MAR 28 2016

Dear Mr. Greenewald:

This further responds to your February 12, 2016 request seeking information pertaining to unidentified flying objects or unidentified aerial phenomena or any similar term describing the topic. Reference is also made to our February 29, 2016 letter.

As advised in our letter, three investigative reports responsive to your request were located. The processing of those reports has been completed. Our review of these documents reveals that they contain personal identifiers (such as names and social security numbers) of third parties, the release of which would constitute an unwarranted invasion of personal privacy. Accordingly, we must partially deny your request and withhold this information pursuant to the Freedom of Information Act (FOIA) provisions 5 U.S.C. § 552(b)(6) and (b)(7)(C). All releasable information is provided to you at enclosure (1). We have also provided an enclosure explaining the various exemptions of the FOIA.

As the official responsible for the partial denial of your request, I am advising you of your right to appeal this determination. Your appeal must be postmarked within 60 calendar days from the date of this letter and should be addressed to the Secretary of the Navy's designee: Office of the Judge Advocate General, (Code 14), 1322 Patterson Avenue, S.E., Suite 3000, Washington Navy Yard, D.C. 20374-5066. The envelope and letter must bear the annotation "FOIA Appeal". A copy of your initial request and a copy of this partial denial letter must accompany the appeal.

1. (U/FOUO) On 18Aug14, [redacted] Civilian, Federal Police Officer at Marine Corps Recruit Depot (MCRD) San Diego, was interviewed in reference to an unidentified flying object (UFO) that had been seen earlier in the day. As background, on 18Aug14 Reporting Agent (RA) was notified by the U.S. Marine Corps Criminal Investigations Division (CID) aboard MCRD San Diego that police officers at Gate 2 had seen an UFO off base in the distance. RA responded to MCRD San Diego to obtain more information about the UFO that was seen.

2. (U/FOUO) [redacted] stated at approximately 1615 or 1630 hours, he and LCpl [redacted] USMC, MCRD San Diego gate guard, were standing at the guard shack at Gate 2 checking traffic when an individual came through the gate and pointed to the UFO. He further stated the object appeared to be hovering over Midway (the name of a nearby street). [redacted] reported the object would elevate, move left, move right, then move around. He further stated the object started to elevate and when the police units arrived at the gate, it was hard to see. [redacted] estimated the UFO was in view for approximately 15 to 20 minutes. He further reported the object has an oval shape and was black with some gray colors and a solid white box on the bottom.

3. (U/FOUO) [redacted] was unable to provide any other pertinent information.

I got the Dji Phantom from Orange County from a craigslist post. It was approximately 3 months ago when I first purchased it. I intended to attach a go pro to it to film motocross. I worked at getting it flight ready but could not get it to fly strait after a month. I then posted it back on Craigslist to see if I could turn a profit on it. I ended up trading it to (last name unknown), the person that answered the post, for some Airplanes and controllers and a flight simulator approximately 2 months ago. He was able to get it flying and I went back to see what I had done wrong. During that flight test at around noon Wednesday of last week, it went out of control. It flew towards MCRD before we lost sight of it. We were flying it only a short distance away(half a block away) in military housing at the time that we lost control. We are actually able to see the gate from street. In no way were we trying to use quadcopter for any wrongful purposes.

The brand of the drone is DJI. It has four arms with rotors on them. Each arm has its own speed controller zip tied in place. All the wires lead back to a Naza flight controller. It also has a 5.8 gHz transmitter and first person view camera for a video feed to see where the aircraft is going. It transmits to a screen or were not being used at the time. They do not have any recording apabilities.

fter we lost sight of the Drone I went home. I don't know why it took so long for to ask for it back. felt like maybe something I had done to make it fly out of control so I want to help him get it back. I know from selling him the quadc friends with him because of our common terest in the remote controlled hobb

It was aprox jul 12 when i received a dji 450 black and grey thru trade via craigslist from (unknown last name)it was in pieces when I received it but was assured it worked I traded 2 foam rc planes ,an rc controller and an rc flight sim.aprox 3 weeks had passed and I now had it in working order with the help of the local hobby shop ben at EZDRONE 6920 miramar rd st140 but still had some discrepancies. I added a sony fpv tvl 700 camera(the kind that will not record)

and a skyzone sky-tx52w transmitter and a 3s lipo battery I had obtained from a pior deal.the battery was wraped in several layers of black tape for protection I added only the last layer of tape. on wednessday august 13 at aprox 1200 came over to my house located across the street from mcrd(witch is mil.housing) to see the work done at this point and asses the situation, wile was flying the craft infront of my houseit was above head when the wind took control and power was lost it malfunctioned and was lost in the direction Of mcrd . I then commed the streets looking for the quad after not finding it I assumed it had landed on the base but did not go to get it because of I had lost my military dependent ID I week prior and I did not know where to go. I in no way did I ever intended to do anything but fly this craft for rec. perposes and was not filming anything because the camera was only taped on and not working because it was not finnished. the reason so much time had passed before I claimed the craft was I was in fear of the problems a navy MA whould face and the grief she would put on me because we had already had problems in the house.

After several days had passed I informed if the misshap she then took the proper steps to locate the craft but am unsure of who was contacted.she then informed me that ncis would like to speek with me

One day last week came over to our house while I was at work anc vas showing him what was wrong with the quad. When was flying the quad, the wind took it out of their view; it flew out of the boys' sight and they weren't sure what happened to it. After ooked for it, and didn't find it, he decided it was los

I assume he didn't want to bother me with the information of losing this expensive toy and that is why he did not tell me about it when it happened. On Wednesday the 20th, I called MCRD Desk Sergeant to find out if it had gone on the base. The Desk Sergeant took my name, phone number and address and told me someone will get in contact with me. A while later, who I know to be an NCIS agent, had called me back to set up an interview. I hac call right after I got off the phone with

NARRATIVE

1. This reactive investigation was initiated as a force protection measure pursuant to a suspicious incident occurring aboard Marine Corps Recruit Depot (MCRD) San Diego. At this time, no criminal statutes apply. The incident was reported via Guardian number (b)(6), (b)(7)(C)

2. On 14Aug14, NCISRA Miramar was notified by Agent (b)(6), (b)(7)(C), U.S. Marine Corps Criminal Investigations Division (CID) MCRD San Diego, that at approximately 0938 hours a civilian drone and its suspected battery were found in a grassy area near Gate 2 by a landscaper aboard MCRD San Diego. Upon arrival at the scene, the drone was found to be a (Flame Wheel F450 DJI) drone with a Sony brand camera and a transmitter attached with multiple wires. Open source reporting indicated this model drone is commonly used for sports photography. Found nearby the drone was an object wrapped in black duct tape with wires protruding, which is suspected to be the drone's battery. The drone was within approximately 50 to 100 yards from Gate 2 and approximately 20 feet from the fence line. Information obtained from Agent [redacted] indicated the landscaper, [redacted] stated he was cutting the grass in the grassy area near Gate 2 when he noticed what he believed to be a remote control plane and a battery. Law enforcement was notified and explosives trained dogs were utilized to determine if any explosive dangers were present. No explosive dangers were found. A scene documentation was conducted. The drone and its suspected battery were seized as evidence and subsequently given to NCIS Pacific Cyber Forensics for analysis. The Multiple Threat Alert Center (MTAC) was notified and a MTAC Watch notification was disseminated.
