27. INFORMATION WHICH YOU FEEL IS PERTINENT BUT WHICH IS NOT ADEQUATELY COVERED IN THIS QUESTIONNAIRE, ALTERNATIVELY PROVIDE A NARRATIVE EXPLANATION OF THE SIGHTING.

We, Mr. [redacted] and myself were outside viewing the eclipse of the moon at 1130 P.M. on the evening of April 12th when we observed this sighting. I was looking at the eclipse when Mr. [redacted] pointed up, said look, and we saw this pattern of lights moving rapidly across the sky.

In your diagram of figure #7, the drawing is a little confusing. From where we were standing. I 1st saw this formation almost directly overhead and it passed to my right in a very rapid movement.

This, along with your other questions is about ALL that I think is important about this sighting.

I would be very interested in hearing from you on anything that your office finds out about this sighting or of anyone else who might have also seen this that night.

Thank You,

Dear Col.Qunitanilla;

At last I have made a full solution for the atmospheric path of the 1968 March 3 object, which I have meantime been informed was the reentry of a Russian ZOND satellite.

Also for idle curiosity I have made a solution of its orbit, as if it was heliocentric.

As so many of the reports came from your office, I am wondering if you would like to publish this solution in the next Blue Book? It would be about the equivalent of some 800 words of text, at a guess.

This merely a suggestion, as such a publication may not be feasable due to regulations etc. But I thought you should have first choice.

I have nothing on the 12 April object of which you asked.

Sincerely yours,

1. This replies to your letter of 28 May 1968. Attached is a summary on the 3 March 1968 satellite decay observations and a general plotting of the reports we received on this sighting.

2. Unfortunately, we do not have any meteor reports for 19/20 March 1968. However, if we do come across any for these dates we will immediately forward copies to you.

3. We have a UFO report for 12 April 1968, 2330 EST, from Warren, Ohio. The witness sighted several greenish-blue lights that traveled westward. They were observed for three to four seconds and were in a "V" formation. Did you receive any meteor reports for this date and time that could account for the sighting?
