34. Date you completed this questionnaire: 10 (Day) Feb (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I have written a short narration of my experience including sightings, landing, inhabitants, interviews with inhabitants, strange meeting with other persons, strange noiseless spheres, humming brain wave transfer, speech, typing + pictures. It includes most information I could give. Also the fact that they looked almost identical to human apart for neck, hands and features of face.

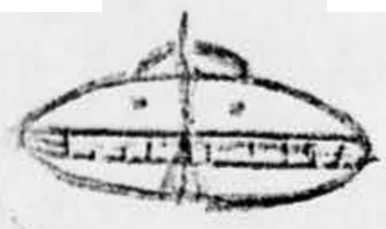

Feb. 5, 1967 (Time - almost dark or at night, between 8 o'clock + 10:00 o'clock. place - On a gravel walkway on a small field with a sort of pond across from the Avery Elementary School) I was returning home after going to a friends house, and bowling at Sierra Lanes I was at the time walking home between the Williams Fairgrounds and my house. It was very cold outside and I wasn't really watching what was going on around me. While I was walking home I heard something (I'm not but I think it was a dog) that made me suddenly look around I kept on going for a few seconds and I then heard a faintly piercing sound (like that of a police car but higher in pitch). When that sound became louder I looked both ways down the road for a police car or something to that effect. By now this I had always been interested in space and I believed and more more than ever, held a strong belief that there are beings from the planets and that they have both landed + tried to make contact with the earth. I am not a saucer nut and don't believe in every saucer sighting there has been. Well as I was telling you before my interruption of the noise I was looking to see if there was a police car around. At this time I could hear nothing. Also but that strange high pitched noise. It began to hurt my ears when I got the urge to look in the sky. I'd say about 100 to 200 ft. above me was a large oval shaped thing that I have seen was probably the bottom of it. On it were three distinct markings that looked like three rectangles (one at end than the other.) Below is a crude sketch of what I think was the bottom of the craft.

picture #1.

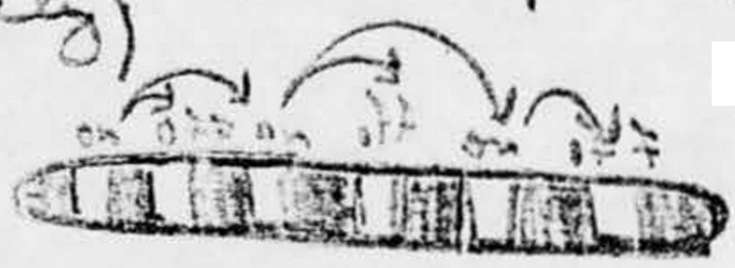

The craft's bottom had no lights that I could see, but was a platinum in color and seemed to glow a little. I guess I just stood there in a daze

I curiosity willed it pushed over me. After it had more for a few seconds it ended and what looked like two lights did. Before is another sketch of what it looked like from the back.

Picture A2.

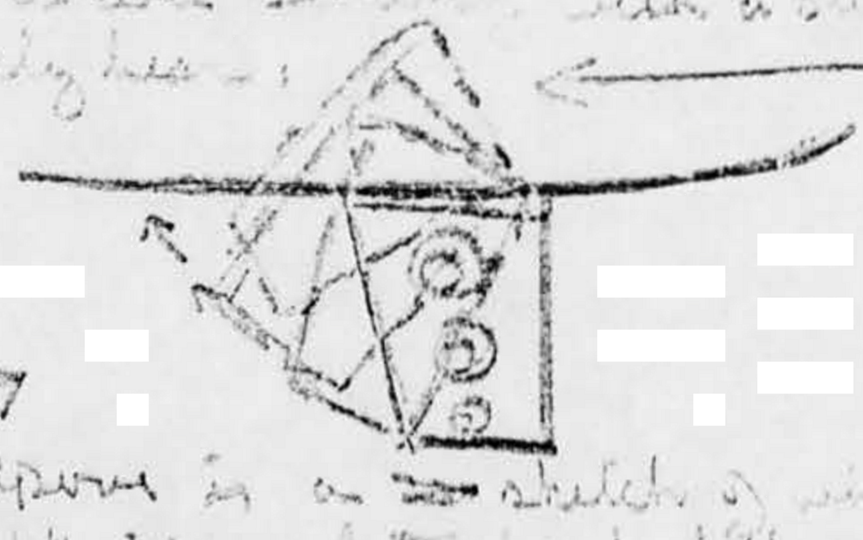

On the back it had two lights on the upper third. It also had dim yellowish lights (rectangular in shape) in the middle portion. These dimmer lights seemed to follow a pattern, that is when one would go off the next would go on. (The pattern was rotated very quickly)

Picture A3.

The craft was descending erratically lower and closer then and nothing else. Then after it had passed over, the school its piercing vibrations I sounds stopped slowly and then dissolved in a low pitch hum. It suddenly [illegible] after that I could see it. It seemed to be hovering for a certain time. To all sides and by this time I was hiding behind [illegible] the wall at [illegible], which I think was the left wing. (It seemed at that particular moment as cars came fast me or was at normal. It a new thickness moment) It moved very slow at 150 ft. (Estimate guess) from the ground and it followed it until it was by the school property, between the fields there are narrow [illegible] which I'm hiding and watching while following the object. It was not over the area with trees that I landed but [illegible] on the other side of the fields running from Army Road to the Railroad Tracks a distance from the school.

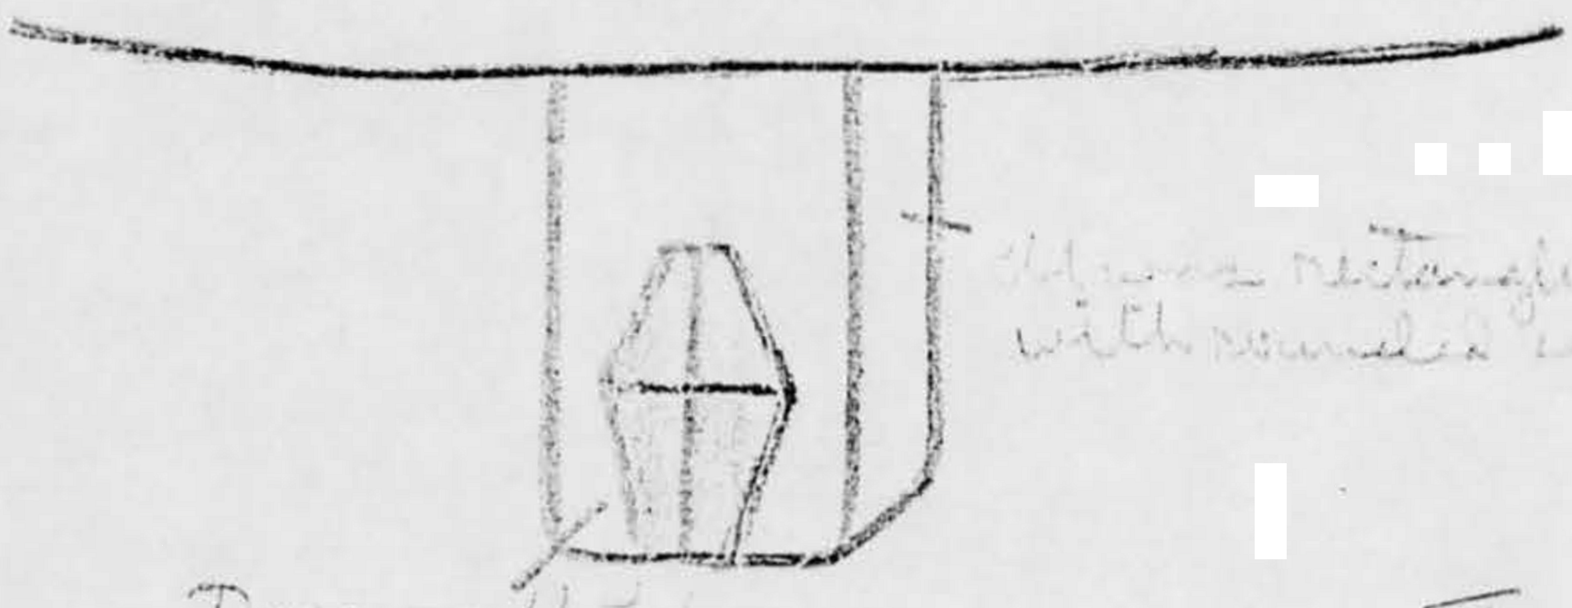

Until about 1300 H., when I was [illegible] and. Then I saw
very dimly looking [illegible] legs came out from the
bottom of the craft & appeared to [illegible] Then it
sank down slowly with a slight [illegible] Then it
vanished from sight.

Sketch A4.

Above is a sketch of what the legs of the craft appeared to look like.

There was no blast of fire but the lights encircling the craft were more [illegible] brightly shining. The steady hum of the craft stopped abruptly, but the lights dimmed yet a little but. As the time elapsed we commenced that a silent period was setting in. Everyone began to feel uneasy, & kept talking myself to be calm & not to panic when from the mid [illegible] the craft a large object like thing protruded from the bottom which at reached the bottom. Out were let upon and had what looked like a human shape clothed in B dress in the skirt of it.

After waiting what [illegible] I don't know how long)
for a while the door on the craft went upwards until
it was above the doorway. It showed and the doorway

disappeared into the wall. Out from it came three
or four men like beings, who resembled us with no

they seemed to defy the laws of gravity. The beings
simply put them in a certain place and they stayed
not moving an inch. Now it was dawning not only
from the wild but also from my brain. I was on the
verge of panic but I kept telling myself to be
calm. Then I heard the noise of crunching ice and thought
at first it was help. I wanted to yell out to
whoever it was but I'm glad I didn't. Out of the
partially lighted field came a man dressed in what
looked like hunting clothes. He walked up to one
of them and started to talk to him. 2 others went over
also and I think 3 others guarded the area.
This time it was different. These beings were talking
with their lips and could hear
nothing more and hearing heard part of what
the outsiders said. After a very short time a minute
or more he left. I waited him till he was out of sight
and then turned my concentration back to the open craft.
Why did the man contact them and did he say it with
not discuss with anyone except what I have
authority.

As I was watching them I must have made a sound
that caught their attention (though I don't remember
any sound I made After them all slowly straightened
One of them looked at another and pointed over
to where I was. I jumped up in an impulse and
began to run but every step I made just seemed
I would fall down. Almost as quickly as
I had started, one of them had grabbed my leg

It started to bring me back to the ship and I remember coughing a few times to try to breath. At the same time I felt an unbearable ache in the area of the upper part of the back of my neck. I remember struggling to get free but it was to no avail. The things hands felt cold and clammy. It had dragged me almost all the way to the space craft when another came to help. Then I noticed their hands. There spirits in the phalanges were shaped differently and there bones had a peculiar effect on me. Just as the other one was about to help they looked at each other & dropped me in the water. I was more aghast at this than anything else that had happened. They could do anything they wished with me but they just dropped me. After dropping me they hurried into the shaft and ascended to the inside of the craft. Gripped by panic I started myself up and ran in a direction I still do not know. After a few seconds of running I came back to my senses and ran home as fast as I could. Almost home I stopped running and caught my breath until I was able to breath almost normally. Then I entered the house and went into the kitchen and almost fainted. For an reason, probably curiosity, I went back. When I arrived at the spot the beings were hurriedly collecting the spherical objects and then entered the rectangular shaft. Almost as soon as the shaft had disappeared into the craft a hum started. The lights that were very dim then were more brighter shining and the pitch of the hum was ascending rapidly. The craft ascended a little, and the Tripod like legs slowly disappeared into the bottom. Then it rose about 200 ft. above the ground and gracefully went out of sight. Many times as I walked home (am part of the way) and about got knocking over a lamp post that was

d. Sore spot on observer's neck, (claimed as a radation burn). Spot was observed by the investigator. The spot was on the nape of the neck at the collar line. It appeared the size and shape of a man's thumbprint. At the time of observence there was no evidence of an open sore. The spot appeared to be a large pimple or small boil that had no core and appeared to be in the healing stage.

e. Landing Site. An investigation of the alleged landing site was conducted in the presence of the observer. No physical evidence of landing was noticed; no marks on the ground, no burned areas or any sign of disturbance. Survey of the area with an AN/PDR-27 Radiac Instrument produced only normal radiation background indication.

f. Observer Statement: The observer's personal written statement (Atch #1) and drawing of the UFO (Atch #2) are attached. His initial formal report is also attached (Atch #3).

14. This report has been delayed in the hope that further proof might be advanced by the observer either to verify or, inadvertantly, to negate his earlier statements. During several telephonic discussions since the initial visit and inqueries, nothing further has been offered that can prove or disprove the validity of his statements.

15. Conclusions: It is the undersigned's opinion that:

a. The story is too pat, well remembered, and systematically presented to have actually occurred to a scared 14 year old boy;

b. Some incident did occur on that evening that was not fully understood by Timothy, he was worried about it, either because of his own implication or implied danger to himself and he developed the story as an excuse;

c. The possibility of a deliberate hoax cannot be definitely eliminated although the observer's continued interest and his forthright attitude do tend to show an innocent motivation; and finally;

d. The lack of physical evidence and absence of further reports from other individuals in this rather populous area tend to belie his statements.
