____ mph / kmh / knots
0-30 mph / 30-60 mph / 60-150 mph / 150-600 mph / Over 600 mph
Was the speed measured with any instruments? Guessed at / estimated / stopwatch / speedometer / airspeed indicator / radar / theodolite

38. Did it leave a vapour or smoke trail behind it? (No) / Yes
Did you see other trails in the sky? (No) / Yes
Was the trail behind it: a single one / a double one ?
Did you notice any flame coming from it? No / Yes
Did the trail appear to dissolve: quickly (in 10 seconds) / slowly (10-60 seconds) / or, remain for more than a minute ?

39. How did it appear to move? (In a straight line) / a curved line / one direction only / zig-zag / one direction but changed / circling the area / up and down (undulating) / up and down following the ground level / only up and down

National Research Council of Canada/ Conseil national de recherches du Canada
RG 77, Vol. 309

40. Did it move in front of anything? (No) / Yes What? _____
Did it move in back of anything? (No) / Yes What? _____
41. Did it seem to be following something? (No) / Yes
What? _____
Did it seem to follow you? (No) / Yes Or around you? No / Yes
42. Did it appear to: break-up in flight / crash / land disappeared into the distance
Did you see it: dive into the water / rise up from the water ?
In entering or leaving any water, did it hit any ice? (No) / Yes
43. Did it leave any traces of an impact or landing? (No) / Yes
Did it produce a crater? (No) / Yes What diameter? _____ ft. / m.
Did it leave a circular (ring-like) impression? (No) / Yes
What diameter was the outer ring? _____ ft. / m.
What diameter was the inner ring? _____ ft. / m.
Did it leave a filled circular depression? No / Yes
What diameter was the circle? _____ ft. / m.
Were there any groups of other impressions? No / Yes
Please describe their shape, size, number, and space apart.
_____
_____
_____
_____
44. Did you notice any damage to trees, brush, crops, or grass? (No) / Yes
Broken branches / burnt branches or bark / wilted or burnt leaves / burnt brush or crops / broken brush or crops / only grass damage
Did any damaged crops or grass appear fallen in one direction?
Outwards / inwards / clockwise / counter-clockwise / every way
Did any crops or grass appear: discoloured / dried out ? / Or not?
If a crop was involved, what was it? _____
At what stage of growth was it? _____
45. Did you see anything go into, leave, or move inside the UFO?
(No) / Yes Please describe what you think you saw briefly.
_____
_____
_____
46. How did it disappear from your view? Faded away in distance / moved past the horizon / moved behind something / went in clouds / disappeared going straight up / broke apart / light(s) went out / vanished into thin air / lost in the stars / went under water / you left the area / looked away and was gone when looked back /
Other _____
47. Did you see any aircraft before, during, or after you saw it?
(a) (No) / Yes Before / during / after
Did it appear to follow or chase the aircraft? (No) / Follow / Chase

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

47. Did any aircraft appear to chase or follow it? (No) / Follow / Chase
(b) What type of aircraft was involved? Small private airplane/ commercial propellar / commercial jet / military fighter jet / other military aircraft / helicopter / uncertain

48. Was there a camera available to take photographs? (No) / Yes
Was it your camera? No / Yes Did it have film? (No) / Yes
If you have taken photographs, it is best to turn undeveloped film over to the R.C.M.P. when reporting the UFO, but if you turn over undeveloped film be certain to ask for a receipt.
If photographs were taken of it, where can copies be obtained?

---

49. Was there a tape recorder available to record any noises or your description of your observations? (No) / Yes
Was a tape recording made during the sighting? (No) / Yes
Where could a copy of the recording be obtained?

---

50. Were there any remains or residues found that may have come from it and were collected? (No) / Yes / Yes but not collected
Was there any 'Angel Hair' seen or collected? No / Yes
Where could samples or any residues or remains be obtained?

---

51. Were any photographs taken of an impact or landing site? (No) / Yes
Where could copies of these photographs be obtained?

---

52. Were any photographs or other evidences collected by either government or civilian agencies? No / Uncertain / R.C.M.P. / military / provincial police / local police / newspapers / Emergency Measures Office / Environment (federal or provincial) / National Rssearch Council / radio or television station / university / planetarium / observatory / Other - see Notes
What did they collect? Film / recordings / residue / remains

53. Have you reported the sighting to any of these agencies? (R.C.M.P.) / military / provincial police / local police / Emergency Measures Office / National Research Council / Environment (federal or provincial) / Transport (federal) / local airport / newspapers / radio or television stations / weather station / university / planetarium / (observatory) / local UFO group / Other_____
Do you know what a CIRVIS or MERINT report is? (No) / Yes
Did you make a CIRVIS or MERINT report? No / Yes
Did you receive a prompt reply? No / Yes
Was the report concluded by their identification? No / Yes

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

54. What was your immediate reaction to seeing it? Trying to decide if it could be a U.F.O. it certainly was something different!

55. What did you first think it was? a satelite of some kind

56. Did it appear to be natural or artificial? Natural / (Artificial)

57. Did it appear: dangerous / hostile / curious about something / interested in you / indifferent to your presence ?
Did you want to: avoid it / stay out of its way / approach it / (get a better view) / stay where you were ?

58. Did you try to communicate with it? (No) / Yes
How? _____
Do you think it responded? (No) / Yes How? _____

59. Did you notice: any peculiar odours / heat / burning sensation / itching / stinging / numbness / dryness / static electricity / or mild electric shocks ?
Was this before, during, or after seeing it? Before / During / After

60. Did you experience any of the following symptoms? (No) / Yes
Nausea / dizziness / faintness / sickness / drowsiness
Are you aware if anyone else experienced these symptoms? (No) / Yes
Did any animals show any signs of such symptoms? (No) / Yes
What kind of animal? _____
What symptom(s) did it show? _____
Did your symptoms last more than an hour or a day?
No / Yes, an hour / Yes, a day

61. What do you think it was now? still don't know!

62. Have you seen anything like it before? (No) / Yes
Within the last year? No / Yes Within the last month? No / Yes
Have you ever reported UFOs before? (No) / Yes
When? _____ To whom? _____
Was it reported to: the R.C.M.P. / military / newspapers ?

63. If you do not wish that your name and personal information be released to the public or news media the next page will be kept confidential. With your permission, a copy of this form will be sent to the Meteor Centre of the National Research Council where researchers sign a promise not to reveal names.
Would you give permission for a full copy of this report to be sent to the Meteor Centre? (Yes) / No
Would you give permission for a full copy of this report to be sent to other UFO researchers? (Yes) / No
Would you give permission to use your name in publishing an account of this report? (Yes) / No

64. Date of answering this form's questions? Mar 24, 19 80

National Research Council of Canada/ Conseil national de recherches du Canada
RG 77, Vol. 309

65. Your name: MRS ETHEL HOLDERBEIN

66. Your postal address: Box 428
MORSE

Postal code: S0H 3C0

67. Your home address: Box 428
MORSE
SASK.

68. Your telephone number: 629-3206

69. Your age: _____ Under 12 / 13-19 / 20-29 / 30-39/
40-49 / (50-59) / 60-69 / 70 or over

70. Your sex: Male / (Female)

71. Do you wear eyeglasses or contacts? No / (Reading Glasses) / Contacts
Are you near-sighted or farsighted? No / (Near-sighted) / Farsighted
Are you colour-blind or night-blind? No / Colour-blind / Night-blind
Have you any difficulty with depth perception? (No) / Yes

72. Do you use a hearing aid? (No) / Yes
Were you using it during the sighting? (No) / Yes

73. Had you taken any drugs or medication before the sighting?
(No) / Yes How long before the sighting? _____
Had you been drinking alcoholic beverages before the sighting?
(No) / Yes How long before the sighting? _____

74. Have you ever been employed in one of these occupations? (No) / Yes
Police / military / pilot / weather observer / engineer /
scientist or teacher (what field) _____
What is your present or last occupation? housewife
Are you retired? (No) / Yes

75. What would be the highest level of education you have had?
Grade school / (high school) / (trade school) / (community college) /
college or university / bachelor degree / post-graduate work
Have you taken any courses or training in the following subjects?
Astronomy / meteorology (weather) / physics / science / (none)

If you would give your permission to disclose your name or personal information, as indicated in question 63, would you be kind enough to sign the report here. Thank you.

E. Holderbein

RG 77, Vol. 309

Jan 24-80.

Dear Sir -

I thought I should add a more detailed report on what we observed.

Tom & Terry Wilson who live about 3½ Miles east of Moose were the first people to tell us about seeing this unusual light in the sky. They saw it on Jan 15, -16-17 & first time thought it was a plane on fire, they told us about it & we were out then & they pointed it out one night believe they was Jan 16 but it was going out I night all we could see was a light heading West but it didnt look like a plane. We thought it could be a satelite.

We were away for the Weekend & Jan 20 Terry phoned & said we should look out West that light is

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

in the sky again & changing colors
the was around 10 to 8 PM. We
saw it but due to the houses behind
us we lost view of it. So we drove
out of town about ½ mile but till we
got out where we could have a
better view it was gone.
When we came home I decided
I'd telephone the R.C.M.P. thinking
they may have a police car out
further west & they could check
it out. As it seemed to travel near
the No. 1 highway area just a bit
South. The RCMP came to our
place in a short while & asked
a few questions & I said he should
talk to the Wilsons as they saw
it closer than we had & would
know more about it. He did & was
asked to come out to their farm
the next night to see for himself

National Research Council of Canada/
Conseil national de recherches du Canada
RG 77, Vol. 309

We went out Jan 21 tod & it was a cloudy night. Not many stars visable & not even the Moon Sometimes. We waited up & on & thought we likely wouldnt see anything but pretty soon we could see it again places where the sky was clear, it gave off different colors red & yellow - orange white. Mostly red & Orange. & it traveled across to the West We couldnt see much that night I phoned Regina to the ~~Director~~ Dept of physics & Astronomy & talked to Dr Greenberg describing this Colorful light We'd seen in the sky & he asked what area & time & said it likely was the planet Venus. I asked if it changes Colors like that & he said it can due to atmosphere Conditions. Since then I have not

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

seem it change colors like that n
ever think I see the same thing.
I see the Planet Venus which
is just like a big star. Others
say it changes Color but Not as
much. - So fr what it would
I cant decide, but I shall keep
watching to see if it will preform
like that again

Sincerely.
Mrs. E. Holderheim
Box 428
Moose Jack.

P.S.
If you have an
answer to what
we saw. I would
appreciate your
opinion
E.H.

UFO Reporting Form

Please answer as many of the following questions as you can by filling in the blank lines or circling the appropiate answer(s). If you make an error and wish to change your answer, simply cross out the circle and circle your correct answer. All answers are used in the tabulation of a computer data-bank on UFO reports, thus it would be most helpful to provide as many answers as you can.

1. Date of the sighting: Day 23 Month JAN Year 80
2. Time it was first seen: 7 AM/PM/Z (Standard/Daylight Savings
   Zone: Nfld. / Atl. / (East. / Cent. / Mtn. / Pac. / Yuk. / Other
3. Duration of the sighting was: - hrs. 2 mins. secs.
   Less than 10 secs./10-30 seconds/30-60 seconds/(1-5 minutes/
   5-15 minutes/15-30 minutes/30-60 minutes/An hour or more
   Time and duration were: clocked time / (estimated / guessed at
4. Your location was: Province Ont
   District or City THUNDER BAY
5. Address or approximate location THUNDER BAY
6. Did you move from this location to another? (No / Yes
   Moved to:
7. The location is: city business / city residential / (rural /
   open country / woodlands / mountains / waterfront / at sea
8. The location is near: airport / railroad / power station /
   power lines / communications antenna / military base /
   river / (lake / ocean / lighthouse / weather station
9. What brought your attention to it? (It came into your view /
   you looks towards it / another witness / (bright light(s) /
   noise(s) / an animal's reaction / Other
10. What were you doing before seeing it? D
11. Did someone show you where it was by: saying where it was /
    pointing to it ? Did you show someone else where it was by:
    saying where it was / pointing to it ? No / (Yes / No one else
12. Did anyone else see it? Husband or (wife / others in family /
    neighbours / friends / strangers / police / military / no one
13. Did any animals seem to react to it? Dog / cat / horse / cattle /
    tame birds / wild birds / farm animals / wild animals / insects /
    fish / none How did the animal(s) react?
14. Time of day: Morning twilight / dawn / morning / noon-time /
    afternoon / sunset / evening twilight / night
15. Sky was: Clear / scattered clouds / partly cloudy / (overcast /
    hazy / foggy / storming

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

16. The weather was: (clear) / light rain / heavy rain / snow / sleet / hail / lightning seen / thunder heard

17. The wind was: blowing hard / brisk / (gentle) / calm
Can you estimate the wind speed? No / Yes 5-10 mph
Direction of the wind was: North / northeast / east / southeast / south / southwest / west / northwest / ? °.
Did the wind change direction? No / Yes, towards ?
Did the wind speed change? Increased / decreased / (remained same)

18. The temperature was: (Below freezing) / freezing / cold / cool / mild / warm / hot Temperature measured was: _____° C / F

19. Could you identify the following objects in the sky? Were they seen during the sighting? Did the UFO resemble the object or not?

Objects	Identify	Seen	Resemble
Sun	(Yes) / No	Yes / (No)	Yes / (No)
Moon	(Yes) / No	Yes / (No)	Yes / (No)
Venus	Yes / (No)	Yes / (No)	Yes / (No)
Jupiter	Yes / (No)	Yes / (No)	Yes / (No)
Mars	Yes / (No)	Yes / (No)	Yes / (No)
Saturn	Yes / (No)	Yes / (No)	Yes / (No)
Sirius	Yes / (No)	Yes / (No)	Yes / (No)
Vega	Yes / (No)	Yes / (No)	Yes / (No)
Stars	(Yes) / No	Yes / (No)	Yes / (No)
Planets	Yes / (No)	Yes / (No)	Yes / (No)
Meteor (falling star)	(Yes) / No	Yes / (No)	Yes / (No)
Fireball	Yes / (No)	Yes / (No)	Yes / (No)
Comet	(Yes) / No	Yes / (No)	Yes / (No)
Satellite	Yes / (No)	Yes / No	Yes / (No)
Rockets or flares	(Yes) / No	Yes / (No)	Yes / (No)
Aircraft lights	(Yes) / No	Yes / (No)	Yes / No landing light
Weather balloons	(Yes) / No	Yes / (No)	(Yes) / No
Searchlights	(Yes) / No	Yes / (No)	Yes / (No)
Northern lights	(Yes) / No	Yes / (No)	Yes / (No)
Mock suns	Yes / (No)	Yes / No	Yes / (No)
Noctilucent clouds	(Yes) / No	Yes / (No)	Yes / (No)
Lenticular clouds	(Yes) / No	Yes / (No)	Yes / (No)
Lunar haloes	(Yes) / No	Yes / (No)	Yes / (No)
Ball lightning	(Yes) / No	Yes / (No)	Yes / (No)
Glowing insects	(Yes) / No	Yes / (No)	Yes / (No)
Birds in flight	(Yes) / No	Yes / (No)	Yes / (No)
Kites	(Yes) / No	Yes / (No)	Yes / (No)
Sun-dogs	(Yes) / No	Yes / (No)	Yes / No
Crepuscular rays	Yes / (No)	Yes / No	Yes / No

National Research Council of Canada/
Conseil national de recherches du Canada
RG 77, Vol. 309

20. Were you travelling in a vehicle when you saw it? No / (Yes)
[Automobile] / truck / small boat / ship / helicopter / airplane
Were you the: passenger / (or driver) (pilot) ?
Did you stop to watch it? (No) / Yes
How fast were you travelling? 40 Skewed to 15 kmh / (mph) / knots
In what direction: North / northeast / (east) / southeast / south / southwest / west / northwest / _____° / Other_____
Is the above speed: [measured speed] / estimated / guessed at ?

21. Was it seen through: a window / [a windshield] / in a mirror / a metal screen / eyeglasses / contacts / binoculars / camera / rifle scope / sun glasses / telescope / television monitor

22. Did you notice any interference with: AM-FM radio / CB radio / television picture / television sound / lights / alarm systems

23. Was it detected on radar? [Do not know] / No / Yes
By whom? _____

24. How many UFOs did you see? 1 (2) 3 4 5 6 More: _____
Did they fly in a formation? No / Yes Triangle / V-shape / diamond shape / single line / Other One Above The Other
Did they move apart or stay together? Moved apart / [stayed together]

25. Was it only a point of light? No / (Yes) Like a star / [brighter] ?
Did it twinkle like a star? (No) / Yes More The brightness of a Planet
Was it brighter or darker than the sky? [Brighter] / darker

26. What was its shape (in general)? Round (globe) / oval / disc (saucer) / triangular / square / diamond / ring (donut) / cylindrical (cigar) / semi-circle (half moon) / crescent / [no shape visible] / Other_____
Did it appear: [clear and sharp] / fuzzy / blurry / indistinct ?

27. Was it: [luminous] (give off light) / reflecting / shiny / dull / dark / transparent / opaque ?
Did it cast a shadow? (No) / Yes Did you see its shadow move across the ground? No / Yes Were there shadows on it? No / Yes

28. What was its surface colour? White / silver / gold / copper / grey / blue / red / yellow / orange / green / black / White Light

29. Did you notice any markings on its surface? (No) / Yes
Describe them briefly. _____

30. Could you see other lights on it? (No) / Yes How many? _____
(a) What colour(s) was the light? White / red / blue / yellow / green / orange / Other_____
The second light? _____ The third? _____
The light was: (Steady) / slowly pulsated / faded on and off / flashed on and off / flashed very quickly (like a strobe light)

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

30. (b) Did the lights change colour? No / when it stopped moving / when it changed speed / when it changed direction / when still / when moving / all the time / Other_____

Did the lights turn off at once? No / when it stopped moving / when it changed speed / when it changed direction / when still / when moving / at several times / Other_____

Did it seem to have a searchlight or project a beam of light? No / Yes Ahead / behind / upwards / downwards / at its side(s)

31. About how large do you think it was? In length: Under 10 feet / 10-35 feet / 35-100 feet / 100-300 feet / more than 300 feet

In height: _____ In depth: _____

Compared to a full moon was it: smaller / larger / the same ?

At arm's length, could you cover it from sight with:
one finger / two / three / four / whole hand /larger than hand ?

Compare its size with the following aircraft.

Single engine Cessna: Smaller / larger / about the same

Boeing 727 jet: Smaller / larger / about the same

Boeing 747 Jumbo jet: Smaller / larger / about the same

32. Did you notice any noises from it? None / uncertain / definitely

The noise was like that of: A jet engine / propellar engine / helicopter / rocket / hum / whistle / crackling / thunder / explosions / dull thuds / Other_____

The noise was: Deafening / loud / clear / soft / barely heard

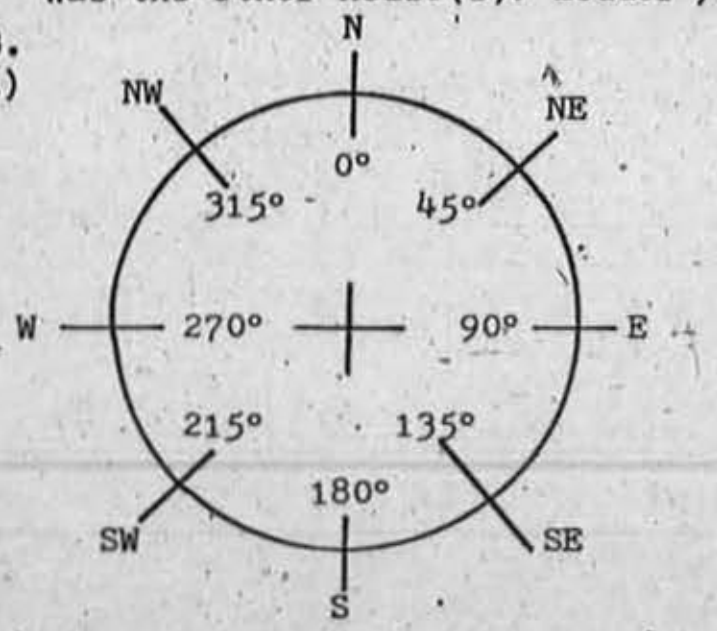

Did the noise sound: very distant / distant / nearby / close-up ?

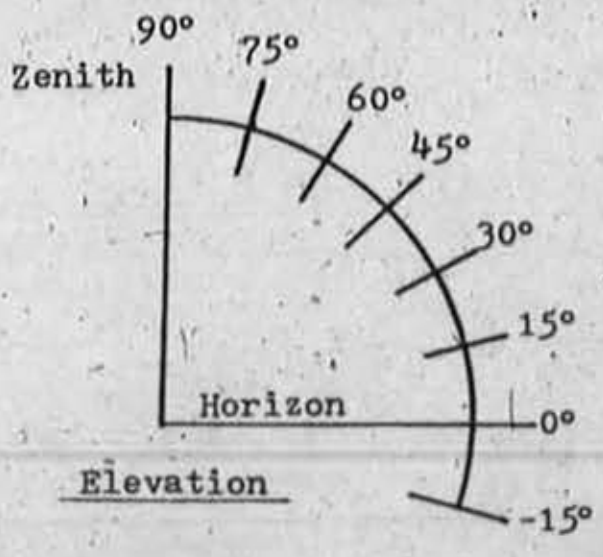

Was the noise it made: steady / fade in and out / off and on / slow pulsating / fast pulsating / short bursts / like an echo

Did you notice other noises? No / Yes What? _____

Was the other noise(s): louder / softer / about the same ?

33. (a)

In which direction did you first see it? 45° _____ °

At what elevation did you first see it? 30 °

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

33. In which direction did you last see it? 120° ____°
(b) At what elevation did you last see it? 5°
What was the highest elevation at which it reached? 30°
What was the lowest elevation it was seen at? 5°
(If you saw it from above be sure to indicate its angle as a minus figure. For example, -15° (below the horizon).)
Did it ever pass directly overhead? (No) / Yes / Almost

34. If you were in an aircraft, did it pass below? No / Yes / Almost
Did it orbit around the aircraft? No / Yes
What was the altitude when it was first seen? _____ ft. / m.
What was the altitude when it was last seen? _____ ft. / m.
In what direction were you flying? _____ °
What was your airspeed? _____ mph / kmh / knots
What was your groundspeed? _____ mph / kmh / knots
Was the altitude and velocities: measured / estimated / guessed at ?

35. How far away from you do you think it was? Under 30 feet / 30-100 feet / 100-500 feet / 500-2000 feet / (Over 2000 feet)
Was this distance: measured / (estimated) / guessed at ?

36. Did it appear to: spin / wobble / tumble / fall / break-up / explode / give off smoke / drop anything / drift aimlessly / change its shape / change its size ?

37. Did it remain stationary (in the same place)? Yes / (No)
When first seen, was it: stationary / (moving) ?
When last seen, was it: stationary / (moving) ?
Was it always in motion when you saw it? (Yes) / No
About what speed did it appear to be moving? An automobile / a helicopter / a propellar airplane / a jet / a rocket
What speed do you think it was? ~~200 - 250~~ 250 - 300 mph / kmh / knots
0-30 mph / 30-60 mph / 60-150 mph / (150-600 mph) / Over 600 mph
Was the speed measured with any instruments? Guessed at / (estimated) / stopwatch / speedometer / airspeed indicator / radar / theodolite

38. Did it leave a vapour or smoke trail behind it? (No) / Yes
Did you see other trails in the sky? (No) / Yes
Was the trail behind it: a single one / a double one ?
Did you notice any flame coming from it? (No) / Yes
Did the trail appear to dissolve: quickly (in 10 seconds) / slowly (10-60 seconds) / or, remain for more than a minute ?

39. How did it appear to move? (In a straight line) / a curved line / one direction only / zig-zag / one direction but changed / circling the area / up and down (undulating) / up and down following the ground level / only up and down

National Research Council of Canada/ Conseil national de recherches du Canada
RG 77, Vol. 309

Maybe Calling wood Mtn

40. Did it move in front of anything? No / Yes What? _____
Did it move in back of anything? No / Yes What? _____

41. Did it seem to be following something? (No) / Yes
What? _____
Did it seem to follow you? (No) / Yes Or around you? (No) / Yes

42. Did it appear to: break-up in flight / crash / land ?
DISSAPEARED COMPLETELY ON THE HORIZON
Did you see it: dive into the water / rise up from the water ?
In entering or leaving any water, did it hit any ice? No / Yes

43. Did it leave any traces of an impact or landing? (No) / Yes
Did it produce a crater? (No) / Yes What diameter? _____ ft. / m.
Did it leave a circular (ring-like) impression? No / Yes
What diameter was the outer ring? _____ ft. / m.
What diameter was the inner ring? _____ ft. / m.
Did it leave a filled circular depression? No / Yes
What diameter was the circle? _____ ft. / m.
Were there any groups of other impressions? No / Yes
Please describe their shape, size, number, and space apart.

_____

_____

_____

44. Did you notice any damage to trees, brush, crops, or grass? (No) / Yes
Broken branches / burnt branches or bark / wilted or burnt leaves / burnt brush or crops / broken brush or crops / only grass damage
Did any damaged crops or grass appear fallen in one direction?
Outwards / inwards / clockwise / counter-clockwise / every way
Did any crops or grass appear: discoloured / dried out ? / Or not?
If a crop was involved, what was it? _____
At what stage of growth was it? _____

45. Did you see anything go into, leave, or move inside the UFO?
(No) / Yes Please describe what you think you saw briefly.

_____

_____

_____

46. How did it disappear from your view? Faded away in distance / (moved past the horizon) / moved behind something / went in clouds / disappeared going straight up / broke apart / light(s) went out / vanished into thin air / lost in the stars / went under water / you left the area / looked away and was gone when looked back / Other _____

47. Did you see any aircraft before, during, or after you saw it?
(a) (No) / Yes Before / during / after HELICOPTERS IN AREA
Did it appear to follow or chase the aircraft? No / Follow / Chase
FROM BORDEN AT
MEAFORD TANK RANGE

National Research Council of Canada/ Conseil national de recherches du Canada
RG 77, Vol. 309

47. Did any aircraft appear to chase or follow it? (No) / Follow / Chase
(b) What type of aircraft was involved? Small private airplane/ commercial propellar / commercial jet / military fighter jet / other military aircraft / helicopter / uncertain

48. Was there a camera available to take photographs? (No) / Yes
Was it your camera? No / Yes Did it have film? No / Yes
If you have taken photographs, it is best to turn undeveloped film over to the R.C.M.P. when reporting the UFO, but if you turn over undeveloped film be certain to ask for a receipt.
If photographs were taken of it, where can copies be obtained?

---

49. Was there a tape recorder available to record any noises or your description of your observations? (No) / Yes
Was a tape recording made during the sighting? No / Yes
Where could a copy of the recording be obtained?

---

50. Were there any remains or residues found that may have come from it and were collected? (No) / Yes / Yes but not collected
Was there any 'Angel Hair' seen or collected? No / Yes
Where could samples or any residues or remains be obtained?

---

51. Were any photographs taken of an impact or landing site? (No) / Yes
Where could copies of these photographs be obtained?

---

52. Were any photographs or other evidences collected by either government or civilian agencies? (No) / Uncertain / R.C.M.P. / military / provincial police / local police / newspapers / Emergency Measures Office / Environment (federal or provincial) / National Rssearch Council / radio or television station / university / planetarium / observatory / Other_____
What did they collect? Film / recordings / residue / remains

53. Have you reported the sighting to any of these agencies?
R.C.M.P. / (military) / provincial police / local police / Emergency Measures Office / National Research Council / Environment (federal or provincial) / Transport (federal) / local airport / newspapers / radio or television stations / weather station / university / planetarium / observatory / local UFO group / Other_____
Do you know what a CIRVIS or MERINT report is? No / (Yes)
Did you make a CIRVIS or MERINT report? (No) / Yes
Did you receive a prompt reply? No / Yes
Was the report concluded by their identification? No / Yes

National Research Council of Canada/ Conseil national de recherches du Canada RG 77, Vol. 309

54. What was your immediate reaction to seeing it? Aircraft landing lights on one in each wing - plane ing. spun one light above the other.

55. What did you first think it was? Aie Plane

56. Did it appear to be natural or artificial? (Natural) / Artificial

57. Did it appear: dangerous / hostile / curious about something / interested in you / (indifferent to your presence ?) /
Did you want to: avoid it / stay out of its way / approach it / (get a better view) / stay where you were ?

58. Did you try to communicate with it? (No) / Yes
How? _____
Do you think it responded? No / Yes How? _____

59. Did you notice: any peculiar odours / heat / burning sensation / itching / stinging / numbness / dryness / static electricity / or mild electric shocks ?
Was this before, during, or after seeing it? Before / During / After

60. Did you experience any of the following symptoms? (No) / Yes
Nausea / dizziness / faintness / sickness / drowsiness
Are you aware if anyone else experienced these symptoms? No / Yes
Did any animals show any signs of such symptoms? No / Yes
What kind of animal? _____
What symptom(s) did it show? _____
Did your symptoms last more than an hour or a day?
No / Yes, an hour / Yes, a day

61. What do you think it was now? Two Helicopters with only White lights

62. Have you seen anything like it before? (No) / Yes
Within the last year? (No) / Yes Within the last month? (No) / Yes
Have you ever reported UFOs before? (No) / Yes
When? _____ To whom? _____
Was it reported to: the R.C.M.P. / (military) / newspapers ?

63. If you do not wish that your name and personal information be released to the public or news media the next page will be kept confidential. With your permission, a copy of this form will be sent to the Meteor Centre of the National Research Council where researchers sign a promise not to reveal names.
Would you give permission for a full copy of this report to be sent to the Meteor Centre? (Yes) / No
Would you give permission for a full copy of this report to be sent to other UFO researchers? (Yes) / No
Would you give permission to use your name in publishing an account of this report? Yes / (No)

64. Date of answering this form's questions? Mar 22, 1980

National Research Council of Canada/ Conseil national de recherches du Canada
RG 77, Vol. 309

65. Your name: D Rogers

66. Your postal address: Box 596
Meaford Ont.

Postal code: N4L 1Y2

67. Your home address: Same

68. Your telephone number: 519 538 3690

69. Your age: 40 Under 12 / 13-19 / 20-29 / 30-39/ (40-49) / 50-59 / 60-69 / 70 or over

70. Your sex: (Male) / Female

71. Do you wear eyeglasses or contacts? (No) / Glasses / Contacts
Are you near-sighted or farsighted? (No) / Near-sighted / Farsighted
Are you colour-blind or night-blind? (No) / Colour-blind / Night-blind
Have you any difficulty with depth perception? (No) / Yes

72. Do you use a hearing aid? (No) / Yes
Were you using it during the sighting? No / Yes

73. Had you taken any drugs or medication before the sighting?
(No) / Yes How long before the sighting? _____
Had you been drinking alcoholic beverages before the sighting?
(No) / Yes How long before the sighting? _____

74. Have you ever been employed in one of these occupations? (No) / Yes
Police / military / pilot / weather observer / engineer / scientist or teacher (what field) _____
What is your present or last occupation? Farm Equip Dealer
Are you retired? (No) / Yes

75. What would be the highest level of education you have had?
Grade school / (high school) / trade school / community college / college or university / bachelor degree / post-graduate work
Have you taken any courses or training in the following subjects?
Astronomy / (meteorology) (weather) / physics / science / none

If you would give your permission to disclose your name or personal information, as indicated in question 63, would you be kind enough to sign the report here. Thank you.

I am a private pilot and have some idea of the height and speed of helicopters. This sighting appeared to be at the altitude of helicopters but the speed appeared twice as fast. There was only two white lights no red or green. the bottom light moved closer to the top one and went out or behind just before the lights ~~when~~ went out or dissappeared.

C.F.B Borden had been doing exercises in Meaford that same day, with helicopters the track these lights ~~not~~ were following would have been towards Borden. the time of sighting was between 7:00pm & 7:02pm (this is accurate). Borden should be ~~of~~ able to verify if it was helicopters. I would like to know. That is why I phoned them.

Don Rogers.

IDENTIFIED AS A METEOR

Dear Sir:

Re: Fireball Sighting - Clinton, B.C. 14-8-77

With reference to the captionally noted fireball sighting and our telephone conversation of this date, please be advised that we are able to supply the following information with regard to the sighting.

The first sighting was reported by a John MAYLOR of Vancouver, Phone No. 985-7356, who reported a bluish colored object in the sky at approximately 10:20 P.M. on the 14 August 1977 20 miles north of Cache Creek. The object was travelling in a northerly direction at that time, and was observed for only a very short time. The object was a constant brightness, and appeared somewhat brighter than the moon. The sky was clear at the time of the sighting, and no bursts were seen from the object. No sounds were heard from the object at all.

note: Cache Creek is about 25 miles south of Clinton.

Two more persons reported sighting a reddish colored object, one sighting being 7 miles north of Clinton, and the other approximately 40 miles north of Clinton. These sightings were reported at approximately 10:25 P.M. Neither of these persons was able to determine altitude of the object, but both stated it had been travelling in a northerly direction and lasted only for a few seconds before it dissapeared out of sight.

A check with the Kamloops Airport revealed that they along with Williams Lake and Prince George Airports had reported seeing this fireball moving in a northerly direction about the time of our sightings. Further exact detail could not be obtained from the persons who witnessed this incident as they all reported this to the 100 Mile office, and left prior to further details being obtained. It is unknown who the last two persons reporting this matter are, and this is the reason their names have not been provided .

Should we be able to be of any further assistance in this matter, please do not hesitate to contact the writer.

Yours truly,

Sgt. for

RE: - OBJET:

Max ANDERSEN
U.F.O. Sighting Near Rocky Mountain House, Alberta
79 OCT 04

On 79 DEC. 17 the writer received confidential information from a person, that Max ANDERSEN and his family had sighted what they thought to be an unidentified flying object in the Crimson Lake area. The informant advised that Max ANDERSEN and his family were reluctant to report this matter, as they felt no one would believe them in the first place. ANDERSEN was contacted by the writer and he and his family agreed to give statements regarding this incident.

2. Attended the ANDERSEN residence and took statements from Max ANDERSEN, Mary ANDERSEN and Martha ANDERSEN. Their statements stated essentially that some time around the fifth of October, 1979, at approximately 9:00 or 9:15 P.M., they were watching T.V. in their house and their dog started barking outside. Martha ANDERSEN went and happened to look in the sky and saw a flashing light in the sky. She stated that it was a very bright white light that sloped down from the sky and was travelling from the southwest to the northwest in a straight line. The object was a constant glow but it seemed to revolve. It pierced the sky with a brighter light. They all stated that this bright light had what appeared to be a runner shoot off from it towards the ground. The light continued northward, seemingly at treetop level and then slowly sunk into the trees and come up again several times, hovering. They all stated they watched the light for an hour or more and then the light dissapeared. Max ANDERSEN claimed the light to be the size of a football field. Copies of the statements obtained in appendix "A" of this report.

3. Through investigations with the ANDERSEN's, it was learned that two other persons working at the Amerada Hess Gas Plant, northwest of Rocky Mountain House, saw lights in the sky on the same night but at a later time. These two persons were Rick Coley and Wally Fenc, both employed at Amerada Hess Gas Plant.

4. On 80 JAN 21 attended the residence of Wally Fenc and obtained a written statement from Fenc regarding this incident. Fenc related that it was in the early morning hours of the fifth of October, he was working the night shift at the gas plant which is located 12 miles north of Rocky Mountain House and the sky was clear except for a few streaks of light cloud

C-237 (1/75) 7530-21-029-4527

National Research Council of Canada/ Conseil national de recherches du Canada
RG 77, Vol. 309

Max ANDERSEN
U.F.O. Sighting Near Rocky Mountain House, Alberta
79 OCT 04

in the eastern sky. He claims that there was also a full moon. About 1:30 A.M. he saw an object moving in a west to east direction in the sky, seemingly quite parallel to earth. He then brought this to the attention of Rick Coley and they both watched the object until it disappeared which was a period of approximately two to three minutes. He stated the object was quite large and gave the impression of being quite low. It had five or six bright lights across it and a light of lesser brilliance to the lower front or perhaps preceeding it. They could not advise any particular shape, but that it did seem quite large and they also stated that it was about the size of a football field. He stated that, for a period of time, it obscured the moon which would give it a form of mass. He claimed that he could not tell whether it was making any noise as the gas plant is quite loud and would drown out any noise that would come from the object. It finally disappeared over the horizon out of their sight. On 80 FEB 08, a statement was received from Rick Coley. Coley's Statement wasn't quite as detailed as that of Fenc's, however, he did substanciate basically what Fenc said in his statement. Both statements are contained in Appendix "A".

5. All of these persons interviewed seem to be reliable and trustworthy persons, that would not necessarily fabricate a story. Therefore, I feel whatever they did see, was very much in existence regardless of what it was.

Max ANDERSEN
U.F.O. Sighting Near Rocky Mountain House, Alberta
79 OCT 04

Statement of Max ANDERSEN, Box 4 Rocky Mountain House, Alberta. 79DEC17.

Date of siting approx. 3rd to 5th Oct. I was sitting in the dining room of the new house N.W. 14 Twp. 40 W. of 5th, reading the newspaper. At approx. 10:00 P.M. when my daughter Martha came over from the old house and wanted to know what this object in the air about tree top level was.

We viewed this object which had revolving lights flashing towards the ground. It would dart a small distance approx. 1000 ft. and then stop again. We opened the patio doors and listened for a specific sound and there was none, to be heard.

The object when it stopped I viewed between two trees approx. 3ft. apart and the light when it revolved touched both edges and it was about 700 yds away example.

The object moved from south to north and I saw it for approx. 15 to 20 mins. left to right.

Max ANDERSEN
U.F.O. Sighting Near Rocky Mountain House, Alberta
79 OCT 04

Statement of Mary B. ANDERSEN, taken at Rocky Mountain House, Alberta.

Early October evening - I had gone to bed about 9 p.m. in our old house - daughter Martha was watching T.V. in the living room - in this same house. She called me - asking me - "if a plane goes through the sky - does a light flash?" - I said "no - why"? then I got up to look at what she was describing. We watched a somewhat revolving bluish - shite light - hovering over the trees to the far end of our field. It moved toward the right over the trees - moving faster then slowing down to a standstill at times - We called Max who was over in the new house at this time. We three watched this light for half an hour or so. It eventually disappeared to the North West of our field.

Max ANDERSEN
U.F.O. Sighting Near Rocky Mountain House, Alberta
79 OCY 04

Statement of Wally FENC taken at Rocky Mountain House, Alberta

In the early morning of October 5/1979 I was working the night shift at the Amerada gas plant approx. twelve miles north of Rocky. The sky was clear, except for a few streaks of light cloud in the eastern sky. There was also a full moon.

I was returning to the control room from a routine check of the office at approx. 1:30 A.M. when I saw an object moving in a west to east direction in the sky, seemingly quite paralel to earth.

My assistant, Rick Coley, was not far off so I ran to bring it to his attention. We both then watched the object until it dissapeared. From the time I first saw it until it dissapeared from view was approx. 2-3 minutes.

The object seemed to be quite large and also gave the impression of being quite low. It had five or six bright lights across it and a light of lesser brilliance and I discussed the object later and we couldn't remember, or perhaps didn't take note of any particular shape. We did agree that the object seemed quite large (he used the comparison, "the size of a football field", and we think it did obscure the moon on its passing.

When the object began to be obscured by the towers at the plant we ran to the eastern perimeter of the plant were we watched the bright lights turn to a fiery orange color with light streams of the same color. Occasionally in these light trails we would see balls of light of the same color. These lights seemed to grow and then explode. We could hear no noise from the object, but the plant process is quite loud and might have drowned any noise there might have been. The object seemed to drop slowly giving the impression that it went down just over the hills and not over the horizon.

When we could no longer see anything I called the Rocky R.C.M.P. to report the incident just in case it might have been a large airliner.

Max ANDERSEN
U.F.O. Sighting Near Rocky Mountain House, Alberta
80 FEB 04

Statement of J. R. COLEY (B: 16-4-59) taken at Rocky Mountain House, Alberta

Location - Amerada, Ferrier Gas Plant

Date - Oct. 6th/79

Time - 1:00 a.m.

What I saw - Three or four bright lights trailed by multicolored lights in four or five streaks. It's size was huge as it blocked out a big portion of the sky, moon and stars. A person couldn't tell the shape. The lights orginated from the western horizon heading eastward. The bright lights in front seemed to burn out as it traveled east and multicolored lights seemed to be swirling and change colores. The colores were, white flame, blue, red, yellow and orange. The lights last for roughly two to two and half minutes.

25 JAN 1980

I do not know why I have not written to you sooner about a UFO I saw in late 1978.

All I can say is that it keeps coming back to my mind. I doubt that this will be of much interest to you however I will give you the details. You may destroy or file this information.

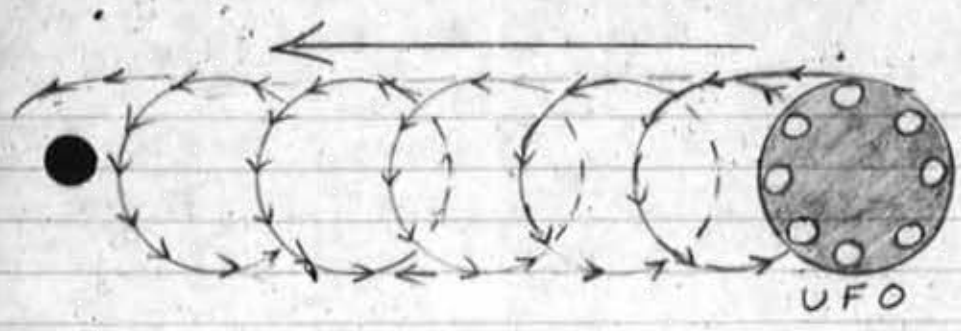

DATE : either the weekend of the 25+26, Nov '78 or 2+3, Dec '78
TIME : approximately 15:30
WEATHER: dull day - low hanging clouds
OBJECT : circular, of pewter coloring with either round windows or lights around edge.

I was sitting at our kitchen table, when I turned my head left to look outside. I saw a circular object roll across my line of vision. It rolled from right to left like a coin would roll (standing up) on a flat surface.

It was not spectacular like one sees on TV or in motion pictures, it just happened and I knew they as I know now that no one will believe me. I am not good at judging distance or height therefore I cannot even guess.

I have made a sketch (to the best of my ability) on the following page.

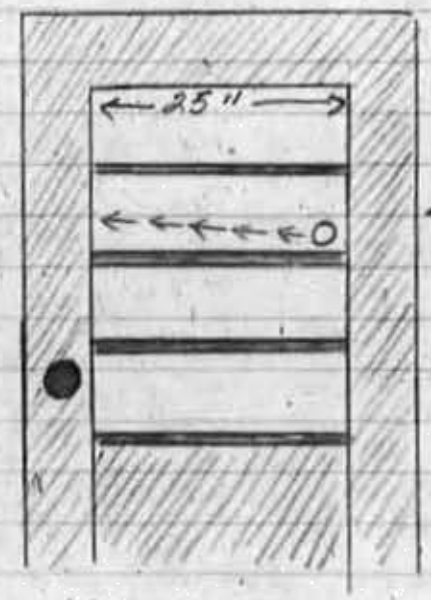

National Research Council of Canada/ Conseil national de recherches du Canada
RG 77, Vol. 309

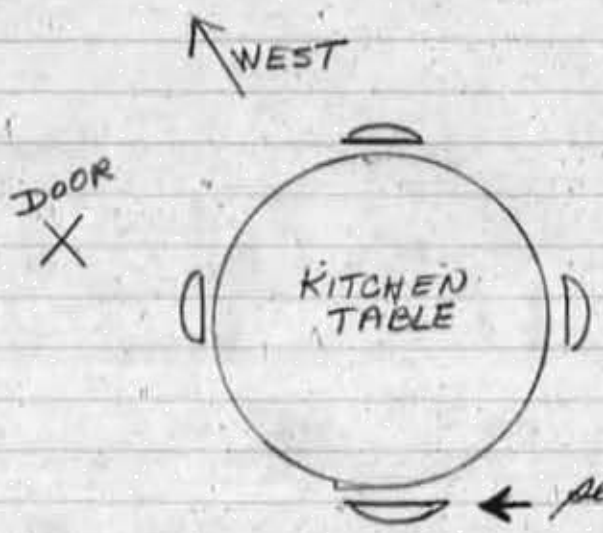

I cannot say if it was flat or round like a sphere, etc..

The small circular openings were bright white (like a white light).

— If you were to ask me it's size I would have to say the size of a fifty cent piece held to the window pane. In other words the size seen from the distance.

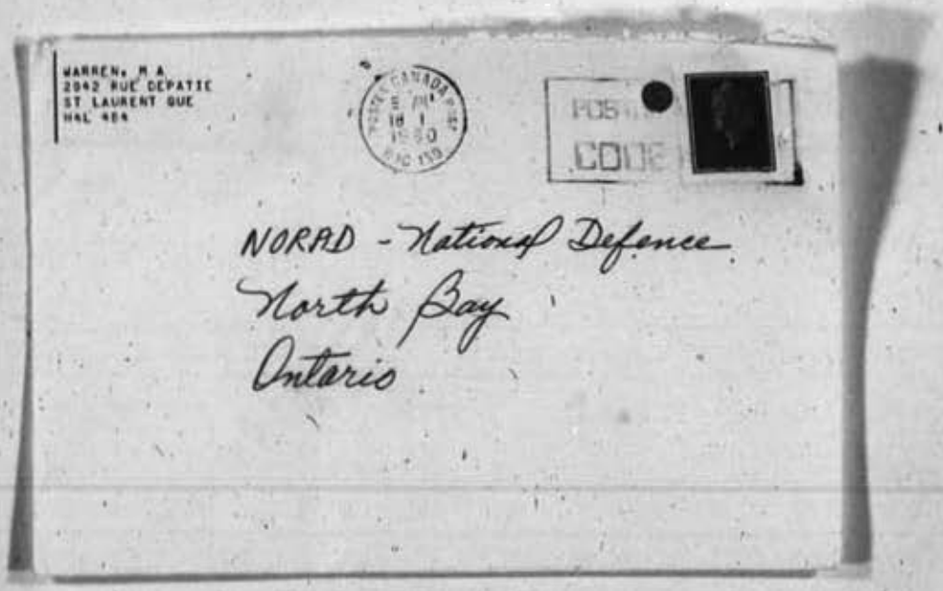

UFO seen through pane of glass.

Thank You,

M. A. Warren

Dear Sirs:

Bright Object in the Sky.

I am writing because I thought the following eyewitness report might be of interest to someone. Dr. Svenn Orvig of McGill felt that you would be the logical recipient.

At 6:38 p.m. on Wednesday, January 2, 1980 in the sky north of Pointe à Pitre, Guadeloupe going E to W (not falling - trajectory parallel to the earth's surface) a bright object (white) moving quickly. A piece broke off, stayed behind, burnt out, and then the whole was extinguished.

IDENTIFIED AS POSSIBLE METEOR

Yours sincerely,

Storrs McCall

Storrs McCall.

Ack'd 19/2/80.

"FLYING COLORED OBJECTS"

1. C/N called 50 Radio and advised that she had just observed a ofject flying west along #1 Highway towards Herbert It was displaying yellow, red, green and blue flashing lights and was reporting this for information purposes. She advised that Tom and Terry WILSON, who live on the farm three miles east of Morse, had observed this similar object between 20:00 and 21:00 hours every night since last Thursday. Recorded for information purposes.

Re: — *Objet:* Ethel HOLDERBEIN - Complaint of Flying Colored Objects Page Two

Date & Time / *Date & heure*	Details — *Détails*
80 JAN 24	2. I attended the Herb HOLDERBEIN residence in Morse and obtained the attached statement covering the sightings of this bright colored object by Ethel HOLDERBEIN. She is believed to be a reasonably reliable witness in this case. I also attended the Tom and Terry WILSON farm, 3 miles east of Morse, Sask. and obtained the attached statement in which they describe what they saw. They were unable to give any accurate altitude for the movement of this obeect, however, what they saw has been recorded for information purposes. Tom and Terry WILSON are believed to be reliable.
	3. Mrs. HOLDERBEIN advised me that she had contacted an observatory in Regina and they advised that what had been observed may have been the planet Venus. A copy of this report forwarded to National Research Council, Planetory Science Section, 100 Sussex Drive, Ottawa, Ontario K1A 0R6. Reported for information purposes.

Statement of Terry WILSON (B: 16 SEP 51) of Box 206, Morse Saskatchewan taken on 80JAN24 at 14:45 hours

The first time I noticed the flying object it was 20:00 hours Thursday 80JAN17. It was directly above our farm, and a little bit to the southwest. Then a few minutes later it was above three farm lights about 10 - 12 miles south of Morse, Saskatchewan. It had come down considerably. It was a red color and it exploded, turned to yellow then to green and blue. That night was the only time I had seen the blue. Then it faded off to the west. By about 20:25 hours it was gone completely. The first couple of nights it did the same thing.

It was a very similar pattern to its' movement every night from 80JAN17 to 80JAN21.

On 80JAN22, Tom, my husband, saw it to the southwest, then it disappeared at about 19:20 hours. It just lasted a few seconds. Then I saw it to the southeast for a couple of seconds then it went out. The next time I saw it was about 20:15 hours. We saw it until 21:00 hrs. when it faded out to the west.

On 80JAN23 we saw it straight up to the southwest of our farm at about 19:30 hours. We only noticed it for about half a minute, then it was gone.

RG 77, Vol. 309

Statement of Ethel HOLDERBEIN (B: 02SEP23) of Box 428, Morse, Saskatchewan taken on 80JAN24 at 14:00 hours

I did see the object the night before I phoned you on 80JAN21. I was out at Terry WILSON'S farm and she pointed it out to me. It was very faint in the west and it looked like a tiny colored light. I thought maybe it was a plane that night. This was just before 21:00 hours, maybe 20:45 hours.

The next, 80JAN21, Terry WILSON phoned me and told me it was out in the west again. This was about 20:40 or 20:45. I watched it for about five minutes. It was going west from Morse off into the distance, and it just faded out to the west until we couldn't see it anymore. It was clear that night.

The next night Herb and I were out at Tom and Terry WILSON'S farm three miles east of Morse. It was about 20:00 hours when we saw the same light. I saw it as red, yellow and green and white, but mostly red. It was just before 21:00 hours about 20:50 hours when it faded out to the west again.

It looked more oval than completely round. The light kept changing in a pulsing fashion.

Cst. Wagg	Cst. Wagg	Assistance

Received call from the above noted person advising that for a period of approximately 1 hour they observed a U.F.O. It was first sighted at Union Square by Elwood Feindl and Louine Feindl and followed then for one hour - all the way to New Canada. Feindl contacted Max Meisner and Glenda Meisner who came over at 6:30 P.M. and they all watched it. They got in Feindl's vehicle and drove north on Sarty Road and U.F.O. followed them again. It was a triangular shape (in daylight looked like highly polished metal and in dark was huge white light.

U.F.O. was approximately 1000 - 2000 feet above Feindl's house and vehicle

Before dark there was a black streak coming to a point running beside the U.F.O.

U.F.O. was estimated as being nearly as big as the moon with red and green rays .

Jan. 80.

TO DR. I. HALLIDAY
UPPER ATMOSPHERE RESEARCH SECTION
OTTAWA

IDENTIFIED AS A METEOR

FROM DR. G. POLNITZKY
UNIVERSITY OBSERVATORY VIENNA, AUSTRIA

DEAR DR. HALLIDAY

FROM THE PILOTES OF SOME AIRLINES I GET VISUAL REPORTS. THE FOLLOWING ONE COULD BE OF INTEREST FOR YOU:

CANADA (TORONTO), ~~9.FEB. 1980. 00.19~~ GMT.
OBSERVER: F/E SCHMID AND CREW OF LUFTHANSA FLIGHT 431 (CHICAGO - FRANKFURT/MAIN).
LOCATION: 43.15.8N, 80.35.5W, AIRCRAFT COURSE 60 DEG. MAGN., $\Delta = 7°W$
ALTITUDE: 33000 FT. $\angle z = 63°$
FIRST SIGHTING: 10 DEG RIGHT, 30 DEG ABOVE THE HORIZON,
LAST SIGHTING: 20 DEG. LEFT. -20 (MINUS) DEG ABOVE THE HORIZON.
DURATION: 10 SEC. $\angle z = 33°$ surprisingly low, even at 33000 ft actually horizon here would be $-3.2°$ below the horizontal!
APPARENT BRIGHTNESS: LIKE A FLARE SIGNAL.
COLOUR: LIGHT BLUE/GREEN
POSSIBLE RE-ENTRY??

REGARDS

RE: - OBJET:

Keith BLAKENEY Jr.
Report of U.F.O. Sighting
Maugerville, York Co., N.B. 80-02-08

80-02-08

1. 2100HRS. The captionally noted reported to Fredericton Detachment that he had observed an unidentified flying object. The following information as per Operational Manual I.3.E.22 is herewith submitted.

2. DATE & TIME OF SIGHTING: 80-02-08 2050 HRS AST

3. CONDITION OF SKY: Clear, no clouds, dark moon

4. IDENTITY OF OBSERVER: Keith BLAKENEY Jr. Maugerville, York Co., N.B. Birthdate: 26 Sep 65 Telephone # 472-1244 (Area Code 506)

5. LOCATION OF OBSERVER AT TIME OF SIGHTING: One quarter mile East of his residence walking along Hwy.#1 (TCH) in a Westerly direction.

6. IDENTITY OF OTHER WITNESSES: No one else observed this object.

7. DESCRIPTION OF SIGHTING: One only bright bluish green oval shaped object with cloud reflecting effect surrounding it. It was about two feet in diameter at an uncertain elevation, moving very fast from south to north directly overhead of observer. Object seemed to disappear behind trees on north side of highway. There was no evidence of noise.

IDENTIFIED AS POSSIBLE METEOR

8. DURATION OF OBSERVATION: Seconds.

9. A telex as required was sent to National Research Council on 80-02-08. The observer seemed to be a sensible youth who would not make up stories to get attention. According to the boy's father his son was upset and frightened when he arrived home and told his parents what he saw. He was returning from a skating party down the road from his residence at the time.

10. Air Traffic Control at Fredericton Airport was contacted. They did not note any unusual occurrences on the night

80 FEB 25

1. This report is being submitted to the National ~~Research Council~~ as per Operational Manual 1.3.E.22. This date at approx. 2210 Hrs Mr. PELLETIER contacted Regina Det. R.C.M. Police advising there was an unusual object with red lights over a field approx. 3 kms west of his residence. The object had been observed for approximately 1 hour before disappearing to the west. Members on duty at the time were on other matters and unfortunately were unable to attend the scene. The Regina Airport Tower was contacted and did advise there was no aircraft in the vicinity.

80 FEB 26

2. This date writer contacted Mr. PELLETIER and obtained the following information. The sighting was observed by PELLETIER, his wife Patricia PELLETIER (Age 26) and 3 others visiting with the PELLETIERS. PELLETIER observed the object from his residence which is located in north west Regina at 7307 Bennett Drive. The sighting occurred approx. 3 kms west, over a field, between 2130 Hrs and 2230 Hrs C.S.T. on 80 FEB 25. The sky as described by PELLETIER was clear and stars were visible. Three other persons who witnessed the object are as follows:

(1) Sidney PELLETIER - Age 28 - Regina, Sask.
(2) Loretta WASCASE - Age 26 - Regina, Sask.
(3) Clara LAFONTAINE - Age 19 - Regina, Sask.

Above witnesses are all from Regina, however, were not present at the time of PELLETIERS' interview, thus complete information on them could not be obtained.

3. The object observed by PELLETIER is described as a circular bright light. The color was white changing to green then to red and repeating approx. every 30 seconds. PELLETIER estimated the altitude to be approx. 650 feet and was observing the object from approx. 3 kms. away. No movement observed for approx. 1 hour then the object went straight west away from viewer until it got smaller before it disappeared. PELLETIER stated only 1 object was viewed and duration lasted approx. 1 hour.

CONTINUATION – SUITE

RE – OBJET

Daniel John PELLETIER (B. 50 MAR 12)
Complaint of U.F.O. Sighting
Regina District, Saskatchewan – 80 FEB 25

4. In my opinion PELLETIER did view an object and is truthful about his observation. PELLETIER reported to writer that he has seen other evidence of U.F.O.'s in the past and related a story that happened in the Melville Dist., Sask. in 1968. PELLETIER is a non-drinker and would be considered by writer as a reliable witness. A statement was obtained from PELLETIER and is held on file. Copy attached with report. N.R.C. Meteor Centre, Ottawa advised by telex. No other reports were filed with this office. File concluded here.

RG 77, Vol. 309

STATEMENT OF: Daniel John PELLETIER (B. 50 MAR 12)
OF: 7307 Bennett Drive., Regina, Sask.
Taken on 80 FEB 26 at 2:10 p.m.

Last night at about 9:30 p.m. my cousin Sidney PELLETIER and his friend Loretta WASCASE came to visit me at 7307 Bennett Drive, Regina, Sask. As soon as they walked in they told me to look outside because they saw a bright light about 3 kilometres west from 7307 Bennett Drive. I went outside and saw the bright white light about 3 kms west and it was about 650 feet above the ground. About every 30 seconds it would change color from a white light to a green light and then to red light. I watched it for about 10 minutes then decided to contact the R.C.M.P. who advised that they would send someone from their Department to investigate the sighting if one of the R.C.M.P. Constables were available. My cousin Sidney his friend Loretta and I took turns looking at the bright light until about 10:15. At 10:30 my wife, Patricia and Clara LAFONTAINE came home from the Bingo and they also looked at the bright light for a few minutes. They noticed that it was beginning to move west and I went outside and saw the bright light move westward until it disappeared out of sight. It took about 5 minutes to move westward until it was out of my sight. During the initial observation period of 1 hour it did not move up or down or sideways. We did not hear any sounds coming from the object. I would estimate the size of the object 20 to 30 feet wide and about 30 feet in height. I do not drink alcohol beverages and do not make a habit of contacting the R.C.M.P. every time I see a light in the sky.

SIGNED: Daniel J. PELLETIER WIT: G.D. Colwell, Cst.

80 FEB 25

1. This report is being submitted to the National Research Council as per Operational Manual 1.3.E.22. This date at approx. 2210 Hrs Mr. PELLETIER contacted Regina Det. R.C.M. Police advising there was an unusual object with red lights over a field approx. 3 kms west of his residence. The object had been observed for approximately 1 hour before disappearing to the west. Members on duty at the time were on other matters and unfortunately were unable to attend the scene. The Regina Airport Tower was contacted and did advise there was no aircraft in the vicinity.

80 FEB 26

2. This date writer contacted Mr. PELLETIER and obtained the following information. The sighting was observed by PELLETIER, his wife Patricia PELLETIER (Age 26) and 3 others visiting with the PELLETIERS. PELLETIER observed the object from his residence which is located in north west Regina at 7307 Bennett Drive. The sighting occurred approx. 3 kms west, over a field, between 2130 Hrs and 2230 Hrs C.S.T. on 80 FEB 25. The sky as described by PELLETIER was clear and stars were visible. Three other persons who witnessed the object are as follows:

(1) Sidney PELLETIER - Age 28 - Regina, Sask.
(2) Loretta WASCASE - Age 26 - Regina, Sask.
(3) Clara LAFONTAINE - Age 19 - Regina, Sask.

Above witnesses are all from Regina, however, were not present at the time of PELLETIERS' interview, thus complete information on them could not be obtained.

3. The object observed by PELLETIER is described as a circular bright light. The color was white changing to green then to red and repeating approx. every 30 seconds. PELLETIER estimated the altitude to be approx. 650 feet and was observing the object from approx. 3 kms. away. No movement observed for approx. 1 hour then the object went straight west away from viewer until it got smaller before it disappeared. PELLETIER stated only 1 object was viewed and duration lasted approx. 1 hour.

4. In my opinion PELLETIER did view an object and is truthful about his observation. PELLETIER reported to writer that he has seen other evidence of U.F.O.'s in the past and related a story that happened in the Melville Dist., Sask. in 1968. PELLETIER is a non-drinker and would be considered by writer as a reliable witness. A statement was obtained from PELLETIER and is held on file. Copy attached with report. N.R.C. Meteor Centre, Ottawa advised by telex. No other reports were filed with this office. File concluded here.

RG 77, Vol. 309

STATEMENT OF: Daniel John PELLETIER (B. 50 MAR 12)
OF: 7307 Bennett Drive., Regina, Sask.
Taken on 80 FEB 26 at 2:10 p.m.

Last night at about 9:30 p.m. my cousin Sidney PELLETIER and his friend Loretta WASCASE came to visit me at 7307 Bennett Drive, Regina, Sask. As soon as they walked in they told me to look outside because they saw a bright light about 3 kilometres west from 7307 Bennett Drive. I went outside and saw the bright white light about 3 kms west and it was about 650 feet above the ground. About every 30 seconds it would change color from a white light to a green light and then to red light. I watched it for about 10 minutes then decided to contact the R.C.M.P. who advised that they would send someone from their Department to investigate the sighting if one of the R.C.M.P. Constables were available. My cousin Sidney his friend Loretta and I took turns looking at the bright light until about 10:15. At 10:30 my wife, Patricia and Clara LAFONTAINE came home from the Bingo and they also looked at the bright light for a few minutes. They noticed that it was beginning to move west and I went outside and saw the bright light move westward until it disappeared out of sight. It took about 5 minutes to move westward until it was out of my sight. During the initial observation period of 1 hour it did not move up or down or sideways. We did not hear any sounds coming from the object. I would estimate the size of the object 20 to 30 feet wide and about 30 feet in height. I do not drink alcohol beverages and do not make a habit of contacting the R.C.M.P. every time I see a light in the sky.

RE: - OBJET:

Bernard HALEY (B: 02 MAR 54)
Sighting of U.F.O. 80-02-25

(1) DATE OF SIGHTING: 80-02-25

(2) CONDITION OF SKY: Clear

(3) OBSERVER - Bernard HALEY (B: 02 MAR 54)

(4) LOCATION OF OBSERVATION: Fraser's Grant, Ant. Co., N.S.

(5) OTHER PERSONS: Mrs. Eileen HALEY, Fraser's Grant, Ant. Co.

(6) DESCRIPTION:

Subject described object as a large yellow light without any mechanical structure. When first sighted it was quite close to earth, however, did go to quite hight altitudes on occasion. Subject appeared quite definite in his description. Could say very little concerning the speed of travel other than it varied from a complete stop, to in excess of normal speeds of a car. Overall times of the sighting would be twenty minutes to one half hour.

Reliablity of Bernard HALEY is unknown. Reliability of Mrs. Eileen HALEY is known to be good.

Self explanatory statement of observed is attached.

RE-OBJET: PAGE

STATEMENT OF: Bernard HALEY (B; 2 MAR 54)
Summerside Rd, Heatherton,N.S.

About quarter to nine last evening I was travelling from Frasers Grant to Heatherton. While on the Frasers Grant Road I lost the radio receiption. Then I stopped at the crossroads of Frasers Grant Rd and the Trans Canada and was turning left to go West. I noticed just ahead of me and a little to the right a yellow light, it was quite a size. It was completely round and at first it appeared to be dropping and coming towards me. I thought it might have been a plane crashing or something. It was beside me, and I could see it had no mechanical structure, it was just a large round yellow light. It started to move ahead and I flashed my headlights on and off and it started to slow down again. Just before I caught up with it, it started to speed up again and following the road patterns as if it was on the road. After it speeded up, it got way ahead of me. I went to South River and decided to turn back I turned in the St. Andrews Highway and decided to stop for a while. Looking out to my right could see the light had stopped also. Judging for a distance I'd say it was over the Marshy Hope area at this time. So I decided to head back to Summerside and just as I was coming into the Dagger Woods area the car seemed to light up in the rear. The light wasn't car lights, it was a yellow light, the light was coming back my way. At that time I increased my speed to get back to Summerside. I was watching the light at the same time I was heading East. It stopped dead about centre of the Dagger Woods and went higher into the sky. When I finally parked at my home the light was dropping back down again. This is when I called Eileen.

Dear Sirs:

1. This letter is being forwarded to you people as per our Instructional Operational Manual 1.3,E,22.a. We have had reported to our office two separate sightings of UNIDENTIFIED FLYING OBJECTS.

2. Mr. Martin J. VAN METRE sighted a single bright white light at 2130 hrs., 26FEB80, 7 miles East, 4 miles North and 4 miles East of Lloydminster, Saskatchewan. VAN METRE explained that this object was at the right of him at a distance of approximately 100 yards. As he drove East on the grid road, this object stayed parallel to him as he proceeded to drive up a large hill and stopped his truck. VAN METRE turned his engine off, stepped out from his truck, and observed this object for a few minutes. The object made no sound and was approximately ½ mile off the earth surface. VAN METRE started his vehicle up, proceeded down the road for ½ mile and the object disappeared. There was no road, trail, or tracks, etc. to the right of this grid road for 2 miles. The land surface is obstructed with hills and hollows.

3. The second sighting was on 28FEB80 at 2025 hrs. At the same location, VAN METRE, his brother Ben, and a good friend--Charlie WALDERN saw a single bright light approximately ½ mile above the earth travelling West. This object made no sound and did not leave any trail of light or debris.

4. VAN METRE reported the second sighting and Cst. MELENCHUK was dispatched to the above noted location. When driving to the scene, this object could be seen from Lloydminster, Saskatchewan. Upon arriving at the scene, the object had moved completely from the East sky to the West. I was standing on the road talking to the other three gentlemen and this object disappeared.

National Research Council of Canada/ Conseil national de recherches du Canada
RG 77, Vol. 309

5. Captain Dave KENDEL of Cold Lake CFB Air Base was contacted and could offer no information to either sighting.

6. Our local RCMP file has been concluded as we are unfamiliar with this type of occurence.

Yours truly,

K.B. Melenchuk

RE: - OBJET:

Paul WILKIE - Reported UFO Sighting
Alberton, P.E.I. 80-03-02

March 2

80-03-02

1. On the above date at approximately 10:40 p.m. Atlantic Standard time, Paul Wilkie and Kenny ASHLEY of Alberton reported to this detachment that they had seen what appeared to be an Unidentified Flying Object approximately 10 minutes previously.

2. Observations of both youths at this time indicated both were normal and did not appear to be under the influence of either alcohol or drugs. Neither have been noted to be involved with same in the past.

3. WILKIE and ASHLEY related that they had been driving around the town of Alberton which has a population of approximately 1500 people, and located on the western end of Prince Edward Island. The evening was cold, the temperature below zero but very clear. There were no visible clouds and very little wind. Both youths were travelling in the same vehicle, heading west on highway #152. They noted a light in the sky which appeared to be low; however, they were some distance from same. The only description of the light at this time was that it was bright and white. They turned their vehicle around at this time and headed back into Alberton. They felt the light was following them; however, disappeared before they reached the town.

4. When the youths arrived at WILKIE's residence the light was noted to be directly over the barn at an estimated height of 75 feet. They described it as being intensely bright at this time lighting up a large area. They observed same for a few minutes before it disappeared. They could at no time detect any outline from the light source. It was at this time they reported their sighting to this office. They felt the light was travelling at a high rate of speed; however varied to keep up with their vehicle.

80-03-20

5. Canadian Forces Base, Summerside, P.E.I. was contacted.. It was learned that 413 Squadron is the only squadron to fly in this area and they occasionally use a "night" flare to light up the sky for paratroopers before they jump. The base is located approximately 35 miles east of Alberton. The type of flare they use is dropped at approximately 2000 feet and burns with an intense white light for approximately 1½ to 3 minutes. The flare could also drift if there was enough wind velocity to carry it. Before burning out, the flare turns a bright orange colour. CFB Summerside advised they were carrying out no exercises on the dates of the reported sightings.

6. Paul WILKIE was contacted on two occasions, 80 March 13 and 80 March 23; however, he advised he had not seen the light since reporting same.

80-03-28

7. Statement obtained from Paul Wilkie on this date. He has not seen the light since 80-03-02; however, had seen it previous to that date. The first time was on 80-02-13 when he was travelling alone along highway #2 and onto #12. The time was approximately 9:30 to 10:30 p.m. He felt it was following him but at some distance but low enough to light up a great area. He described it the same as before; however, on this occasion it passed in front of his vehicle, forcing him to stop. He then went to a friend's house and on returning to his vehicle approximately one half hour later, the light had disappeared. WILKIE advised he again spotted the light on 80-03-01 while in Alberton. He was in the company of Kevin Ashley and their girlfriends at this time. He described the light as being close to orange in colour. They followed the light out highway #151 from Alberton, where it would travel towards them and depart again. WILKIE estimated the time of this sighting at approximately 10:00 p.m., the weather again was clear and cold. WILKIE saw the light again later the same date while travelling highway #12. It was again bright enough to light up the sky and areas below. He watched until it disappeared out of sight near his residence.

8. It is difficult to asess what the youths saw or thought they saw. What is known at this point is that the sightings appear to be between 9:00 and 10:30 p.m. when the weather was clear and cold. No shape or object was visible on any sighting; however the light was always intense.

9. It is not our policy to form an opinion as to whether the youths were actually seeing a UFO or believing they saw something, only to report same. We have no more information on this and will be concluding our investigation unless more concrete facts are received.

CONTINUATION – SUITE

RE: OBJET | PAGE

28 March 1980

STATEMENT OF PAUL WILKIE, Alberton, P.E.I.

The first time I remember seeing this object was the 13th of February, 1980 at approximately 9:30 to 10:00 p.m. I was headed towards Alberton from MacNeill's Mills via route #12. I saw the light before I entered highway #2 from MacNeill's Mills that night approximately 20 miles from Alberton. At this time, when I saw it, the light was kind of orange-red in colour and I first thought it was an airplane. My radar detector also went off in my car when I was at the corner of MacNeill's Mills and the #2 road. At this time my radar detector was pointing into the woods.

Q: What did you see, a light?
A: I never seen the shape of an object yet, just the light; however, the light was lighting up more than the width of the road. After I turned onto #2 highway, I proceeded west to #12. I turned there towards Alberton. At this time the light was following me. To the best of my knowledge it (the light) stayed on the driver's side of the car but it definately moved along with me. After I was approximately 3 miles from Alberton the light came across in front of my car. I thought the light was going through my car, so I stopped. I was travelling slow at the time. The light went over me then I went into Jimmy Ashley's house. After I was in for about a half hour or so, I came out. The light was gone.

Q: Had you had anything to drink?
A: No.

Q: When you first saw the light, it was an orange-red colour. The light changed to what colour later on?
A: As far as I could tell, when it made me stop, it was a white-blue light similar to that of a welder's light. That's the last time I saw it that day.

80 MARCH 01

On this date, a Saturday, I was at the wharf in Northport, PEI near Alberton. I saw the light along with Kenny Ashley and our girlfriends. I drove my car towards Elmsdale. On the way to Elmsdale I showed them the light. The light was an orange-red, with a flash of blue at times. The light would travel towards us and then leave again. It travelled very fast, faster than anything I saw. The light was in the sky while we were in Elmsdale; however, when we came into town the light left, we didn't see it again. This was around 10:00 p.m. or 10:30 p.m. this evening.

Q: At what height was the light at this time?
A: This night the light was very high in the sky, we couldn't tell.

After we drove around for a while around Alberton, PEI that Saturday, I took my girlfriend Tracy home to MacNeill's Mills. This was around 1:00 a.m. on Sunday morning. I met Leslie Vincent along the Cascumpec Road near Kelly Road. We stopped and he came along with me after

KODAK SAFETY FILM

he parked his truck. We started down #12 east, the light in orange-red colour followed us. The light was located on either side of the car, it seemed to follow us and it changed sides frequently. The light was still high in the sky, although I could not say for sure.

Q: What was the weather like this night?
A: The weather this night was clear as was the weather the first time I saw it. We drove down to MacNeill's Mills about 2:00 a.m. We started back and picked up Vincent's truck. Then we went to our house in Alberton, sat in the yard and watched it until about 3:00 a.m. The light was still orange-red in colour and seemed to sit there. We were at the end of the driveway, the light seemed to be over our barn. The light just seemed to sit there, then after a while it just went out. We did not know where it went or anything. We did not see it for the rest of the night.

80 MARCH 02

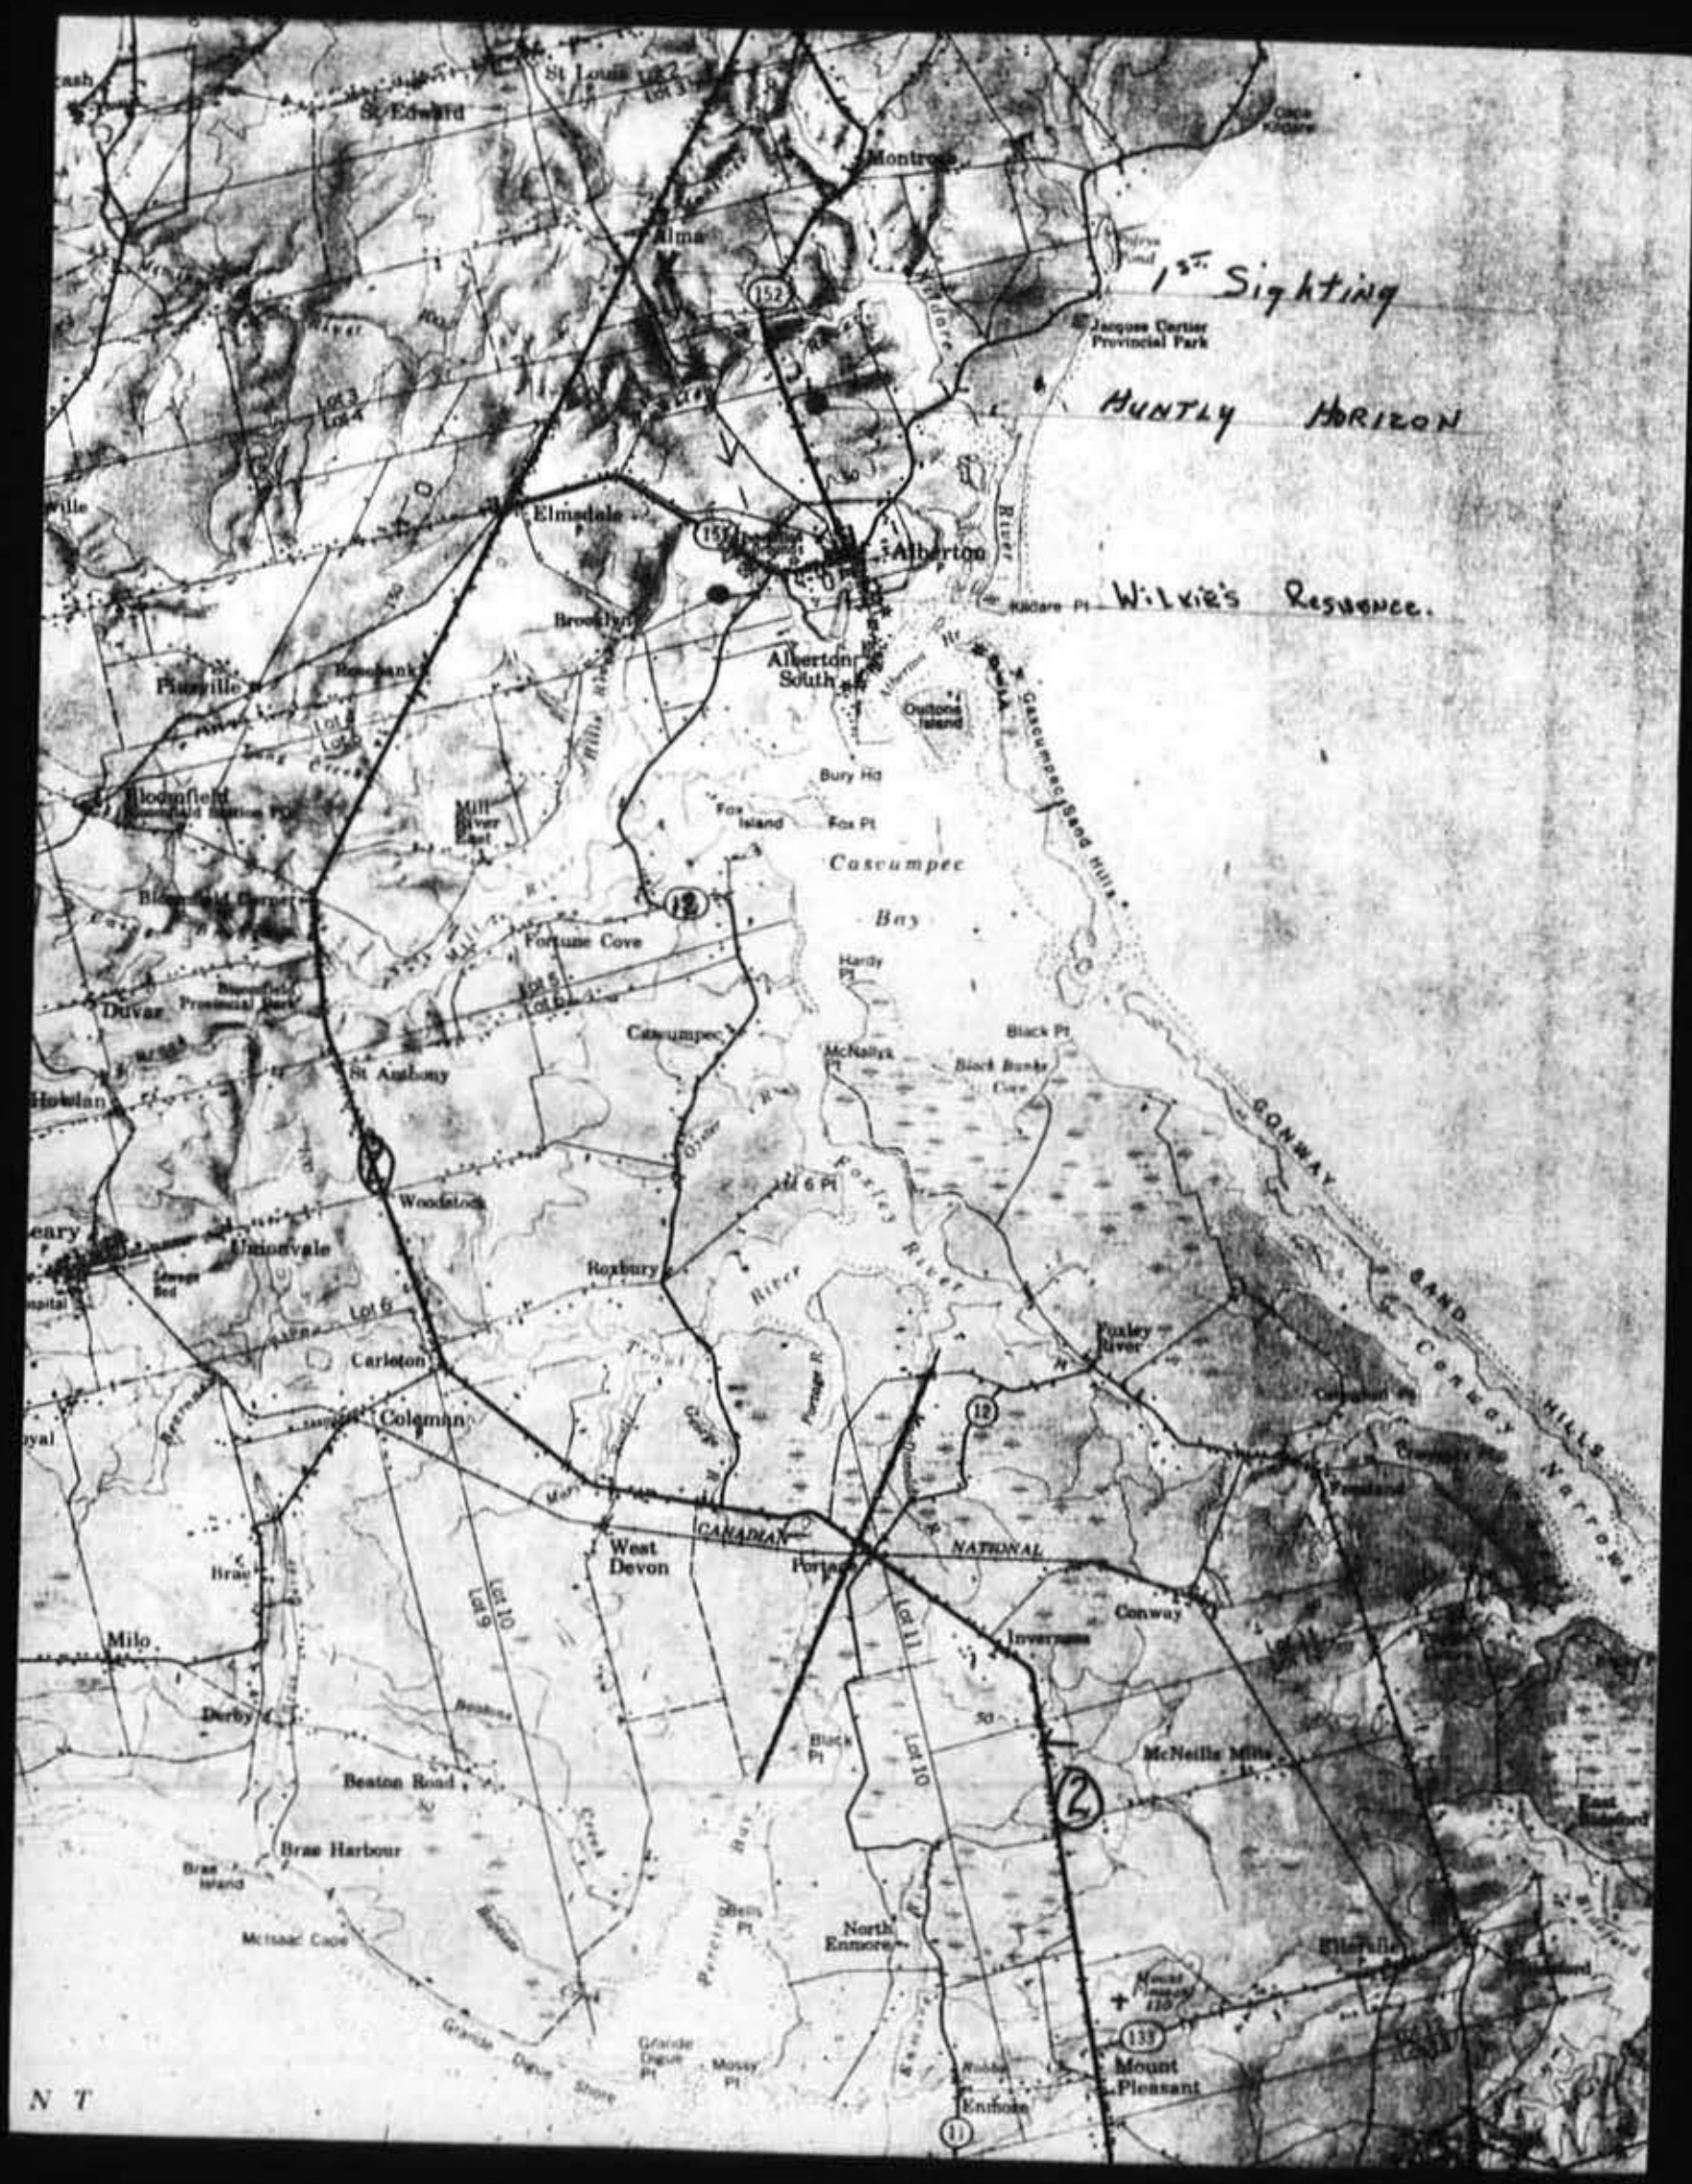

On this date, we were going to the Huntley Horizon just outside of Alberton. There was myself, Kevin, Tracy and Terry. We had Kevin's car and had decided to go get something to eat. This was around 9:00 p.m. After we got something to eat we took a drive down a side road, known at the "Mill Road". After we went down that road about ¼ mile, we noticed the light which we had seen before. The light was out near Alma and was located lower in the sky. After we saw the light, then we turned around and headed home. The light followed us, but never really came into town. The light seemed to turn off and rejoin the road near our house, by taking a short cut. The light was low at this time and it seemed to light up the woods. After we got to our house, there was no one up so we went to Kenny's house, he lives nearby. At this time the light had lit up the sky and Ashley's barn, the barn, etc. all a red-orange colour. At this time the light was not much higher than the barn. It was hard to tell how big the light was but it did light up a big area. After we watched it for a few minutes, the light disappeared. We then came down to the R.C.M.P. office to report it.

I have seen it on one occasion or two since this but both times I was travelling home from the girlfriend's house. I was travelling around 11:00 p.m. on #12 on my way home. I saw the light again and it lit the road up in front of me. This was out near Cascumpec, PEI. The light was still orange-red in colour. To the best of my knowledge, it followed me a while down the road for approximately 10-15 miles, then it disappeared. It was very high and the altitude didn't change, what I could tell anyway. That was the last time I saw it.

RE: U.F.O. Sighting, near Rossland, B.C.

Dear Sirs;

On 80 MAR 8 at approx. 2115 Hrs., Mark TOPLIFF of 2323 - 7th Ave. Rossland, B.C. (362-5321), observed what he described as a large bright red glowing object with a short glowing red tail. At the time TOPLIFF was at the base of the Red Mtn Ski Hill looking east into a clear sky.

He observed the object for approx. 3 seconds as it moved north at approx. 30-40 degrees in a downward motion. As the object moved behind a small mountian a shower of red sparks were also seen. There were no traces of the tail after it disappeared and no sounds were heard.

TOPLIFF believed the object may have landed on the mtn it disappeared behind as it was only a half to a mile from where he was standing and was close enough to light up a portion of the mountain. TOPLIFF is quite knowledgeable of the area and checked the mountian on foot, but was unable to find any traces of the object he had seen.

The elevation at this point is approx. 4,000'.

TOPLIFF is 22 years of age and is of responsible character and was working as a member of the local ski patrol at the time of the sighting.

Another person who also observed the object was David MARTIN of Rossland, Ph #362-7798. MARTIN is also of responsible character.

ONL679 U F O SIGHTING

17 04:30
ON 80MAR16 AT APPROX 2130 HRS MST IN A MOSTLY CLEAR SKY, DON SPENCE LLOYDMINSTER SASK SIGHTED WHAT HE DESCRIBED AS A UFO. APPARENTLY SPENCE'S WIFE ALSO SAW THE OBJECT. THE OBJECT WAS NOTED IN THE SKY OVER FORT PITT, SASK AREA AND SEEMED TO HOVER OVER THE AREA AND FOLLOW SPENCE'S VEHICLE TO THE ALCURVE DISTRICT WHERE SIGHT OF THE OBJECT WAS LOST. WHAT THE OBJECT'S ALTITUDE WAS IS UNKNOWN. THE OBJECT WAS DESCRIBED AS A BLUE SHAPED LIGHT SURROUNDED BY A YELLOW HALO. THERE WAS ONLY THE ONE OBJECT. SPENCE ORIGINALLY GAVE HIS COMPLAINT TO LLOYDMINSTER DET, THEY REDIRECTED THE COMPLAINT TO THIS POINT AS THE ORIGINAL SIGHTING TOOK PLACE IN THIS AREA. SPENCE GAVE AN ADDRESS AND PHONE NUMBER FROM THE FORT PITT AREA. PHONE NUMBER IS NOT THAT OF SPENCE, BUT APPARENTLY THAT OF A FRIEND. OUR INVESTIGATION IS BEING REFERRED BACK TO LLOYDMINSTER DET SO THAT THEY MAY OBTAIN FURTHER INFORMATION FROM SPENCE. NOTHING IS KNOWN OF SPENCE'S CHARACTER OR RELIABILITY

Dear Sirs:

The following is a report of an unidentified flying object which was sighted on 80 MAR 16 in the Fort Pitt District, Saskatchewan. Don SPENCE of 4707 - 46th Ave., Lloydminster, Canada was the person who reported the sighting. The object was first seen in the northern sky at approximately 2130 hrs., M.S.T. The object was an oval shaped bright light with a long upside "V" coming out of the bottom. The "V" was blue in colour. There was also a small red light on the left side of the "V". The object moved to the north west and seemed to hover in that position. The object was visible for approximately two hours.

The object was also seen by Ms. Shelly WEBER of Lloydminster, Canada. Her story was identical to that of SPENCE (she was with SPENCE).

This Detachment has not been able to determine what this object was and has expired all avenues of investigation open to us.

(H. L. BOYD), Cst.

31 march 80
1:50

Dear Sir:

I just spoke to Professor Crawford of McGill University in Montreal, who answers questions the public may have concerning astronomy. He suggested that I write to you.

30 march

Last night, at 8 p.m. (perhaps a minute or two before or a minute after 8 p.m.), I was walking along Maisonneuve Blvd. in Montreal, near Guy Street. I looked at the sky in an easternly direction when I noticed a large extremely bright round object falling down in a steep curve, with a tail that was less bright, and perhaps 10 to 15 times as long as the diameter of the falling object. It all happened so quickly, perhaps two seconds, and the object was lost from view behind some skyscrapers in the city.

It is, of course, impossible for me to say how big the object could have been or how far away. I will make two drawings at the end of my letter to give you a further idea of my observation.

Akh

Professor Crawford thought that it may have been a meteor and he said that very bright meteors are seen only a few times during the year. And only a few people ever see it, because few people look at the sky, and it has to be at that precise moment, because a second or two the meteor is gone, unless one is in the country and can see it just a little bit longer. Professor Crawford also thought that you may be interested in this information for your records/statistics.

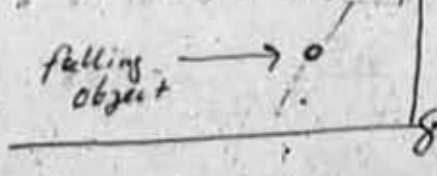

Sincerely,

Karl Pietzsch

Acadia University

Dear Mr. MacNeill

Sorry we took so long to answer your letter as my husband and I are both very busy.

My husband and I were on our way home from Union Square at about 5:30 p.m. I was driving the car and my husband was looking out the window on the passengers side when he saw a black square shape line in the sky at first he thought it was from a jet but the line was only in one place. Then I looked up too and saw a shiny object in the sky next to it, it was a triangle shape. This was not there

National Research Council of Canada/ Conseil national de recherches du Canada
RG 77, Vol. 309

when my husband spotted the lights. We kept driving along and my husband said it was moving along with us so I stopped the car and it stopped we started off again and it did too. We did this several times to make sure it moved and stopped when we did. The last time it stopped when we did it then suddenly took off across the sky and then stopped until we got up under it then it followed along with us. We watched it the whole way over to Mrs Lunada's We stopped into my husbands sister's house and told them they came out and looked at it too. Elwood's sister said that when we left the driveway and it saw the break lights it flashed a red light too. When we arrived home our friends Mary & Glenda Mussies called we told them what was going on so they came over to our house to see it. My husband & Mary watched it for quite awhile They both got in the car and drove up the road to see if

National Research Council of Canada/
Conseil national de recherches du Canada
RG 77, Vol. 309

The V.F.O. would follow. Glenda and I stayed in the house and watched and sure enough it took off and followed the car. I then decided to call the R.C.M.P. and told them what was going on they said they couldn't come up for an hour. By the time the R.C.M.P. arrived it had disappeared. They took a report of what we saw and our names. After they left it reappeared. This time my husbands parents where here and they saw it too when we pointed it out to them. My husband and his father stayed out doors then and watched it.

I strayed across the sky towards Bridgewater flashing different coloured lights, red, blue, green and yellow. That was the last I saw of it. Then when my husband and I went to bed it was back again and we watched it for a half hour then it disappeared for the rest of the night. Then the next night we saw it again and in a half hour it was gone. The first time we spotted it it was

National Research Council of Canada/ Conseil national de recherches du Canada
RG 77, Vol. 309

only about 2-3 thousand feet in the sky.

I hope this report will be most helpful to you. My husband + I and his parents are quite interested in U.F.O.'s. If there are any further questions please send us a line.

Yours truly
Mrs Lorraine Swindell

Dear Sir;

I wish to report the sighting of a fireball on April 4, 1980 at 21.30 N.S.T. (0.50 U.T.). It was spotted in the constellation Perseus heading towards the Pleiades. It had aMag. of - 8 much brighter then the planet Venus. It lit up the area where we were. It split into two parts before dying into a red colour. It last for about 5 seconds. Nome of the other three observers with me heard any sound either. I hope this is of help to you. If not please let me know so I won't bother you again.

1. On this date the statement taken from Mr. NELSON on the 80 JUL 4 by a Grand Falls Det. member was received.

2. Members at that point had been attempting to interview Mr. NELSON since 80 APR 19 with little success. Subject is apparently reluctant to make any statements as he feels he may be subject to ridicule.

3. The statement that was obtained from Mr. NELSON by Cst. A. MacNEIL is as undernoted:

80 JUL 04

STATEMENT OF MICHAEL ANTHONY NELSON - (B.52 MAR 05)
34 Second Ave., Windsor, Nfld.

On the 5th day of April, 1980 I was driving back to Grand Falls from Hr. Breton. About 10-10:15 P.M. I saw a blue pulsating light which seemed to be coming from the passenger side of the car. At this time I was about 20 minutes drive this side of the Northwest Gander Bridge. I had been driving about 45 MPH as the road was kind of slushy and it was misty this night. There was no wind blowing and the sky was overcast.

After seeing the light I was coming around a right curve in the road and at first I thought it might have been a snow plough. I drove on for approximately 3-5 minutes and didn't see any cars at all that night or snow ploughs on the road and the light was still there - on the right side of my car.

I drove on a bit more and started to become a bit worried. The light was getting brighter at this time. Then I pulled off to the side of the road figuring it could be a reflection from inside the car, and shut off all my lights.

Then I saw this object stop when I stopped. It was splerical shaped with a cyan colored light,

CONTINUATION - SUITE

RE-OBJET: Michael Anthony NELSON

PAGE 2

CONTINUED FROM PAGE ONE.....

.....COLORED LIGHT, pulsating almost like a heartbeat. Then I figured it must be a UFO and left as soon as I could. The light followed me for 5-8 minutes, after that I became scared for my safety.

Just before and during the time I saw the light I noticed the temperature gauge in my car jump from normal to hot and then back to normal. I hadn't had any trouble with my car prior to this. I drove on after this and didn't see the light again. I had the windows up in my car and when I stopped I didn't get out so I didn't hear any sound whatsoever.

The object was hovering about 10' I would say above the tree tops and off to my right about 20'. The object appeared to be at the edge of the trees beside the road.

Q. Do you think this object could have been a tower or anything stationary?

A. No, because it kept pace with my vehicle and always to the right side of my vehicle.

Q. Were there any other colored lights?

A. No, just the cyan,(almost like a white and blue mixed together).

Wit. A. MacNeil, Cst. Sgd. Michael A. NELSON

4. The foregoing was the only reported sighting in the Bay D'Espoir Detachment area. As there are no other related incidents and no further investigational action that can be taken, the matter is being considered as hereunder noted.

CONCLUDED HERE

Cpl. (C.E. COPP) #25056.

RE: - OBJET:

Léonard Roy (DN: 29-02-1936)
Autre Loi Fédérale (O.V.N.I.)
Ste-Marie de Beauce, P.Q.

1. Suite aux informations reçues en date du 80-04-06, l'enquête suivante fut conduite.

PLAIGNANT

4/4/80. 3:00 2

2. M. Léonard ROY fut rencontré à son domicile, soit au 1505, rue des Plaines, Ste-Marie de Beauce, concernant un Objet Volant Non Identifié (O.V.N.I.). Il m'expliqua que le 80-04-06 vers 22h00, il avait vu un objet dans le ciel. Le ciel était dégagé et il voyait plusieurs étoiles. M. ROY vit l'objet à environ 250 pieds au-dessus des arbres mais il se trouvait à ce moment à environ deux (2) milles de cet endroit.

Le plaignant explique qu'il avait vu un cercle semblant être du feu, cependant de couleur rose vif et très rond. L'objet brillait beaucoup comparativement à une étoile et la lune. M. ROY a vu l'objet pendant environ 30 secondes et celui-ci a disparu soudainement sans avoir bougé de place. Aucun son ne fut produit par cet objet. Il m'expliqua que sa femme a vu le même objet.

COMMENTAIRES DE L'ENQUÊTEUR

3. Lors de l'entrevue avec M. Léonard ROY, Gérant du Service à la Clientèle chez Québec Téléphone à Ste-Marie, il me parut gentil, sincère, sérieux, et surtout très stable concernant les événements datés du 80-04-06. Il est à noter que M. ROY ne pensait pas que nous prendrions cette enquête au sérieux et il fut très satisfait de notre travail.

4. Soumis pour votre information.

KW/10R2255 PLEASE RELAY TO NRC METEOR CENTRE. THE FOLLOWING UFO SIGHTING
RECEIVED FROM VERNON DETACHMENT. QUOTE:

WE RECEIVED A UFO SIGHTING THIS PAST P.M. AND AS PER
OPERATION MANUAL 1 3 E A TELEX TO NRC, METEOR CENTER OTTAWA, VIA PRIORITY
UNCLAS TELEX AT 053-3715. PLEASE REPORT SIGHTING TO THEM VIA YOUR TELEX
MACHINE.
1. SIGHTING OCCURRED 80-04-14 AT APPROX. 2145 HRS, PACIFIC STANDARD TIME.

15/4/80 5:45

2. WEATHER WAS CLOUDY

3. SIGHTING WAS REPORTED BY ANN LUNAN (B.13 JUL 62) OF 6652 TOPAZ DR., VERNON,
B.C.

4. LUNAN WAS RETURNING HOME VIA PRIVATE AUTO, DRIVING ALONG OKANAGAN LANDING
RD. WHEN UFO WAS SIGHTED OVER OKANAGAN LAKE.

5. NO OTHER SIGHTINGS WERE REPORTED.

6. UFO DESCRIBED AS VERY LARGE, CIRCULAR LIKE A 'DISCO LIGHT' ALL COLOURS.
OBJECT REPORTED STATIONARY OVER THE LAKE FOR APPROX. 2-3 MINUTES THEN
HEADED EAST TOWARDS CITY OF VERNON.

7. DURATION OF OBSERVATION WAS 2-3 MINUTES.

8. ANN LUNAN IS CONVINCED IN HER OWN MIND THAT WHAT SHE SAW WAS AN UFO:
HOWEVER SHE WOULD NOT REPORT HER SIGHTING TO LOCAL POLICE AS SHE FLET
SHE WOULD BE LAUGHED AT. PARENTS HAD LUNAN'S SISTER SANDY PHONE IN THE
REPORT. NO ALCOHOL INVOLVEMENT. ANN LUNAN WAS RETURNING HOME FROM A
SHOW WHEN SHE SIGHTED THIS UFO ABOVE OKANAGAN LAKE. WHEN SHE ARRIVED
HOME PARENTS NOTED ANN WAS TREMBLING AND QUESTIONED HER AS TO WHAT
HAPPENED. THE REPORT WAS THEN PHONED INTO THE VERNON RCMP DET.

DUE TO THE FACT NO FURTHER SIGHTINGS HAVE BEEN REPORTED AT OR AFTER THE
TIME OF THIS OCCURENCE NO FURTHER INVESTIGATION INTO THIS PARTICULAR
SIGHTING IS ANTICIPATED UNLESS OTHERWISE INSTRUCTED BY YOUR OFFICE.

Dear Sirs:

RE: Compl. of U.F.O. Siting
Grumbler Rapids - MacKenzie Highway #2
Approx. 50-60 Miles South of Hay River, N.W.T.
80-04-17

With reference to the above and our Msg. HR55/7 to Meteor Centre, Ottawa, 80/04/17 please find attached statements of witnesses M. Lynn READMAN, Roger N. READMAN and Barbara HUNT.

Mrs. Hazel HAIGHT of Hay River, N.W.T. (Telephone No. 874-6956) was also interviewed and she advised her statement was the same as M. Lynn READMAN's with respect to the sighting. Terry HAIGHT and Janine READMAN advised they couldn't give any further information other than what was supplied by Mr. READMAN.

If this office can be of any further assistance, please do not hesitate to contact the undersigned.

Yours truly,

E.P. Walsh Cst.

CONTINUATION — SUITE

NO. OBJET / PAGE

Statement of: M. Lynn READMAN
Box 1182, Hay River, N.W.T.
80 April, 25

Time and Location:

North of Indian Cabins while traveling north on the MacKENZIE Highway at approximately 5:00 a.m. April 17, 1980.

I first noticed what I first thought was a very bright and shiney cloud; it was about 4 or 5 times longer than it was wide. After observing this clould I realized it was moving in a much different manner than other clouds and formations I had watched. At this time it was moving in a patch of very blue sky between the red of the rising sun and a grey black cloud above. I thought then it must be a jet and the very bright part would be the vapour trail, this vapour trail did not very in size or shape so I ruled it out. Throughout its flight across the sky it did not change in size or brightness but its speed did seem to increase from when I had first noticed it. It moved from the blue sky rising and moving forward until it was behind the dark gray.cloud. Our curiosity now aroused, we continued to look for it and observed it appearing at the top and other end of the cloud. It now continued on its way across the sky until it was lost to view behind the trees. While it was still very visable we stopped the car and opened the doors but we could hear no sound.

Signed:

M. Lynn READMAN

CONTINUATION – SUITE

Statement of: Roger N. READMAN
Box 1182, Hay River, N.W.T.
80 April, 25

While traveling north on MacKenzie Highway on April 17, 1980 I observed an object in the sky east of the road and slightly ahead of the car. It was approximately 4:55 in the morning and the sun was coming up but still behind the trees. There was some cloud in the sky on the northern horizon and some orange/pink cloud on the eastern horizon. The object was pointed out to me by my wife and at first it looked like a small white cloud that was reflecting the bright silvery sunshine on it. At first it appeared to be stationary and by this time we had turned a few corners and the object was now on the east side of the car. The object then appeared to move, parallel to the highway traveling north and gaining some altitude then disappeared behind a large cloud. It re-appeared above the cloud still traveling northernly and I stopped the car to take a picture of it. After mounting my 2X multiplier and 105 mm telephoto lens on the camera I could not take a picture as the film was on 35 on the camera. The object by this time was traveling at a high rate of speed and at a northwesterly direction. I would estimate that the object was four times its height in length. The entire siting lasted about 2 minutes. The object was at least 1000 feet in altitude and approximately a half mile away. During the siting the discussion of the object in the car was that it appeared to be a vapour trail behind the object but the trail stayed with the object and did not stay across the sky as it does on some of the sitings of high altitude planes that I have observed in the sky.

Signed:
Roger READMAN

—CONTINUATION—SUITE

Statement of: Barbara HUNT
Box 21, Hay River, N.W.T.
Phone 874-3579

Around 5 A.M. Thursday April 17, north of the N.W.T./ Alberta border an object in the sky was seen by 7 persons in Roger READMAN's car.

This object that was seen was grey/white, there was a tail that looked like a jet stream, it was bright silver/white, but it stayed the same length the whole time and it followed the grey silver object.

The tail had a dome top and it was straight across the bottom. At this time Mr. READMAN got out of the car to take a picture and his camera would not work.

KODAK SAFETY FILM

U.F.O. Report, telephoned by Miss Debra McGillivray
Phone 932-7565, in area Cornwall, Ont.

19/4/80 4:30

Friday April 18, 1980, 11:30 p.m. E.S.T.
In car with boy friend, near Apple Hill, not
certain about directions.
Bright object seen in sky - could see 3 bright lights.
Object appeared to revolve, stayed ahead of them
when closed in car, above tree tops.
Later, on return to farm near Maxville, single
bright light light in sky.

N80/94

Report taken by D. Halliday

21 April 1980
3 p.m.

(Note: impossible to tell much from her description but
there is a bright triangle of Jupiter, Mars and Regulus
at moderate elevation in the west at this time of
night - quite unusual grouping and spectacular)

FM: O DIV (RCMP) TORONTO - PSU

N-80/106

PSU481 U.F.O. SIGHTING
AT 23:46 80-05-07 THE FOLLOWING FAMILY MEMBERS FORWARDED INFORMATION REGARDING A U.F.O. SIGHTING.
JOHN GILROY DOB 27 ~~MAR~~ JUL 44
45 ELM AVE
THORNHILL ONT

SHIRLEE GILROY DOB 04 MAR 47
ADDRESS AS ABOVE

MR GILROY FORWARDED THE FOLLOWING INFORMATION REGARDING THE SIGHTING OF THE U.F.IO.:
THE OBJECT WAS SEEN ON 80-05-07 BETWEEN THE APPROXIMATE TIMES OF 23:40 AND 00:00 (80.05.08) 8/5/80 4:40
SKY CONDITION : CLEAR SKY, STARS VISIBLE
THE OBJECT WAS SEEN WITH AND WITHOUT BINOCULARS THROUGH MR GILROYS BEDROOM WINDOW AND OUTSIDE HIS RESIDENCE. BEDROOM FACES WEST. HE DESCRIBED IT AS BRIGHT BALL OF LIGHT, ORANGEY-YELLOW IN COLOUR.
THE OBJECT WAS MOVING AWAY FROM THE HOUSE IN A NORTHWEST DIRECTION AND MOVED DOWNWARD ONCE. MR GILROY COULD NOT ELABORATE ON THE ALTITUDE OF THE OBJECT. HE STATED THAT THE OBJECT WAS SEVERAL MILES AWAY FROM THE HOUSE.
MR GILROY STATES HE WAS ASLEEP AND WAS AWAKEN BY THE BARKING OF HIS DOG. MR GILROY NOTICED THE OBJECT AFTER HE WAS AWOKEN BY THE DOG. MR GILROY DID NOT SEEM INTOXICATED DURING THE TIME IN WHICH HE SPOKE WITH THIS MEMBER NOR DID HE SEEM OF A MENTALLY UNSTABLE NATURE.
MR GILROY WAS REFERRED TO US BY CFB DOWNSVIEW.
