

Object

Date & Time
Date & heure

Details - Détails

It started to drop, i.e. move in a north easterly direction. I then got in my car + on my travel to Beauvallon I noticed it had moved about 8 miles in my approximation. As I was posting ~~to~~ in Beauvallon it continued moving until it disappeared over the horizon (i.e. trees).

There was only one of these objects. I had the object in my sight for approximately one-half hour.

The object did not appear to be moving very fast. Although the wind was blowing from the north to the south the object moved in a northerly direction i.e. (north-east into the wind).

The object appeared to be approximately 70 feet in diameter.

NRC OTT
015 VIA RCMP EDMONTON
ROUTINE TWO HILLS APR12 UNCLAS

TO: NRC METEOR CENTRE OTTAWA (TELEX 0533715)
FM: RCMP TWO HILLS, ALTA.

AT APPROXIMATELY 10PM EST ON 81APR06 RONALD BAZYLO OF BOX 487
TWO HILLS ^{7/300}
ALBERTA SIGHTED AN OBJECT WHILE HE WAS 8 MILES WEST OF MYRNAM, ALBERTA

AT THE TIME THE SKY WAS CLEAR AND STARS WERE VISIBLE. THE OBJECT
WAS DESCRIBED
AS BEING CIRCULAR IN SHAPE, GREYISH-WHITE IN COLOR WITH A
REDDISH BOTTOM.
THE ALTITUDE WAS ESTIMATED AT 1 TO 1.5 MILES. THE OBJECT WAS APPROX
70 FT
IN DIAMETER. THE OBJECT DID NOT APPEAR TO BE MOVING VERY FAST
DURING THE
TOTAL TIME OF THE SIGHTING, WHICH WAS ABOUT 1/2 HOUR, THE OBJECT
MOVED ABOUT
8 MILES. AT THIS TIME THE WIND WAS BLOWING FROM THE NORTH TO THE
SOUTH AND
THE OBJECT WAS MOVING IN A NORTHERLY DIRECTION.

NO OTHER WITNESSES.

MR. BAZYLO IS WELL KNOWN TO THIS OFFICE AS HE IS EMPLOYED AS A DISTRICT
T
AGRICULTURALIST WITH THE ALBERTA PROVINCIAL DEPT. OF AGRICULTURE.

RE: WILLIAM JAMES SCHNARE
U.F.O. SIGHTING
EAST CHESTER, LUN. CO., NOVA SCOTIA 81-04-13
FILE 81-0484

AS PER OPERATIONAL MANUAL 1-3-E-02

1. 81-04-13 1930 HOURS TO 1035 HOURS ATLANTIC STANDARD TIME
2. CLEAR - MOONLIGHT NIGHT
3. WILLIAM JAMES SCHNARE (DOB: 45-09-16)
700 VICTORIA ROAD, BRIDGEWATER, NOVA SCOTIA
4. SIGHTING OCCURRED OVER A FORTY MINUTE PERIOD WHILE SCHNARE WAS TRAVELLING WEST ON HIGHWAY 103 FROM HALIFAX, TO EAST CHESTER, LUN. CO., NOVA SCOTIA WHERE HE PULLED OVER AND PARKED ON THE SIDE OF HIGHWAY 103 TO OBSERVE THE U.F.O. PASS OVERHEAD.
5. PETER GREGORY KING (DOB: 50-02-10)
DASHILL, LUN. CO., NOVA SCOTIA
6. U.F.O. WAS CIGAR SHAPED WITH A SMALL WHITE LIGHT ON THE FRONT AND REAR. THERE WAS ALSO A WHITE LIGHT MARKING EACH SIDE OF THE SHAPE HALFWAY BACK. THE U.F.O. THERE WAS A RED LIGHT IN THE CENTRE OF THE SHAPE. U.F.O. WAS TRAVELLING FROM WEST TO EAST AND APPEARED TO BE FOLLOWING THE SAME LINE AS HIGHWAY 103. SPEED ESTIMATED AT A MAXIMUM OF 80 MILES PER HOUR. SCHNARE INDICATES ALTITUDE OF APPROXIMATELY 20,000 TO 30,000 FEET. KING INDICATED THAT HE WAS NOT SURE BUT GUESSED AT 2,000 FEET. THERE WAS NO COLOUR NOTED.
7. SCHNARE OBSERVED U.F.O. FOR A PERIOD OF 40 MINUTES OF WHICH 35 MINUTES WAS WHILE DRIVING AND FIVE MINUTES STOPPED. KING OBSERVED THE U.F.O. FOR APPROXIMATELY FIVE MINUTES.
8. SCHNARE ADVISED THAT JUST AS HE WAS DEPARTING HALIFAX AT 1930 HOURS A.S.T. HE OBSERVED TWO LIGHTS IN THE SKY THAT LOOKED LIKE ONE. SCHNARE STATED HE IS AN AMATEUR ASTRONOMER AND HE REALIZED THESE TWO STAR LIKE LIGHTS DID NOT BELONG. IT SHOULD ALSO BE NOTED THAT ALTHOUGH SCHNARE IS COLOUR BLIND HE FELT THE COLOUR WAS DIFFERENT FROM THAT OF A STAR. HE OBSERVED THESE LIGHTS GETTING CLOSER AS HE DROVE TOWARDS EAST CHESTER, WHERE HE EVENTUALLY PULLED OVER AND STOPPED. HE PULLED OVER

BY A TRACTOR TRAILER WHICH WAS OPERATED BY KING WHO WAS THE SECOND AND ONLY OTHER KNOWN OBSERVER. THE SHAPE WAS AS DESCRIBED IN PARA 6 THE ONLY APPARENT DIFFERENCE IN KINGS AND SCHNARES DESO IF THE DIFF IN ALTITUDE AND THE RED LIGHT IN THE CENTRE OF THE UFO WHICH KING SAW AND SCHNARE DID NOT BOTH ALSO NOTED A HUMBLE OR ENGINE NOISE WITH SCHNARE SAYING IT WAS VERY LOUD AND KING FEELING THAT IT SOUNDED LIKE A JET OFF IN THE DISTANCE. IT IS THE INVESTIGATORS UNDERSTANDING THE NORTHERN LIGHTS WERE VERY ACTIVE 81-04-13 HOWEVER BOTH SUBJECTS INDICATE THAT THE SIGHTING WAS NOT CAUSED BY THE NORTHERN LIGHTS.

BOTH OF THE WITNESSES APPEAR TO BE RELIABLE RESPONSIBLE PERSONS. SCHNARE IS EMPLOYED AS PHARMACEUTICAL REP FOR A DRUG COMPANY BASED IN TORONTO CANADA. KING IS EMPLOYED AS A TRUCK DRIVER FOR THOMPSONS TRANSFER COMP LTD BRIDGEWATER NS.

N80/36

Dear Sirs,

I would like to report a fireball seen approximately 9:45 p.m. I live at section 23 8-5-E Southern Manitoba and I saw the fireball start at about a 45 degree high until last seen at about a 7 degree ~~aa~~. I used a protractor to make the degree with a 90 degree straight up. The magnitude was about -1.8 magnitude and fell for 35 seconds. I saw it east in the sky, May 4, Monday.

I am an amateur telescoper and I would like additional write-ups on Meteors, Fireballs and Meteorites.

Also if you get any information on the fireball I saw please tell me.

Yours sincerely,
Kevin Penner

P.S

I went by Daily savings time in Manitoba for the time given above.

Report on a "sighting"

Observer: ~~REDACTED~~

N 81/51

R. RIVARD

Commissionaire,

Mac Kenzie Desk RDHQ. - (2-4581)

Date 6 July 1981

HOOR. 03:12 EST

Observation site;
Corner of Meadowslands Drive and
Iskhar Avenue, N. Year

Position of object sighted,
NNE BY N - (looking towards Galena Rd.)
approx angle 45°

Lighting conditions $\frac{1}{2}$ Dark
 $\frac{1}{2}$ light

Firmament; clear

Upon waking up at the hour indicated²
I happened to look out the window,
when I saw a most brilliant
object in the sky, a brilliance the
like of which I have never seen
before, like white hot, with
bluish radiances, the whole
thing scintillating.

Upon discovery it was taying
perfectly still. I do not know
of course for how long. "before"
I saw it. But of my observance
approximately 3 seconds, then
it fled with incredible speed, in
a perfectly straight path,
leaving no trail, heading
NNE BY N observed flight
approx 2 seconds.

I could not hear anything as
our bedroom windows are

closed being as our apartment
is air conditioned.

I know the object was not a
meteorite as I have seen many
and their path always curves,
leaving a trail, and they are
much lower than the sighted
object.

With my 28 years of experience
in the air force, I can
vouch it was not an aircraft.

I have a modicum knowledge of
aerial navigation to state, that
it neither a planet or a star.

Certified true
P. M. G. Ward

RECEIVED

Statement of Eva PERREAULT:

81 AUG 11

"I was in the vehicle with Laurent and Carmen. We were headed to Donnelly Corner, and to the southwest, we noticed a round orange object with a black circle in it. We stayed at Donnelly Corner for approximately half-an-hour. When we came out, it was still there. We then proceeded south on Highway #2 for a short distance and then the round object went slowly down. After that we did not see it again. We stopped for ten minutes and it never came back."

WITNESS: Cst. P.W. CALLAN

SIGNED: Eva PERREAULT

Statement of Carmen PELLETIER:

81 AUG 11

"On July 12th, we were headed towards Donnelly Corner and we saw this flashing light up ahead. It was round flashing ball with a tail on it and it was orange in colour.

We went into Donnelly Corner, we had a bite to eat.

On our way back home, about two miles south of Donnelly Corner, I noticed it again, except it was red and it had a black ball inside of it. At first we thought it was the moon but as we moved, it was moving also. We stopped the car, we watched it for fifteen minutes. The dot inside moved from the right to the left and then the whole thing went down.

We sat around for about five minutes and it never came back up."

81-07-18

On 81-07-17 a complaint was received from Bruce BOSENCE to the effect that he and his wife had seen an unidentified flying object near Hampton. The sighting occurred at approx 0827 and lasted for about sixty seconds. The observers were travelling west on Hwy 1, approx 2 kilometers from Hampton. In the vehicle were Mr BOSENCE, his wife Dianne, and their daughter Shelly, 5 yrs. old.

The object was described as round, flat white in color BOSENCE likened it to a large ping-pong ball. It was observed moving at a steady speed across the sky, then disappeared over the horizon. There were no other lights on the object.

Report forwarded to National Research Council as per Operational Manual 1.2.E.22.a.2.

81-07-27

Spoke to Mr. BOSENCE and his wife regarding this matter. He is still very insistent on what they saw. Statements obtained from Bruce BOSENCE (DOB 47-09-05) and DIANNE BOSENCE (DOB 42-04-23). In their statements they state what they saw, where and when. Story did not vary from the one they gave ten days before. Statements were taken separate from each other and the story was exactly the same.

Mr BOSENCE is a computer technician and the Vice President of a firm in Saint John. It is very doubtful this could be a practical joke as I questioned the BOSENCE and they seemed very sincere.

The district air traffic control office was called and they stated there was nothing unusual reported on radar that date, time and area. They also report no aircraft in the area at that time.

There were no further reports of sightings that day by anyone. Statements of Mr and Mrs BOSENCE attached. The sighting remains unexplained.

Statement of Bruce BOSENCE (DOB: 05-09-47) of
79 Kennebecasis River Road, Hampton, New Brunswick
U.F.O. Sighting on 17 July 81

Proceeding to work 17th July 1981 from Hampton to Saint John about 8:26 A.M. just beyond Island View Esso saw what I first took as a balloon in the general direction of Hammond River. At first thought it was stationery, only our movement making the object appear to move. As we rounded a slight bend in the road we had the object straight ahead and it was definitely moving. Disappearing from view behind a large tree about 20 sec after first sighting.

The object was round and white, with the apparent color and testure of a table tennis ball. It was low on the horizon (day sunny, few small white clouds) moving as would a jet plane coming into SJ airport. We considered it might have been the sun on a plane, but dismissed this due to the very round shape and not really that shiny a color.

From our viewpoint, it was not possible to guess a distance or size of the object.

RE—OBJET:

PAGE

Statement of Dianne BOSENCE (DOB: 23 April 42 of
79 Kennebecasis River Road, Hampton, New Brunswick
U.F.O. Sighting on 17 July 81

We were driving from Hampton to Saint John on Friday -
July 17/81 at approximately 8:30 A.M. We were on the MacKay Highway
around the Esso Service Station when my husband and I both noticed,
at the same time, what looked like a white ball in the sky. It
appeared to be moving quite slowly. I watched it while driving
along the part of the Highway between the Esso Station and the Shell
Service Station, where I lost sight of it. It seemed to go behind
the trees. It looked almost perfectly round and was all white. Our
little girl Sheeley, age 5, saw it and said it was the Man in the
Moon playing with a ball.

COMM 50N OTT

At 200:59 EDT on July 29, 1981 while travelling
in an easterly direction on highway #7 (different to
all exact direction due to many curves on highway)
approximately $\frac{1}{3}$ the distance from Kalamazoo to Lake
Lake, a very bright meteor suddenly appeared in
front and slightly to the left, coming perhaps
from the southeast and travelling in a northerly
direction. The angle of entry was approximately 3°
to the horizon and in ≈ 3 sec travelled an arc
of perhaps 30° .

The fireball was very bright & glimmering green
with perhaps a little white at the front (the
windshield is completely clear). The tail was
somewhat smaller in cross section than the
diameter of the fireball and perhaps ten times its
length with very pronounced and distinct
reddish-brown parallel bands for at least over
the width of the tail and 50% its length. The
redder bands were on the bottom side of the tail.

The tail did not have the usual streamlines
long tapered profile but had almost a blunt

termination with faint & uttering of material on the
 end which became very pronounced just before
 the meteor disappeared (somewhat similar to the
 exhaust cone of a black brand rocket just prior
 to burnout with material flying in all directions)

The estimated diameter of the fireball was
 from $1/4^{\circ}$ to $1/2^{\circ}$ of arc and due to automobile
 noises it was difficult to determine if
 sound was associated with this event.

Mounties aren't laughing at report of UFO in Alta.

SMOKY LAKE, Alta. (CP) — RCMP officials are not laughing at a recent report of an unidentified flying object in the Smoky Lake area, 80 kilometres northeast of Edmonton.

A confidential report, with pictures and ashes from a possible UFO crater, has been sent to RCMP headquarters in Ottawa.

The excitement began Aug. 22 when Pat Wilson and her husband Jim saw a strange fire burning in a field on their acreage.

"It wasn't like a normal fire," Mrs. Wilson said in an interview. "There was no crackling sound, no smell and it was a bright orange color."

They went to the site and found no fire, "just mounds of cold ashes and a weird sulphur smell."

The Wilsons are convinced the fire was a UFO taking off from their field.

"What we saw was definitely not normal," Mrs. Wilson said.

RCMP officials questioned the Wilsons and investigated the site carefully before filing their report.

"The ground was burned to a depth of six or seven inches," said an RCMP officer who wants to remain anonymous.

"The ash was grey-black with a crater-like surface. It was soft. If you stepped on it you would sink up to your ankles."

"The area was cigar-shaped, about 30 feet across. If you let your imagination get away you could almost see jet propulsion marks."

Samples of the ashes have been sent to Ottawa and to a University of Alberta professor for analysis.

Dear Sir:

Re: Edward RHODES - Report of U.F.O.
Near Cochrane, Alberta 81 AUG 22

1. Please be advised a telephone call was received at our office from Edward RHODES of 5144 Nesbitt Road N.W., Calgary, Alberta, advising that a U.F.O. had been seen at approximately 2300 hrs. (MST), on the 22 AUG 81. Apparently, several people had been camping at the Pine Grove Campground in Sibbald Flats, which is located approximately sixty kilometres west of Calgary, Alberta, when this U.F.O. was sighted.
2. The two persons who observed this U.F.O. were Barbara Joan SAWER (B: 5 FEB 35) and Edward RHODES, Age 45. Mr. RHODES teaches Meteorology at the University of Calgary, Calgary, Alberta.
3. RHODES advised the sky was clear with no cloud cover that night. The object was described as having a series of lights in white, red, blue, and green colours. Red was predominant but the white was extremely bright.
4. A photograph of this object was supplied to this office.

Yours truly,

(J.H.R.) S/Sgt.
i/c Det.

Professor Gary WHITEFORD -
Complaint of U.F.O. Sighting -
Boiestown, N.B. area - 81-08-31

1 Sept / 0155 Z

1. On the above date at approximately 22:55 hrs., a complaint was received at this Detachment from Professor G. WHITEFORD of an unidentified flying object which appeared to be over the Boiestown area. Immediate patrol was made by Cst. LUTWICK and DUFFETT to the Boiestown area, however with negative results.
2. The following information was obtained from Prof. WHITEFORD:
 - a) Date & Time of Sighting: 81-08-31 at 22:50 hrs.
 - b) Condition of Sky: Clear, starlight
 - c) Identity of Observer: Prof. Gary WHITEFORD, 434 Dufferin, Fredericton, N.B. (Phone: 454-4968)
 - d) Location of Observer at time of sighting: Durham, York Co., N.B.
 - e) Identity of other persons who saw U.F.O.: Maurine & Mary JOHNSTON, Durham, N.B. 472-6849
 - f) Desc. of Sighting: Oval, red light revolving around same, altitude undetermined, object appeared just on horizon. Only movement appeared vertical. Object was singular.
 - g) Duration of Observation: Approximate 2½ hours.
3. Evidently, according to Mrs. Mary JOHNSTON, U.F.O. had been reported appearing around same time each night for several nights.
4. Professor Gary WHITEFORD is a Professor at the University of New Brunswick and advises that he has some knowledge of U.F.O.'s and has been studying them for sometime.

RE: Possible UFO Sighting
Abb. det. case (Org)
81 SEP 08

As per our operation manual directives, please find attached a copy of a report of a UFO sighting.

The following is a short summary of the report:

- (1) Date - 81 SEP 08
Time - 0030 Pacific Standard time
Daylight saving time 7.30 Z
- (2) Condition of sky - clear
- visibility 20 miles
- (3) Identity of observer - kept secret as per wishes but found to be of good standing in the community.
- (4) Location of observer at time of sighting - on back porch of residence. Subject was unable to sleep and decided to get some fresh air.
- (5) Witnesses - NIL
- (6) Description of sighting as per diagram attached to file.
- (7) Duration of observation - The first sighting approximately 1 minute. The second sighting approximately 2 to 3 minutes, later lasted less than 1 minute.
- (8) Any other relevant info - no sound was heard
- the objects appeared to be flying between Mission, B.C. and Abbotsford, B.C. a distance of approximately 9 miles.
- no irregular movements
- appeared level with horizon
- size of objects unknown, lights only were observed.

If more information is requested, please reply:

31-09-10 0530 - A Lt approx 11:30 AM on 09 Sept 81 spoke with David Dodge 738-2855 of the Observatorium and was advised by the description that was provided that the object seen could have been an airplane with no sound being heard because it was flying away from the observer.

To the best of his knowledge there were no satellites in or around the area in question. Satellites are approx 60 miles up and are barely visible.

- A Lt approx 12:00 AM on 09 Sept 81 spoke to Mr Alberdi of the MOT area control center. He advises that radar is capable of picking up flying objects some 250 nautical miles away. However if the object flies low enough to the ground radar will not pick it up. Mr Alberdi indicates that it is likely that the observer saw a low flying airplane.

The investigating member is left with the following thoughts.

① Did the observer actually see a UFO, and if so what was it?

- One of ours?

- One of theirs?

② Would the MOT admit to a UFO sighting if they observed one or would it be kept as hush as possible? The latter was the impression I got (No one would admit to it)

**Jessie Thelma COOMBS (DOB: 02-04-02) - U.F.O. Sighting
Passekeag, Kings County, New Brunswick
Address: Passekeag, Kings County, New Brunswick
81-09-08**

81-09-13

1. On the above date at 17:10 hours, Jessie Thelma COOMBS, telephoned this office to report that she had sighted a U.F.O. on 81-09-08.

81-09-14

2. This date, I patrolled to Passekeag and interviewed Mrs. COOMBS. She is an alert person and by no means did she appear to be the type of person who would report something she thought to be untrue. She lives in the same residence as Nick MERSEREAU (73 years old).

3. Statement taken from Mrs. COOMBS. Copy attached. Also attached is a drawing she did of the object.

4. Mr. MERSEREAU, who appears bright and sincere, did not see the object. He confirmed that Mrs. COOMBS had woke him up on the night in question and related the same story. He also confirmed that the bottom far limb of the tree was shortened, it was curved down and used to be upright. The leaves on the branch above died overnight and the limbs in the immediate area of the downturned limb were blackened. I should point out that Mrs. COOMBS keeps a diary and in it she has an entry for 81-09-08 making reference to the sighting.

5. Pictures of the tree were taken and will be forwarded with the next report. A copy of the report is being sent to National Research Council, Planetary Science Section, 100 Sussex Drive, Ottawa, Ontario, K1A 0R6.

RE-OBJET:

PAGE

Statement of Jessie Thelma COOMBS (DOB: 02-04-02) of
Passekeag, Kings County, New Brunswick
Telephone: 832-5898

On Tuesday the 8th of September at about 10:10 p.m., I was about to draw the curtain on the east side of my bedroom. I noticed an object go by the south bedroom window. I watched it go out over the road and the lights went out. The object was shaped like a vertical cylinder. It was about 3 feet high, 1 1/2 feet in diameter. It had vertical wavy black lines about three inches apart. Between the lines there appeared to be red tinted glass from which a pulsating light was emitted. The object went by about three feet from the house. It produced no sound.

The next day I looked out the door at the elm tree and the lower far branch was broke off. An upper branch had all the leaves missing. The branches were black. The lower far branch was upright the day before. The morning after it was curved downward towards the road and appeared charred. The day before it had three prongs on it about 1 1/2 feet long where the telephone people cut it off. That part of the branch was missing.

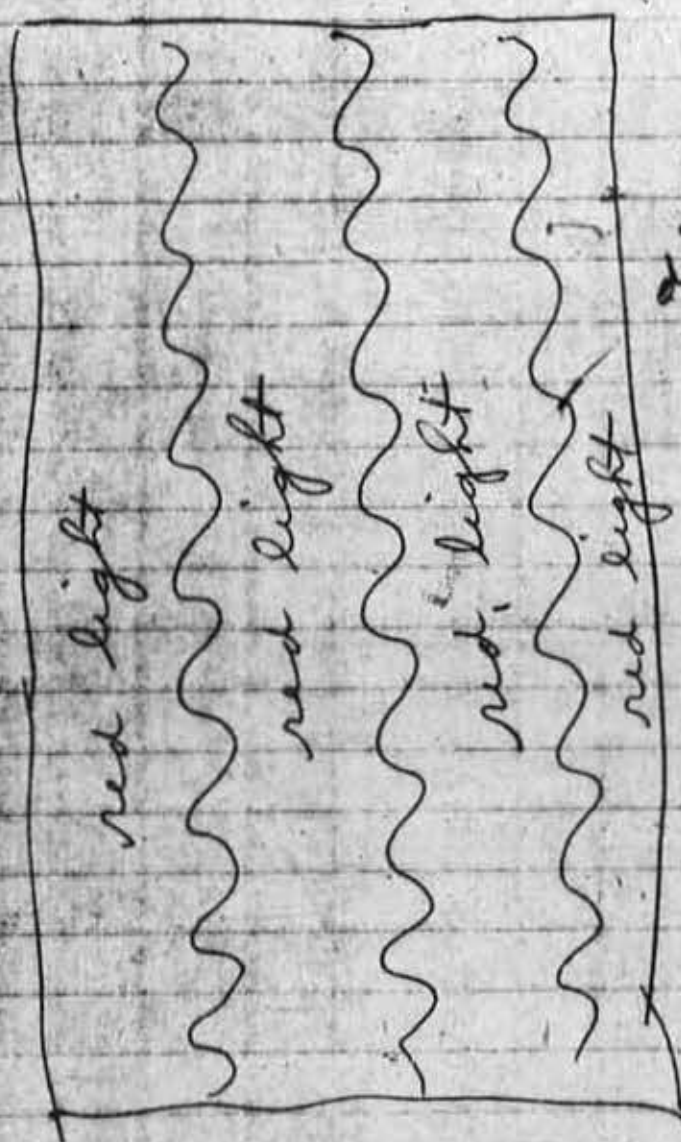

I should point out that I look at that tree everyday. It definitely changed one day to the next.

When I saw the object I went upstairs and told Nick MERSEREAU. I didn't report it to the R.C.M.P. at the time because I was sick in bed.

1. Attached please find pictures of the tree as mentioned in P.C.R. Following is description of each picture:

Picture #1: Shows the house. The tall tree between the house and road is the tree in question. I have put an "X" over the window the object passed by. I have put an "O" over the window Mrs. COOMBS was standing beside while observing the object. I have put an arrow pointing to the shortened, charred limb. It may be noted most of the trees foliage is fresh.

Picture #2: Shows the shortened, burnt limb, behind which are limbs with foliage.

Picture #3: Shows the tree limb in question is 1/2 way up trunk on right hand side.

Picture #4: another picture of tree and limb.

Picture #5: Same as picture #2

2. Negatives held on file at this point. If further pictures required, please advise and they will be ordered.

Dear Sir or Madam,

I'm afraid I hardly know ~~how~~ to begin, but the reason I'm writing to you is because, of some things I've noticed in the recent months that might be of interest to you and that have me extremely baffled. To begin with I ~~live~~ live across the street from an oil tank farm which lies on the west side of the Rideau River here in Kingston. One early morning (about 3 A.M.) in early August (I forget the exact date) it was an extremely humid hot sticky night with a light mist in the air and I, being too uncomfortable to sleep, got up out of bed and stood looking out the window at the Rideau River with the oil storage tanks in the foreground. A light which was moving over one of the tanks attracted my attention (I took it for a star before it began motion). After a short while it grew much larger and what was more surprising it was darting about extremely fast in a most erratic manner over the oil storage tanks and the river. The most striking thing about it was

its motion which was in a very slippery fluid motion like ~~quicksilver~~ quicksilver darting about erratically, the colour also was like quicksilver. I watched this thing dart about over the river and tank farm for about an hour before I grew tired and went to sleep. I woke up a couple of hours later and went to see if anything was still visible but could not see anything. I could not think of anything that would account for what it was; but that was not the end of it. About a week later (about the 8th or 9th of August) the conditions were almost the same, it was a humid, uncomfortable night once again and I again got up in the night and eventually went and glanced out the window and what did I notice, to my astonishment, but another strange object. What it appeared to be was a luminous bluish-white sphere which appeared to be about the size of a basketball. It was hanging over one of the oil tanks, occasionally it would dart about short distances always returning to its same position. It would dart over and slide along the nearby power lines then return to hang over this one oil tank. I watched this ~~thing~~ amazed, for about 2 hours until it got light when it became no longer visible ~~when~~ when dawn came. The first object I saw a week before appeared

3

to be solid, but the second object a week later was a luminous sphere which was transparent as I could see the telephone and power lines through it. It was the strangest thing I've ever seen. I've not seen anything odd since, but I'd sure be glad if you might be able to tell me what you think it probably was I saw. I know I'm not a good writer and I apologize if this seems confused. Thanks for your attention.

Sincerely
(Mr.) Kim Smith

Dear Sirs:

RE: Jack BLACKBURN - Sighting of U.F.O.
81 Sep 25 - FORT McMURRAY, Alberta

Reference is made to the above captionally noted occurrence having lasted for approximately five to ten minutes at 10:15 P.M. (daylight saving time) on the aforementioned date. The sighting was at the Fort McMurray Municipal Airport and there have been no further reports of any similar sightings received to date. The sky was clear (sunset 7:18 P.M.) and the object was described as an "intense white light" which was observed to move in an erratic fashion, that being, going one direction one instant and then another the next.

The witness is a helicopter engineer of unknown reliability, however he strongly feels that the sighting he had was not one of an aircraft common to modern day technology.

Hopefully this report will entail all that is required for your records. Should you require any further information concerning this incident please refer to our file number. We will conclude our file at the present time.

SIR-14067

RE: JACK BLACKBURN - SIGHTING OF U.F.O.
81 SEP 25 - FORT MCMURRAY, ALBERTA

REGARDING THE ABOVE CAPTIONALLY NOTED, THE SIGHTING OCCURRED 81 SEP 25, 2215 HRS. (DAYLIGHT SAVING) AT THE FORT MCMURRAY MUNICIPAL AIRPORT.

IT IS UNKNOWN IF ANY OTHER PERSON/S MAY HAVE WITNESSED SAME- NO OTHER REPORTS

FILED THRU THIS OFFICE TO DATE. AT THE NOTED TIME THE SKY WAS CLEAR (SUNSET

1918 HRS.) AND OBSERVATION LASTED FOR FIVE MINUTES. OBJECT DESCRIBED AS

'INTENSE WHITE LIGHT' MOVING IN AN ERRATIC MANNER, ONE INSTANT GOING ONE

DIRECTION THEN ANOTHER THE NEXT. ITS DIRECTION WAS NOT GRADUAL IN CHANGING,

ON THE CONTRARY VERY SUDDEN.

THE OBSERVER IS A HELICOPTER ENGINEER OF UNKNOWN RELIABILITY, HOWEVER

HE STRONGLY FEELS THAT THE SIGHTING HE HAD WAS NOT ONE OF AN AIRCRAFT COMMON TO MODERN DAY TECHNOLOGY.

FORWARDED FOR YOUR INFO. WRITTEN REPORT TO BE FORTHCOMING TO N.R.C. PLANATORY SCIENCES SECTION, OTTAWA, ONT.

RE: - OBJET:

U.F.O. SIGHTING
81 OCT 04
Hwy 23 north of Vulcan, Alberta
Karen BUTCHER

File / Dossier	(4714-1)
Encl. / P. i.	
Dis. To / Trans. à	D. Cardinal
Released by / Cloué par	NH/10
Index / Indexé	
Initials / Initiales	

On the above noted date BUTCHER was on her way back from Calgary to Lethbridge, Alberta. While BUTCHER was driving on Hwy 23 approx. 15 miles north of Vulcan she observed a white light following behind her. Copy of BUTCHER's statement attached. BUTCHER did not stop her vehicle and continued until she arrived at Vulcan. At this time she contacted Cst. J.A. HENDRY on main street in Vulcan. A statement was obtained and then a patrol was made north of Vulcan on Hwy 23 where BUTCHER claimed she saw the U.F.O.s. At this time no other vehicles were seen on the Hwy. The sky was clear and no other objects were seen at this time. BUTCHER continued on her way back to Lethbridge without further incident.

It is not known the reliability of BUTCHER. She was by herself at the time of the sighting. Due to the time of the sighting there was very little traffic on Hwy 23. There were no other reports of U.F.O. sightings on this date in the Vulcan area.

BUTCHER can be reached at 720-7th Ave. South Lethbridge, Alberta, Phone 1-403-320-8602.

If you require any further information please contact this office at 1-403-485-2266.

Yours truly,

(J.J.B. Wiebe), Sgt.
i/c Vulcan Det.

(J.A. Hendry), Cst.
Vulcan Detachment

Statement of Karen BUTCHER (B. 21 MAR 61)
Statement taken at 04.30 HRS.

On October 4th, 1981 I left Calgary about 2:00 am - I turned at High River & came down on Hwy 23. I was on my way to Lethbridge.

Before High River I pulled over & had a sleep. I ~~didn't~~ slept for about 45 minutes & then continued on my way.

About ~~there~~ half hour ago I noticed white lights shaped something like a kite.

They seemed quite high off the highway. I looked in my rear view mirror, my side mirror & even looked behind over the back seat.

It was too hard to tell how far away they were but they did not get any closer.

To compare the lights to the car headlights I would say they would have been approx 1 Km behind me.

About 7 or 8 minutes ~~more~~ before I came into town I saw 6 white lights, 1 yellow light & 1 red light altogether.

Just before I turned into town the lights seemed to disappear.

I then turned into Vulcan & found a phone & phoned Lethbridge R.C.M.P.

Shape of objects →
small circles
indicate lights.

~~Six~~ white shaped objects
One yellow shaped object
One red shaped object.

Witness J. Hendrix 42

OF ISLAND LAKE WITH HIS FAMILY THEY HAD JUST ENTERED THE BAY
AND THIS OBJECT APPROACHED THEM AS DESCRIBED EARLIER IN THIS
REPORT THE OBJECT WAS FLYING ANYWHERE BETWEEN A COUPLE OF
FEET OFF THE WATER, UP TO TREE TOP LEVEL UPON SEEING THE
OBJECT PUNCH TURNED HIS BOAT AROUND AND STARTED HEADING FOR
HOME THE OBJECT IS DESCRIBED AS BEING CONE SHAPED WITH THE
POINT AT THE TOP AND ROUNDED AT THE BOTTOM LIKE A LIGHT BULB
WHEN THE LIGHTS WERE FLASHING HE COULD SEE THE FILAMENT INSIDE
THE OBJECT FOLLOWED HIM FOR ABOUT 1/2 HOUR OR A DISTANCE OF ABOUT
4 MILES THE LIGHTS WERE BRIGHT WHITE AT THE TOP AND BLUE
LIGHTS IN THE CENTRE WEATHER CONDITIONS AT THE TIME WERE
CLOUDY BUT HE COULD SEE THE STARS AND SOME MIST ON THE LAKE
PUNCH SOUNDED EXCITED AND A LITTLE SCARED AND DID NOT SEEM
INTOXICATED

CST COCHRANE A MEMBER OF NORWAY HOUSE DETACHMENT IS SCHEDULED
FOR REGULAR PATROL INTO ISLAND LAKE FROM 81-10-22--26 AND
WILL INTERVIEW THE WITNESSES AT THAT TIME A REPORT WILL THEN
BE COMPLETED AND FORWARDED TO DIVISION HQ AND THE

APPENDICES ATTACHED

APPENDIX "A"

Albert PUNCH (BD:17JUN46)

APPENDIX "B"

Elizabeth Violet PUNCH (BD:31JAN52)

81-10-03

1. On this date Cst. D. GORMLEY received a call from Thompson Telecoms who advised that one Albert PUNCH of Garden Hill, Island Lake had reported the sighting of an Unidentified Flying Object. Cst. GORMLEY contacted PUNCH immediately at which time PUNCH briefly related the details of the sighting. PUNCH was advised by Cst. GORMLEY that the writer, Cst. C.R. COCHRANE was scheduled for an inland patrol 81-10-22/26 and would investigate the incident at that time. Telex 81-113 was forwarded on the incident as per Operational Manual I.3.E. 22.a,

81-10-24

2. On this date a statement was obtained from Albert PUNCH which is attached as APPENDIX "A". In his statement PUNCH advises that he observed the object at approximately 20:45 hours. The weather was clear and calm at the time and it was dark. PUNCH had taken his wife and young children out cutting wood and were just coming home travelling south approximately 7 miles North of Garden Hill. The object was coming from the North at a high rate of speed. PUNCH stopped his outboard motor to determine if the object had any sound which it did not. PUNCH restarted the motor at which time the object began coming towards them.

PUNCH advised that the object came within a few hundred yards from the boat and the outboard motor stopped completely. The object lowered to approximately four to five feet from the surface of the water and it was at that time that electric arcs jumped from between the water and the object. The object then

...2

RE - OBJET

81-2175

PAGE

2.

Albert PUNCH

moved up again and rapidly moved back and forth in the sky.

PUNCH describes the object as being at least 200 feet in diameter. The object had bright lights around it somewhat similar to that of an arc welder flash. There was also a blue flashing light on top of the cone shaped object. The bottom of the object was convex rather than flat. There was also no detectable noise from the object.

81-10-25

3. On this date a statement was obtained from Elizabeth Violet PUNCH which is attached as APPENDIX "B". Elizabeth PUNCH relates a very similar sequence of events as does Albert PUNCH.

81-11-10

4. It is the opinion of the writer that both Albert and Elizabeth PUNCH are sincere in reporting what they observed. They both appeared to be in awe over the occurrence. It is not felt that the story was concocted by the PUNCH's.

5. No statements were taken from the children due to their very young age. No report to follow.

CONCLUDED HERE:

Albert PUNCH has
Garden Hill, Mo.

Statement of Albert PUNCH.

DOB: 17 JUN 46

ADD: Garden Hill, Manitoba

I am Craig COCHRANE of the RCMP
and I am investigating an incident
that occurred on 8-10-03 where
you saw an unidentifiable object
in the sky.

Q: What can you tell me about this?

A: It was about 8:45 P.M., it was
dark but clear. There was no wind.
I was out in the boat with my
family. We were coming home
from cutting wood. My wife
saw this object first. It was
coming from the North. It was
travelling quite fast. I stopped
the motor to see if it had any
sound. It didn't. It was quite
a ways from us at that time. I
started the motor and took off
again. That's when we saw it
starting coming towards us. It
only came within a couple
hundred yards of us. That
is when the motor quit
on us. Just dead stop.

APL

A.P.

It gradually came down to about 4 or 5 feet from the water. That's when you would see arcs sparkling along the bottom of it like electricity. Then it went up again and just moved from shore to shore. It was just like a blink of the eye and it would be in a different spot. This was right in Cochrane Bay.

It was about at least 200 feet in diameter. It had lights all around it almost like a weld flash. It put your eyes. There was a light on top that was a bluish colour, really bright. It was flashing all of the time. It was cone shaped. It came up to a point. There was no noise at all. It was kind of rounded out on the bottom rather than right flat.

I paddled to shore to get my wife and kids to the beach and it left. I could see the shining of the lights on the other side of the island. I tried my motor, it

CR

A.P.

3

started and we went on home.
We never seen it again.

DOB: 31 JAN 52.

in regards to the sighting of an
unidentifiable object you seen in
the sky on 8-1-0-63.

Q: What can you tell me about that?

A: I was around 8:30 P.M. I was
in the boat in Cochrane Bay with
my husband and three young boys.
We were coming back towards Garden
Hill, we had been out to cut some
wood. It was a clear, calm night and
it was dark already.

I looked back, to the North, to talk
to Albert who was driving. That
is when I seen some blue light.

I was about two hundred yards
from us then. I looked at it
and it was going back and forth. That's
when I told Albert to start the
motor and go. He had stopped the
motor to see if we could hear
noise. We couldn't. He started
the motor and went quite
a distance. I wasn't getting
any closer to us but was

CR

E. N. P

still moving back and forth. ~~At~~
 That they were down close to
 the water and that is when our
 motor suddenly stopped. A boat
 thought maybe he hit a rock
 and he paddled to the shore.
 When we got to shore he checked
 the propellers and found that it
 hadn't been a rock. I told him
 to start the motor to see if it
 would go and it did. We were
 still seeing that light all the
 time but it had went back up
 higher.

We went around one side of
 this big island and we could
 see the glow on the other side
 of the island. We never seen it
 again after that.

It was core stopped. About
 maybe fifteen feet across the
 bottom. It had a flashing
 blue light on the top that
 was going all of the time. When
 it came close to the water it
 got lights around the bottom.
 I could see the sort of flaring
 up. It was just moving back and
 forth. CR

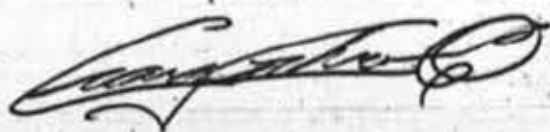

E. V. P.

3

There was no noise at all
coming from this thing. It was
maybe ten feet high.
That's all I can tell you about it.

Dear Sirs:

This is directed to the Royal Canadian
Air Force personnel on your staff.

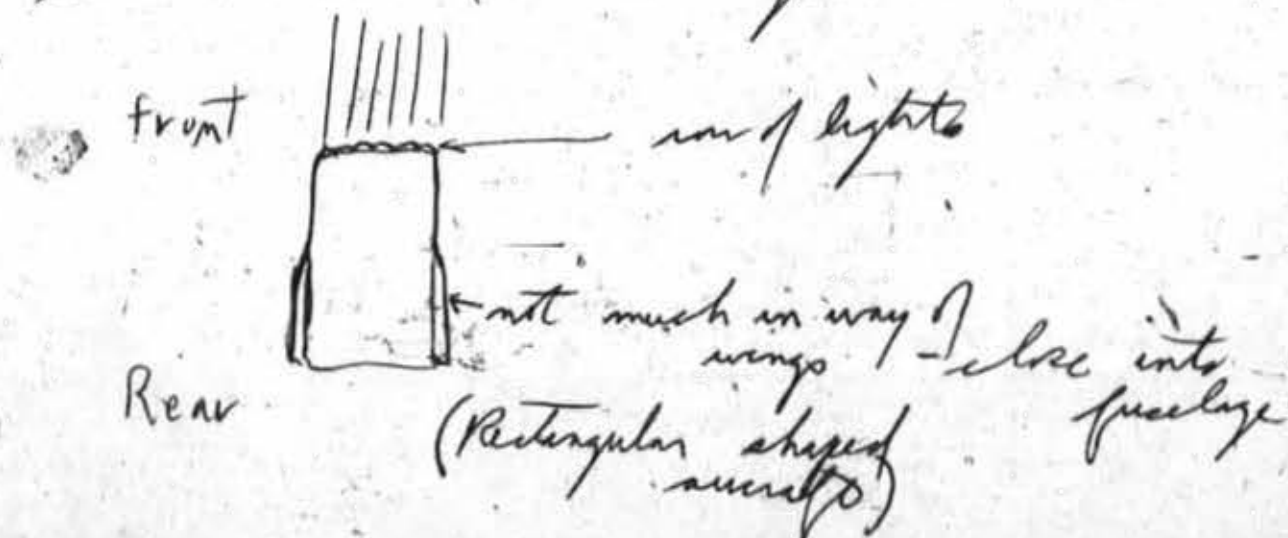

Saw some unusual looking aircraft last
November 1980 in Woodbridge, Ontario and
wanted your opinion as to what they were.

There were three aircraft, fairly large -
they came out of the north or northwest
headed for Toronto. I didn't make a drawing
at the time or take a photograph, so
can't recall much detail.

They were rectangular in shape, longer than
wide, no wings much to speak of - unlike
conventional aircraft. From the side the
fuselage looked square shaped and streamlined
like jets. One of most unusual features
were the row of lights shining from the
whole front portion of the aircraft. It
was toward evening when they went over
Woodbridge. It's hard to judge the size
of aircraft maybe 150 feet long by 80 ft
wide.

Insert -

a drawing of the underbelly of one of aircraft that went over Woodbridge in November 1980

The 3 aircraft didn't go over together. One went over first and the other two followed, or vice-versa - it's hard to remember. The craft looked futuristic. They went over at quite a speed but long enough to get a look at them. They were low flying.

Is there anything in the R.C.A.F. like the above mentioned craft with those dimensions - experimental or otherwise? How about the U.S.A.F.? Were there any reports of strange looking craft in the area at the time from other residents that you may have heard of? Did Downsview Airport air traffic controllers hear anything from pilots of such aircraft in November?

I'm just interested in finding out what the craft were. Sorry my!

description isn't detailed enough. I should
have made a drawing at the time. Hope
to hear from you in the near future.
If you can't answer my question
as to what they were, can you give
me an address for the U.S. A.F. - maybe
Edwards Air Force Base?

Yours sincerely,
Charles Morrison

RE - OBJET: Peter SPEIGHT
Assistance to National Research Council

N81/128

1. Further to Telex GIS 1119 sent to National Research Council Meteor Centre, Ottawa, a follow-up interview was conducted on 81-11-04 at the subject's residence of 90 Gilder Drive, Scarborough, Ontario.

2. The time of the sighting was 1510 hrs., 81-11-03. Peter SPEIGHT was the only person who sighted the object. He described it as a round silver disc, dull in appearance with no lights or vapour trail. It was spotted out of the West proceeding in an easterly direction. The subject estimated that it took the object approximately ten seconds to cross the horizon. It had an altitude of approximately one and one-half miles over Lake Ontario. The subject stated the sun was not obstructing his vision. The sky was clear at the time.

81-11-09

3. Ray FERGUSON, Watch Supervisor at the Toronto International Airport, stated nothing unusual was reported on the date in question. He indicated, however, that aircraft landing in Malton on that afternoon were approaching over Lake Ontario.

INVESTIGATOR'S COMMENTS:

4. This investigator was impressed with the cooperation on the part of Mr. SPEIGHT. There was no evidence of fabrication on his part.

To Whom it may Concern:

30 Nov.
0445Z

Please find attached copy of this detachments report of a U.F.O. sighting in the R.M. of Gilbert Plains, Manitoba. The sighting took place at approximately 10:45 P.M. on the 81-11-29 Central Standard time. It was a clear night. Ronald Henry HALE (BD: 9 MAY 23) of NE 29-24-21 RM of Gilbert Plains witnessed the UFO and statement is attached. Statements were also obtained from Helen Young HALE (BD: 21 OCT 27) and Trevor Gordon HALE (BD: 16 OCT 57) as well as Penelope Lynne WINDSOR (BD: 9 MAR 42) and her husband Robert William WINDSOR (BD: 9 OCT 37), with copies attached. Diagrams were made by each person who provided a statement except for Penelope WINDSOR. Description of the UFO is contained in each of these statements along with duration of sighting. Robert William WINDSOR states that the same object was visible the next morning at 6:00 AM in a different location from where it had been observed the night before. Forwarded for your information and attention.

Yours truly,

(W.G. BAKER) Sgt.
i/c Dauphin Rural Det.

Taken 81-12-01 RM of Gilbert Plains at 9:27 PM

On Sunday November 29th, 1981 at 10:45 PM to 11:15 PM I looked out of the door of our house towards the south-east and saw this bright light in the air at times the clear light was bright and sometimes it was dim. It also moved up it was hard to say how far it moved as, I would say 10 to 15 miles from our place and also there were blue lights and red on the outside of the big clear light, also orange lights seemed to point down for several feet until they met in a funnel pattern.

Statement of Helen Young HALE (BD: 21 OCT 27)
Address; NE 29-24-21 RM of Gilbert Plains, Man.
Phone 548-2038
Taken 81-12-01 at RM of Gilbert Plains, Man. 9:28 PM

On Sunday evening November 29th, 1981 at approximately 10:45 PM my husband had gone outside and noticed a very bright light in the sky. We had company here for the evening and they had just left a few minutes before. Ron, my husband, did not notice this until they left. Both myself and our 24 year old son ran outside and also noted this bright light - as we watched by naked eye we saw this object moving horizontally and vertically. Trevor, our son, and myself ran in and got a set of binoculars each to observe it. By the naked eye it looked like this. A large light with an appendage of similar light and also red, orange and blue flashings around both top and bottom.

By binoculars the object looked like a disk with lights of above colour and flashings all around it. Flashing lights appeared to be all around dish. We watched this until approx. 11:15 - all this time this object, although moving up and down and going back and forth horizontally it seemed to come back to around the same location. By 11:15 it seemed to be getting further away but was still a bright light.

Phone 548-2038
Taken 81-12-01 at RM of Gilbert Plains, Man. 9:29 PM

I was in the house at the time of the siting. My father was outside and came in the house and told us he could see a strange light in the sky. I went out and took a look and then went in the house and got my binoculars to get a closer look. The light appeared to have a red light on one side and a blue one on the other. While watching it, it would go straight up in the air from where it was sitting and then it would come back down. It appeared to be a saucer shape but would change to a half diamond at certain times. I watched it for 30 minutes.

Statement of Penelope Lynne WINDSOR (BD: 9 MAR 42)

Address: SW 6-25-21 RM of Gilbert Plains, Man.

Phone: 548-2672

Taken 81-12-01 at RM of Gilbert Plains, Man. 2200 hrs.

Upon arriving home Sunday evening November 29, 1981 approximately 10:45 PM our neighbours phoned us to ask us if we could see something in the sky towards the southeast. When we first looked we couldn't see just what they were talking about. About 10 minutes later we went and looked again spotting it right away. It looked to me like a lot of flashing coloured lights. Red lights and blue and a white light seeming to be circling like a beacon. It looked like it was moving up and down. We didn't have any binoculars on hand so I found it very hard to tell what shape it was with the naked eye. We watched it on and off for approximately half an hour.

Org. Sgd.: Penny WINDSOR

Org. Wit.: Cst. R.H. DESJARDINS
Dauphin Rural Detachment.

Statement of Robert William WINDSOR (BD: 9 OCT 37)

Address: SW 6-25-21 RM of Gilbert Plains, Man.

Phone 548-2672

Taken 81-12-01 at RM of Gilbert Plains, Man. at 2210 hr.

At approx. 10:50 PM on Sunday November 29th we had just returned from our neighbors, Ron & Helen HALE - as we got in the door the phone rang. It was Ron HALE phoning to look out and see this bright object in the sky - S.E. direction from our house. I spotted this object which didn't look like a star but had two red and blue circling lights - this object looked like this. The lights appeared to be circling this object. I observed this bobbing up and down object until approx. 11:45 going further S.E. At 6:00 A.M. November 30th, I got up and looked out and saw this same thing only it was situated in the N.E. and appeared much higher but the circling lights were still present.

R.H. of Hilbert Plains, Man

548-2671

* At approximately 10⁵⁰ P.M. on Sunday
Nov 29th we had just returned from
our neighbors - Ron & Helen Hale - as we
got in the door the phone rang - it
was Ron Hale phoning to look out
& see this bright object in the sky
- S.E. direction from our house -
I spotted this object which didn't look
like a star but rather red & blue
circling lights - this object looked like three
○ The lights appeared to be circling this
object & I followed this thing
up & down object until approx 11⁴⁵ -
at this time it seemed to be
going further S.E. at 6¹⁵ P.M. Nov 30th
I got up & looked out & saw the
same thing - only it was situated
in the N.E. & appeared much higher
but the circling lights were still present.

January 16 thru 31 SHEET TWO.

M 45 1 101

30 7 PM LP 2 PF Ecorse 2 BB 2 were black spots.

30 8.05 P. allen PK 1 PF Detroit 1 PF Ecorse 2 BB 4 PF one dark PF

30 10 PM LP 4 BB 1 Planform.

31 3 Am Detroit 1 BB looking toward Detroit Mile in from Ecorse Mich
Detroit river.

LP 7 PF Southgate 1 PF Ecorse 1 BB 6 PF Black spots in all PF why?

Note to my knowledge, of what happened one evening in nice weather
3 Children Boys around ten years of age were checking at 7.45 PM
one evening what i was seeing thru scope one boy noticed a black
band in my living room and asked me if i had someone staying with
me i said no. he said look at shade in living room. there was
a black band floating thru my living room. had one at 3.53 am
one morning checking a kitchen window as i was eating breakfast.

February one thru 15 1981

31 9.02 Pstangelville bb bottom 1/2 black section floats on top part
31 9.19 p krok bb then broke up to two separate rect sections.
31 9.30 to 9.55p krokbb ellisville bb, sleepy hollow 2 miles in a bb toward L
noticed a light in from road in field plowed today/ had lee mueller with me and
school chum of his we watched with scope and i got 5 cell flashlight it would
dim and then bright had thin round disk with small lights clock like on rim of
disk moving away from it main light off reddish kids went when we didnt see it
i stayed checking sky i got threebbellisville krok and clear east lake mich way
THEN SCOPE LOCK BROKE OFF AT THIN METAL CAME IN RECORDED SAME. JUST AFTER 9:30
9:30 Q). TO 9:53 & LEE AND BUDDY RETURNED CAME HAD IT REDDISH IN FIELD NORTH OF
PINE GROVE NEAR SLEEPY HOLLOW ONE MILE NORTH EAST OF SY. STANGELVILLE GOT LIGHT
WINKING WITH % CELL FLASHLIGHT DULL STEEL REDDISH I WORKED IN STEEL AT FORD MO
A WHILE.

NOTE LEE MUELLERS BUDDY HAD SEEM THIS BEFORE IN FIELD AND LEE HAD TO GO HOME
SO I WATCHED IT A FEW MORE MIN AND PLAYED LIGHT IN SKY TOWARD PLANFORMS.
THEN IT WINKED OUT?

EVEN HAD IT WINKING OUT THEN BRIGHT AS I PLAYED MY FLASHLIGHT TOWARD IT.

BACK FROM TUCSON FOR NOV 24 LEAVING

3 am sky check for WISCONSIN

1 414 388 3693 OR

ALBERT MUELLER R.R. NO 2 BOX 168

KEWAUNEE WIS 54216

TILL ABOUT 10 of DEC then BACK HOME.

BY CAR TO TAKE SCOPE WITH ME.

ITS A HOT UFO AREA,

P.S. A F WANTED TO PUT ME THERE IN 76

BUT U.S. ARMY SAID NO TO ME FOR CANADAN REPORTS
SAID RUSSIAN GETS IT (HA....)

TOOK USAF FROM 63 to 76 SEPT OR SO TO FIND
FROM NOW RETIRED FORD OFFICE OF SPECIAL INV.
MAN THAT I WAS OUT THERE WITH TWO FORD HUARDS
AND TOLD THEM IT WAS JUST A UFO.

P.S. ON LOCAL POLICE ORDERS I STOPPED MAKING

A COPY FOR CENTER FOR UFO) HYN)

JUST MY LOG AND COPY IN TYPED ONLY 1 GOD.
TO YOUR OUTFIT.

M \$% M 45 1 101.

THIS IS MY ORG 1953 Remington use office
one in coal bin for typing.

GOING DOWN TO TUCSON, TO SEE A DIEING BUDDY
ITS BONE CANCER, EXPECTS TO BE UNDER BY DE

THE U.S. MILITARY WANT MY SMALL GALLSTONES
OUT, BUT IM 240 .

anyone in windsor or so i could see and get

CHENODEOXYCHOLIC ACID

THIS DRUG IS A POTENT GALLSTONE DISSOLVER

THATS BEEN HEALING PEOPLE IN GERMANY

AND OTHER COUNTRIES IN EUROPE SINCE

1974 ,

I WOULD PAY FOR IT, I HAVE DIABETIC
CONDITION,

Dear Sir:

1. Please be advised that on 81-12-09 a report of a U.F.O. sighting was received by this Detachment.
2. Further investigation revealed that Lloyd McIVOR (BD: 51-11-15) of Sandy Bay Indian Reserve, Manitoba, was out nightlighting with three other residents of Sandy Bay Indian Reserve, Manitoba, on 81-12-03. At approximately 03 30 hrs, the group was located approximately six miles south and six miles west of Amaranth, Manitoba, in the Big Grass Marsh. It was at this time that McIVOR and Theodore Oliver RICHARD (BD: 64-02-06) observed the reported U.F.O. through rifle scopes. The object that was observed is described by both McIVOR and RICHARD in their attached statements and diagrams.
3. This matter is being closed at this point and will not be reopened, unless you require further assistance.

Yours truly,

G.V. Wright
(G.V. WRIGHT) Sgt.,
i/c Amaranth Detachment.

Statement of Lloyd McIVOR (BD: 51-11-15)
Sandy Bay Indian Reserve, Man.
Taken at McIVOR residence P.C. 477
81-12-10
21 25 hrs

Lloyd, I am Cst. Kevin HARRISON of the R.C.M.P. in Amaranth and I am investigating a sighting of an U.F.O. on 81-12-03. What can you tell me of this?

A. We were driving along near the Big Marsh. We saw lights flashing. We thought it was some other guys taking the guts out of a deer. I don't know how come they were in the marsh. We came north and the flashing stopped. We got almost to the road, it was pretty close. There was just two big orange lights. We stopped on the road and they were coming straight at us. I used a scope from a rifle to look at it. I told him what it looked like. We jumped in the truck and started running. Guys kept looking back and it kept getting closer, but as soon as we got to the house it just went like that. That's it.

Q. Who were you with that night?

A. My brother Charlie, my brother Wayne and Oliver RICHARD.

Q. Did they all see this?

A. Yeah.

Q. Which one saw it through the scope?

A. Oliver.

Q. Can you describe what you saw through the scope?

A. Besides them big oranges lights, it was wide. It had some kind of stripe right through the middle. There was two lights pointing to the ground underneath.

Q. How big was it?

A. It's bigger than my house anyway.

Q. Could you tell what colour it was?

A. It kind of looked like it was white.

Q. Did it make any noise?

A. I couldn't hear it, the truck was too loud.

Q. How fast would you say it was moving?

A. It wasn't coming very fast. It was just moving.

Statement of Lloyd McIVOR (BD: 51-11-15) Cont'd

Q. Do you know of anyone else who has seen this?

A. There's quite a few that mentioned seeing that.

Q. Is there anything else you wish to add to this statement?

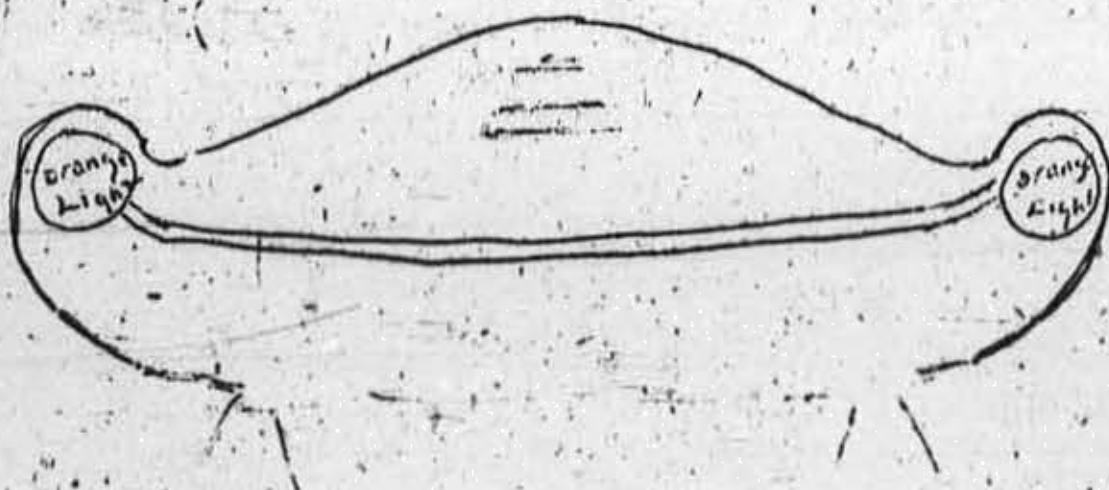

A. About a week before we saw a big orange light in the air.
When Wayne shone the spot light on it, it just disappeared
into a blue dot.

K.L. HARRISON, Cst.

ORIG. SGD: Lloyd McIVOR

81-12-10

21 41 hrs.

Lloyd McIvor
(Sutherland).

Statement of Theodore Oliver RICHARD (BD: 64-02-06)
Sandy Bay Indian Reserve, Man.
Taken at Joseph McIVOR residence PC 477
81-12-11 13 10 hrs

Q. Oliver, I am Cst. Kevin HARRISON of the R.C.M.P. in Amaranth and I am investigating an U.F.O. sighting by yourself. What can you tell me of this incident?

A. We were down someplace over there. We were spotlighting when we saw something. So we got to the road. We stopped there for five or ten minutes. So we took a look with a scope gun. I saw this thing coming. So, I gave that scope gun to Lloyd. He said its coming toward us. We got in the truck and drove away. That's all, we came home.

Q. What time was this at?

A. I guess it was around 3:30AM.

Q. What was the weather like?

A. It was kind of windy and cold. There were no clouds.

Q. Do you remember what day it was?

A. I can't remember.

Q. Can you describe what you saw through the scope?

A. I saw shaped like a hamburger. There were lights on each corner. There was like a stripe there in the middle too.

Q. What colour were the lights?

A. They were yellow.

Q. Were there any oather lights?

A. I don't know. I only saw those lights there.

Q. What colour was the body?

A. It was white.

Q. What colour was the stripe?

A. I don't exactly know. I only saw there was something there. I think it was black.

Q. Who else was with you?

A. Lloyd, Wayne and Charlie McIVOR. They're brothers.

Q. How far away would you say it was when you saw it through the scope?

A. About a quarter of a mile.

Statement of Theodore Oliver RICHARD (BD: 64-02-06) Cont'd

Q. What happend to it?

A. We just drove away.

Q. Did it make any noise?

A. I don't know. The truck was on.

Q. Is there anything you wish to add to this statement?

A. No.

K.L. HARRISON, Cst.

Chief of the Air Staff,
Royal Canadian Air Force,
Department of National Defence,
O t t a w a, Ontario.

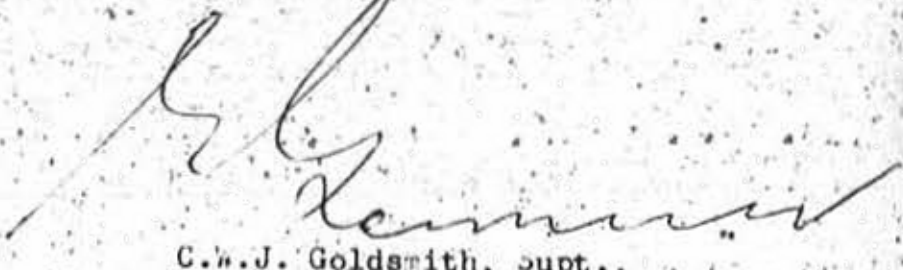

Re: Reporting of Vital Intelligence.

I refer to your letter dated June 19th, 1962, concerning a reporting made by our Alberta Division to CANAIRHED.

2. This reporting concerned the sighting of a fireball or meteor in Alberta and was reported to CANAIRHED in accordance with our present instructions.

3. * * * Earlier this year this Force agreed to assist the National Research Council, Associate Committee on Meteorites through Mr. J.C. ARNELL, Scientific Adviser to the Chief of Air Staff, for reporting of fireball sightings by members of this Force in the field.

4. As certain misunderstandings arose as to the proper reporting of information under this heading and those under the Reporting of Fireballs or Meteors - both instructions concern unidentified flying objects - the matter was again referred to the Scientific Adviser for the Chief of Air Staff on file 004-74/57 (CAS/SA). In order to provide consistency and have a clearing house for all reports, it was arranged whereby an information copy of all messages for fireball reportings would be sent to CANAIRHED OPS.

Unidentified Flying Objects

1 Attached is a copy of a letter received at AFHQ from the Superintendent of "K" Division, CIB, Edmonton, to Professor H. Folinsbee, University of Alberta. The reason for the report being addressed to the University is not known but, presumably, the CIB detachment have some reason for referring the matter to Professor Folinsbee.

2 The RCMP here have been contacted and advised that reports of UFOs should be directed to your Headquarters instead of AFHQ for collation and reply.

"I" Directorate
Security and Intelligence
Royal Canadian Mounted Police
Headquarters, Tremblay Road
Ottawa

Attention: Assistant Director, Superintendent M.H. Kelly

Reporting of Vital Intelligence Sightings

- 1 As discussed, Supt. E. Porter, IIC "K" Division C.I.B., Edmonton, has addressed correspondence to Commanding Officer CANAIRFD. Presumably, this is the address recorded in his instructions for forwarding reports on either vital intelligence sightings or on sightings of unidentified flying objects.
- 2 Approximately two years ago, AFHQ delegated responsibility for collation and investigation of reports of UFOs to the AOC, Air Defence Command. Delegation with respect to UFO reports was compatible with the reporting of vital intelligence under the provisions of a Canada/United States agreed reporting system. This system, JACAP 126(D) - Communications Instructions for Reporting Vital Intelligence Sightings (CARVIS/MERINT), has been adopted by DUT, all Canadian Services and, I believe, your Department. Instructions have been promulgated to all concerned outlining the procedures to be used in reporting as expeditiously as possible to the AOC, Air Defence Command any matter which may be of intelligence value. Reports can be sent by mail, by wire or by telephone on a collect basis. The mailing address is AOC, Air Defence Command, RCAP Station St Hubert, P.Q.
- 3 You may wish to review your instructions to your field units and, for reports of this nature, revise the address to that stated in the above paragraph.

This sighting is very probably a meteorite that was large enough to survive re-entry.

The only man-made vehicles that would be in trajectories that would cover the latitude would be ~~one~~ of the Discoverer series launched from Vandenberg AFB. This might possibly represent the re-entry of and disintegration of one of these vehicles.

NORAD should have the records of all satellites and would be able to check dates.

DIARY DATE

SET FOR

1. On the 18-3-61, while sealing on Coronation Gulf at Lat. 67°58' and Long. 114°55' observed an object descending to earth in a southeast direction at approximately 2000 Z.. The object at first left a contrail but as it got closer to the earth it burst into a bright flame, leaving a smoke trail. The object disappeared behind one of the Couper Islands, followed by two explosions a few seconds apart. The contrail remained for some time but the smoke trail disappeared shortly after. was hunting in the same area as corroborated his report.

2. who was travelling on sea ice at a position, 67°46' Lat. and 114°20' Long. reported hearing a single explosion at approximately the same time. He observed the contrail and the smoke trail after hearing the explosion, but did not see the object. The smoke trail indicated that the object struck on the mainland southeast of him.

3. who was near the ASIAX RIVER at approximately Lat. 67°20' and Long. 114°05' reported hearing the explosion which he said came from practically due north from where he was. He did not see the object only the contrail and smoke trail.

4. who was near the mouth of the KUGARYUAK RIVER at approximately Lat. 67°42' and Long. 113°18' reported hearing the explosion practically due west. He seen the object and described it as being shiny and oblong. When the object got closer to the earth it burst into flame.

5. Mrs. a resident of Coppermine, reported seeing the object from the settlement. Her description of the object was identical to that of and

6. Taking the various positions that the object was seen and heard from, would indicate that it struck at a point approximately 67°35' Lat. and 114°10' Long.. A search was made in this area by dog team with negative results. There was a light snow fall and a ground drift in this area on the 19-3-61 which would obscure any evidence to show where it struck.

7. The Department of Transport Radio Station acting local Ground Observer Corps were notified of this object on the 19-3-61.

8. This file will be considered as shown hereunder, subject to be reopened should any further information come

Unidentified Objects found in Shelburne County, N.S.

The foil described in your report is similar to that dropped on occasions by aircraft of the USAF. Normally, the minimum length is 9 inches, but it is possible that those referred to are parts of strips broken off because of tangling in trees. Without examination of the objects, it is not possible to be more positive.

The source of the plastic sheets is not known nor can their probable use be deduced from the information given.

Min 4
EWB-2

I cannot identify the plastic sheets. They may be from a net balloon and DOT Met Service could advise on this. S/L in EMB/HQ could advise on this. S/L in EMB/HQ could advise on this. S/L in EMB/HQ could advise on this.

Shelburne Co., N.S.
(SHELburne DETACHMENT CASE).

FORWARDED herewith are copies of our file in connection with the above. Please observe that R.C.A.F. authorities at this point have no information regarding the origin of the strips of tin foil and sheets of plastic located in this instance. It would appear possible that these items may have had some connection with an air-borne balloon, however, we would appreciate your comments before the articles are disposed of by the persons concerned.

DIARY DATE

SET FOR

1. Reference the above, this will advise that at approx. 5.00 PM of the 19-4-58, a telephone call was received from Mrs. [redacted], Lower Ohio, Shel. Co., N.S. to the effect that she was in possession of some aluminum or tin foil which she had found in the woods.

2. She stated that she had found same clinging to the top of a tree located in back of her home. It was seen shining very brightly in the sun's rays and was taken down on the same day, that being the 30-3-58.

3. Patrol was made to Mrs. [redacted] home where she showed the writer numerous strips of aluminum or tin foil. They were all approx. 2' in length and 1/2" wide. She also stated that more of same had been sighted approx. 1/2 mile back in the woods from her home. The area in which these strips were found is quite densely wooded.

4. The reason Mrs. [redacted] called this office was due to an article appearing in the Halifax Mail Star of the 17-4-58 which stated this type of foil had been found in the Province of Quebec and was being investigated by the RCMP at that point for the possibility that it may have come from "Sputnik" or some other airborne aeronautical device.

BARDED - 4

5. At approx. 4.30 pm of the 21st inst. [redacted] of Shelburne, N.S. called in at this office and produced two large sheets of transparent plastic, similar to that used for plastic storm windows. One sheet was approx. 10' long X 6' wide - the larger one was approx. 20' long and 5' wide. [redacted] stated that he lived on the outskirts of town on the shore of Shelburne Harbour. At approx. 10.15 AM of the 20th inst. his wife had been out in the yard when she observed a large object drifting down from the sky in a south-westerly direction. It landed in the water approx. 20' from shore. She went over at once and found the larger sheet of plastic in a tree top near his driveway. These sheets of plastic have been examined and no identifying marks found. [redacted] felt these sheets of plastic may have originated from an airborne balloon of some kind.

6. It is not known what further action, if any, should be taken by this office to determine origin of unidentified object. May this detachment be further advised, please.

62K 1089-2

Edmonton, Alberta,
June 12th, 1962.

Prof. R. E. Folinsbee,
University of Alberta,
Edmonton, Alberta.

Dear Sir:

RE: Flying Object, Teepee Creek
District, Alberta. 9 May 62.

Embodied hereunder is the contents of report submitted by our Grande Prairie Detachment relative to an unidentified flying object reported in the Teepee Creek district of Alberta.

" 11 May 62

1. This date [redacted] of the Teepee Creek Dist. Alta., reported to this office and stated that at approx. 3:00 PM on 9 MAY 62 his hired hands, [redacted] & [redacted] saw a flying object, while working in a field on the Hollingsworth farm. [redacted] further stated that on the 10 May 62 he searched the area they believe this object landed in with no success. [redacted] was assisted in this search by his hired men.

31 May 62

2. A patrol was made to the [redacted] farm and further interviewing was continued. The sighting of this flying object took place on N.W. 1/4-8-74-4-W.6th. The sky condition at the time of the sighting was clear. The object was described as: oblong, about 18-24" long, black in colour, made a sound like a jet plane that is along distance away and had no colour trail. No bursts were heard along the path of this object and no sound heard when it landed or was believed to have landed a short distance from where [redacted] and [redacted] were working. At the time of the sighting the object was about 50-100 ft. above the ground and coming toward the ground at a very steep angle.

3. The flying object is believed to have landed in a very bushy area and approx. where the object landed is a slough approx. 3 acres in size and about 18" deep. It is felt that any attempt to search this slough would meet with negative results. This slough is expected to dry up by about the end of August. Should a search of this area be required a search about the 20-30 Aug. 62 would be far more effective than at this time. "

Should you require any further data in regard to this matter, would you please advise.

Yours truly,

(E. Porter) Supt.
I: C "K" Division C.I.B.

Dear Sir:

RE: Sightings of Meteors or Fireballs -
Co-operation with Armed Services.

Enclosed is copy of correspondence dated June 7th from our Lethbridge office together with photostatic copy of newspaper clipping.

The incident outlined herein is likely known to you. However, should you wish this Force to interview the residents of Fort Macleod who allegedly sighted the meteor, would you please advise.

Yours truly,

ak.

Commanding Officer,
CANAIRHEB OPS,
R.C.A.F. "A" Building,
Cartier Square, Ottawa.

(E. Porter) Supt.
I:C "A" Division C.I.B.

Sir:

FORWARDED with correspondence and photostatic copy of newspaper clipping attached.

The Commissioner
 RCM Police
 Ottawa, Ont.

Attention: Supt. H.S. Cooper

Dear Supt. Cooper:

Since our last telephone conversation, I have reviewed your instructions covering the sighting of meteors or fireballs and have also discussed the subject with CDR. Willson, Deputy Director of Naval Intelligence.

CDR Willson agrees with me that most sightings of fireballs are recognizable as such and are unlikely to be considered unidentified flying objects. Therefore there would be little confusion between the two types of sightings. Because of this, arrangements are being made for a Naval order to be issued in essentially the same language as the original Air Force order, of which you have a copy. This Naval order is going to direct that copies of all messages be sent to CANAIRHED OPS, in addition to the Associate Committee representatives.

In order to provide consistency and to have a central clearing house for all reports, would you please arrange to have your Instruction CO-Air 20 amended to include that an information copy of all messages be sent to CANAIRHED OPS.

Yours very truly,

Original Signed by

J. C. Arnell

Sir Directorate
Security and Intelligence
Royal Canadian Mounted Police
Headquarters, Tremblay Road
Ottawa

Reporting of Vital Intelligence

Our earlier letter on this subject was written without full knowledge of arrangements that had been made for reporting on meteorites. It is therefore understandable why your field unit addressed correspondence to Air Force Headquarters in lieu of Air Defence Command.

While it would still be desirable to have reports on unidentified flying objects, not of a fireball or meteorite type, addressed directly to Air Defence Command Headquarters, segregation may unnecessarily confuse instructions to your field units. The present system will therefore be retained and all reports will be directed to this Headquarters.

CO-OPERATION WITH ARMED SERVICES

(AIR FORCE)

1. SIGHTINGS OF METEORS OR FIREBALLS. - The RCAF have requested our assistance on reporting sightings of very bright meteors or fireballs, and is launching a country-wide publicity effort to bring this to the attention of the Canadian public.

2. A fireball is a bright meteor with a luminosity which equals or exceeds that of the brightest planets. It is usually seen moving rapidly across the sky and sometimes a trail of glowing particles is left behind. The meteor may explode with a burst of light and a loud sound; that may happen several times during a single fall.

3. When a sufficient number of fireball observations are obtained over an area of 100 miles or more, it is possible to combine the observations and predict the most probable area in which meteorites associated with the fireball may have reached the surface of the earth. Since freshly fallen meteorites are of considerably more interest than old falls, sightings should be reported as soon as possible.

4. When sightings occur, the Detachment concerned is to provide Sub-Division Headquarters with the following information by the most direct manner:

- (a) date and time of sighting;
- (b) condition of sky (clear, cloudy, haze, etc.);
- (c) location of observer (either precise position on ground or geographical reference);
- (d) occurrence of bursts (number and approximate positions along path);
- (e) luminosity (brightness compared to planets or moon and occurrence of shadows cast by nearby objects, if any);
- (f) colour (distinguish between colour of fireball and any persistent train or trail after passage of fireball);
- (g) form (size in relation to moon and shape);
- (h) duration (both of fireball in motion and persistent train or trail in the sky);

CG-Air
520
10 Mar. 62

4. (i) sounds (description of sound and time interval between sighting the fireball and hearing the sounds);
(j) position in sky (positions of beginning and end of fireball path, both azimuthal and elevation);
(k) any other unusual observations.

5. On receipt of the above information at Sub-Division, an unclassified priority message is to be forwarded direct to the nearest Regional Representative of the National Research Council Associate Committee, as listed below:

Maritimes	- Rev. M.W. Burke-Gaffney, St. Mary's University, Halifax, N.S.
Quebec	- Mr. E.E. Bridgen, 241 Clarke Ave., Westmount, Montreal 6, P.Q.

April, 1962

Mr. Ken Kaasen,
2450 East Second Avenue,
VANCOUVER 12, B.C.

Dear Mr. Kaasen:

I refer to your most recent letter, dated 30 March 1962, on the subject of unidentified flying objects.

Your statement that USAF Regulation 200-2 permits only the release of solved unidentified flying object reports to the press is not entirely accurate. This restriction applies to base commanders only, for the reason that final investigation and co-ordination of reported incidents is accomplished by higher headquarters. In any case, this USAF Regulation is not applicable to the Canadian forces, our policy being as set forth in my previous letters on this subject, and amplified hereunder.

I gather that your desire is that all reports of unidentified flying objects held by the RCAF or Department of National Defence be made available to the press, for further investigation. I must make it quite clear that this Department has neither the authority nor desire to prevent the press from investigating any incident of this sort that come to their attention. However, since all incidents that have come to the attention of this Department have been thoroughly investigated, and since these investigations have produced no evidence of any activities that would justify "national" as opposed to normal military vigilance, no useful purpose would be served by making these investigation reports public. Furthermore, many of the reports gathered in these investigations were given by the witnesses concerned on the understanding that they would be treated as "strictly confidential". It is therefore not possible for us to release these reports, even if it were desirable to do so.

Yours sincerely,

Douglas S. Harkness

April 11, 1962.

A/CAS

Unidentified Flying Objects
Mr. K. Kaasen

1. Reference is made to your S940-105 Vol. 4 (CAS) dated 27 March 62 in which you suggested a reply to Mr. Kaasen's letter of 12 March. Attached is a copy of Mr. Kaasen's reply to our letter of 28 March (your suggested letter).
2. Your advice as to what we should say in reply to Mr. Kaasen's third paragraph would be appreciated. If we say merely that military security demands that we withhold information concerning certain unidentified flying objects, he will, of course, assume that we are withholding information concerning a great many sightings. If the facts would permit us to do so, it would be desirable to say that we have had no reports of sightings which, after investigation, would lead us to believe that the objects belonged to a foreign power, terrestrial or otherwise.
3. Throughout his correspondence Mr. Kaasen has assumed that the R.C.A.F. follows U.S.A.F. regulations, or similar regulations, with respect to release of information concerning unidentified flying objects. It would be appreciated if you would let me know whether this is the case.

(W. H. Muncy) Wing Commander,
Minister's Staff Officer.

Vancouver 12
British Columbia

Dear Mr. Kaasen,

I refer to your letter of 12 March 1962, concerning an apparent contradiction in our correspondence concerning unidentified flying objects. The apparent contradiction seems to have arisen from the interpretation of the term, "unidentified flying objects." If this term is used to mean artificial objects which are directed by an intelligence other than human, and of extra-terrestrial origin, then we can state that there is no evidence of the existence of such objects and that if any evidence became available, it would not be withheld from the Canadian public.

However, the term, "unidentified flying objects," may be used to cover aircraft or space vehicles of a foreign power. Clearly, in certain cases, prudence and the requirements of military security might demand that particular information be withheld until a complete investigation could be made.

I can assure you that there is no department of the government that desires or has instructions to withhold information on objects that might be of extra-terrestrial origin. None of the available reports on unidentified flying objects could be interpreted as providing evidence of objects which are not natural phenomena or man-made. Nevertheless, we are most interested in receiving and investigating reports of this nature, both from the aspect of what they might yield scientifically and from the standpoint of any threat that might be posed to national security.

Yours sincerely,

Douglas S. Harkness

DEPARTMENT OF NATIONAL DEFENCE

ROYAL CANADIAN AIR FORCE

Ottawa, Canada
23 Jun 60

Mr. Kenneth Kaasen,
NICAP Investigator,
2480 E. 2nd Ave.,
Vancouver 12, B.C.

Dear Mr. Kaasen:

Your letter of April 21st to the Commanding Officer, RCAF, Edmonton, has been forwarded, in accordance with existing RCAF regulations, to this HQ for reply.

The RCAF has recently implemented the JNAP 146 (D) procedure for the reporting of vital intelligence sightings. The Air Officer Commanding, Air Defence Command, has been charged with the responsibility of coordination and administration of this programme.

I am not at liberty to answer the questions included in your letter. Needless to say, the RCAF in concert with American forces is interested in all such reports and evaluation is done on a systematic basis. While the outcome of individual evaluations is not made public, you may rest assured that any threat to the security of Canada or the United States will be reflected in appropriate military plans.

Your interest in this matter is appreciated and it is hoped that we may anticipate your co-operation in forwarding reports of UFOs to the Air Officer Commanding, Air Defence Command, RCAF Station, St. Hubert, P.Q.

Yours truly,

RCAF GM Rev. 2-57

Mr. Kenneth Kasten
2480 E. 2nd Ave.,
Vancouver 12, B.C.

April 21st

Commanding Officer
RCAF Base
Edmonton, Alta.

Dear Sir:

I am a member in the "National Investigations Committee on Aerial Phenomena" (NICAP) of Washington D.C. I wonder if you can give me some information on Unidentified Flying Objects (UFOs) over Alberta. As you know, UFOs have been sighted all over the U.S. & Canada since 1947, by people on the street, and reputable observers. I hope you can answer some questions:

- (1) Are you (RCAF Edmonton base) under order of JANAP 146 (d)?
- (2) How many UFOs have been sighted over Edmonton (and all Alberta if you know) since 1957?
- (3) Has a RCAF jet ever pursued a UFO over the Edmonton area?
- (4) Do you know of any case of an Alberta Airlines pilot sighting a UFO on a flight?
- (5) To your knowledge, do you know of any case of a UFO landing in Alberta?
- (6) To your knowledge, has there been any sightings of "green fireballs" over Alberta?
- (7) Are you, personally, in favor of telling the public all about UFOs?
- (8) Have YOU seen a UFO?
- (9) What is YOUR opinion on UFOs?
- (10) Has any UFO over Alberta shown any signs of hostility?

If you cannot answer my questions, I will know that you either have not got this information, or that you are under order of JANAP 146 (d). I'm sure you know about JANAP 146 (d), JANAP 146 (d), binding on armed forces, the CAA, Coast Guard and other agencies of the U.S. & Canada, orders (Regulation 200-2) AF personnel not to reveal unsolved UFO sightings. I'm sure JANAP 146 (d) covers Alberta too... but I may be wrong.

The National Investigations Committee on Aerial Phenomena (NICAP), was set up to evaluate and publish authentic UFO reports: Visual, radar and photographic evidence from armed forces and airlines pilots, rocket trackers, airport tower operators, astronomers, engineers and many other reputable observers here and abroad. Except for a few confidential NICAP reports, the USAF also has this factual evidence.

...../2

- 2 -

A majority of the NICAP Board of Governors term official UFO secrecy dangerous. NICAP is working to end the censorship. As more information is uncovered, we shall reveal it in our magazine and special bulletins for members. NICAP membership, at \$5 a year, includes these publications and a NICAP identification card. REGARDLESS of membership, we shall be glad to receive any sighting reports or other UFO information you believe NICAP may not possess. UFO sighting forms will be sent you upon request.

Please reply soon. . . and I hope you drop the Director of NICAP a line and ask for more information on just what NICAP is doing: Major Donal Keyhoe
NICAP

Re: Unidentified Flying Objects -
Mr. Ken Knasen

1. Attached are copies of an exchange of correspondence between the Minister and Mr. Ken Knasen on the above noted matter. The Minister's reply of March 8 was based on your 45-83 Vol 4(CAS) dated 28 February, 1962, in answer to another enquiry.
2. In view of the statement imputed to you that evaluations of unidentified flying objects are not made public, it would be appreciated if you would suggest a further reply to Mr. Knasen.
3. As Mr. Knasen apparently wants to believe that we are hiding something, it will be difficult to convince him otherwise, but in view of the apparent contradictions in our statements, it would seem desirable to attempt to do so.

(W.H. Huncy) Wing Commander,
Minister's Staff Officer.

March 12, 1962

Hon. Douglas S. Harkness
Minister of National Defence,
Ottawa, Ontario

Sir:

Statements from the RCAF concerning UFOs completely contradict your stand on UFOs. In a letter of reply to me, June 23, 1960, from Group Captain for Chief of the Air Staff, the Group Captain stated that UFO evaluations are not made public. This contradicts your statement that UFO reports are not kept from the general public.

The RCAF has also admitted to me, although most UFO reports can indeed be attributed to natural phenomena and man-made objects, that a small percent of sightings may be objects under intelligent control. JANAP I46 has been implemented by the RCAF. JANAP I46 provides for rapid secret transmission of UFO reports by aircraft in CIRVIS reports. The public is not aware of such orders as JANAP I46 and CIRVIS reports.

It is unfortunate that the Canadian people are not aware of the secrecy imposed on UFO reports.

Sincerely,

Mr. Ken Kaasen
Mr. Ken Kaasen

Ottawa, March 2, 1962.

Mr. Ken Kaasen,
2480 East 2nd Avenue,
Vancouver 1, British Columbia.

Dear Mr. Kaasen:

I refer to your letter of March 1, concerning investigation of reports of unidentified flying objects.

I wish to assure you that if investigation indicated that a space object had appeared in our skies, whether it was judged harmless or in any way a threat to Canada, the information would not be withheld from the Canadian public. There is certainly no intention of withholding such information, and none has been withheld in the past.

I might also add that none of the sightings which have been investigated by the R.C.M.F. could be attributed to anything other than natural phenomena or man-made objects, such as weather balloons.

Yours sincerely,

WHM/JTL

Douglas S. Harkness.

ASO, P. 1
Vancouver 1

March 4, 1962

Honourable Douglas S. Harkness
Minister of National Defence,
Ottawa, Ontario

Dear Sir:

Unidentified Flying Objects

In reply to your letter of Oct. 24, 1961 acknowledging my inquiry concerning UFOs. I am a member in the National Investigations Committee on Aerial Phenomena (NICAP), located in Washington, D.C. NICAP is a non-profit, fact-finding organization. Policy is established by the Board Of Governors and carried out by the executive staff, with the help of the Panel of Special Advisers, Affiliates, and investigative Subcommittees (Canadian NICAP Subcommittees are in Calgary and Winnipeg).

The purpose of NICAP is to investigate UFOs, and claims, relative to UFO activity and to offset official secrecy. Two major goals are open Congressional hearings to end secrecy imposed on the UFO subject, and scientific investigation of UFOs.

Your statement that UFO reports are not kept from the press and general public is misleading. In the U.S. unsolved UFO reports are marked "For Official Use Only". USAF Regulation 200-2 orders Air Force personnel not to reveal unsolved UFO reports. UFO reports in Canada are classified just as they are in the U.S. and Great Britain.

You also stated that UFO reports are not necessarily offered to the press in every case, but if requested they are never denied. The reports that are given to the press can be explained either as natural phenomena or mistaken identity. The reports that cannot be explained; from military and airline pilots, radar observers, trained personnel and competent people in all walks of life, are classified and never become public knowledge. If UFOs are nothing more than natural phenomena and mistaken identity, why not open all the files on UFOs and let the press investigate all reports for itself? This will not be done.

On Dec. 24, 1960, acting USAF Inspector General Major General Richard E. O'Keefe issued a publication to all Air Force Commands warning that UFOs are serious Air Force business.

General W. H. Hiltner (former
Governor) revealed this air force
concern. The Directive states that "our concern
with UFOs is three fold;

"First of all," the directive states, "is the object a threat
to the defense of the United States? Secondly, does it contribute
to technical or scientific knowledge? Thirdly, there is the question
of how to explain the sightings to the public."

Official Air Force publications warn that UFOs are a matter
of serious business. Vice President Lyndon Johnson has expressed
his concern regarding UFOs. When the Vice President was in the
U.S. Senate, he instructed a military subcommittee to report UFO
sightings to him personally. In early 1960 NICAP sent the Vice
President, who was then a Senator, a digest of documented evidence
on UFOs. The Vice President replied to the director of NICAP,
Major Donald E. Keyhoe, admitting his concern for UFOs. He told
the NICAP director that the Senate Preparedness Investigating
Subcommittee is investigating the Air Force investigations of UFOs.
Senator Johnson told NICAP that he was not at all satisfied with
the Air Force investigations of UFOs.

I trust that the Canadian Defence Department is concerned
with UFOs. UFOs are a threat to the North American continent and
should be recognized as serious business. By putting UFO facts
on public record, America and Canada could offset any claim by
the Soviet Union that UFOs are Russian aircraft. The Soviet Union
could also make propaganda by charging that the West is keeping
UFO information from the people. Making UFO information public
would offset such propaganda that could be damaging.

I hope sir, that you and the Defence Department recognize
the importance of the UFO situation.

Sincerely,

Mr. Ken Laasen
NICAP Member

40-1

Parliamentary Returns Section

Unidentified Flying Objects

1 It is suggested that the questions regarding unidentified flying objects posed in a letter to the Minister of National Defence be answered as follows:

Question 1. Are unsorted UFO reports in Canada kept from the Press and general public?

Answer: No. While reports are not necessarily offered to the Press in every case, they are never denied.

Question 2. Does the Defence Department share American concern that UFOs pose a possible threat?

Answer: The Canadian Government is concerned with any report which might affect national security and, undoubtedly, this would be the attitude of the United States Government also. However, to date, UFO reports which have been investigated by various departments of the Canadian Government have not revealed positive evidence of anything which might affect national welfare and which could not be attributed to possibly natural phenomena or mistaken identity.

Question 3. What is the official RCAF stand on UFOs?

Answer: The RCAF position is one of complete open-mindedness. Each reported incident is investigated to the extent that circumstances, such as the apparent reliability and competence of the observer of the incident, seem to warrant.

OFFICE OF THE DEPUTY MINISTER OF NATIONAL DEFENCE

MEMORANDUM

18 October 1961

To: CAS/Sect.

(1)

A letter has been received in the Minister's office requesting information with regard to unidentified flying objects. Three questions are posed:

1. Are unsolved UFO reports in Canada kept from the press and general public?
2. Does the Defence Department share American concern that UFO's pose a possible threat?
3. What is the official RCAF stand on UFO's?

It would be appreciated if a suggested reply could be sent to this unit as soon as possible.

Min (2)

CPlansI

1. For action as per min (1) and prepare a reply to the Parliamentary Returns Section for the CAS' signature (4 copies).

Unidentified Flying Objects
Request for Information

Your letter of July 18th 1961 to the RCAF Headquarters at Ottawa was forwarded to Air Defence Command for our comment. Unfortunately we have very little information for you.

Various aerial phenomena occur daily over North America which to the untrained observer appear strange. For example, light reflection off high flying aircraft, navigation lights, aircraft anti-collision lights, satellites, weather balloons, meteorites, vapour trails; all of these visual things under certain circumstances could give the observer a false impression.

The event mentioned in your paragraph 2 cannot be confirmed or denied. However the writer recalls something of that nature in the Galt, Ontario area. It was reported by a very young boy and may have been written up in the Galt newspaper.

To whom it may concern:

You may find this story on the funny side, but I'm sure this should be taken under consideration.

As my profession is Insurance Agent, I went out the other night to insure my wife's cousin in the country called St Boniface located about five miles outside of Shawinigan limits. After I arrived, talking about the usual conversation, weather, my wife's uncle came up on a subject that I have found worth of mentioning to you people. It just happened that what my wife's uncle saw would be classified by me as an unidentified flying object. Since I have been in the air force before and know quite a bit about flying objects such as Aircraft or weather balloons. The thing he saw, he and his wife, appeared in the western sky about 7:50p.m. on the night of Monday the 28 of February and lasted till around 8:30p.m. the same night.

The object was very bright and of a gold color and as described by my wife's uncle and her wife I have made a schema of it as it appears to look like to them. Here it is:

this appear very close to the size of the moon

This appeared to them way above a hill in the western sky, too high to be anything close to the ground such as a light and too much of great magnitude to be light since they couldn't look too long at it and this object seemed to have a slow forward motion as well as a left and right covering a considerable area and the object seemed to glow just like the small rays of the sphere would fade away at time.

I would be pleased if you would kindly considered these information as I think they are worth to be considered, and I would be pleased if you could let me know if you have any idea on what this could be.

Sincerely yours,

*APPR

Unidentified Flying Objects (UFO) - RCAP Policy
Letters from Mr. Ben Kason

1 This HQ has been forwarded copies of letters dated 21 Apr 60, 23 Oct 60 and 2 Jan 61 to various components of the RCAP from a Mr. Ben Kason of Vancouver, B.C. who is apparently an ordinary member of the "National Investigations Committee on Aerial Phenomena". His letters made various delusional remarks about military reporting of aerial phenomena and some remarks that were quite confused.

2 Because this HQ acts as a liaison HQ and receives all UFO reports within the RCAP he wishes to point out that many reports terminate here every year and that none have ever been proven to concern unusual phenomena. The RCAP has never undertaken any but primary investigations of these reports. Most of them are, as Mr. Kason states, balloons, flashing navigation lights and meteorites which have entered the earth's atmosphere rather spectacularly.

3 Mr. Kason should be informed that most UFO reports terminating here are unclassified. There is no reason to suspect that information on this subject is being withheld from the public. Such phenomena pose no threat to the safety of North America in so far as is known by this HQ.

4 It would be appreciated if Mr. Kason would reply to Mr. Kason's letter dated 2 Jan 61 in light of these remarks and information already at hand.
