11., BRIEF SUMMARY AND ANALYSIS

The observer sighted a conical object that appeared to have red and green lights revolving around it in a circular pattern. The observer said that it hovered at the end of a field about 150 yards from his car for about 15 minutes then it sped away.

COMMENTS: The observer said that he returned to the area again that evening and saw three similar objects. The observer also stated that "since seeing this event we look for them while deer spotting and have since seen them with different persons riding along. One of the observer's witnesses said that he had seen similar UFOs numerous times in the vicinity of Cowansville. It is felt that the observers are not very familiar with aircraft and that this could be what they saw and have since seen so many times. However, because of the numersou occassions that they have seen UFOs the sighting is being carried as UNRELIABLE.

Dear Sir.

On the 13th of September, 1967 while on a deer spotting trip I and two others saw an objet with red and green lights revolving around in a circular pattern at the end of this field. I played the spotlight on the object as it moved down the field. It appeared to be conical in shape and made no noise. It hovered at the end of the field about 150 yds. from our car and observed us for about 15 minutes. It then sped away with the lights changing to a reddish blue.

Returning back to this area this evening we observed 3 similar objects in the sky moving across at high speed with out engine sound. The lights on these craft resembled also but did not have the red-green color to them. The sightings were made in the vicinity of the Madonning Dam area in Armstrong County near the town of Kittanning (about 25 mile from Kittanning). It seems the objet of the 13th was about 50-100 ft in lenght.

I am a student of biological science at the local high school. Other sightings have been made by a Mr. Blose who owns a farm in Rural Valley. He is math teacher at the school.

I did not believe that such things existed but now I am not sure. If you people are interested I would be glad to show you the area. You could speak to Bloss if you wished. We do not want anything reported to the press because people these days just don't think this is possible and being in this profession you watch what you say. In case of this nature people and the press have said that the people involved played a hoax. We will supply all the information about this case if it is kept quiet.

Sincerely,

[redacted]

there have been other occasions that similar objects have been seen by other residents. If the Air Force would be willing to take time to send an investigator he could go along on a trip and would see these objects and form his own conclusions. It is better to see than to read about this report. We would welcome him on one of our deer spotting trips.

Since seeing this event we look for them while deer spotting and have seen them with different persons riding along. People who have laughed this off have thought a little more seriously about what they saw.

I feel fortunate to have seen something that I used to read about or hear about. Whatever it is it exists in reality. Im sure the Air Force would not be disappointed in making a trip to check those out at night when we have occasion to see them.

Sincerely.
