The object when we first saw appeared as a bright red light. Brighter than others stars. When it got closer and when seen through the binoculars it appeared solid and had clear edges.

We first spotted it in the car but watched the object at ~~Paul's~~ house. We were in a field across the road from his house.

Dear Sirs:

My name is [redacted] I live
one mile west of Green Lake, Wisconsin.

On April 27, 1967, at about 10
p.m. [redacted] and
I were going to [redacted] house which
is one mile west and one mile north
of Green Lake. We went west a mile
and then turned north on the road
to his house. I noticed a bright
red object in the western sky. It was
near the ground and changing from
red to white to orange. It was moving

Send

very slowly to the north and very near the ground. The sky was very clear with no clouds or no wind.

We quickly drove down to ~~the~~ house to get his binoculars. His house is in a small valley that runs east to west which is open.

Mr. Fumerton and the three of us watched the object which was about $\frac{3}{4}$ of a mile away. It hovered over the ground and tilted from side to side very slowly and was moving north towards a small wooded hill. Through the binoculars the object was very clear and distinct. It looked like the one I have enclosed in this letter. It also was about the same size when viewed with the binoculars.

The object was changed from red

to orange to white all the time. It tilted once so we could see the bottom which was a bluish color or glow.

When it got near the woods it stopped. Then it tilted toward the north and went down into the woods. It flooded the area where it was with white light. Then it would come out again and move north and then did the same thing again. The lighted area of the woods could be seen very easily without binoculars.

It finally came up out of the woods again and went over the hill. We got in my car and went north to the top of a hill after we got enough nerve. We could see it still traveling north at tree top level but it was now quite aways away from us. Finally it disappeared from sight. Once when we first saw it the object

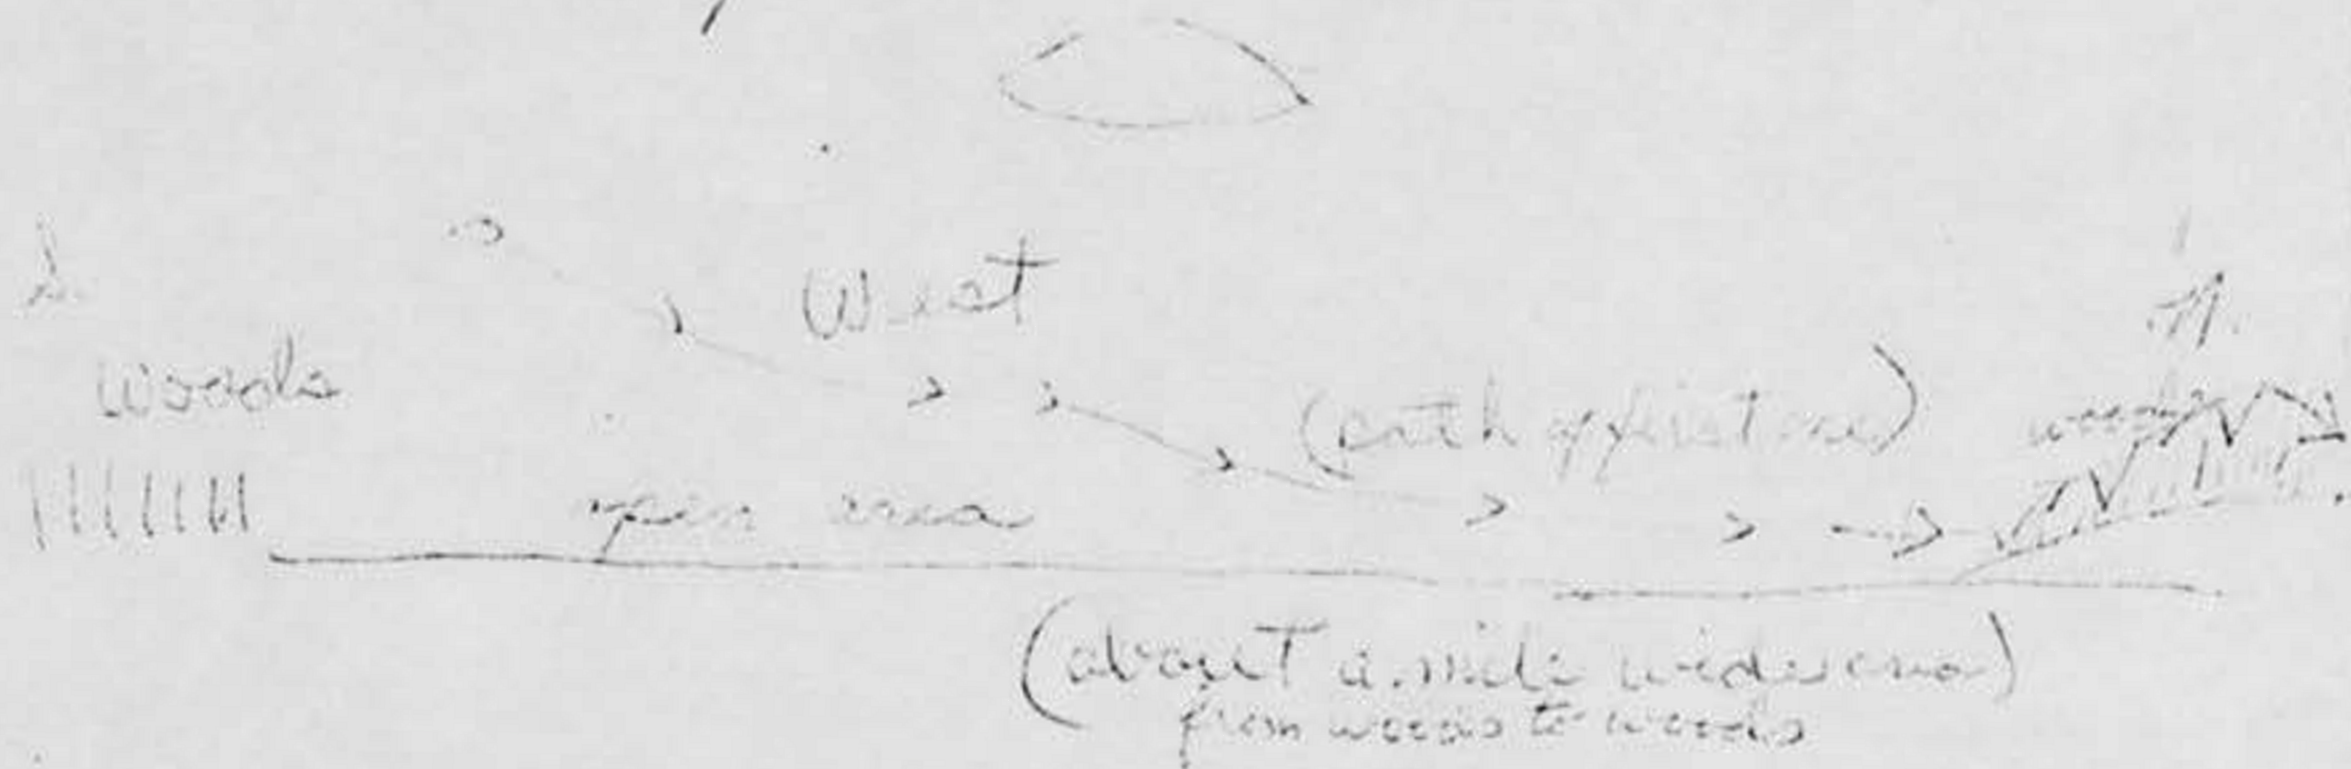

4

Came our way and got too close
for comfort so we ran back to the
house but other than that it kept
going north. We watched it for
about 15 minutes. There was no
moon at the time we saw the object.

I could hardly believe what we
had seen. We could see it so clearly
it was unbelievable. I never thought
I would ever see anything like it.

We told a few people but they
wouldn't believe us so we just
dropped it. Then last night we
saw the same thing traveling
west, higher and farther away but
we could still see it with the
binoculars which are 7x50. I
called up Ed Wells and his
father and they came out to
~~the house~~ to verify it.

This is a close looking of the one we saw. When it turned red the top was bright red and the middle orange. the bottom had a bluish glow. It was the same shape. Please answer.

We watched it untill we lost it from sight. It was about 20 minutes because it was moving very slowly and again changing colors but was redder on top. We saw this at about 10 o'clock (pm) also and we just happened to notice it in the sky.

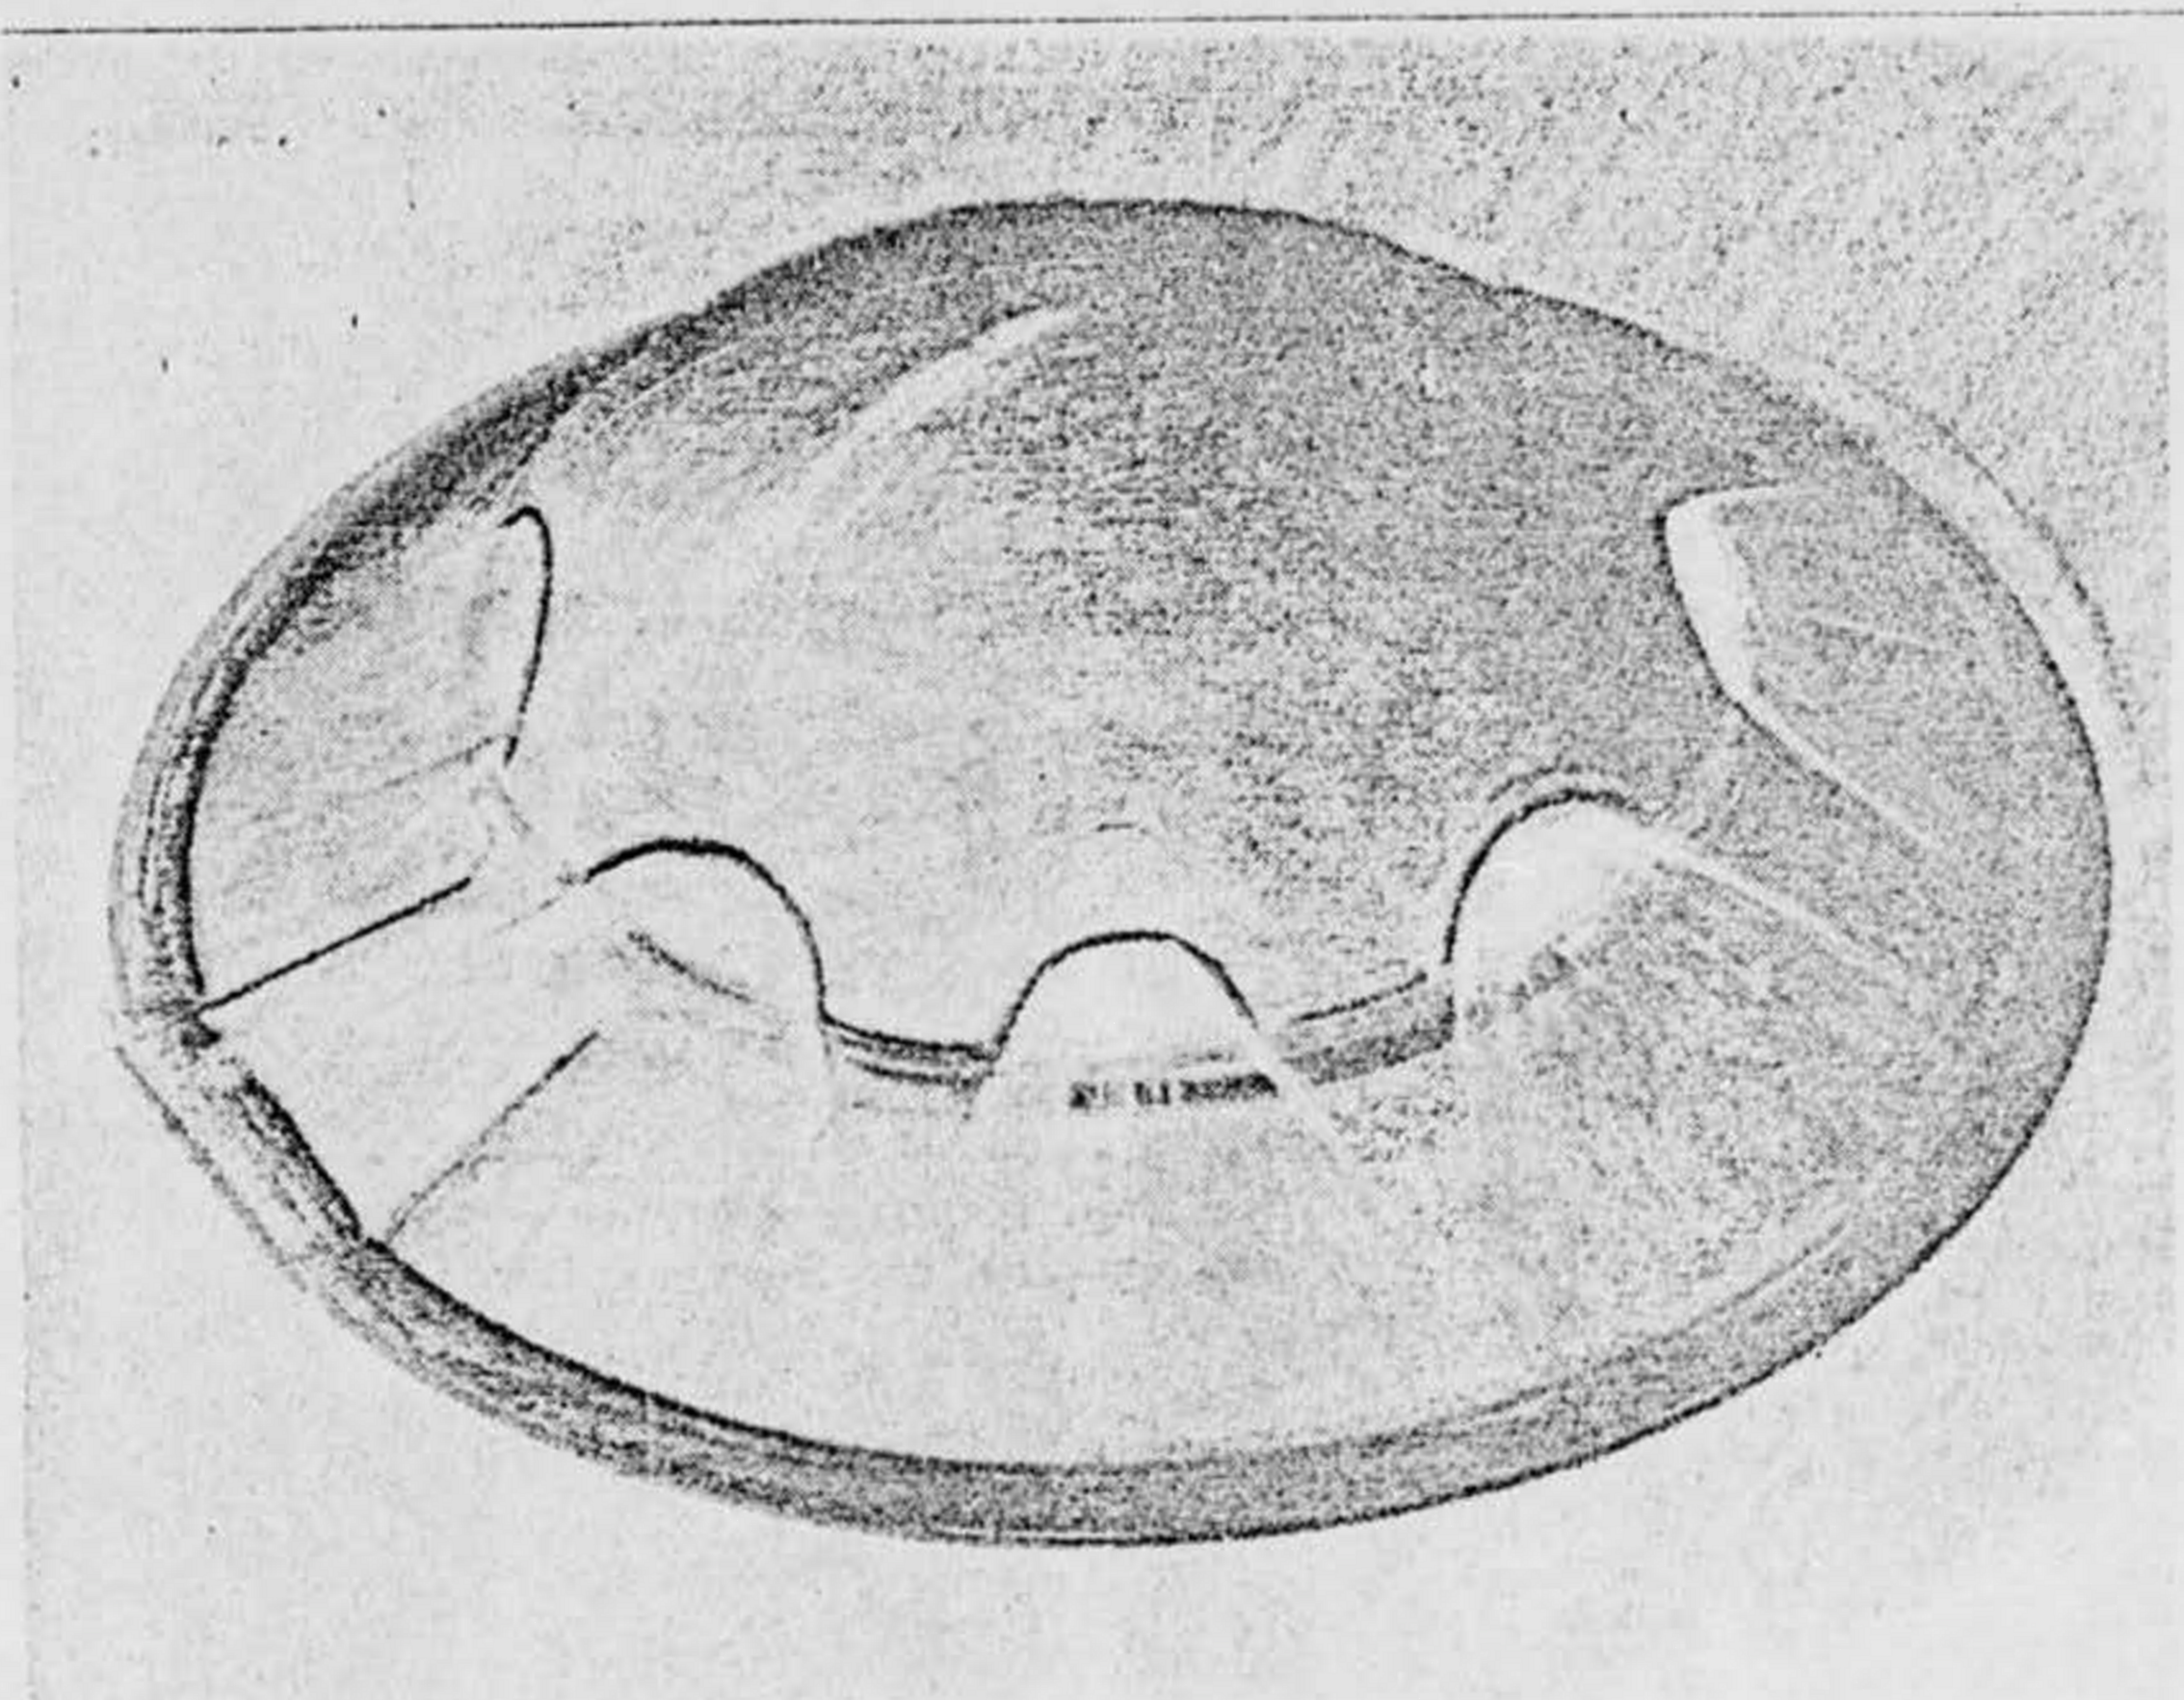

I know you gentlemen are very busy but this is no joke. I was too scared to be a wise guy.

If you could send me any information on what the object could be I would greatly appreciate it. I am very interested (along with other people) in knowing just what it was we saw.

Thank you very much for your time.

Yours truly,

SHOOTS UFO PICTURE ON HUNTING TRIP

Sibley County, Minnesota, deputy sheriff Arthur Strauch took this never-before-published photo, left, of a UFO, while returning home from a bowhunting trip last October along with his son, wife, and a second couple, Mr. and Mrs. Donald Grewe. The sketch, above, of the alleged UFO was made from an aggregate description of the machine, given by the five witnesses, shortly after the prolonged, close-up sighting.
