In compliance with Paragraph 7cld, AFI 200-5, the following information is submitted concerning an unidentified object sighted on 3 September 1952 at Tucson, Arizona.

One unidentified object appeared to the observers, Mr. [REDACTED] and Mr. [REDACTED]. It was elliptical in shape and of a dark color which freely reflected sunlight. The object made no perceptible sound and emitted no smoke or exhaust. The object made well-coordinated turns and performed no unusual maneuvers. Sources stated that the object appeared to be approximately one-half inch through the apparent longitudinal axis.

The object was sighted at 1600 hours, Greenwich time, on 3 September 1952. It was observed for a period of approximately one and one-half minutes.

Visual observations were made. Because the size of the object was unknown, no estimates as to speed or altitude were given by sources. Mr. [REDACTED] stated that the object ranged from approximately twenty to sixty degrees vertically above the horizon. The object made three sweeps past the observers, each being in excess of one hundred ninety degrees laterally along the horizon. The total distance was covered during the period of approximately one and one-half minutes. The observers were located six miles north of the center of Tucson, Arizona at approximately 32°15'N 110°57'W.

Observers were Mr. [REDACTED] and Mr. [REDACTED], both of [REDACTED], Tucson, Arizona. Mr. [REDACTED] is an instructor pilot for Barr Aero Tech, Incorporated, Marana Air Base. Mr. [REDACTED] has thirteen years piloting experience and is considered quite reliable. Mr. [REDACTED] is approximately sixty years of age. He has excellent eyesight although he would be considered as an inexperienced observer.

The weather was clear and visibility unrestricted during the period the object was being observed. Surface winds were light. A "Moby Dick" weather balloon had previously been sighted by numerous individuals at 1420 hours, Greenwich time, on the same date. Information relative to the balloon was given to Mr. [REDACTED] who stated that the object viewed by him was definitely not a balloon. His statement is based on the speed, appearance and maneuvers made by the object in question.

No photographs were taken of the object and there was no apparent physical evidence available.

No interception or identification action was taken.

Air traffic in the general area at the time of sighting is unknown.
