Dear Sir:

Re: U.F.O. Sighting

22:30

On May 21, 1980 at approximately 1530 hrs. about six miles northwest of Carbon, Alberta, Clifford HAZEL of Torrington, Alberta and a friend were driving back to Torrington. In a summerfallow field he saw a ball-like object. It was about four feet in diameter and very shiny, silver like. He described it as a turning ball in a dance hall. The distance that he saw it at was about one street block. The first time he spotted it, it was moving slowly across the field in an easterly direction. It then went out of sight in a coulee. He then saw it hovering over the coulee and then it suddenly went up, at a very fast speed, and disappeared. The full time of observation was about five to six minutes. When the object was hovering, it was approximately thirty to forty feet in the air. On that particular day, it was very warm and the sky was clear.

HAZEL's friend that was with him at the time was Greg HERZOG, also of Torrington, Alberta. We have been unable to contact him to ascertain if he could add anything to HAZEL's description. Mr. HAZEL's observations are probably reliable, however we have not had any other reports of sightings on that date or since then.

Yours truly,

(P.A.J. LEBLANC) Cst.

K1A 0R6

Dear Sir:

2:27h. 30 May 80

At approximately 22:27 hours, 80 MAY 29, Daniel CHAPLIN, age 18 years, of Middle Stewiacke, Colchester County, Nova Scotia, called this office to advise that he had seen a bright object fall from the sky. He observed the object through the window of his home. He had been seated beside the window watching T. V. and had seen the object at approximately 22:15 hours. Sky conditions were clear at the time.

The object was seen when facing east. CHAPLIN first observed the subject at an angle of approximately 60 degrees from the horizon, moving rapidly in a south-easterly direction toward the horizon at a sharp angle. Just before reaching the horizon, the object disappeared behind a tree in front of the window.

CHAPLIN described the object as being approximately one-quarter the size of the moon, bluish white in colour and very bright. He thought it might have flared at one point.

The control tower at Halifax International Airport was contacted. They could report no similar sightings.

Prof. Rupert H. McNEILL, Box 340, Wolfville, N. S., a regional representative of the National Research Council was contacted by telephone. As a result of conversation with Prof. McNEILL, an appeal was made through the local radio station for any information on similar sightings at the time.

.....2

Search and Rescue Headquarters, Halifax, was contacted. They advised there were two areas of activity in the Maritimes:

1. A ship was in distress in the Gulf of St. Lawrence. Flares were being dropped from approx. 5000 feet.
2. A military exercise was underway off the eastern shore of Nova Scotia. Shells were being fired to a height of 15,000 feet which contained magnesium flares.

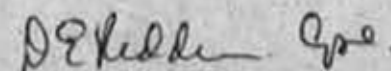

Numerous fireball sightings had been reported to Search and Rescue Headquarters during the late evening of 80 MAY 29. At approximately 23:50 hours, Mrs. William MacDONALD of 43 Phillip St., Truro, N. S. came to this office. He stated he had seen a fireball in the eastern sky. At the time, he was driving his car on the 102 Highway just south of Truro. He was giving the information in response to the radio appeal. WILLIAMS first noticed the object at approximately 30 degrees to the horizon, slightly north of east. The object was headed southeast and downward at a sharp angle. He described the object as bluish green and very bright. He used the word "sparkling". It appeared to go out just before reaching the horizon.

At approximately 2355 hours, Mr. Ron NOLAN, of R.R.#6, Truro, N. S., telephoned this office. He stated that at approximately 22:15 hours, he had been driving on the highway between Sheet Harbour and Upper Musquodoboit, Halifax County, N. S. At a point approximately ten miles south of Upper Musquodoboit, he noticed a bright object in the eastern sky. He first saw the fireball high in the sky. It was headed south on an angle to the horizon. He described it as being bluish green in color with a sparkling tail and extremely bright. NOLAN did not see if the fireball disappeared on the horizon as his view was obstructed by some trees. He first observed the object in a NNE direction. It would appear from talking to NOLAN that he was much handier to the fireball than Mr. MacDONALD.

On 80 MAY 30, I again contacted Prof. McNEILL. He suggested the sightings might not be the result of military activity. The three sightings were made by persons who are believed to be reliable and it should be noted the object was bright enough to attract the attention while driving. It should be noted that no details of the original sighting were released when requesting assistance from the local radio station.

A copy of this report is being forwarded to Prof. McNEILL.

Yours truly,

(D. E. REDDEN) Cpl.

1. Further to telex PSU482 sent to National Research Council, Metecr Centre, Ottawa, a follow-up interview was conducted on this date at the subject's residence of Apt. 1410, 275 Bleecker Street, Toronto, Ontario. Also present were Elizabeth and Camille ALEXANDER; the subject's daughters. In addition to the information provided in the telex, Mrs. ALEXANDER stated that she had called the University of Toronto in an attempt to find out what the objects that she had seen were. She was told that the objects were planets and a star.

2. At the time of the interview, the subject surrendered the undeveloped film of the pictures of the objects seen on 80-05-08. The pictures were of poor quality and could not be developed as a result.

80-05-20

3. This date, Dr. TURNER of the Dunlap Observatory, University of Toronto was contacted. He confirmed that they had received a number of calls similar to Mrs. ALEXANDER. Dr. TURNER identified the objects seen as the planets Jupiter and Mars and the star Regulus, further stating that these three objects were often in the configuration described by the subject.

80-05-29

4. Mrs. ALEXANDER was contacted by telephone this date and was advised of the results of our investigation. She was further advised that her developed pictures and negatives would be returned to her by mail.

80-06-04

5. This date the subject's pictures and negative were returned to her by registered mail. No further action required.

1. Further to Telex GKB 474 sent to National Research Council, Meteor Centre, Ottawa, a follow-up interview was conducted on this date at the subject's residence of 344 Betty Anne Drive, Willowdale, Ontario. Also present were Howard and Rhonda COHENS, the subject's son and daughter. Each of the subjects were interviewed, both separately and together, and they confirmed the original information from the telex. At the time of the interview, it was noted that a number of airline passenger jet aircraft passed over the subject's residence; when asked about the frequency of aircraft passing overhead, they confirmed that their house is situated in an area of approach to Toronto International Airport. They further stated that the sighting was farther north than the normal flight path and the size of the object was larger than any aircraft that has flown over their home before.

2. Rhonda COHENS was the first to sight the object and the only witness to see its bullet-shape. Almost immediately after she first viewed the object, it rotated on its vertical axis approximately 90 degrees and took on a circular shape. She then brought the object to the attention of her father and brother, who as a result, only saw the object as a circular shape.

3. Howard COHENS did take one photograph of the object. When interviewed, he stated that the aperture on the camera remained open approximately 8 to 10 seconds. As a result, the photograph was a time-exposure of the object. When developed, the negative showed a streak of light and was of no value to the investigation.

80-05-20

4. This date, Dr. TURNER of the Dunlop Observatory, University of Toronto, was contacted but he could not assist our investigation.

80-05-21

5. Attended at C.F.B. Toronto and was advised that there was no air traffic out of the base on the night of the sighting.

PROPERTY OF THE R.C.M.P. This police report is supplied to you by the R. C. M. POLICE for the information of your Department only. It is not to be made known to any other Agency without the written permission of the R.C.M.P.

6. Contacted Mr. OWEN, Tower Supervisor at Toronto International Airport, who advised that he could find no indication in their logs of flights in the area of the sighting. He did, however, state that aircraft from C.F.B. Borden were dropping flares during night exercises which were held on dates around the time of the sighting.

80-05-22

7. Captain COOK of C.F.B. Borden was contacted and he confirmed the use of flares during night exercises. After consulting his records, however, he stated that there were no night exercises on the night in question.

8. Captain MAZEY of Base Operations, C.F.B. Trenton, was contacted and he stated that there were no flights out of the base that night.

80-06-02

9. Further checks with air traffic controllers at Toronto International Airport and Buttonville Airport revealed no further information.

80-06-10

10. The negatives of the film developed was sent by registered mail to the subject. No further action is contemplated at this time.

INVESTIGATOR'S COMMENTS:

11. Both this investigator and Cst. CRANE, who was present at the interview of the subjects, were impressed by the cooperation of the witnesses. There was no evidence of fabrication on their part.

Dear Sir:

Re: Our Message dated 07 JUL 80/PARLEE Dave
U.F.O. Sighting Near Fort Saskatchewan, Alta.

Dave PARLEE provided a statement of his observations of the U.F.O., a copy of which is attached. PARLEE is a licensed pilot with considerable experience and claims he has never before had a sighting. Subject reliability unknown. He has not lived in this area before and is not known to Detachment Members.

Debbie EVERETT of 8819-147 Avenue, Edmonton, Apt.#215, was also with PARLEE at the time of the sighting. Her statement is the same as PARLEE's and a copy is enclosed. She has never had a similar experience.

EVERETT is of unknown reliability. She resides in the City of Edmonton and we have no indicies on her.

Terry HIGGINS of 14535-54 Street, Edmonton, Apt.#404, phone 478-9061 was contacted by phone and HIGGINS' version is somewhat different.

There was no sound coming from the object which was coming from NW headed SE. HIGGINS says the object appeared orange and had a short tail to it and that it disintegrated. It's size from where HIGGINS was, appeared about that of a basketball. The speed was not all that great.

The reliability of HIGGINS is not known as well. The difference in color may be due to the type of lighting present on the glass in the small guard shack being of a tinted nature.

No further action contemplated at this point. Our file will thus be concluded.

Yours truly,

S/Sgt. R. Wolsey

0313

AT 0313 I NOTICED A SINGLE GREEN LIGHT
APPROACHING FROM THE SOUTH AND TRAVELLING AT A
REASONABLE SPEED PARALLEL TO THE GROUND. IT APPEARED TO
BE AN AIRCRAFT CLEARANCE LIGHT. THERE WAS NO AUDIBLE
SOUNDS AND AS THE LIGHT WAS OVER THE SOUTH END OF SRC
IT BROKE IN A SERIES OF (4) FOUR SMALLER LIGHTS AND
DISAPPEARED. I WOULD GUESS THE ALTITUDE TO BE ABOUT
100 FEET.

0600 I TALKED TO SUPER T HIBBINS AND HE SAW THE
SAME THING FROM PHOS AREA AT THE SAME TIME.

Paul

1. At approximately 1300 hrs. on the above date, a Mrs. William WHITTAKER, Glenfinnan, P.E.I., contacted this office and advised that she and her son Philip, age 22, had sighted an unidentified flying object. Mrs. WHITTAKER stated that she and her son were seated in their livingroom at 0400 hrs. this date when they made the sighting.
2. Mrs. WHITTAKER was contacted but her son was not at home at this time. She stated that the light was noted in the sky in the direction of Charlottetown. The sky was apparently clear at the time of the sighting. Mrs. WHITTAKER described the object as rectangular in shape, glowing orange and yellow, with several smaller lights falling from it. The light remained for only a few minutes and then got smaller and disappeared.
3. Mrs. WHITTAKER advised that her son attempted to take a picture at the time, but the light was nearly gone by the time he got his camera.
4. Several attempts have been made to obtain the film, but her son has left for British Columbia. Mrs. WHITTAKER stated that she feels that the film will show very little.
5. It is the opinion of the writer that the sighting was a flare of some kind used by the militia during exercises off the shore. However, this could not be confirmed.

2. Cloudy
3. Marlene LeJUNE, Bear River, N.S. Phone: 467-2432
4. Bear River, N.S. in her residence
5. Stan VIDITO
6. Mrs. LeJUNE said that she heard noises and noise like cars going by outside and when she looked out of the window she saw a large circular light shaped like a plate or full moon, just about tree level. She described the color as bluish-white with flashing lights. There was no full moon that night. The object remained there for about 30 minutes. Mrs. LeJUNE was too scared, she decided to go to bed and try to sleep.

The next day somebody discovered a perfect circular depression in high grass about 20 feet in diameter where the object was seen. Also, Stan VIDITO, a maintenance man at the Digby General Hospital, reported seeing an unusual light in that direction at the same time that night.

7. Approximately 30 minutes.
8. The National Research Council representative at Acadia University was advised. Mrs. LeJUNE is well-known in the community of Bear River and Digby. She works as a nurse at the Digby General Hospital. I would say that she is quite reliable.

RE - OBJET:

U.F.O. Sighting
80-08-02
0330 Hours

N 80/131

1. Mrs. Linda COLLIER was contacted in relation to a report made by her on 80-08-02 to this R.C.M. Police office of a possible U.F.O. sighting. The following information was related to the investigator with respect to the actual sighting:

1. The sighting was reported on 80-08-02 at 0330 hrs., Eastern time.
2. Sky Condition: Clear - with a small amount of fog-type cloud according to Mrs. COLLIER.
3. Observer: Mrs. Linda (J.A.) COLLIER
1154 Wilson Avenue, Apt. 1507
Toronto, Ontario.
Phone Number: 630-0494.
4. The sighting was observed from Apt. 1507, 1154 Wilson Avenue, which is located on the eastern end of the apartment building with a view of the Northeast and Southeast areas of Toronto.
5. There are 3 other witnesses to the sighting:

Mr. David John COLLIER (Husband)
1154 Wilson Avenue, Apt. 1507
Toronto, Ontario.

Mr. Gordon James COLLIER (Brother)
461 Hopewell Avenue
Toronto, Ontario.

Ms. Barbara COLLIER (Niece) (11 years old)
1154 Wilson Avenue, Apt. 1507
Toronto, Ontario.

6. The sighting was described as follows:

Sighting on 80-08-02, sheet
lighting in appearance sighted
to the Northeast on the horizon,
and moved slowly to the Southeast
by later that same day. No thunder
sound was heard during the sighting
just orange lightning.

.../2

RE - OBJET

PAGE

U.F.O. Sighting
80-08-02
0330 Hours

- 2 -

7. The sighting duration ran from early hours of 80-08-02 to mid-morning, approximately seven hours.
8. Mrs. COLLIER stated that her husband, brother-in-law and mother viewed a similar occurrence in Salsbury, New Brunswick, approximately three days later. When C.F.B. Downsview was contacted by Mrs. COLLIER, the explanation given at that time was attributed to the atmosphere working as a reflector of highway traffic lights. Mrs. COLLIER went on to say that she viewed the same scene the next evening, 80-08-03, on the southeastern horizon.
9. The Climatology Department at Toronto International Airport was contacted by this office to ascertain weather conditions on 80-08-02. Information received was as follows:

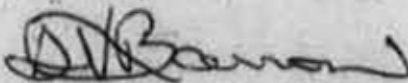

Temp: 19° C
Visibility: 15 miles
Winds: Westerly at 6 Knots
Clouds: Scattered, mainly clear sky
Weather: Clear up until late afternoon
with precipitation of .6mm.

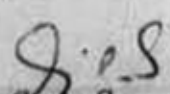

INVESTIGATOR'S COMMENTS:

2. During the course of the interview with Mrs. Linda COLLIER, she stated she had seen U.F.O.'s on previous occasions, describing them in detail. One such occurrence dated back five years ago. Mrs. COLLIER described seeing a large circular ship with bright lights that flew low to ground over Highway 400 North of Toronto. When asked whether she ever partook of alcohol or relied on medication in anyway, she stated she did not drink and nor did she require any sort of medication other than the occasional aspirin.

3. Mrs. COLLIER appeared rational and concerned with what she had seen, and that she had not received, in her opinion, a proper explanation.

CONCLUDED HERE:

MAIN FILE CHARGED TO	

Dear Sir:

At approx. 0150 Pacific daylight time, the Fort Nelson R.C.M.P. detachment received a phone call from a man identifying himself as a Mr. Edward MOORE. The complainant stated that he had just observed an Unidentified Flying Object at Mile 235 of the Alaska Highway.

Attendance was made to the Tompkins Esso station by Cst. T. WILD and the writer, Cst. D. MEIKLE.

The complainant, Edwin Lee MOORE (DOB 03MAR59), and his wife, Denice Kay MOORE (DOB 31JUL60) were observed to be very scared and very pale, to indicate that they were very scared.

The married couple were immediately separated, and statements were obtained, as per attached photostat copies. The two literally said the same things, but it was also shown that it was not rehearsed.

The sighting occurred at Mile 235 of the Alaska Highway, where the surrounding area is combined of rolling hills and muskeg. The area's only population is at Prophet River, Mile 233 of the said highway, which is approx. 100 people.

The condition of the sky at that time was scattered clouds, with a lot of northern lights during the night. In some lower areas, patches of fog were observed.

The MOORES stated that they were travelling south on the highway and observed a vehicle approaching them; who in turn passed them, but immediately thereafter, two (2) large

.../2

lights appeared after the car had passed them. These lights were described as 5 feet tall and 2-3 feet wide and the brightest kind of light that they had ever seen. MOORE stated that these lights were approx. 50 feet off the ground, and slowed to a stop, rotated and stopped. The couple who were driving a 1980 GMC 4x4, also stopped, and tried to ascertain what it was. There was no sound, nor could they observe any type of object behind the lights. The MOORES then proceeded to back up and turn around. The object followed them for approx. seven (7) miles, around corners, up and down hills, with the object following them. The said object flew in the air at again 50-75 feet and also negotiated corners. Mr. MOORE kept the object in sight trying to ascertain what it was, and after approx. seven (7) miles the object then suddenly disappeared as it appeared.

The writer and the MOORES attended at the scene of the sighting, which was approx. 70 miles from Fort Nelson, where it was observed by the writer that there were similar tire tread marks at the area in which they described prior to our attendance. The tread marks indicated that someone slowed to a stop at the curb and proceeded to back up, then turn around, and then left the scene in a hurry.

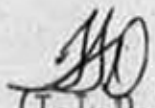

The investigator should also note that Mr. MOORE had not slept for approx. 36 hours, but his wife had slept on and off in the truck, but was rested before seeing the U.F.O.

If you have any further questions, please do not hesitate to contact the undersigned.

Yours truly,

(D.D. MEIKLE) Cst.

(I.L.D.) S/Sgt.
i/c Detachment

20/08/21
0220 hrs.
Food Nelson, BC

This is the statement of Edwin Lee
MOORE (B 03 MAR 59). Presently has no fixed
address - moving to TERESA, OKLAHOMA.
Taken by Lt. T. J. WILD at Tompkins
Restaurant, Food Nelson, B.C.

I am presently investigating a report of
a UFO that was sighted earlier on this
evening. Could you please relate to me
your knowledge of this incident.

On 20/08/21 at approximately 0130 hrs, my
wife Denise and I were travelling south on
the Alaska Hwy. Denise was picking up
one of the puppies. There was a vehicle
coming towards us. My truck is quite
loaded and the low beams are quite high.
The vehicle flashed his lights at us. When
I looked at the approaching vehicle I saw
another two lights up above the vehicle
and back a little. The approaching car
passed and I could still see the other
two lights. I thought it was another
vehicle up on a hill. As we approached
I told Denise to look at it. As we
got closer this object was about 50 feet
above the ground and about 50 yards
ahead of us. I continued to watch it
and I stopped the truck. This object
turned more directly towards us and
started to come towards us. I opened
the window and listened but I couldn't
hear anything. It still came towards us
so I started to back up and turned
around. As I was turning around the
object stopped in mid air as if watching
(u)

(2)

us. I then proceeded to head back towards Fort Nelson. As I was turning around I looked out the window and it looked as if it was following us again. We then proceeded to head back to Fort Nelson. I looked out into the rear view mirror and could see it. I then asked Denise to take the wheel and I stuck my head out the window but then there was nothing there. We were scared so we continued back to Tompkins' Cove, M 293 Alaska Highway at a high rate of speed. We then called the Fort Nelson RCMP.

Q. Do you mind if I ask you a few questions?
A. Yeah.

Q. What did these two lights look like?

A. They were rectangular shaped and very bright. They had lines around the sides.

Q. "How many hours have you gone without sleep?"

A. 30 hours.

Q. When did you come from today?

A. Watson Lake.

Q. This object couldn't possibly be a helicopter or an airplane?

A. No - There was no sound.

Q. These windows - how big were they?

A. They started out real small but as they came towards us they got as big as about 5 ft tall and about 3 or 4 feet wide.

(3)

wide.

Q. You didn't see any other vehicle coming from the south?

A. No.

Q. What was about the maximum total time you saw this object?

A. About 15-20 minutes.

Q. Have you had anything to drink today - meaning alcohol?

A. None. - I haven't had a beer or anything for about 2 weeks.

Q. Have you taken any type of drugs today?

A. No.

Q. You said something about the color of the plants on the side of the road. Could you explain that again?

A. As we were headed south they seemed to have a kind of glow to them. But on the way back we noticed that they seemed normal.

Henry J. Wild.
(T. J. Wild) Cst.
Ford Nelson, Det.
80/08/21 0300 hrs

E. L. Hord

This is the statement of Denice Kay Moore
(B 31 Jul 60). Presently has no fixed address -
moving to TELSA, OKLAHOMA.

Q: OK. Denice, your husband reports that
you say you saw a U.F.O. to night?
Is this true?

A: Yeah.

Q: Last night did you see?

A: Bright, scary, you know, like, square objects,
two of 'em, floating on a hill, like in
the air, but we were on a flat piece
of land.

Q: These lights, they were square in shape
were they?

A: Yes, huge.

Q: How large were they?

A: 6' x 5' 3" and I would say, just
about as tall as 6' x 5'.

Q: How high?

A: I couldn't say, exactly, maybe 2 1/2 - 3
feet, 6' x 5' had a good perspective on
it, but they were tall directly.

Q: Where did you see these lights?

A: I don't know the exact spots, but I
know we were off the good pavement and
onto the bad pavement. About fifty (50)
yards from here.

Q. About what time did you see these lights?

A. I don't know the time, sir.

Q. When you saw these lights, what happened next?

A. They started coming toward us slowly, they were down the main road, and I started for home, but there wasn't any, he started looking up, and maybe for a half a mile, and the thing came toward us fast, and then we stayed off, and went into the middle of the road, and started to come back to town, and we met those two men, and told them not to go out.

Q. These two men, how did you meet them?

A. They were going south, as we were trying to get away from it all, we stopped them by flashing our lights, and they what, stopped, and they talked us back.

Q. How long have you and your husband been traveling to day?

A. Last night, and all day, we left on Monday night, about quarter to eleven, and I been up all last night, all day long.

Q. How much sleep have the two of you had in the last 48 hours?

A. I've been quite dazed, playing on or off in the truck, but haven't had any.

Q. Where did you have lunch?

A. Anchorage, Alaska.

Q. How long did this light follow you?

A. In my opinion, approx. 7 to 10 minutes, it
seemed that it was a short time,
but we were moving.

1. Ms. Karen JONES was contacted in relation to a report made by her on 80-09-07 to this R.C.M.P. Office for a possible U.F.O. Sighting. The following information was related to the investigator with respect to actual sighting:

1. The sighting was reported 80-09-07 at 06:28 hours Eastern Time.

2. Sky Conditions: according to Ms. JONES were clear with good visibility.

3. Observer: Ms. Karen Louise JONES
(B: 07 DEC 60)
16 Summerhill Road
Toronto, Ontario
Phone No.: 259-2584

4. The sighting was observed from the kitchen window of 16 Summerhill Road which faces south overlooking Lake Ontario.

5. There were 3 witnesses to the sighting:

(a) Mrs. Marie Louise JONES (Grandmother)
Investigator unable to interview her as she was hospitalized at time of investigation.

(b) Mr. Barrie Frederick JONES (Father)
16 Summerhill Road
Toronto, Ontario

Was interviewed 80-12-03 - he gave us description of the sighting as being lights - red, green and a white strob light - moving from side to side and also up and down at a very rapid pace, yet not moving out of the specific area over Lake Ontario. He stated he is an ex-pilot and feels it was not an aeroplane.

(c) Mrs. Margaret DOBSON (Neighbour)
Unable to interview as she had moved from area, no forwarding address.

6. The sighting was described as follows:

- Silver round shape.
- Green, red and white flashing lights,
- It appeared to hover moving in a vertical plain.
- Only one object was sighted according to Ms. JONES over Toronto Island Airport area at a height of a passing plane.

7. The sighting duration ran from early hours of 80-09-07, approximately 1 a.m to 7 a.m.

8. Ms. JONES stated she had seen the object numerous times over the same general area.

9. The Climatology Office was contacted at the Toronto Island Airport to ascertain weather conditions on 80-09-07. Information received pertains to weather conditions at 7 a.m. that day.

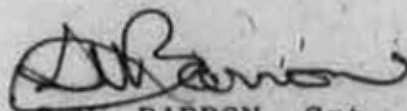

Temperature: 18°
Visibility: 12 miles
Winds: West-South-West at 19 kilometers
Clouds: High thin layer
Weather: Mainly sunny at 7 a.m. Eastern Time

INVESTIGATOR'S COMMENTS:

2. There were no reports of U.F.O. Sightings on file with Toronto Island Airport Office; climatology Toronto also negative, as well, David Dunlop Observatory was contacted - no reports documented there, as all reports are referred to Ottawa National Research Council.

3. During the course of this investigation, both Miss JONES and her father were quite convinced that/they had seen was something other than an aircraft and both appeared rational, as well as concerned with what they had witnessed.

RE: - OBJET:

Mr. Edwin THOMAS - U.F.O. Sighting
Kingston Peninsula, Kings Co., N.B. 80-09-29

N80/156

80-09-29

1. On the above date at 2230 Hrs. Mr. Edwin THOMAS reported seeing an object coming out of the sky and down to earth. He stated it was bright blue/green at the top and yellow/white at the bottom. There was no flame trailing and it didn't light up the sky. It came down on the opposite side of Butler Lake from where he lived. This would be on the Hampton side of Butler Lake.
2. A short time later a call was received from Mrs. Ken MATHESON of 1 North Street, Rothesay, N.B. She related that she saw an object of the same description land to the south side of the McKay Highway. This was between that highway and the Saint John airport.
3. I checked with the Air Traffic Controller at the Saint John airport. He got two similar reports. The only name he could remember was Glen MORGAN of Churchland Road. I wasn't able to locate such a person.
4. Also on our Police Radio I heard Campobello Detachment discussing a similar sighting. I checked with Fredericton Telecommunications Centre and they said similar sightings were reported in Sackville and Moncton.
5. I checked with Cpl. John MOORE of C.F.B. Gaagetown Military Police. He informed me the firing at their range ceased at 2213 hours and could not cover such a geographical area.
6. I telephoned Moncton Telecommunications Centre and they advised they received a report from Sackville Detachment and an EPA Pilot via the Air Traffic Controller at Moncton. All reported sighting occurred about the same time.
7. I checked with C.F.B. Chatham with Sgt. RICHARDS. He informed me they heard via C.F.B. St. Margaret's that a similar sighting was reported by the Rogersville Fire Department.
8. Radiogram # 80/39 submitted.

80-10-05

9. This date I patrolled to Fairvale and interviewed Mary (Mrs. Kenneth) MATHESON. A statement was obtained and a copy attached. She seems a reliable person and from the location she described I do not feel it is the same object Mr. THOMAS saw.
10. This date I interviewed Mr. Edwin THOMAS and took a statement, copy of which is attached. Mr. THOMAS seems to be a credible person.
11. There doesn't appear to be any further action which can be taken at this point. Unless instructed to the contrary the file will be closed. Copy of report sent direct to National Research Council, Planetary Sciences Section, 100 Sussex Drive, Ottawa, Ontario K1A 0R6.

Concluded Here.

Statement of Edwin Walter THOMAS (DB: 29 Jul 32) of
Erb's Cove Rd., (Peter Hill Road), Kings Co., NB
Tel: 832-422

1

Hampton, N.B.

About 10:30 p.m. on the 29th of September, 1980 I was sitting in my living room and saw a bright object in the sky. It was bright blue green at the top half and yellow white at the bottom. It was real bright and glowing. No flames trailed it. It was a clear night and the stars were out. I couldn't tell the shape but the glowing part was vertical oblong. It came down straight and the speed of a flare falling. I couldn't tell the size because I couldn't tell how far away it was. It appeared to come down near Butler Lake about 1 mile away behind the hill.

Fairvale, N.B.
80-10-05

On the 29th of September my husband was driving me from St. John to my home in Fairvale, N.B. We were just near the Fox Farm Road and I saw what looked like a flare coming straight down out of the sky. It was going at a speed it would be falling and not propelled. It appeared oblong and 2 feet long and 6 inches wide. The top 2/3 was pastel green and the bottom was salmon pink. It was all aglow but did not light up the area around it. I didn't notice there was anything trailing it such as vapour but I didn't see any flames. It was almost down to the ground when I saw it. I only saw it for about 5 seconds. I pointed it out to my husband but there was a transport approaching and he couldn't look. This happened about 10:20 p.m. The sky was clear.

1. Further to radiogram dated 80-09-30.
2. On 80-10-19 a statement was obtained from the complainant as to what occurred on the night of the incident. Mr. LEGERE is a well known citizen and known by members of this detachment. It is believed that his information is reliable and true.
3. Further investigations with the surrounding detachments of the R.C.M.P. reveals that the same object was seen by several other persons in the province. Inquiries made in local area revealed no other persons had observed anything.
4. While talking with Mr. LEGERE he advised that the direction degree was not as mentioned on the radiogram. The more accurate direction is south east of Minto, in the direction of Cumberland Bay in Queens County, N.B. Investigation with the other Detachments revealed the sighting to be all in the same general area.
5. Submitted for your information.

(D.M.V.) Cpl.

RE-OBJET:

Statement of Angus LEGERE (DB: 3 Apr 1907)
of Spruce St., Minto, N.B.

PAGE

On the night of the 25th of Sep 1980 I was sitting in the living room looking through the living room window when all of a sudden a big ball of fire appeared in the sky for approx. 3 to 4 second. It appeared round, and almost as bright as a car headlight. It was also approx. 2 ft. in diameter. It was dropping straight from the sky leaving no streak of fire or anything behind. I was standing in the house therefore I heard no noise whatsoever. As I was sitting across the living room I did have a clear and good look at it as it was coming straight down and straight in front of me.

Angus LEGERE

Q: Were you drinking on that night or previous to the incident?

A: No.

Q: When was the last time you had alcoholic beverages?

A: Aprox. 2 months.

Q: Did you ever report any sighting like this one before?

A: Yes, once approx. one year ago in the same direction.

Q: Since, have you talked to anybody that have seen the same thing?

A: No I have not.

Witness: J.A.R. JAILLET, Cst.

Sgd: Angus LEGERE

RE: - OBJET: Neil GALLIFORD (DOB: 70 May 28) Sighting of U.F.O. 80.10.03 Prince George, B. C.			File / Dossier (4712-5) Encl. / P. / <i>W</i> Off. / Tr. / <i>L. Cardinal</i> Invest. / Enq. / <i>WH 51</i> Other / Aut. / Done / Fait /

1. 80.10.03, 2120 hours, captionally-noted attended at office with his mother, Mrs. Anne GALLIFORD. The sighting occurred in an alley off Alward St. near 15th Ave., Prince George, B. C. The time of the sighting was approximately 2040 hours, under clear skies, after sundown. The temperature was around 17° C. according to the radio station (C.J.C.I.).

2. According to the captionally-noted, the entire sighting lasted only 5 to 7 seconds. The object appeared to be approximately 10' x 12' by 5' in size (see attached diagram for shape). The object had a steady glow, bright red in colour. The captionally-noted was quite emphatic in pointing out that it did NOT pulsate. A soft humming sound was emitted from the object, not loud enough to be heard other than within close proximity. The object travelled from west to east and stopped approximately 25 feet above the ground about 50 feet from the captionally-noted. It then hovered for about three of four seconds and took off easterly and disappeared up out of sight within two seconds. During the hovering, the object appeared to circle the ground just above a tree. The captionally-noted used the tree as a reference to gauge height and size of the object.

3. Taking the age of the captionally-noted into account, it was decided to interview the boy's mother as well. According to her, the boy has never been one to tell stories. He is an intelligent, mature boy for his age, and he seems to know a fair bit about aircraft as he wishes to join the Air Force when he is older. The mother states that when her son came home, he was white in the face a really trembling. As the boy ran into the house, he was in such a rush that he slammed the front door so hard that he smashed the light on the outside of the house. At that time the boy was just terrified according to the mother. She could not get him to go back outside for fear that it might still be out there. She had to coax him to come to the Police Office.

4. During the sighting the boy could feel warmth on his face and hands, these being the only exposed areas of skin due to the clothing he was wearing. There was no flame or smoke being emitted as there should be if there was any exhaust. It should be noted that the feeling is that the boy probably did see something, but exactly what is unknown.

2.

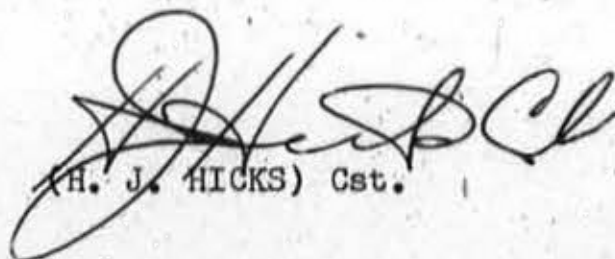

5. C.F.S. Baldy Hughes was contacted at 2300 hours, and the sighting was reported to M/Cpl. SCHNEIDER.

6. 80.10.03, 2300 hours - a preliminary examination of the scene of the supposed sighting was made by Cst. I. J. HISCOCK of our office. He attended with the complainant to the scene, where he was shown the position of the object and the tree that it hovered over. During the time of the examination, there was no visible evidence of the sighting that the member was able to detect.

7. The story given to Cst. HISCOCK was the same as that which was related to the members in the police office earlier in the evening.

RE:
OBJET:

KREUTZ, Edward (B: 11 Jul 62) - Sighting of Unidentified Flying Object - Davin District, Saskatchewan - 80 OCT 18

80 OCT 18

1. The following is submitted in accordance with Op. Man. IV. 2.1.G.1.B.2. and in reference of CPIC message of 18 OCT 80 20:59/45.

2. At 1829 hrs this date the writer was contacted by Ed KREUTZ, 318 Argyle St, Regina, Sask., Phone 543-0961. KREUTZ was enquiring as to who he should report the sighting of a UFO. Further information gathered revealed that early AM this date approximately 5:45 hrs he was driving east on 48 Hwy near Davin, Sask. At the time his brother Andy KREUTZ Age 20 was also with him. At approximately 4 miles east of Davin, Sask., they both noticed an object slightly north of Highway 48. At the time the object in question appeared to be at a height about one thousand feet. As they kept driving towards this object described as circular in shape and with flat bottom, same observed losing height stopped and appeared to become stationary approximately 200 - 300 feet. Ed KREUTZ estimated that diameter of object at that height was around 25 feet. Ed KREUTZ and his brother kept driving and at one time the object was observed directly above their vehicle. Ed KREUTZ further stated there was no sound or static on their radio and that their vehicle kept functioning in a normal manner as they went along. Time of observation was around 15 minutes upon which the object took a southbound direction. Weather conditions at the time was clear, visibility was good and temperature cold.

3. Enquiries made in the Regina Detachment Complaint Book showed no report of any such happenings. Regina Telecommunication Centre contacted and advised that they had not received any calls of this nature. Lastly I contacted the Regina Air Traffic Controller who advised they did not have any report of UFO on their log. Enquiries are continuing in this matter and Ed KREUTZ and his brother will be met at a later date and statements obtained. Telex was also sent to the National Research Council in Ottawa via Regina Telecoms.

80 OCT 19

4. I contacted Ed KREUTZ (B: 62 Jul 11) at his residence at 318 Argyle St N, Regina, Sask. Ed KREUTZ interviewed by writer and statement obtained and is included in this file for perusal. The original report made to Regina Detachment day before was basically confirmed and the interview first started by having Ed KREUTZ sketch what he saw that morning. This drawing is also included to report being forwarded to the National Research Council. The drawing is also divided into two parts which first shows what they first saw initially and bottom part what each saw when they got closer.

KREUTZ, Edward (B: 11 Jul 62) - Sighting of Unidentified Flying Object

5. Further to the original description of the object given to the writer Ed KREUTZ reported that the object had blue lights on the left side and red lights on the right side. There was also mention a search light that was activated once their vehicle passed by the object. Edward isn't sure however, if the beam had hit the car. Edward lost sight of the object for a short time however, the next time the object was seen it had gone across the road to the south side. Although they didn't stop at all during the incident on account of being quite scared, Ed feels that the object was stationary at the time. Mention was also made to Edward about his AM radio being turned on, which it was, and Ed advised there was no static or interference on the radio and that furthermore vehicle did not experience mechanical failure of any sort.

6. Ed further stated that a McGavin's truck was following them a short way behind approximately $\frac{1}{4}$ to $\frac{1}{2}$ mile. He explained that they had passed this vehicle earlier and Edward is quite certain that the search light came on between the two vehicles. Therefore, an attempt is to be made to locate the McGavin's truck driver at a later time and obtain statement from same. Edward also stated that the whole sighting lasted about 15 minutes.

7. In talking with Edward my impressions were that he was still scared or impressed with this incident. He also told me he was quite skeptical about these phenomena and that of this date was a believer. He appeared to be a serious kid clean cut and mature for his age and undoubtedly previously mentioned was quite scared about the incident.

8. Local indices check made on subject to the Regina City Police and Criminal Records file - all indices checked were negative.

9. Andy KREUTZ was unavailable for interview at the time and therefore a patrol was made to the Flight Service Station at the Regina Airport. Flight Service Station is the only office open at Regina Airport between 1200 midnight 0700 hrs local time. The Station Manager made available to the writer all the flight plans for 80 Oct 18. All examined by writer with negative results as to any aircraft in the Regina area being in the Davin District at that particular time. These flight plans include military flights however, none appear to be around at that particular location at that time. It should also be noted that the Terminal Area Centre and their radar services are not open between 12 midnight and 0700 hrs in the morning, and their services are being monitored by Winnipeg Centre. It also should be noted that there is no radar coverage assumed by Winnipeg Centre over Regina and that their range goes only as far as Brandon, Man.

10. Although the Regina Centre and Radar were closed at the time, a check was nonetheless made with the Supervisor of Air Traffic Control in Regina, Sask. It is believed an occurrence of this nature would have been reported to this services, however,

RE - OBJET

PAGE

- 3. -

KREUTZ, Edward (B: 11 Jul 62) - Sighting of Unidentified Flying Object

10. (continued)

HOWEVER, enquiries made with the supervisor on shift revealed no report of the sort. A check was also made with the supervisor with the Terminal Centre immediately south of Regina Centre to wit: Salt Lake City and the supervisor at this location advised that there was no report of an occurrence of this nature. Reason of the check was that object was last seen heading south at the time.

11. In the later part of the day I was able to meet Andy KREUTZ (B: 20 Oct 60) 318 Argyle St N, Regina, Sask. Statement was obtained as well from Andy and is included with file for perusal. Again Andy basically corroborated the statement made by Edward and being the driver of the vehicle at the time was able to give a better drawing than his brother. The drawing is also included with Andy's statement and will be forwarded to the National Research Council as well. The drawing in question is definitely of a circular object. Andy also stated that the object was approximately 300 feet high and that he had quite a good sight on the object and that the weather conditions were excellent. Andy also gave the same description of the object being blue light left red light on the right and a red flashing light in the centre. Andy was also able to see that when the red flashing light in the centre was turned off a search light came off it from exactly the same location. The light source was protruding from the bottom may be a foot and was also a foot in diameter. Andy mentioned also that AM radio of their vehicle had no static interference and that the engine was working normally. There was no noise heard from the object. Andy confirmed as well the part of overpassing McGavin's truck and saw the light beam of the object between the vehicles. Andy feels that whoever was driving that truck would have seen the object. Andy described the object going across the highway as being of quite a fast move. Dead start to dead stop, not in a jump as such but without acceleration. Total time of sight was estimated as 15 minutes and Andy also added that the blue light on the left side appeared to be beeping out of the object and was rather pale in comparison to the red light on the other side. It may be also mentioned that the search light did not hit their car but was going up and down the highway.

12. Local indices check was made on the subject as well to the Regina City Police and record indicates that subject has no criminal record.

13. A check was also made with Cst. LEFEBVRE of Montmartre Detachment, which detachment is in charge of covering the area of Vibank, Sask. Cst. LEFEBVRE advises no report of UFO's from their point. It also appears that McGAVIN's Company has a regular run going through Vibank and Montmartre and Cst. LEFEBVRE made some attempts to locate the driver of this vehicle however, subsequent check revealed negative results and an attempt is to be made by the writer to contact him in Regina for further information.

KREUTZ, Edward (B: 11 Jul 62) - Sighting of
Unidentified Flying Object

-4-

80 OCT 20

14. This date the writer contacted the McGavin's Company, Albert St, Regina, Sask., 543-9655 and talked to the Fleet Manager, Mr. CRADDOCK. Information gathered revealed that Gordon MacKENZIE of 867 Morris Cres, Regina, Sask., Phone 949-6182 was working at the time and would be the driver which was making the run on No. #48 Hwy. Mr. MacKENZIE was contacted by the writer and an interview was made on 80 Oct 22 at his residence in Regina, Sask. A statement was obtained from Mr. MacKENZIE and is included in this file for reference. Unfortunately MacKENZIE mentions not seeing anything unusual on his run and when further advised that the enquiry was about an unidentified flying object, he advised that again that he had not seen anything. My conversation with Mr. MacKENZIE revealed that he was a believer in UFO and I feel that should he have seen an object of this nature on No. 48 Hwy he would have mentioned same to the writer. All the three witnesses regarding this matter have been contacted and written statements obtained from same. All avenues have been explored by this detachment and this report is now being forwarded to Ottawa c/o National Research Council for their information, and whatever action deemed appropriate. This matter is now concluded to this point.

Statement of Andy KREUTZ (B: 20 OCT 60)- 318 Argyle
Street N, Regina, Sask

Saturday morning 80 Oct 18 at around 5:40 A.M. I was with my brother Ed and I was driving my car eastbound near Davin, Sask. We were east of Davin around 2 miles. At the time in the distance about 2 miles to the east and just off the highway to the north, I noticed what appeared to be a TV Tower or an aeroplane. It was a red flashing from the time we seen it. We kept approaching and I ruled out the possibility of an aircraft as I was catching up to it. Then we got just about right beside it and I noticed the lights the blue one on the left and red on the right area the red one in the middle was still flashing. It was off to my left 200 ft about and at most 200 - 300 ft in the air. Then when we had just come beside it and a little bit back the object sort of kept up with us and the red flashing light in the middle stopped flashing and the white search light came on from the exact same spot. I was seeing the object from the bottom side in an angle. The object was circular in shape 25 - 30 feet in diameter in the area where the light from was protruding may be a foot and was around a foot to 18" in diameter. When this search light came on, it traced behind my vehicle then to the left on the highway up and down. It didn't stop at all on any particular object, no noise from the object was heard. The AM radio was on and seemed to be working all right. There was a vehicle that we had previously passed, it was a McGavin's truck 2 - 3 tonnes. He stopped in Vibank later on. He didn't stop for that object, seemed to stop but kept up with us later on. When the search light was on it was between the 2 vehicles. The object kept beside us, just off to the left for about 1/8 of a mile, after that it switched off the search light turned on the red flashing and crossed over to the south side of the highway. It took it about 3 seconds to go across the highway. He wasn't a real jump, but it wasn't gradual either. It was a steady move. After that I could no longer see it as it was in the blind spot of the car. Weather conditions was clear at the time, cold and no wind. It was still dark. The object was standing out in the dark from the moon. There was no markings as such but the blue light seemed to be beeking us by contrast to the other side light and was not as bright as the other light almost pale. Search light didn't hit the car at any time. Duration of the sight from when we first saw it was about 15 minutes. After we got passed Vibank traffic got a big heavier. Straight ahead to the east exactly was a star very bright exactly over the road. Thats about it.

Sgd: Andy KREUTZ.

Cst. R. Gagnon

Statement of Gordon A. MacKENZIE (B: 31 Oct 45)
867 Morris Cres, Regina, Sask. Ph 949-6182

On Saturday morning 80 Oct 18, at around 5:30 A.M. I was working my run on #48 Hwy. I was driving a McGavin's Truck and was proceeding eastbound on 48 Highway. When I first got on #48 highway., from #1 Highway, I was passed by a car. This car went up ahead about 1/2 mile and I kept sight with that car all the way to Vibank, Sask. The weather was clear, there was no fog. I didn't meet any traffic on the way to Vibank on #48 Highway. I didn't see anything usually different on the road or in the air that morning.

Sgd: R. Gagnon,
Regina Detachment.

Sgd: Gordon A. MacKenzie.

Statement of Edward KREUTZ (B: 11 Jul 62) 318
Argyle North, Regina, Saskatchewan

On Saturday morning at around 5:45 A.M. I was with my brother Andy KREUTZ in his car driving eastbound on #48 Hwy about 4 miles out of Davin, around midway to Vibank, Sask.

Andy was driving at the time and at first I noticed it and jokingly I said look at the UFO and as we approached it we had thought it was an aeroplane, but we kept getting closer and closer to it. Andy asked me if there was a TV Tower there and I told him that there wasn't. Once we got about 300 feet away, we noticed the two other lights on the side blue on the left, red on the right with the red flashing light in the centre. Once we had appeared to cross its path, the search light came on. I saw the light come on but I am not sure if it hit the car. Around that time I lost it because of the visibility of the window. Then I noticed it after it passed along the car through the back window. At that time it was definitely on the other side of the road the south side. When I noticed it it appeared to be stationary. We never stopped the vehicle we were too scared. From what I saw it was dark, it was hard to say because of the flashing light. It was a bright red and a constant light flashing. The two on the side were constant on and the middle one flashing. Weather conditions were clear, cool and dark. Could see the stars still. Shape of the object was round, with oval top. The lights seemed to be on an arc pattern so I presume it was round.

We had the radio on at the time there was no static interference and the car engine kept functioning without problem. As we crossed the path of this object, I would estimate it was 200 - 300 ft off the road on the north side and 200 - 300 ft. high.

There was only one other vehicle around there at the time. A McGavin's truck travelling same direction behind us about 1/4 to 1/2 mile. We had passed it earlier. We lost the truck around Vibank, so I think he might have turned into Vibank, Sask. Nobody else that I noticed neither Andy or I had been drinking. I don't drink. The whole incident was frightening and scarey. I didn't report right away. Didn't know what to do, went home and talked to Mom, and Dad and said we should talk to you. I was skeptical before but now I do believe.

Sgd: Edward KREUTZ.

RE: SIGHTING OF UNIDENTIFIED FLYING OBJECT

COMPLAINT RECIEVED AT 1829 HRS CENTRAL TIME FROM REGINA
RESIDENT REPORTING UFO SIGHTED APPROXIMATLY 12-15 MILES SOUTHEAST
OF REGINA NEAR DAVIN, SASK. TIME OF SIGHTING WAS 0645 HRS
80 OCT 18 SKY CONDITION CLEAR AND COLD. OBSERVERS WAS ED KREUTZ
AGE:18 AND BROTHER ANDY AGE:20 BOTH OF REGINA SASK. OBSERVER
LOCATED AT THE TIME ON HIGHWAY NO. 48 NEAR DAVIN, DRIVING
EASTBOUND, OBJECT DESCRIBED AS CIRCULAR IN SHAPE, FLAT BOTTOM.
BLUE FLASHING LIGHT ON LEFT SIDE AND RED FLAHSING LIGHT ON RIGHT SIDE
OF OBJECT. WHEN FIRST OBSERVED, OBJECT WAS SLIGHTLY ON NORTH
SKDE OF MGHWAY AT A HEIGHT ESTIMATED OF 200-300 FEET.
DIAMETER ESTIMATED AT 25 FEET. DURATION OF OBSERVATION WAS 15
MINUTES UPON WHICH OBJECT QUICKLY LEFT THE AREA HEADING SOUTH-
BOUND.

INVESTIGATION TO FOLLOW IN THIS MATTER. FURTHER CORRESPONDANCE
TO BE FORWARDED DIRECT TO C.R.S. OTTAWA UPON COMPLETION OF
INVESTIGATION.

RE - OBJET: Bob & Diane WALKER - Compl. of UFO sighting
Smithers, B.C. 80-10-21
SMITHERS DETACHMENT CASE (UNORG)

N 80/164

1. On the 21st of October, 1980 Mr. Bob WALKER contacted the Terrace Telecom Centre at approx. 2145 hrs. advising that he and his wife plus another witness had just seen a UFO and wished to speak to a member.
2. On this same date, the 21st of October, at approx. 2147 hrs. I attended at the complainant's residence at 3667 First Ave. where I met with Mr. & Mrs. WALKER at the rear door to their house.
3. The complainant advised me that he had ordered a taxi to attend his residence to pick him up to take him to a class that he was teaching at a local school. Mr. WALKER advised me that Rita DAVID, the taxi driver, came around to his house to pick him up and upon getting into the car with her Mrs. DAVID directed Mr. WALKER's attention to a bright light which was hovering or flying over the ridge area directly to the south of town. This ridge is a ridge that is presently under construction of the new ski lift for the ski hill area. Mr. WALKER said that when he got into the car and she pointed it out to him, he noticed that the light was a circular shape and a stronger light than what is normally seen as a street light or even a star or a satellite. He advised that the bright light was moving in a very erratic pattern over the ridge and along the ridge towards Hudson Bay Mountain. He further stated that he and Rita watched the object for approx. 5 minutes or so before he got out of the car and went back into the house to inform his wife of the sighting. He then said that he went back out and the light object had gone down in behind the ridge closest to the mountain and when it had, he told his wife Diane to watch the area as she might see it. Mr. WALKER then informed me that he departed in the taxi to the school without seeing the object again.
4. Diane WALKER advised me that she watched for this object that her husband had seen and approx. 2 minutes later it appeared again at about the same location that he had pointed out to her. She informed me that the object was circular in shape with a bright flashing white light and a bright pink glow around the sphere. She further advised that she watched this brightly lit object for approx. 30-45 minutes and during that time it moved back and forth along the mountain and ridge area at a very fast rate of speed. She then stated that the sphere hovered over the mountaintop and moved back and forth in a pattern using the mountaintop as a sort of central point. Mrs. WALKER then informed me that the sphere came in towards town at one point at a very fast rate of speed and then moved back again over the mountaintop. Mrs. WALKER then said that the sphere again came in towards town at a much faster rate of speed and closer in towards town than it did the first time. She then advised that she went into the house to do something and when she checked on the object again it had gone. Diane WALKER informed me that this incident had taken place between the hours of 1930 and 2030 on this date.

RE - OBJET

PAGE

2

Bob & Diane WALKER - Compl. of UFO Sighting
 Smithers, B.C. 80-10-21
 SMITHERS DETACHMENT CASE (UNORG)

5. I then asked Mr. WALKER why he failed to report this incident at the time it was happening. He advised me that he didn't report it because he felt that no one would believe either him or Rita DAVID. He stated that he observed this object at approx. 1930 hrs. and also described it as a sphere with a pinkish glow around it.

6. On attendance at the complainant's residence and meeting with both persons, I felt that the complainant's wife was rather excited about the incident and about sighting this object that she had seen. He appeared to me to be very calm and very collected about the whole incident. Both persons appeared to me to be sober and none had any odour of alcohol on their breath whatsoever.

7. Description of Sighting:

Shape:	Circular when stationary, inverted dishlike shape when moving.
Colour:	Bright white light on the lower half of the sphere when stationary. Sphere also had a bright pink glow around it and seemed to light up the mountain area with this pinkish glow due to a light snow covering on the mountain.
Altitude:	Approx. 5 - 6500 feet.
Movement:	Rapid, traversing type of movement, faster than a plane or helicopter.
Number of Objects:	One.

8. From the point that the complainant and his wife had made the sighting, I could see clearly the entire mountain area and also the trees along the ridge above town. The sky was very clear with the moon casting a light down on the snow of the ridge and also the mountain area. The air was cool, to the point that frost was forming on the cars. None of the street lights in the area of the complainant's house obstruct the view of the mountain.

9. I then made my attendance to the Rita DAVID residence on King Street and Third Ave. where I had intended to speak with Rita herself. She was, however, not home and I was therefore given a phone number to call at which I could speak to her. This number was called and I spoke to Rita. She confirmed the sighting of a brightly lit object and also that she had made the first sighting of it. When Mr. WALKER came out to the car she informed him of this sighting also and directed his attention to it where they both watched it for approx. 5 minutes. When speaking with Mrs. DAVID on the phone, she sounded to me at that time to be sober and completely believable.

RE—OBJET

PAGE 3

Bob & Diane WALKER - Compl. of UFO Sighting
Smithers, B.C. 80-10-21
SMITHERS DETACHMENT CASE (UNORG)

10. At approx. 2250 hrs. on this same date, the 21st of October, I attended to the Smithers Airport where I spoke to the terminal dispatcher, Bruce BOBICK, who was the controller for the airport that evening. He advised that the last plane out of the area and around the Smithers area was just prior to 1900 hrs. He further advised me that they did not have any radar type of tracking or monitoring device with which they could observe incoming and outgoing planes. Mr. BOBICK also advised me at that time that the nearest tracking facility was near COMOX or Prince George at the Armed Forces Bases.

11. I then returned to the Detachment where I called down to Comox to the Comox Armed Forces Base at 339-2211 and spoke to a female person down there. This person then put my line over to another line on the Base which handles such calls as this sighting. The female person at this part of the Base took down some of the details of the sighting, she did not, however, advise whether anybody would be getting in touch with this office as to confirming any sort of sighting.

12. A complete CPIC message has been forwarded to Prince Rupert Sub/Div and also to the CO "E" Div., Dist. 2 advising of the sighting and of some of the details of the complaint.

13. It is my finding in this matter that the complainant's are both believable, but it is not known for sure what exactly they had seen on this particular date. On the ridge area where the complainant's had seen this flying type of object, there is a new development of some sort going up there in which the ski hill is putting up a ski lift to the other side of the ridge. There is a road up there, but there are trees along this road which would cover the light of any sort of vehicle which might be driving along it. Both complainant's stated that this object was not coming from within the tree area or on the mountain itself, but flying above the ridge and also the three peaks of the Hudson Bay Mountain. On Hudson Bay Mountain itself there are four peaks, three of which are much higher than the fourth. Mrs. WALKER had advised me at the time that this object was flying above the mountaintop above the highest peak of the three of the four peaks. She stated also that it seemed to use the top of the mountain as a central point at which it would traverse out and then back in, out again in the opposite direction and back to the central point, then out again and continued like this for a period of 30-45 minutes. Both Mr. & Mrs. WALKER and also Rita DAVID stated that this object was a brightly lit type of sphere or dishlike object which was moving very rapidly, faster than a normal plane would travel. Findings at the airport have stated that no helicopters or planes were flying in the general vicinity at the time this sighting was made.

14. As there is nothing further that can be done on this particular complaint, no further action will be taken until such time as correspondence is received to re-open the file.

FIREBALL / SATELITE SIGHTING

- AT 0258Z I WAS IN REGINA TOWER AND OBSERVED A SERIES (APPROX 3 OR 4) WHITE LIGHTS MOVING AT MODERATE SPEED IN A FLAT TRAJECTORY ACROSS THE HORIZON. FIRST SIGHTED BEARING 280° MAGNETIC FROM TOWER AND TERMINATED ABOUT 30 SECONDS LATER BEARING APPROX 300° MAGNETIC. HEIGHT ABOVE HORIZON 15 TO 20° .
- AT THE SAME TIME THREE HIGH ALTITUDE OVERFLIGHTS REPORTED SEEING THE LIGHTS. ONE FLIGHT STATED THE DIRECTION OF MOVEMENT APPEARED TO BE SW TO NE OR SOUTHWEST TO NORTH AND SEEING WHITE LIGHTS BREAKING UP INTO SMALLER LIGHTS AND DEVELOPING RED TAILS

F42211 RE U F O SIGHTINGS

FOLLOWING RECEIVED FROM SHIFT CURRENT CITY DET QUOTE

I, CST M PAGE WAS BY THE T V ANTENNAS ON THE SOUTH SIDE OF THE CITY AT AROUND 2100 HRS. WHEN I OBSERVED TWO LIGHTS COMING FROM THE WEST. THEY WERE BOTH BRIGHT, ONE WAS ON TOP OF THE OTHER. THEY WERE BOTH EAST BOUND WHEN I SAW THEM THEN THEIR COURSE GRADUALLY TURNED NORTHEAST. THEY WERE BOTH PARALLEL TO EACH OTHER. THE TOP ONE WAS SLIGHTLY IN FRONT OF THE BOTTOM ONE. THEY BOTH LEFT A TRAIL OF LIGHT AND SPARKLES WHICH APPEARED TO ME TO BE METEORS AT THE TIME. THEN THEY STARTED TO DISINTEGRATE GRADUALLY. THEN THEY WERE GONE. CST TODD AND CST MCCULLOCH, BOTH OF THE CITY DET SAW THE LIGHTS WHEN I CONTACTED THEM ON THE RADIO. THE SKY WAS CLEAR AT THE MOMENT.

AT 2135 WAS A RON AILSBY OF THE CANADIAN ARMED FORCES RESERVES (MAJOR) CAME INTO OUR CITY OFFICE AND REPORTED THE SAME SIGHTING. AILSBY WAS 6 MILES EAST OF RUSH LAKE ON HWY NBR 1 AT THE TIME OF THE SIGHTINGS. AILSBY SAW IT AT A 25 DEGREE ANGLE AND WAS LEVEL WITH THE HORIZON. AILSBY THOUGHT AT FIRST THAT IT WAS AN AIRPLANE CRASHING BEING A PILOT HIMSELF. THEN HE FIGURED THAT IT MIGHT BE A SATELLITE BECAUSE OF THE BRIGHT ORANGE YELLOWISH COLOR. AILSBY CAN BE REACHED AT THE FOLLOWING PHONE NUMBERS: REGINA 584-8567 AND WYMARK 627-3490.

THESE SIGHTINGS WERE SEEN AT 2100 HOURS NOVEMBER 04 1980, CENTRAL STANDARD TIME. THE DURATION OF THE OBSERVATION WAS BETWEEN ONE AND ONE HALF MINUTE. MANY OTHER PEOPLE OF THE CITY SAW THE HAPPENING UNQUOTE

A. 05 NOV 80, 0255Z OR 0300Z. REPORTED THROUGH BASE OPERATOR APPROX 8

B. VERY CLEAR SOME FERTHERY CHINOOK CLOUDS A MILES OR SO TO THE EAST

C. MR ARTHUR EDWARD BRIGGS, GENERAL DELIVERY, MILLARVILLE, ALTA,

PHONE 931-2581. BUSINESS BRIGGS FURRIERS, CALGARY, PHONE 249-7781.

D. MILLARVILLE, ALTA. 28 MILES SW OF CALGARY, BETWEEN PRIDDIS AND
TURNER VALLEY ON HWY 22

E. TIMMY ADAMS 18 YEARS OLD SON OF TOM ADAMS OF PRIDDIS, ALTA,
PHONE 931-2141. SIGHTED NEAR HOME. APPROX 7 MILES NORTH AND 2 MILES

WEST OF THE BRIGGS HOME. APPROX 2 MILES SW OF PRIDDIS

F. A SMALL LIGHT AND A LARGER LIGHT, CONSIDERED TO BE 2 CRAFTS,

VERY LUMINOUS AROUND THE EDGES. THE LARGER ONE LEFT A DISTINCTIVE

TREMENDOUS SPARKLY TRAIL AS IT PASSED FROM THE SSW TO THE NE PARALLEL

TO THE GROUND. PASSED TO THE SOUTH OF MR BRIGGS ON WHAT APPEARED TO

THE SAME FLIGHT PATH AS AIRLINES GOING INTO CALGARY FROM THE SW,

POSSIBLY A MILE SE OF THE HOUSE WITH 1 MILE ALTITUDE. WERE EXTREMELY

FAST, BUT GAVE NO SOUND AT ALL. MR BRIGGS STATED HIS HORSES WERE NOT

AFFECTED AT ALL. NO DISCERNABLE SHAPE. A FEW SECONDS LATER NOTICED A

DIMMER LIGHT HIGHER AND MUCH FARTHER SOUTH GOING FROM EAST TO WEST

G. 5 SECONDS, POSSIBLY A LITTLE LONGER

H. COULD NOT CONTACT TIMMY ADAMS BUT HIS FATHER CONFIRMED 2 LIGHTS

FROM SW TO NE, VERY FAST. THE LARGER ONE WITH A BRIGHT ORANGE FIRE

LIKE TRAIL. SON SAID THAT HE THOUGHT IT WAS QUITE CLOSE. FATHER

MENTIONED HIS SON WAS VISIBLY SHAKEN BY THE INCIDENT

RE - OBJET:

Carol DIXON
Possible U.F.O. Sighting on 80NOV08
Toronto, Ontario

1. In reference to the CPIC message sent to you 80NOV08 from "O" Division R.C.M.P. Toronto.
2. Enquiries were made with various agencies to ascertain the possible origin of the U.F.O. It was found that this aircraft was in fact the Toronto Sun advertising airplane.
3. Further contact was made with the complainant. It was found that they have since realized that what they saw was indeed the aircraft used by the Toronto Sun for advertising. Since the date of the first report, 80NOV08, they have seen the aircraft on several occasions.

Re: Mark Robert MOSE, Norman Allan PERRY, Mrs. Shirley MURPHY,
Dr. Linda Ann WITHAM. - Sighting of Unidentified Flying
Objects - Elnora, Alberta 80NOV25

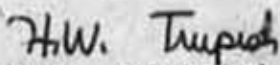

At approximately 8:40 p.m. on November 25, 1980 Mark Robert MOSE of Elnora, Alberta called our office to report that he had spotted an unidentified flying object earlier that evening just north of Elnora, Alberta. On November 26, 1980 a Shirley MURPHY of Elnora, Alberta called our office to report that she and two others had spotted an unidentified flying object just east of Elnora at 6:20 p.m. on November 25, 1980. Norman Allan PERRY of Elnora also reported the sighting of an unidentified flying object southeast of Elnora on November 25, 1980. On December 2, 1980 a Dr. Linda Ann WITHAM of Elnora reported to our office that she had observed a unidentified flying object on November 25, 1980.

The different sightings occurred at approximately the same time and are all from the same general area. The four sightings roughly coincide with each other as to the description and direction of the object. All four parties had contact with each other prior to me obtaining their statements. The people that reported the sighting seemed sincere and gave me no reason to question their reliability. There was a meteor shower confirmed by Canadian Forces Base at Penhold as occurring at 6:00 p.m. on November 25, 1980, however all four parties maintain that what they saw was not a meteor.

The attached statements are those of the people who made the sightings.

Statement of Mark Robert MOSE, Box 652, Elnora, Alberta
D.O.B.: 06SEP63 Occupation: Cat Skinner Ph.#:773-2243

Commenced: 2032 hrs.

N 80/191 A

"I was walking my caterpillar tractor back from Elnora to Secondary Road 590, it was around 6:15 p.m., something caught the corner of me eye, it looked like it was a meteor when I first saw it. It had a long streaking tail on it. As it came closer I saw it was not a meteor because of the individual lights on it. As it came closer it slowed down and I could see that the colour of the lights, it had four amber lights on the side. It had a square light around 20 by 30 feet on the back side of the round shaped object. It sort of turned on its side so that I could see the shape of the object. It was round shaped, like a dish, 30 to 40 feet thick. It was 200 to 300 yards long and wide. It was perfectly circular. As it slowly started moving away I pulled my caterpillar tractor up a bit so I could get a better look at it before it went over the trees. It speeded up real quick and kind of left a trail behind it. I watched it as it was going west until I could not see it anymore. I'm not sure what the color of the object was as the lights were very shiny. They were definitely artificial lights."

Q: What is the date and time of your sighting?

A: Around 6:15 p.m. on November 25, 1980.

Q: What was the condition of the sky?

A: The sky was clear.

Q: How close was the object to you?

A: Within a 1/4 mile.

Q: Was the sky totally dark?

A: It was not totally dark, there was some light in the west.

Q: What was the altitude of the object when you saw it?

A: About 2,000 feet.

Q: What was the duration of the sighting?

A: About a minute and a half.

Q: Was there any odor or noise from the object?

A: Not that I could smell or hear, I had my cat running.

Q: Did you feel any heat from the object?

A: No.

Q: Had you taken any alcohol or drugs on November 25, 1980?

A: No.

Q: What kind of lights were on the object?

A: They looked like they were in behind a pane of glass, square in shape.

Q: Is there anything you would like to add to this?

A: No.

... page 2

Q: What colour was the tail on the object?

A: It was an orange reddish glow streaking out from the back of the object.

Q: From what direction did the object come?

A: It came from a northeasterly direction, it came down very fast. It appeared to come from the stars.

Q: What speed do you think it was travelling?

A: Faster than anything I had seen before.

Terminated: 2100 hrs.

Taken on 80NOV26 at Mark MOSE's residence.

Commenced: 2105 hrs.

✓ 80/191B

"Around 6:00 p.m. on November 25, 1980 I was getting out of my truck and I happened to glance to the northeast sky and I saw what looked like a falling star. As it got closer it looked like high power landing lights from a plane. I saw red, amber, blue and orange lights in a row. All the lights had tails on them. The tails were more or less a white color. I never noticed the shape or size of the object. The string of lights would have been 4 or 5 times the length of a regular sized plane. It made a sound like that made from spinning a top on the floor. It was not really a hum. It was above a hum. It was around 3 or 4,000 feet above the ground. The object headed off in a westerly direction."

Q: What was the condition of the sky?

A: The sky was clear.

Q: What was your location at the time of the sighting?

A: I was southeast of section 3, township 35, range 22. I was 6 miles east and a mile and a half south of Elnora. The object was a mile and a half to two miles north of me.

Q: How fast was the object moving?

A: Around 300 miles per hour, maybe under 300 miles per hour.

Q: How many objects were there?

A: I'm not sure there was one object.

Q: How long did you observe this object?

A: Over a half a minute, maybe a minute.

Q: Did you detect any smell or heat from the object?

A: No.

Q: Had you taken any drugs or alcohol on November 25, 1980?

A: No.

Terminated: 2126 hrs.

Q: Was the sky totally dark:

A: The sky was 80-90% dark, there was a light glow in the west.

Statement of Shirley MURPHY, Box 581, Elnora, Alberta
Ph. # 773-2385.

N90/191C

"On Tuesday 25NOV80 at about 6:20 p.m. I observed an object sending a light beam down from the sky. At that time there was only one light. The object lowered along side the road and observed a large light in the centre and a smaller light directly below that one. Smaller lights were around the outside edge which sent out single direct beams of light. The object was approximately 60' in length.

It raised and angled in a north westerly direction, but more west. When it raised to leave the small lights seemed to fade until there was only the one light again.

We were driving from Innisfail to Elnora. We rolled the car window down but we didn't hear anything above the engine noise.

None of the lights were flashing, they stayed on constantly. Faye CAMPBELL (773-2479) and Helen BOICE (773-2307) were with me at the time."

N 80/191D

Statement of Dr. Linda Ann WITHAM, Box 160 Trochu, Alberta. Occupation -
Physician - D.O.B. 09FEB53, Ph. 773-3957

Nov. 25th, 80: I was travelling N. on Highway #21 just N. of Huxley (region of the buffalo jump turnoff) @ approx. 6:00 p.m. or just after (no later than 6:15 p.m.) when I saw a low flying light (blue-white) of considerable intensity, clearly visible through window screen travelling in a W to E direction at a fast speed (faster than I have seen low planes flying before), but slower than jets about to land.

Estimate height from ground @ 200' (but I'm no good at heights). As I watched the light I noted 2 laterally placed white lights of less brightness at a fixed distance from the central one with the impression of a band of light joining the 3 (as if there was a base which was reflecting light upwards). Apart from this I have no idea of shape of any object. The light was clear but very dark. The 3 lights moved across the sky as if one object and went quite westerly from my car. I saw the central light flash, rapidly with the disappearance of the lateral 2 lights.

Beyond this I saw nothing further as I was proceeding N and I stopped looking to the west.

I didn't see anything "land."

I didn't hear any noise, no impression of heat or odour.

I estimate light to be 1/4 mile from my car.

Total time visible 2-3 min.

No previous sightings.

Never seen a meteor.

RE: - OBJET:

Nellie Marina SIMMS (DOB: 30 JUN 42)
Report of U.F.O. Sighting
Deer Lake, Newfoundland 80-11-21

N 80/198

- On 80-11-21 at 0029 hrs. a report was received to the effect that an unidentified flying object had been sighted at approximately 2345 hrs. on 80-11-20 in the detachment area.
- The sky was clear at the time and the local Aerradio facility described the cloud condition as 3,000 scattered and 10,000 broken with a fifteen mile visibility.
- The report of the sighting had been made by Nellie Marina SIMMS (B: 30 JUN 42) of 84 High Street, Deer Lake, Newfoundland. At the time she had been in a vehicle parked on 6th. Avenue, Deer Lake accompanied by three other Deer Lake residents. The other three passengers Sylvia Lydia GILES (B: 29 JUL 49) of 78 High Street, Priscille Ether DROVER (B: 24 MAR 48) of Airport Avenue, and Awilda Ellen McKay (B: 29 JUN 38) of 9 Sixth Avenue, also reported seeing the object. Statements attached.
- The witnesses described the object as a round ball about two to three feet in diameter. It was said to be bright red in color unlike fire and more glowing, similar to the brake lights of a car. The single object was said to appear to be a very heavy object falling from the sky on an angle from West to East. It was travelling very fast and came into their horizontal view from the vehicle. The duration of the sighting would be approximately two seconds and none of the witnesses heard any sound from the object. They were all in agreement that the object appeared as if it was going to collide with the peak of a house approximately 250 feet from their location.
- Cst. NASON and myself went to the scene of the sighting shortly after accompanied by the four witnesses. The area was thoroughly checked with nothing unusual found and no indications of an impact having occurred. A light covering of new snow made the investigation of the scene most accurate. From the position of the observers at the time of the sighting and the peak of the house which it appeared to strike the object would have struck the earth at some point directly south or possibly a little south southeast of #9 Sixth Avenue, Deer Lake. No other witnesses could be located.
- The witnesses appear to be reliable and it is my opinion that the object was likely a meteor which was actually larger and further away than the witnesses realized. The area where they thought it had landed is a residential area and had any object of any size landed it certainly would have been noted.

CONTINUED ON PAGE 2.....

Nellie Marina SIMMS

CONTINUED FROM PAGE 1.....

7. A check with the Aerradio office at the Deer Lake Airport failed to discover anything to aid this investigation. There were no other sightings reported nor were any air craft overdue or lost for this period.

8. No other sightings have been seen or reported since this occasion. It is felt, as outlined in paragraph 6, that it was likely a meteor.

CONCLUDED HERE:

Fwd: *P.M.M.* Sgt.
(P.M.M.)
i/c Deer Lake Det.

James D. Smith Cst.
(J.D. SMITH)#35412.
Deer Lake Detachment.

Statement of Sylvia Lydia GILES (DOB: 29 JUL 49)
of 78 High Street, Deer Lake, Newfoundland.

On a Thursday night in November I was at a meeting at the Salvation Army Church and left in a car with Priscilla DROVER, Welda McKAY, and Nellie SIMMS. We stopped on Sixth Avenue in front of Welda McKAY's house to let her off. We were sitting in the car talking. Talking about religion mostly. This would be after 11:00 PM probably between 11:30 PM and mid night. The car was parked facing South up the road. I was sitting in the back seat. I saw something come down out of the sky but it wasn't too high up when it came into my view. It was really travelling fast, and was coming down on sort of an angle or slant. It looked like a round ball. It didn't look like fire but a really bright light. It was a bright red or a pretty red, like brake lights on a car. It looked about the size of the moon sometimes when its just coming up over a hill, but right bright red. I didn't hear any noise. It looked like it was going to hit the corner of Mr. WALDRON's house. It disappeared behind the corner of the house. The whole thing only lasted about one second. I wasn't really scared but it really gave me a start. We left in the car and checked all around but we couldn't see anything.

WIT: J.D. SMITH, Cst.

SIGNED: Sylvia GILES

Statement of Priscilla Ether DROVER (DOB: 24 MAR 48)
of Airport Avenue, Deer Lake, Newfoundland.

On a Thursday night about two or three weeks ago I had been at a church meeting in Deer Lake. I left the church roughly around 11:30 PM and took Mrs. SIMMS, Mrs. GILES and Mrs. McKAY in my car with me. We drove down to Sixth Avenue in Deer Lake and parked in front of Mrs. McKAY's home. We were sitting there in the car talking. We were there long enough that I was low on gas and had to turn the car off. I was sitting in the driver's seat and Mrs. SIMMS was in front with me. We were there maybe half an hour, it was probably close to 12:00 PM and the windows were beginning to steam up. I turned on the defroster and looked at the windshield and I saw this think. You couldn't miss it. When I first saw it I said "Look at the car coming out of the sky". I don't know why I said that, it's stupid but I thought about it after and it looked like tail lights on a car that I have seen from one side of the car to the other with no break in between. The others didn't see it right away because when I mentioned "car" they looked straight ahead. The thing was coming so fast that they did see it in just a second and everyone was hollering and screaming something. From the way that it was coming down and the speed I thought there was going to be a big crash and that it was going to hit WALDRON's house. When it was almost on top of the house I ducked down behind the dash. I didn't hear any noise at all. After it disappeared we drove all around the area but we couldn't see anything anywhere. When I first saw the light it looked long. I'm sure it was longer than wide but it was going so fast its hard to say for sure. Just before it disappeared I thought for sure it was a helicopter or a small plane. It was round like a ball then and I thought it was the bubble on those small helicopters. Even the next day I was expecting to hear that there was a helicopter down. It came down on a sort of angle or slant from West to East. It was travelling as if it were something really heavy just falling out of the sky. It was coming as fast as it could come. It was a bright red like tail lights, not like fire. When it looked like it was going to hit WALDRON's house it looked almost as big as one of those bubbles on a helicopter.

WIT: J.D. SMITH, Cst.

SIGNED: Priscilla DROVER

Statement of Awilda Ellen McKAY (DOB: 29 JUN 38)
of 9 Sixth Avenue, Deer Lake, Newfoundland.

It was on a Thursday night about the last of November. I came from a church meeting and was sitting in front of my house on Sixth Avenue, in a car with Priscilla DROVER, Sylvia GILES, and Nelly SIMMS. At about 11:30 PM we saw this light come down out of the sky. It came down on a sort of a slant. It was a really bright red color and I thought it was about the size of a nice big pot. It was round and it seemed to me it was like a big glass ball and you could almost see on through it. It wasn't up very high when I first saw it. I thought that it had come down right by the corner of Mr. WALDRON's porch. He lives two houses up from me on Sixth Avenue. When I first saw the light I first saw a red color on my side window and I looked around to see if a car was backing out and that's when I saw the light. I didn't hear any noise, and after we checked all around and couldn't see anything where it looked like it came down.

of 84 High Street, Deer Lake, Newfoundland.

On a Thursday night the 21st. of November I was at meeting at the Salvation Army Church in Deer Lake. I left the church in a car driven by Priscilla DROVER and Sylvia GILES and Welda McKAY were other passengers. We parked in front of Welda McKAY's house on Sixth Avenue to put her off. The car was facing South and the four of us were sitting in the car talking for a bit. I caught a glimpse of something at the same time the others all spoke up and Priscilla ducked down behind the steering wheel. What I saw was a big round ball, it looked about as round as the top of a 45 gallon drum. It was red, bright red, very bright. I didn't hear any noise and it came down on an angle. It was travelling really really fast. What I saw only lasted for a split second. Priscilla thought sure that it had hit WALDRON's house. We checked all around and couldn't see anything. I couldn't get to sleep that night wondering about it and where it went and the next day I phoned up the open-line show on the radio to see if anybody else had seen it but no body phoned in.

RE - OBJET: Nellie Marina SIMS (DOB: 30 JUN 42)
Report of U.F.O. Sighting
Deer Lake, Newfoundland 80-11-21

- On 80-11-21 at 0029 hrs. a report was received to the effect that an unidentified flying object had been sighted at approximately 2345 hrs. on 80-11-20 in the detachment area.
- The sky was clear at the time and the local Aeradio facility described the cloud condition as 3,000 scattered and 10,000 broken with a fifteen mile visibility.
- The report of the sighting had been made by Nellie Marina SIMS (B: 30 JUN 42) of 84 High Street, Deer Lake, Newfoundland. At the time she had been in a vehicle parked on 6th. Avenue, Deer Lake accompanied by three other Deer Lake residents. The other three passengers Sylvia Lydia GILES (B: 29 JUL 49) of 78 High Street, Priscille Ether DROVER (B: 24 MAR 48) of Airport Avenue, and Aulda Ellen McKay (B: 29 JUN 38) of 9 Sixth Avenue, also reported seeing the object. Statements attached.
- The witnesses described the object as a round ball about two to three feet in diameter. It was said to be bright red in color unlike fire and more glowing, similar to the brake lights of a car. The single object was said to appear to be a very heavy object falling from the sky on an angle from West to East. It was travelling very fast and came into their horizontal view from the vehicle. The duration of the sighting would be approximately two seconds and none of the witnesses heard any sound from the object. They were all in agreement that the object appeared as if it was going to collide with the peak of a house approximately 250 feet from their location.
- Cst. NASOM and myself went to the scene of the sighting shortly after accompanied by the four witnesses. The area was thoroughly checked with nothing unusual found and no indications of an impact having occurred. A light covering of new snow made the investigation of the scene most accurate. From the position of the observers at the time of the sighting and the peak of the house which it appeared to strike the object would have struck the earth at some point directly south or possibly a little south southeast of #9 Sixth Avenue, Deer Lake. No other witnesses could be located.
- The witnesses appear to be reliable and it is my opinion that the object was likely a meteor which was actually larger and further away than the witnesses realised. The area where they thought it had landed is a residential area and had anything of any size landed it certainly would have been noted.

CONTINUED ON PAGE 2.....

Nellie Marina SIMMS

CONTINUED FROM PAGE 1.....

7. A check with the Aeradio office at the Deer Lake Airport failed to discover anything to aid this investigation. There were no other sightings reported nor were any air craft overdue or lost for this period.

8. No other sightings have been seen or reported since this occasion. It is felt, as outlined in paragraph 6, that it was likely a meteor.

Dear Sirs:

On the 16th of October, 1980, 100 Mile House detachment received a call from a Wayne Marshall of 9880 Dyke Road in Richmond, B.C. advising us that a friend of his by the name of Ken Sumner, 9300 Walford Road, Richmond, B.C., phone 604-270-2593, had reported to Marshall of a U.F.O. sighting. Sumner was called in Richmond and he gave the following account:

During the week of October 6-10, 1980 Ken Sumner and four other persons were hunting in the vicinity of Gustafson Lake which is approximately 23 miles west of 100 Mile House, B.C. At approximately 6:30 p.m. two of the persons saw an object fly overhead so fast that they could not get an accurate description. Approximately 45 minutes later an object was sighted in the sky. This object was stationery and moved slowly to the left and then to the right. It had a green light on the top with a red light on the bottom side. Approximately one hour later three of the men in the camper noted a light to come through the vent in the top of the camper and move around to the front of the truck. It appeared to be a beamed light and stated that it moved faster than if held by hand. It was alleged that this light came through even where there were no windows. The camper then shook and the men stated they felt like their bodies were rising in the air. At approximately 10:30 a.m. they heard a loud noise something like a jet taking off. He stated that all the men were so scared they did not look out and this was not reported to our office at the time of the incident as they did not feel they would be believed.

As it was stated earlier I contacted Sumner and that was his account. He advised that with him was Randy Balway, Phone 604-278-1961, also Al Slather, age 24, address and phone number unknown and Joe Balaway, address unknown as well as another gentleman.

... 2

- 2 -

The above is for your information and forward action as you see necessary. For your further information on the 26th of October, 1980 another report was received of an unidentified flying object from one Randy Stuart Murray of Mackenzie, B.C. This sighting took place at 83 Mile on Hwy. 97 which is approximately 17 miles south of 100 Mile House, B.C.

I will enclose these two statements for your information. Should you take action on this matter please advise the writer for our information.

Yours truly,

B. F. Hodgkin

Gentlemen:

I have the pleasure of informing you that I have sighted
an U.F.O. Seeing is believing. Now, let us pass to the description
of the object.

It was round, luminous, and it seemed like a bulb flying
in the sky. Those are the only actual details that I can give you,
and certify.

It was apparently moving in a straight line from N-N-W,
to S-W. Because the South was hidden by a building, I was unable
to follow it more than ten (10) seconds, after which it disappeared
behind it.

When I first sighted it, it was half-way between the ho-
rizon and me. Travelling at about the height of a jet, it disap-
peared about ten seconds later, passing at about five miles at the east
of my observation point.

Date of Observation: May 29, 1967
Time : 21 35

I hope this observation may be of some value to you,

Yours truly,

Claude Roy

THROUGH SPACE WITH AN ESTIMATED SPEED OF BETTER THAN ONE THOUSAND MILES AN HOUR. ONE OBSERVER AT FIRST THOUGHT THE SUN MAY HAVE BEEN REFLECTED FROM OBJECT APPEARING TO COME FROM THE CENTRE REAR PORTION OF THE OBJECT. THIS CENTRE REAR PORTION APPEARED DARK WHEN NOT EMITTING A WHITER THAN VAPOR LIGHT COLOUR. OTHERWISE OBJECT HAD A DULL ALUMINUM OR STAINLESS STEEL APPEARANCE.

G. OBSERVATION TIME FROM TIME OF FIRST SIGHTING TO DISAPPEARANCE OVER HORIZON APPROXIMATELY 15 SECONDS.

H. SL BISSKY AND DR ROY CRAIG, UFO PROJECT REP FROM THE UNIVERSITY OF COLORADO INTERVIEWED BOTH OBSERVERS AM 6 JUN. CPL ROKOSH ESTIMATED AT THIS TIME SIZE OF OBJECT TO BE SIZE OF SMALL FINGER NAIL AT ARMS LENGTH AS COMPARISON. SHAPE WAS BASICALLY ROUND EXCEPT FOR SLIGHT FLATTENED AREAS ON TOP AND BOTTOM. HE ALSO STATED THAT REFLECTION OF SUN, IF IT WAS REFLECTION, WAS NOT CONSTANT AS ONE WOULD EXPECT. RATHER THE WHITE LIGHT APPEARED AT INTERMITTANT INTERVALS WITH NO SET PATTERN TO INDICATE A MEANS OF PROPULSION. BOTH OBSERVERS WERE LEFT COPIES OF COLORADO PROJECT UFO SIGHTING REPORT WHICH ARE TO BE SENT DIRECT TO ^{DR} CRAIG ON COMPLETION, NEGATIVE RADAR RESULTS WERE OBTAINED FROM BOTH THE WINNIPEG DOT AND DULUTH 29TH AIR DIVISION ON CHECKING WITH THEM AT TIME OF REPORT HAVING BEEN RECEIVED.

La manifestazione che si svolgerà a cura di un comitato di lavoro della Commissione parlamentare dei diritti degli handicappati, avrà, conseguentemente, una portata internazionale e sarà dedicata al tema: "L'handicap e la cultura".

Figure 1: Schematic representation of the experimental design. The diagram shows a sequence of events: a subject is presented with a stimulus (a word), which is then followed by a response (a word). The response is then presented to the subject, who then provides a final response. The diagram also shows a timeline of the experiment, with a 10-second interval between the stimulus and the response, and a 10-second interval between the response and the final response. The diagram is labeled with 'Stimulus', 'Response', and 'Final Response'.

OBJECT SUDDENLY AND AT GREAT SPEED DESCENDED TOWARDS BOAT. MR GREENE MADE VERY HASTY RETREAT USING FULL POWER OF 75 HORSE OUTBOARD TO MAKE SHORE AND GET OUT OF BOAT. OBJECT THEN RETURNED TO ORIGINAL HOVERING POSITION. BOAT WAS RE ENTERED AND ATTEMPT WAS MADE TO RETURN TO PERSONS VISITED BUT OBJECT AGAIN APPEARED TO MAKE RAPID DESCENT TOWARDS BOAT. BOAT WAS IMMEDIATELY GROUNDED ON SHORE AND MR AND MRS ROBERT GREENE RAN TO HOME OF BERT GREENE AND AWOKE ENTIRE HOUSEHOLD WHO OBSERVED OBJECT AS WELL, AS IT HOVERED FOR APPROX 10-15 MIN, ASCENDED AND RAPIDLY DISSAPPEARED IN WEST NWEST DIRECTION TOWARDS FALCON LAKE. OBJECT WAS DESCRIBED AS OVAL IN SHAPE WITH A SLIGHT RISE ON TOP AS THOUGH WITH A CANOPY. COULUR WAS SHINY WHEN FIRST OBSERVED, METALIC OR GLASSY IN COLOUR. NO LOGHTS VISIBLE EXCEPT THAT TOPS OF TREES APPEARED TO GLOW WHITE WHEN OBJECT MADE DESCENTS AFTER BOAT. OBJECT TILTED TOWARDS THE DESCENT BUT APPEARED TO RISE HORIZONTALLY AND FLY HORIZONTALLY WHEN IT DISAPPEARED. OBJECT WAS VERY CLEAR TO THE NAKED EYE WITH MOON REFLECTING OFF IT. MR ROBERT GREENE DESCRIPTION OF SIZE APPROXIMATELY 25 TO 30 FT ACROSS AND APPROXIMATELY 10 TO 15 FEET AT THE THICKEST POINT. AS OBJECT DISAPPEARED IT TOOK ON AN ORANGE TINGE. NO NOISE WAS HEARD BY ANY OF THE OBSERVERS NOR THOSE OCCUPYING TWO CABINS AT LESS THAN A QUARTER MILE DISTANCE FROM

71

PAGE 3 RCWPC 117 UNCLAS

WHERE OBJECT WAS ALEGEDLY HOVERING. ONE OCCUPANT, MR ALEX GREENE DID OBSERVE THAT HE WAS LISTENING TO HIS TRANSISTOR RADIO AT TIME, TATION CKRC ON 630 KCS, WHEN SO MUCH STATIC AND INTERFERENCE WAS HEARD THAT RADION WAS SHUT OFF. HE LOOKED OUT WINDOW

FACING NORTHWARD THINKING THUNDERSTORM IN AREA BUT NOTEC CLEAR SKY.

HIS REDIO WAS CHECKED AND FOUND IN SATISFACTORY OPERATING CONDITION.

ALSO ANOTHER TRANSISTOR WAS CARRIED TO SCENE 31 JUN. AND CHECKED FOR STATIC WITH NOTHING BUT CLEAR RECEPTION. WIND CONDITIONS CALM, MR

ROBERT GREENE STATED THAT TOPS OF TREES MOVED VEPY NOTICABLY AS OBJECT MADE BOTH DESCENTS.

G TOTAL OF APPROXIMATELY 30 MINUTES.

H SL BISSKY VISITED SCENE AND INTERVIEWED OBSERVERS 21 JUN AFTER HAVING RECEIVED REPORT FROM SUPT MILLER RCMP. FOLLOWING ADDITIONAL OBSERVATIONS. MR ROBERT GREENE APPEARS TO BE RELIABLE WITNESS WITH NO OVER INDULGENCE TENDENCIES. HAS BEEN EMPLOYED PRESENT POSITION AT TOURIST FISHING CAMP FOR NUMBER OF YEARS. UNABLE TO DO BACKGROUND CHECK WITH EMPLOYER DUE ABSENCE DURING VISIT. NO ALCOHOL WAS CONSUMED BY ANY OF WITNESSES EVENING OF SIGHTING. MR. GREENE HAS GOOD EYE SIGHT NEEDING NO GLASSES. HIS STATEMENT WAS SINCERE AND STRAIGHTFORWARD. OTHER OBSERVERS NOT AS WELL SPOKEN AS MR R GREENE, HOWEVER APPEARED

71

PAGE 4 RCWPC 117 UNCLAS

EQUALLY AS SINCERE. LOCAL TERRAIN AT SCENE VERY ROCKY, COVERD BY A VARIETY OF TREES. CHECK FOR LOCAL MAGNETIC FIELD USING HAND HELD COMPASS WITH NIL RESULTS. NO ODOR DETECTED NOR REPORTED BY ANY WITNESSES. NO POWER LINES IN VICINITY. FROM ALL REPORTS OBJECT DEFINITELY SOLID NOT GASEOUS. NO OBSERVERS COULD TELL IF OBJECT REVOLVED OR NOT, HOWEVER ALL AGREED SPEED WAS VERY FAST. EXAMINED ALLEGED HOVERING AREA CAREFULLY, LOCATED ONE TREE APPROXIMATELY SEVEN INCHES IN DIAMETER HAVING VERY RECENTLY BEEN BROKEN OF NEAR GROUND FALLING IN NWESTERLY DIRECTION WHICH IS OPPOSITE TO PREVAILING WINDS. EVERAL SAMPLES OF WILTING LEAF LIMBS BROUGHT TO WINNIPEG FOR ANALYSIS AT UNIVERSITY 22 JUN. HAVE ALREADY CHECKED LIMBS AND CLOTHING WORN AT SITE FOR RADIATION WITH NIL RESULTS. NO GATHER VISIBLE INDICATIONS OF HEAT BEING EMITTED FROM OBJECT BUT ATTEMPTING TO OBTAIN AERIAL PHOTOS OF AREA BY 408 ON T33 IPCRAFT. MOON AT TIME OF SIGHTING ON MR R GREENES LEFT AND OBJECT ON HIS RIGHT, DEFINITELY NO CONFUSION

Attention: DOPS 4 (W/C Robertson)

UFO SIGHTING REPORT
INDIAN BAY - 18 JUN 67

Reference: My FLYTRG 5175 221700Z Jun 67

1. Further to my referenced message, forwarded herewith are photographs of the site, marked in red on the enclosed map, which is the alleged site where the UFO hovered.
2. On photo number 1 (vertical) you will note a point which has been annotated by 408 Squadron and is included as the centre point for most of the oblique photographs. Although there appears to be some significance in the photographs, this rock outcropping was examined by S/L Bissky who found nothing out of the ordinary except for a few freshly cut shrubs at the west side, which the Indians admitted cutting, and the tree mentioned in my message is lying towards the rock.
3. On the oblique photo 1 are marked cabins A and B which are unoccupied. The remainder of the cabins in the area are all occupied by Indians of the reserve. Also marked in red square on this photo is the general area from which limb samples were taken for analysis. The round red circle encloses the downed tree.
4. Of interest, the Department of Forestry is having their field representative in the area examine the site this week to determine the cause of wilting of some of the leaves. One set of samples showed evidence of fungus which would cause the wilting but the remaining samples showed no live evidence of fungus or blight.

P. Bissky

back to be placed on our files.

71

July 2, 1970.

Dr. J. Allen Hynek,
Department of Astronomy,
Lindheimer Astronomical Research Center,
Northwestern University,
Evanston, Illinois 60201.

Dear Allen:

Nice to hear from you. Was a little puzzled by your final paragraph, I quote "I had hoped to see you in Brighton and perhaps I may yet if your plans change." I have already paid for our room at the Brighton Hotel for the IAU, and thought I had said in my last letter to you that Peggy and I would be in Brighton. My plans have not changed, and I will be happy to take this opportunity to discuss the general field of peculiar things seen in the sky.

I am enclosing a copy of the complete report of the incident referred to by Tennyson in his letter to you. I phoned Tennyson to see if he remembered the incident and he told me it was a sighting of January 1968, in the area of Shoal Lake, Manitoba. Fortunately, he gave me the Defence Department's numbering of the case which was No. 71, and hence we had no trouble identifying it in our files. To illustrate the mistakes that can occur, even in letters between scientists, this sighting was actually made on June 18, 1967 at Shoal Lake in Ontario, which is quite a different Shoal Lake to the one in Manitoba. Also, I am afraid I do not agree with our friend Tennyson's statement that it "remains as a fascinating unidentified aerospace phenomenon." I had not gone into this particular sighting in detail before, but the similarity of the report to much other material we get on Venus made me suspicious at once. Hence, I have just done a rough plot of the position of Venus for the time in question at Shoal Lake. Venus was at greatest elongation in the western sky, 6° above the horizon in a direct WNW, and within 40 minutes of setting. The moon was on the observer's left, as stated, while the planet was on his right. It is possible some anomalous refraction might have been present, but the irregular motion of the host plus the well known 'moving point effect' could well account for the whole report of the aerial phenomenon.

There is nothing at all to connect the wilting of the trees or other foliage items with the aerial sighting, and I have not troubled to send you a whole series of oblique air photographs of the district which

Dr. J. Allen Hynek.

July 2, 1970.

were taken by the Air Force, and which show nothing out of the ordinary; no patterns or circular rings or anything of the kind. If I had had anything to do with this sighting I would not have recommended the detailed air-coverage that was given, but this was before we took over the files here. As far as I know, Tennyson picked up this information when searching the Defence Department files, and I don't believe he had had any previous experience in dealing with reports of things seen in the sky.

Just to keep you abreast of some of the reporting that still seems to go on in our newspapers, I enclose a page from a recent issue of the Ottawa Citizen. As you will note, this does not include a report of anything new, but refreshes some sightings which caused excitement in the Chalk River area a year or two ago. The fact that the large Petawawa Military Camp is not far away, and that at Petawawa they frequently make tests of various types of flares and rockets, is not unrelated to some of the excitement in the area. On the other hand, I am by no means suggesting that this necessarily explains everything.

I am impressed by the fact that I have yet to see any clear evidence of a connection between the so-called rings, an example of which is shown in the large picture, and the area phenomena reported from the same district. Once something peculiar has been sighted in the sky people seem to immediately look for evidences of landing, and any peculiar earth marking is connected up with the sighting without any good reason. I had some grass from one of these areas (not the one photographed) analysed by the Geological Survey a short time ago. An X-ray study showed no evidence of radio activity nor of any metallic or mineral content. The strange crystalline substance reported on the grass was entirely biological and must have been the result of some organic action, perhaps a rare type of mold or disease. I did not attempt to follow the matter any further at this point.

I try very hard to keep an open mind in this subject, but I must confess I get more and more disillusioned with what people report they have seen with their eyes. You will, I'm sure, note a very significant point about the newspaper article I am enclosing. When you read the last few paragraphs carefully, you find that at least seven people saw a peculiar light in the morning sky. Six "dismissed it as a bright star or pretended it did not exist." However, the seventh, a young girl, had a very lurid story to tell about the whole event. I might add that at this time, Venus was well visible in the morning sky, and that for quite a few days near the middle of September was positioned with Regulus very close to it. This might explain the description of something coming out from under the bright object.

We have not had any recent reports worth noting here. I will certainly do as you suggest and quietly carry out my own investigation of anything I think worth studying. Looking forward to seeing you in Brighton.

Very sincerely yours,

Peter M. Millman.

MEMORANDUM

V 2000-4 (DG Prog)

5 July 67

SA/VCDS

UNIDENTIFIED FLYING OBJECTS (UFO's) -
DND INTEREST

1. Attached is a copy of a letter, dated 30 Jun 67, from Dr. Rettie of NRC, requesting a meeting in August to discuss the Canadian position with respect to a Scientific Study of Unidentified Flying Objects.
2. Dr. Rettie is the Canadian representative of the Scientific and Technical Sub-Committee of the United Nations Committee on the Peaceful Uses of Outer Space and as such, is the Canadian representative at the United Nations on this matter.
3. Although the letter has been addressed to DG Prog, it is considered that it would be more appropriate for you to act as OPI in determining the Department's position with respect to UFO's. As you know, Dr. Arnell has had a long-time interest in this subject and is the author of an article, "UFO's: Pigment, Fact, or Fiction", which appeared in the June 1966 issue of "The Sentinel". A copy of this article is attached. More recently, he prepared data for use by the Minister in opening the Flying Saucer Pad which was built as a centennial project at St. Paul, Alberta. I understand that recently Mr. Greenwood, DSC/DC OPS, has been involved in answering questions with respect to the DND position which were posed by a Japanese source. DGI, of course, has an interest from a point of view of intelligence.
4. It is requested that you assume responsibility for determining the Department's position with respect to UFO's and communicating this to Dr. Rettie, as requested in the attached letter.
5. Although DG Prog Division is not directly involved, I have a personal interest in the subject and would appreciate being kept in the picture, and would be pleased to assist you in any way that I can.

Dear Doctor Rattie:

UNITED NATIONS INTEREST IN UNIDENTIFIED FLYING OBJECTS

A/C Aldwinckle has passed on to me his copy of your letter of 20 June 1967, addressed to Mr. Barton of External Affairs.

I will be pleased to attend the meeting that you propose to hold in August and to explain the activities of this Department in examination of reported UFO incidents.

Yours sincerely,

10 July, 1967.

TO: SEC DS

MINISTERIAL INQUIRY

CANADIAN AERIAL PHENOMENA INVESTIGATIONS COMMITTEE

1. On 9 Jun 67, Mr A.K. Vesina, Chairman of the m/n committee, wrote to the Associate Minister of National Defence requesting financial assistance for the committee. An interim reply was given on 19 Jun 67.
2. This matter has been discussed with Brig Doucet, EA to the AMND, who feels that no further reply is required at this time. It is felt also that DND should NOT be put in the position of appearing to be responsible for this subject, thus linking these phenomena, in the public mind, with some sort of threat to the national security. Brig Doucet suggested that a paper be prepared for submission to Defence Council recommending a transfer of responsibility from DND to the National Research Council.
3. A paper is attached for your consideration.

B1A

MEMORANDUM TO DEFENCE COUNCIL
FROM DIRECTORATE OF OPERATIONS
UNIDENTIFIED FLYING OBJECTS

Reference: A. Supporting Data Attached.

INTRODUCTION

1. Since 1966, the Director of Operations has been tasked with the responsibility for dealing with Unidentified Flying Objects (UFOs) reports which are referred to CFHQ. It has become evident that the Directorate of Operations has neither sufficient staff nor the necessary scientific assistance available to carry out an objective and scientific evaluation on UFO reports.
2. As the public is obviously becoming more conscious of UFOs, and in view of the increasing number of UFO reports being referred to CFHQ for action, it is suggested that the present policy for handling UFO reports be reviewed with the aim of determining a more objective and effective procedure for dealing with these reports.

AIR

3. The aim of this memorandum is to review briefly the present procedure for actioning UFO reports referred to CFHQ and to suggest a more effective method for dealing with UFO reports.

CFHQ ACTION ON UFO REPORTS

4. In brief, the Director of Operations' staff endeavours to classify UFO reports into one of two main categories, namely:
 - a. Category One - Information which would suggest the type of phenomena associated with fireballs and meteorites, or
 - b. Category Two - Information that does not conform to the physical patterns usually associated with fireballs or meteorite activity.
5. Reports which are classified under category one are forwarded to the Director for Scientific Co-ordination for evaluation. In addition, copies of the report are made available to RMC Meteorite Centre and to a named representative of the province in which the sighting was made.

.../2

6. Reports which are classified under category two are studied by the Operations Staff who either place the report on the UFO file with an annotation to the effect that further investigation is not warranted, or initiate action to have the report investigated by a military officer. To date, no evidence has been discovered which would suggest a threat to national security. The US authorities reached a similar conclusion i.e. that there is absolutely NO evidence indicating a threat to national security. This being the case, it is suggested that DND should NOT be the agency primarily responsible for the receipt and investigations of UFO reports.

7. It is emphasized that no procedure exists at this time to assess any possible scientific information which might be obtainable from these reports. It should be noted that in the United States a civilian oriented scientific investigation has in fact been instituted on the University of Colorado. In Canada, the National Research Council would appear to be the body most suited to organize such an investigation.

RECOMMENDATION

8. In view of the above, it is recommended that the National Research Council be named to co-ordinate, on behalf of the Government of Canada, investigations into reports of UFOs.

SUPPORTING DATA

FOR

MEMORANDUM TO DEFENCE COUNCIL

ON

UNIDENTIFIED FLYING OBJECTS

INTRODUCTION

1. The Department of National Defence receives, through many sources, well over fifty UFO reports each year on unusual aerial sightings which the observer is unable to identify or explain.
2. In accordance with instructions contained in CPAC 71-1, Fireball and Meteorite Observation; and CPAC 71-6, UFO Reports; the Director of Operations is tasked with the responsibility of reviewing these reports and, as warranted, initiating action to have the reports formally investigated.
3. The present method for actioning these reports is considered unsatisfactory as the Operations Staff are neither qualified to differentiate between fireballs, meteorites or UFOs, nor are trained investigators available to evaluate such reports. In addition, there is no known scientific body tasked with the responsibility for assisting the Operations Staff to arrive at acceptable conclusions.

BACKGROUND ON UFOs

4. Reports on unusual aerial sightings are not new to this generation, unusual aerial sightings having been reported throughout history. It would appear that the number of sightings increase in the Spring, die away, only to develop a second peak during the Summer months.
5. In the early 1950s scientific committees were set up in both Canada and the United States, under defence auspices, to investigate UFO reports. Following several years of study, both committees were able to explain all but a very small percentage of the many thousands of sighting reports made. The American scientific committee concluded its investigation by stating, "that the evidence presented on UFOs shows no indication that these phenomena constitute a direct physical threat to national security" and recommended, "that the national security agencies take immediate steps to strip the UFOs of the special status they have been given and the aura of mystery they have unfortunately acquired". Although not formally stated, the Canadian Scientific Committee arrived at the same conclusions. Since that time UFO reports referred to DND have been studied by interested staffs and, as warranted, investigations have been made.

.../2

6. Approximately seven years ago the National Research Council established a scientific committee, on which IWD is represented, to co-ordinate Canadian activity on the study of optical effect in the upper atmosphere, such as fireballs and meteorites. This committee receives reports on fireballs and meteorites through a number of agencies such as IWD, ICRP, DCF, etc. It is to be noted that this scientific committee is primarily interested in optical observations which can be classified as fireballs and meteorites and are not engaged in the scientific study of other unusual aerial sightings (UFOs).

7. Unusual aerial sightings referred to IWD for action have followed a varied career at one time, Air Defence Command was the military agency most concerned with UFO reports. Prior to the Spring of 1966 the Director of Intelligence co-ordinated IWD action on UFO reports. Correspondence held on the IWD UFO file indicates that Dr. J.C. Arnell, then Scientific Deputy Chief of Technical Services, was an active participant in actioning UFO reports. In the Spring of 1966 the responsibility for actioning unusual aerial sightings was transferred to the Director of Operations.

USAF PARTICIPATION ON UFOs

8. In 1966 the USAF established the "Blue Book" program for the purpose of investigating UFOs. The objectives of the program are to determine whether UFOs pose a threat to the security of the US and to determine whether UFOs exhibit any unique scientific information or advanced technology which would contribute to scientific or technical research. The program centre is established at Wright-Patterson Air Force Base, Ohio. Each sighting report referred to the USAF is objectively and scientifically analysed, and, if necessary, all of the scientific facilities available to the USAF can be used to assist in arriving at an identification or explanation. The Office of Information of the Office of the Secretary of the AF is used to disseminate information concerning UFO sightings, evaluations and statistics. Recently, and probably due to the increasing concern of the general public, the USAF has selected the University of Colorado, under the direction of Dr. K.O. Gordon, physics professor, to conduct an independent investigation into UFO reports. Under this research agreement, Dr. Gordon expects to call on the services of more than 100 scientists around the country to assist in this research study. A full report is expected to be delivered to the USAF in 1968.

CIVILIAN PARTICIPATION ON UFOs

9. A number of private citizens, many of whom are exceptionally well qualified, are either carrying out personal and independent research studies on UFOs, or have joined organizations which have been established for the purpose of investigating UFOs. Such organizations

as the Canadian Aerial Phenomena Investigations Committee and the Aerial Phenomena Research Organisation, claim membership into the thousands. ;

10. Several universities, such as the University of Colorado and the University of Arizona, have shown a marked interest in UFOs and are presently conducting investigations into this field.

11. The civilian organisation, the Canadian Aerial Phenomena Investigations Committee, Scarborough, Ontario, has recently made representation to DND for financial assistance in order to increase the effectiveness of their organisation as a public service. It is to be anticipated that other private citizens or organisations will make representation to DND for either financial and/or administrative assistance for UFO research and investigation purposes.

V 2000-4 (D Ops)

7 July, 1967.

MEMORANDUM TO DEFENCE COUNCIL
FROM DIRECTORATE OF OPERATIONS
UNIDENTIFIED FLYING OBJECTS

Reference: A. Supporting Data Attached.

INTRODUCTION

1. The Director of Operations is presently tasked with the responsibility for actioning Unidentified Flying Objects (UFOs) reports which are referred to CPHQ. It has become evident that the Directorate of Operations has neither sufficient staff, the professional skill requirements within the Directorate, nor the necessary scientific assistance available to carry out an objective and scientific evaluation on UFO reports.

2. As the public is obviously becoming more conscious of UFOs, and in view of the increasing number of UFO reports being referred to CPHQ for action, it is suggested that the present policy in effect for handling UFO reports be reviewed with the aim of determining a more objective and effective procedure for dealing with these reports.

AIM

3. The aim of this memorandum is to review briefly the present DND procedure for actioning UFO reports referred to CPHQ and to suggest a more effective method for dealing with UFO reports.

CPHQ ACTION ON UFO REPORTS

4. In brief, the Director of Operations' staff endeavours to classify UFO reports into one of two main categories, namely:

- a. Category One - Information which would suggest the type of phenomena associated with fireballs and meteorites, or
- b. Category Two - Information that does not conform to the physical patterns usually associated with fireballs or meteorite activity.

5. Reports which are classified under category one are forwarded to the Director for Scientific Co-ordination for evaluation. In addition, copies of the report are made available to NRC Meteorite Centre and to a named representative of the province in which the sighting was made.

.../2

81

6. Reports which are classified under category two are studied by the Operations Staff who either place the report on the UFO file with an annotation to the effect that further investigation is not warranted, or initiate action to have the report investigated by a military officer. To date, reports and formal investigated reports have failed to disclose evidence which, in the opinion of the Operations Officer, would suggest a threat to national security. It is to be emphasized that UFO reports and investigated reports are not passed to a scientific body for the purpose of determining whether UFOs pose a threat to national security or whether they exhibit any unique scientific information or advanced technology which could contribute to scientific or technical research.

7. In view of the general public's increasing interest in the number of UFO reports being made by many intelligent and conscientious citizens, DND should initiate action to establish an objective and effective means for dealing with UFO reports.

8. An objective and effective DND method for dealing with UFO reports could be accomplished in any one of many ways; a number of suggestions are listed hereunder:

- a. Establish a scientific body within the present resources of DND who, in addition to their normal duties, would be responsible for the scientific evaluation of UFO reports, or:
- b. Establish a scientific body under DND auspices who would be responsible for studying and evaluating UFO reports, or:
- c. Promote the establishment of a governmental scientific body independent of DND auspices, but who would be required to advise DND on any matter of significant value relating to national security, or:
- d. Establish an agreement with the USAF whereby all UFO reports referred to CPMQ would be forwarded to the USAF for evaluation, with the understanding that DND would be advised on any matter of significant importance. DND would co-operate with the USAF in obtaining additional information on any report in which the USAF would be interested, or:
- e. Establish a joint Canadian/United States agreement in which both countries would participate militarily, scientifically and financially in a program to evaluate UFOs objectively.

RECOMMENDATION

9. In all probability the method noted in paragraph 8.d. would prove the more easily adopted procedure and would, no doubt, be more economical.

SUPPORTING DATA

FOR

MEMORANDUM TO MEMBERS COUNCIL

ON

UNIDENTIFIED FLYING OBJECTS

INTRODUCTION

1. The Department of National Defence receives, through many sources, well over fifty UFO reports each year on unusual aerial sightings which the observer is unable to identify or explain.
2. In accordance with instructions contained in CPNO 71-1, Fireball and Meteorite Observations; and CPNO 71-6, UFO Reports; the Director of Operations is tasked with the responsibility of reviewing these reports and, as warranted, initiating action to have the reports formally investigated.
3. The present method for examining these reports is considered unsatisfactory as the Operations Staff are neither qualified to differentiate between fireballs, meteorites or UFOs, nor do they possess the necessary professional qualifications to objectively evaluate such reports. In addition, there is no known scientific body tasked with the responsibility for assisting the Operations Staff to arrive at acceptable conclusions.

BACKGROUND ON UFOs

A. Reports on unusual aerial sightings are not new to this generation, UFO reports can be traced back to the Old Testament where the Prophet Ezekiel gave a description of a machine which landed near the Chebar River in the Land of Chaldea. Evidence is available which shows that unusual aerial sightings have been reported throughout history. However, it would appear that the number of sightings increase in the Spring, the way, only to develop a second peak during the Summer months.

5. In the early 50s scientific committees were set up in both Canada and the United States, under defense auspices, to investigate UFO reports in order to satisfy a concerned general public. Following several years of study, both committees were able to explain all but a very small percentage of the many thousands of sighting reports made. The American scientific committee concluded the investigation by stating, "what the evidence presented on UFOs shows is no indication that these phenomena constitute a direct physical threat to national security" and recommended, "that the national security agencies take immediate steps to study the UFOs of the special status they have been given and the aura of mystery they have unfortunately acquired". Although not formally stated, the Canadian Scientific Committee arrived at the same conclusions. Since that time UFO reports referred to IND have been studied by interested staffs and, as warranted, investigations have been made.

6. Approximately seven years ago the National Research Council established a scientific committee, on which DND is represented, to co-ordinate Canadian activity on the study of optical effect in the upper atmosphere, such as fireballs and meteorites. This committee receives reports on fireballs and meteorites through a number of agencies such as DND, RCMP, DOT, etc. It is to be noted that this scientific committee is primarily interested in optical observations which can be classified as fireballs and meteorites and are not engaged in the scientific study of other unusual aerial sightings (UFOs).

7. Unusual aerial sightings referred to DND for action have followed a varied career; at one time, Air Defence Command was the military agency most concerned with UFO reports. Prior to the Spring of 1966 the Director of Intelligence co-ordinated DND action on UFO reports. Correspondence held on the DND UFO file indicates that Dr. J.C. Arnell, then Scientific Deputy Chief of Technical Services, was an active participant in actioning UFO reports. In the Spring of 1966 the responsibility for actioning unusual aerial sightings was transferred to the Director of Operations.

USAF PARTICIPATION ON UFOs

8. In 1948 the USAF established the project Blue Book program for the purpose of investigating UFOs. The objectives of the program are to determine whether UFOs pose a threat to the security of the US and to determine whether UFOs exhibit any unique scientific information or advanced technology which could contribute to scientific or technical research. The program centre is established at Wright-Patterson Air Force Base, Ohio. Each sighting report referred to the USAF is objectively and scientifically analysed, and, if necessary, all of the scientific facilities available to the USAF can be used to assist in arriving at an identification or explanation. The Office of Information of the Office of the Secretary of the AF is used to disseminate information concerning UFO sightings, evaluations and statistics. Recently, and probably due to the increasing concern of the general public, the USAF has selected the University of Colorado, under the direction of Dr. E.O. Condon, physics professor, to conduct an independent investigation into UFO reports. Under this research agreement, Dr Condon expects to call on the services of more than 100 scientists around the country to assist in this research study. A full report is expected to be delivered to the USAF in 1968.

CIVILIAN PARTICIPATION ON UFOs

9. A number of private citizens, many of whom are exceptionally well qualified, are either carrying out personal and independent research studies on UFOs, or have joined organizations which have been established for the purpose of investigating UFOs. Such organizations

.../3

as the Canadian Aerial Phenomena Investigations Committee and the Aerial Phenomena Research Organization, claim membership into the thousands.

10. Several universities, such as the University of Colorado and the University of Arizona, have shown a marked interest in UFOs and are presently conducting investigations into this field.

11. The civilian organization, the Canadian Aerial Phenomena Investigations Committee, Scarborough, Ontario, has recently made representation to DND for financial assistance in order to increase the effectiveness of their organization as a public service. It is to be anticipated that other private citizens or organizations will make representation to DND for either financial and/or administrative assistance for UFO research and investigation purposes.

CONCLUSION

12. That DND adopt an effective policy designed to deal with unusual aerial sightings referred to DND in an objective manner.

REPORT OF UNIDENTIFIED FLYING OBJECTS

Reference: A. CFAO 71-6

1. Submitted with reference to A is the following report of the sighting of an unidentified flying object observed by LS Gooderham, CFB Esquimalt. This report is submitted by letter, observing the delayed report occasioned by the fact that Gooderham was on annual leave and it has only now been possible to obtain the appropriate details.

2. In accordance with the information required, the following has been obtained:

- a. 0630Z 29 Jun 67
- b. Clear
- c. 50465-E Gooderham R. LS Bosn 181
- d. Victoria, BC area, highway 1A, one-half mile east of Colwood corners.
- e. Mrs. Olive Gooderham and an RCMP Constable from Colwood Detachment whose name has not been ascertained.
- f. Elliptical, white, approximately 1500 feet, descending in a westerly direction, 2 UFOs sighted.
- g. A total of approximately 40 minutes.
- h. The 2nd UFO was of red, white, and green colour, and appeared to be hovering.

REPORT OF
INVESTIGATION OF CERTAIN MARKS
NEAR CAMROSE, ALBERTA

Canadian Forces Base, Edmonton
16 Aug 67

BACKGROUND

1. The writer was detailed by HQ CFB, Edmonton, to carry out an investigation and report upon certain markings on the ground in the vicinity of CAMROSE, Alberta. Contact with Mr. PATRIDGE of the Camrose Canadian to obtain specific information and liaison with the DRB Experimental Station, SUFFIELD, was ordered. Arrangements were made by telephone for Suffield to provide a Scientific Officer and, at that Officer's request, a photographer from CFB Edmonton was also taken along. Personal contact was made with Dr. GH JONES of Suffield at the Camrose airstrip and the bulk of the investigation was made in his company.
2. Capt GC WALKER and the photographer proceeded to CAMROSE and vicinity by PMC, departing Namac at 1000 hours, 11 Aug 67. After meeting Dr JONES, the party proceeded to the offices of the Camrose Canadian and met with Mr. PATRIDGE, from there all proceeded to the farm of a Mr. SCHIELKE near the village of DUHAMEL and examined the ground in question. After the departure of Dr JONES, Capt WALKER met a Mr. Ray SANDERS and as a result of information from him, proceeded back to DUHAMEL for a further visual investigation and then returned to NAMA0.
3. On 15 Aug, Capt WALKER returned to DUHAMEL and obtained soil samples as directed in a telephone call from CFBHQ Operations.

GENERAL DESCRIPTION OF GROUND

4. The field involved is the Southeast quarter of Section 28, Township 45, Range 21 and is owned by Mr. SCHIELKE. It is located approximately one mile South and two miles West of the village of DUHAMEL, near Alberta Highway 21. Approximately one and a half miles due North there are two large, white storage tanks. There are prominent grain elevators in the village. A sketch of the immediate quarter-section is attached as Annexure A.
5. There were a total of six circles or portions of circles in the quarter-section. These were arbitrarily numbered for ease of reference and the numbers shown on Annex A.

VERBAL INFORMATION

6. Mr. PATRIDGE was the first person contacted. He stated that he knew little first-hand information. He had been informed by Mr. Ray SANDERS of the existence of the marks and had taken photographs and written a short article for his newspaper.
7. Mr. Edgar SCHIELKE was interviewed. He stated that he had personally seen Mark #2 on the morning of Saturday, 5 August. It was of sufficient interest that he mentioned it to relatives and friends, with the end result that Mr. SANDERS became interested. Mr. SANDERS then found the other marks in the same field. Mr. SANDERS informed news media including Mr. PATRIDGE of the Camrose Canadian. Mr. SANDERS resides at SW 33, Township 45, Range 20, near Camrose. His telephone number is 672-6861.

93

...#2

8. Mr. SANDERS took some photographs, these were examined but had nothing to contribute and were not retained. Mr. PATRIDGE's negatives were borrowed for printing by CFB Edmonton Photo Section.

9. Various other people were mentioned in the course of these conversations as having sighted Unidentified Flying Objects in the area. None of the sightings were made in the immediate vicinity (ie, within one or two miles) and there were no mentions of sightings later than the end of June. The SCHIELKE family themselves heard or saw nothing unusual, except the marks themselves.

10. There was a rainstorm of approximately one inch on Friday, 4 August and another fall of the same amount on Monday, 7 August.

DETAILED DESCRIPTION OF VISUAL EXAMINATION

11. All the marks exhibited the same general appearance. There is a ring, six inches in width, with diameter varying from slightly over 31 feet to 36 feet. These show no visible evidence of heat, but there is a definite impression in the ground indicating distinct pressure. There is no indication of disturbance inside the ring. There is no indication of any tracks to or from the marks. There are vehicle tracks in the field but these are quite distinct from the marks in question and bear no apparent relationship. Both Mr. PATRIDGE and Mr. SANDERS stated that most of the vehicle tracks have been made since they first saw the marks, obviously by sightseers.

12. The overall impression of the rings is the same as one would expect from a snow or mud tire with lugs spaced about three inches apart. At some points along the perimeter, the impression of "lugs" is quite distinct and at others, almost non-existent. There is slight evidence of movement in a radial manner along the marks in that certain marks have the grass pressed down in a definite direction. The direction is consistent within each mark but the same between one mark and another.

13. Each mark has one portion of the circle or arc more heavily impressed at one side, but the side involved is not consistent from one mark to the other neither in relation to direction or to the height of ground. The ground has small irregularities and the grass is quite short but the marks are not more heavily impressed on the higher ground than they are on lower ground a few inches away. The impressions are definitely deeper and more distinct than tracks of cars or light trucks in the same field. The grass has been damaged, in most cases killed, but new growth is now taking place within the marks.

14. There are cattle in the field but it is not possible to say whether they have been avoiding the marks, the ground being such that no significant cattle tracks are being left. There is no evidence, physical or verbal, of any change in their habits.

15. There is no physical evidence of any damage to trees or shrubs in the field. There is no evidence that would lead to a conclusion of deliberate interference or involvement by any person. Careful scrutiny was made to determine if any centre point was marked. In one mark such a point was found with a stick pushed into the ground, but both Mr. SANDERS and Mr. PATRIDGE stated that the stick had been placed there by SANDERS himself during the process of measuring the marks. There is no evidence of chemical involvement. A survey was made by Dr. JONES with a geiger counter, but only

..../3

normal background radiation readings were obtained. There was absolutely no radiation change inside, along or well outside the rings.

16. Mark #1 - A complete circle, very regular with definite "tread" markings. Grass appears to be pressed down in a clockwise direction. At the North side, there were a few very sharply defined marks across the ring approximately one inch apart.

17. Mark #2 and Mark #3 - Complete circles, #2 slightly irregular (ie, 34 feet North-South versus 36 feet East-West). Grass appears to be pressed down in a counter-clockwise direction. "Tread" markings evident in places.

18. Mark #4 - Slightly more than half of a circle evident. Grass appears to be pressed down in a counter-clockwise direction. "Tread" markings evident in places. Two small areas of sod removed by Mr. SANDERS and taken to Emergency Measures Organization in EDMONTON. (Mr. SANDERS stated these samples were examined at the University of Alberta. In view of samples taken by myself, it was not considered worthwhile to pursue this.)

19. Mark #5 and Mark #6 - Less than half of a circle evident. Markings less distinct than in the other marks. Unable to determine direction of collapse of the grass.

20. At the point marked with a star on Annex A, there was an indistinct arc on the ground, but it was impossible to determine whether this was, in fact, a mark similar to the others, or whether it was merely coincidental.

21. Particular attention was paid to surrounding fields from the car while travelling in the area. Some of these fields were freshly ploughed and others were in crop. There was no evidence of interference in any other fields.

Helicopter ops officer

MEMORANDUM

V 1540-1 TD 7234 (D Ops)

25 August, 1967

TO: MINISTER'S MILSEC

MINISTERIAL INQUIRY

MR. W.A. SMALL - MYSTERIOUS PRINTS
FOUND ON MR. ED SCHIRKE'S FARM

1. On the 8 August 1967 CPHQ received a UFO report from Caninfo Edmonton stating that four depressions had been made in the soil of a pasture in the Duhamel area, Camrose, Alberta. The four depressions, in the form of rings, suggested that some unknown large round objects had settled into the ground. The rings covered an estimated diameter of some 34 to 36 feet. The outer edges of the circles contained clearly marked teeth or claw like marks. The informant further advised that photographs had been taken of the imprints.
2. On the 9 August, CPHQ instructed CFB Edmonton to investigate the subject UFO report and to obtain copies of the photographs as part of the report to be forwarded to CPHQ/DCPS for study. In addition, CFB Edmonton was instructed to contact DND Experimental Station at Ralston, Alberta for scientific assistance in carrying out the investigation.
3. In view of a recent UFO investigation carried out by DND in the Falcon Lake area, 90 miles east of Winnipeg, Manitoba in which soil samples taken from an alleged UFO landing area indicated a higher than normal radium count, it was deemed advisable to instruct CFB Edmonton to obtain soil samples for testing purposes from the pasture area.
4. The investigation report, photographs and soil samples were received at CPHQ on the 18 August 1967. The soil samples are presently being tested for foreign matter and a report is expected shortly.
5. The report indicates that the pasture area was visited by the DND Investigating Officer and Dr G.H. Jones from the DND Experimental Station, Suffield. A total of six circles or portions of circles, six inches in width and varying in diameter from slightly over 31 feet to 36 feet were clearly visible to the naked eye. The marks showed no signs of heat but the impressions in the ground indicated distinct pressure. An examination of the surrounding grounds gave no indication of tracks or marks leading to or from the impressions. The grass in the impression areas has been damaged and in most cases killed, but new growth is now taking place within the marks. There is no obvious physical damage to trees or shrubs in the field; nor is there any evidence which would lead to the conclusion of deliberate involvement by any person. A survey made by Dr Jones with a geiger counter disclosed no unusual radiation readings. Interviews with

.../2

a number of persons residing in the general area indicates that UFOs had been sighted in areas some two miles away from the pasture prior to the end of the month of June 1967. However, no recent UFO or unusual aerial sightings were observed during the period in question.

6. The report has been studied by members of the Operation Staff and Mr Greenwood, Director of Scientific Co-ordination in an attempt to arrive at an acceptable explanation as to what may have caused these mystery marks. From the available evidence it has not been possible to arrive at a conclusion.

7. Until the soil sample tests are concluded it will not be possible to say as to whether or not a type of fungus was responsible for the marks in question. However, the impressions which indicate a source of distinct pressure would hardly be related to a fungus action. The marks in question were not caused by a Canadian military vehicle, nor to the best of our knowledge, by a vehicle operated by either a friendly or unfriendly nation.

MEMORANDUM

V 1540-1 TD 8011 (D Ops)

January, 1968

TO: SPECIAL ASSISTANT TO MND

MINISTERIAL INQUIRY
LETTER FROM MR. W.A. SMALL
WFOs - CALGARY, ALBERTA

Reference: A. V 1540-1 TD 7234 (D Ops) 25 August, 1967.

1. Two sets of soil samples were removed from the area in question, one by the DND investigating officer and one by Mr Ray Sanders of Camrose, Alberta. The DND soil analysis divulged nothing abnormal in or about the soil. The sample taken by Mr Sanders was not analyzed by the University of Alberta as the area of investigation had been subjected to heavy rains for several weeks prior to the extraction of the soil samples.
2. The weight bearing capacity of the local terrain was not calculated as to do this accurately would involve heavy and expensive equipment not readily available in the area. The actual weight of any possible vehicle can only be estimated as being heavier than an automobile or light truck.
3. DND is unable to arrive at a solution as to what caused the impression on the property of Mr Ed Schielke of Dunham, Alberta.

F.B. Caldwell
Commander
Secretary Defense Staff

DOPS 4
W/E Robertson

1. Reference VFO report Rivers, Man.
2. The actual sighting reports conform with the appearance of a fireball, and the two observations of "explosion" noises not only fit the fireball pattern, but suggest a good probability that some of the incoming material would reach the ground.
3. The only important confusion is the reported time - 5.30 to 7.10 AM. If the times are reliable, we have other coincident meteors on VFDs. Quite possibly the times are guesses - this might be checked.
4. Prof Leitch can take up the fireball investigation.

Mr. J.D. Bridges
1928 Pandosy Street
Kelowna, B.C.

Dear Mr. Bridges:

Your letter of 2 September 1967 concerning an unidentified flying object has been passed to the office of the Canadian Forces Director of Operations for reply.

Many such sighting reports are forwarded to us from various parts of Canada each month. These reports receive careful study and where such action is deemed warranted, military officers are sent to the scene of the sighting to conduct further investigation and evaluation.

You will be aware of course that where no physical evidence is available we can only record details of the sighting and co-relate with other sighting reports made at the same time. An examination of the sighting file has shown no other reports from your area for 30 August.

Your interest in reporting this matter is much appreciated.

Yours truly,

W. W. Turner

2 September 1967

Chief of the Defence Staff,
Canadian Forces Headquarters,
Ottawa, ONT.

Dear Sir,

Referred to	<u>D O R</u>
SEP 12 1967	
File No	<u>2000-4</u>
Chg'd. to	<u>RL CFAE</u>

I do not know if there is any official interest in U.F.O. reports but if there is I should like to report an unusual sighting as told to me by my ten year old son.

At approximately 2107 hours Pacific Daylight time on 30 Aug he saw from his open bedroom window what he told me at first was a satellite. However further questioning revealed that the object was about half the diameter of the full moon, circular in shape and of a dull luminescent green. Atop the object was a much brighter but smaller green light. According to the boy it moved fairly fast in a south westerly direction, and seemed to be very high. It emitted no sound.

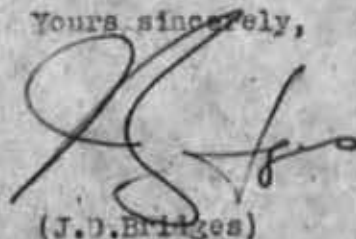

The evening of the 30th was clear with a slight smoke haze and plenty of stars visible, there was no wind to mask any noise and the street, at the time, was quiet.

At first I thought he might have seen the starboard nav light and exhaust flare of CPA's DC6-B which climbs out of Kelowna every evening around that time, but this aircraft appeared some fifteen minutes later, on the same course but quite low and emitting very large amounts of noise.

Having been a Ground Observer Corps Officer and being currently PAIO of the local Air Cadet Squadron I realize that although official policy is sometimes not announced, nevertheless every clue to this kind of thing is helpful.

Incidentally my son is a Cub and reasonably observant and repeated retelling of this story through different lines of questioning has brought out the same answers each time. I believe him implicitly.

Yours sincerely,

(J.D. Bridges)
